The foregoing rule change has become effective, pursuant to Section 19(b)(3)(A) of the Securities Exchange Act of 1934. The proposed Rule Change changes the subsequent options fee and is a stated policy, practice or interpretation with respect to the meaning of the Option Plan of the PHLX. At any time within sixty days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 "L" Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number references in the caption above and should be submitted on or before September 16, 1977.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

AUGUST 15, 1977.

[Release No. 34-13866; File No. SR-SCCP-77-2]

STOCK CLEARING CORP. OF PHILADELPHIA

Self-Regulatory Organizations; Proposed Rule Changes

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on August 1, 1977, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission proposed rule changes as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGES

Stock Clearing Corporation of Philadelphia proposes rule changes which will give it authorization to participate in interface agreements with other clearing corporations and to clear over-the-counter securities. In addition, the rule changes authorize the Board of Directors to require selected trades to be settled on an ex-clearing basis. The proposed rule changes are attached hereto as Exhibit No. 1.

STATEMENT OF BASIS AND PURPOSE

The purpose of the proposed rule changes is to remove impediments from one account settlement at Stock Clearing Corporation of Philadelphia.

The basis under the Act for the proposed rule changes is to remove impediments to, and perfect the mechanism of, a national system for the prompt and accurate clearance and settlement of securities transactions.

Comments from members were not solicited regarding the proposed rule changes.

Stock Clearing Corporation of Philadelphia believes that no burdens on competition will be imposed by the proposed rule changes.

On or before September 30, 1977, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding, or (ii) as to which the above mentioned self-regulatory organization consents, the Commission will:

(a) By order approve such proposed rule changes; or

(b) Institute proceedings to determine whether the proposed rule changes should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing and accompanying exhibits with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before September 16, 1977.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

AUGUST 16, 1977.

EXHIBIT 1

TEXT OF PROPOSED RULE CHANGE

Transactions between Members (italics indicate new material and brackets indicate deletions.)

Rule 2. All purchases and sales of [cleared] securities made on the floor of the *Philadelphia Stock* Exchange between clearing members shall be [cleared and settled] *confirmed* through Stock Clearing Corporation *of Philadelphia, (SCCP). Clearing members of SCCP may designate whether their side of each trade will be settled through SCCP, will be interfaced to another clearing corporation, or will be settled on an ex-clearing basis.* Purchases and sales [of cleared securities] made on other exchanges [between clearing members also] *or over the counter* may be cleared and settled through the Stock Clearing Corporation of Philadelphia. *Such trades shall be reported promptly to SCCP directly by members or by another clearing corpora-*

[1] The application for unlisted trading privileges was prompted by PRI's application on March 23, 1977, to withdraw its common stock from listing and registration on the PSE. We have since granted that application. See, Securities Exchange Act of 1934 Release No. 13657, June 22, 1977 ("Order Granting (PRI) Application to Strike From Listing and Registration (on PSE) Subject to Certain Terms and Exempting Certain Persons and Securities from the Provisions of Rule 17a-15").

[2] Securities Exchange Act of 1934 Release No. 13658, June 22, 1977 ("Order Directing A Hearing").

[3] Letters from Alan S. Holzman (July 28, 1977), Robert E. Denham (July 29, 1977), and Frank J. Wilson (August 3, 1977), respectively, to George A. Fitzsimmons.

[4] In particular, the NASD states that its response would relate only to "PSE misstatements regarding the size of the spread in NASDAQ, statistical data concerning the relative proportion of volume executed on PSE and in the over-the-counter market, quotation information for PSE limited to open and close (sic), innuendo concerning the rationale of market makers in objecting to last sale reporting, representations regarding access to the floor of PSE and unsubstantiated statements concerning double reporting."

[5] The PSE's stated reasons for its objection were that (1) the hearing procedure does not provide for rebuttal; (2) the revision of the procedure would further delay the decision regarding PSE's application; (3) any further submissions would merely be cumulative; and (4) PSE's submission has been available to the NASD since it was filed on July 29, 1977 and thus could have been reviewed by the NASD before filing its comments on August 3, 1977.

To clarify point 4 above, when the Commission staff informally gave the NASD a two working-day extension for it to file its submission, the NASD consented not to seek access to the public PSE filing until after the NASD filed its submission on August 3. The staff felt it would not be equitable for one commentator to have the advantage of using another commentator's timely filing in preparing a submission to be received after the formal filing deadline.

[6] This comment period will thereby also allow PSE, PRI and other interested parties to respond to any information submitted in the original comments.

V 42 166 AUG 26 77 7 UMI

tion which has performed the comparison function. Loans or other deliveries of [cleared] securities between clearing members may be cleared and settled through Stock Clearing Corporation of Philadelphia.

The Board of Directors of SCCP may designate from time to time the size of trades of individual issues which must be settled on an ex-clearing basis.

REPORTS AND CONFIRMATIONS

Rule 3. All transactions [made on the Exchange] *to be cleared and/or settled through Stock Clearing Corporation of Philadelphia* will be promptly reported *to it* [from the floor of the Exchange to Stock Clearing Corporation. All transactions made on other exchanges, if such are to be cleared also shall be promptly reported to Stock Clearing Corporation].

A confirmation of each transaction [will be prepared by Stock Clearing Corporation] *including transactions representing shipments of trades to other clearing corporations* [and a copy] *will be* distributed to both the buyer and seller *as soon as possible* [shortly] after the transaction has been effected. On the buyers confirmation will be listed the settlement date, exchange where executed, [sellers] *contra side* clearing number, number of shares, name of security price, amount *and transaction identification number*. On the seller's confirmation will be listed the settlement date, exchange where executed [buyer's], *contra side* clearing number, number of shares, name of security, price, amount *and transaction identification number*.

Clearing members shall verify each confirmation upon receipt, and incorrect in any particular, shall [return it promptly to] *notify SCCP prior to settlement date. In addition, members shall notify SCCP of any transactions for which a confirmation was not received. Members shall be liable for any loss resulting from their failure to notify SCCP of any such discrepancies.*

VETERANS ADMINISTRATION

STATION COMMITTEE ON EDUCATION ALLOWANCES

Meeting

Notice is hereby given pursuant to Section V, Review Procedures and Hearings, Rules, Station Committee on Education Allowances, that on October 19, 1977 at 10:00 a.m., the Baltimore Regional Station Committee on Educational Allowances shall at the Federal Building, Room 212, 31 Hopkins Plaza, Baltimore, Maryland, conduct a hearing to determine whether Veterans Administration benefits to all eligible persons enrolled in Maryland School for Education, Business and Vocational Skills, 5526 Harford Road, Baltimore, MD 21214, should be discontinued, as provided in 38 CFR 21.4134, because a requirement of law is not being met or a provision of the law has been violated. All interested persons shall be permitted to attend, appear before, or file statements with the Committee at that time and place.

Dated: August 22, 1977.

JOHN W. RUE,
Director, VA Regional Office, Federal Building, 31 Hopkins Plaza, Baltimore, MD 21201.

INTERSTATE COMMERCE COMMISSION

[No. 465]

ASSIGNMENT OF HEARINGS

AUGUST 23, 1977.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 140829 (Sub-No. 32), Cargo Contract Carrier Corp., now assigned September 15, 1977 in St. Paul, Minn. is cancelled and application dismissed.

MC 117765 (Sub-226), Hahn Truck Line, Inc., now being assigned September 15, 1977 (1 day), at St. Paul, Minn., in the Federal Bldg., 316 N. Robert Street.

MC-C 9687, *Greyhound Lines, Inc. v. Sway Seymour* Individually and Swan Seymour DBA Swan Seymour Bus Lines now assigned September 8, 1977 at Memphis Tenn. is cancelled and reassigned for the 5th day of December, 1977 (1 week), at Knoxville, Tenn. in a hearing room to be later designated.

MC 116004 (Sub-No. 42), Texas Oklahoma Express, Inc., now being assigned November 7, 1977 (2 weeks), at Oklahoma City, Okla., in a hearing room to be later designated.

H. G. HOMME, JR.,
Acting Secretary.

NATIONAL RAILROAD PASSENGER CORPORATION

ADDITIONAL AGENDA ITEM FOR MEETING

In accordance with rule 4d. of Appendix A of the By-laws of the National Railroad Passenger Corporation, notice is given that the following item will be added to the agenda for the Board of Directors meeting of August 31, 1977:

Fall 1977 Frequency Reductions.

Board members Besson, Lorentzsen, MacDonald, Luna, Quinn, Head and Langdon determined by recorded vote that the business of the Corporation requires the change in subject matter by addition of the agenda item, and affirmed that no earlier announcement of the change was possible, and directed the issuance of this notice at the earliest practicable time. Mr. Reistrup voted no. Board members Jacobs, Adams and Dunlop could not be reached for the vote.

The revised agenda to be discussed at the meeting follows:

AGENDA

NATIONAL RAILROAD PASSENGER CORPORATION MEETING OF THE BOARD OF DIRECTORS, AUGUST 31, 1977

(9:30 a.m.) *Closed Session:*
1. *Internal Personnel Matters.*

13

SECURITIES AND EXCHANGE COMMISSION.

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94-409, that the Securities and Exchange Commission will hold the following meetings during the week of August 29, 1977, in Room 825, 500 North Capitol Street, Washington, D.C.

Closed meetings will be held on Tuesday, August 30, 1977, at 10 a.m. and after the open meeting scheduled for 2:30 p.m.

Open meetings will be held on Tuesday, August 30, 1977, at 2:30 p.m. and on Wednesday, August 31, 1977, at 10 a.m.

The Commissioners, their legal assistants, the Secretary of the Commission, and recording secretaries will attend the closed meetings. Cetrain staff members who are responsible for the calendared matters may be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, the items to be considered at the closed meetings may be so considered pursuant to one or more of the exemptions set forth in 5 U.S.C. 552b (c)(4)(8)(9)A and (10) and 17 CFR 200.402(a)(4)(8)(9)(i) and (10).

Chairman Williams, Commissioners Loomis, Evans, and Pollack voted to hold the aforesaid meetings in closed session.

The subject matter of the closed meeting scheduled for Tuesday, August 30, 1977, at 10 a.m. will be:

Formal orders of investigation.
Institution of injunctive actions.
Offers of settlement of injunctive actions and administrative proceedings.
Request for confidential treatment.
Termination of injunctive action.
Referral of investigative files to Federal, State or Self Regulatory authorities.
Authorization of former staff members to testify.
Consideration of *amicus curiae* matter.
Freedom of Information Act appeals.
Discusstion of Rule 2(e) proceeding.
Other litigation matters.

The subject matter of the closed meeting scheduled for Tuesday, August 30; 1977, after the open meeting scheduled for 2:30 p.m., will be:

Post-oral argument discussion.

The subject matter of the open meeting scheduled for Tuesday, August 30, 1977, at 2:30 p.m. will be:

1. Oral argument on an application filed by John C. Gebura for a review of the disciplinary action taken against him by the National Association of Securities Dealers.

The subject matter of the open meeting scheduled for Wednesday, August 31, 1977, at 10 a.m. will be:

1. Consideration of a petition filed by Steadman Security Corporation requesting an extension of the forty-five day period which management companies now have to transmit annual reports to shareholders.

2. Consideration of the amendment of the Commission's Statement of Policy relating to investment company sales literature.

3. Consideration of an interpretive release concerning the bearing of distribution expenses by mutual funds. (Rescheduled from Tuesday, August 23, 1977, at 9 a.m.).

4. Consdieration of an application filed by Midwest Stock Exchange Incorporated for Commission Review of the Denial of Access to the Common Message Switch ("CMS") of the Securities Industry Automation Corporation. (CMS is an automated data processing device).

5. Consideration of the adoption of Rule 17Ac3-1 and Related Form TA-W, which prescribe procedures to be used for withdrawing the registrations of transfer agents registered with the Commission.

6. Consideration of a submission by Securities Investor Protection Corporation proposing to repeal a bylaw requiring quarterly meetings of the Board of Directors.

7. Consideration of an extension of time for concluding proceedings in connection with the applications for registrations of the following clearing agencies: The Depository Trust Company; Bradford Securities Processing Services, Inc.; Stock Clearing Corporation of Philadelphia; Boston Stock Exchange Clearing Corporation; Midwest Securities Trust Company; The Options Clearing Corporation; Midwest Clearing Corporation; Pacific Securities Depository Trust Company; Pacific Clearing Corporation and TAD Depository Corporation.

8. Consideration of a proposed rule change filed by the American Stock Exchange, Inc. to establish alternate criteria for the original listing of common stock.

9. Consideration of the publication of a list of foreign issuers which have submitted information required by the exemption relating to certain foreign securities under the Securities Exchange Act of 1934.

SERVICES FOR VETERANS

FY 1978 Veterans Preference Indicators of Compliance Levels

V 42 1 66 AUG 26 77 UMI

DEPARTMENT OF LABOR

Employment and Training Administration

[20 CFR Part 653]

SERVICES FOR VETERANS

FY 1978 Veterans Preference Indicators of Compliance Levels

AGENCY: Employment and Training Administration, Labor.

ACTION: Proposed rule.

SUMMARY: The Employment and Training Administration of the Department of Labor is proposing to issue its first annual updating of the levels for the Veterans Preference Indicators of Compliance. The Veterans Preference Indicators of Compliance are used by the Department to monitor State employment service agencies to insure that veteran applicants receive priority service as required by 38 U.S.C. Chapters 41 and 42 and by 20 CFR Part 653, Subpart C.

DATES: Comments due on or before September 26, 1977. Comments on the proposed rule should be sent to the Assistant Secretary for Employment and Training. Attn: William B. Lewis, Administrator, United States Employment Service; Room 8000, 601 D Street, NW., Washington, D.C. 20213.

FOR FURTHER INFORMATION CONTACT:

Peter Rell, Director, Office of Program Review; United States Employment Service; Room 8324; 601 D Street NW., Washington, D.C. 20213, 202-376-6914.

SUPPLEMENTARY INFORMATION:

BACKGROUND

Chapters 41 and 42 of Title 38 U.S. Code, provide for job counseling, training and placement services for veterans. The Secretary issued regulations to implement 38 U.S.C. Chapters 41 and 42 on November 2, 1976 at 41 FR 48250. The regulations are found at 20 CFR Part 653, Subpart C. Sections 653.221-226 of that subpart set forth standards of performance governing State agency services to veterans. 20 CFR 653.230(a) states:

To help in determining whether the standards of performance set forth in §§ 653.221-226 are being met, the ETA shall use the floor levels and the veterans preference indicators of compliance set forth in this section to compare the level of services provided to veterans and eligible persons with the level of services provided to nonveterans.

20 CFR 653.230(c) states in pertinent part:

ETA shall establish numerical values for the veterans preference indicators of compliance for each Federal fiscal year for: (1) Veterans versus nonveterans; (2) Veterans of the Vietnam era versus nonveterans; and (3) Disabled veterans versus nonveterans.

Information regarding methodology for determining values is available upon request from Mr. Rell (see FOR FURTHER INFORMATION CONTACT section above).

Accordingly, 20 CFR 653.230, is proposed to be revised as follows:

§ 653.230 Veterans preference indicators of compliance.

(a) To help in determining whether the standards of performance set forth in §§ 653.221-226 are being met, the ETA shall use the floor levels and the veterans preference indicators of compliance set forth in this section to compare the level of services provided to veterans and eligible persons with the level of services provided to nonveterans.

(b) The term "applicants" as used in this section shall mean individuals who filed or renewed job applications during the fiscal year. To improve statistical comparability, the term "nonveteran" as used in this section shall not include women and persons 19 years of age or younger. The term "veteran" as used in this section, shall include eligible persons. The term "disabled veteran", as used in this section, shall include "special disabled veteran".

(c) To prevent State agencies which are actually performing at low levels of accomplishment from mathematically appearing, according to the veterans preference indicators of compliance, to be doing well, the ETA shall establish a floor (minimum) level of expected accomplishment for each reportable service for each Federal fiscal year. Only after a State agency reaches its expected floor level of accomplishment shall the veterans preference indicators of compliance be applied. Each year ETA shall consider each State agency's past year's complishments as a major factor in establishing the floor level of accomplishment for the next Federal fiscal year. Computation of the floor levels shall also be based on external and other appropriate factors.

(1) The floor levels shall be stated as the ratio of veteran individuals served to the number of veterans applying for service, rather than the number of veterans served, to avoid the difficulties associated with establishing absolute numbers under varying conditions, time periods and locations. The floor levels of accomplishment for FY 1978 shall be as follows:

(i) A minimum of 6 percent of those veterans applying for service shall be counseled.

$$\frac{\text{Veterans counseled}}{\text{Veteran applicants}} \times 100\% = 6\%$$

(ii) A minimum of 1.5 percent of all veteran applicants shall be enrolled in training.

$$\frac{\text{Veterans enrolled in training}}{\text{Veteran applicants}} \times 100\% = 1.5\%$$

(iii) A minimum of 7.5 percent of all veteran applicants shall be provided job development.

$$\frac{\text{Veterans provided job development}}{\text{Veteran applicants}} \times 100\% = 7.5\%$$

(iv) A minimum of (individual State values) percent of all veteran applicants shall be placed in jobs.

$$\frac{\text{Veterans placed}}{\text{Veteran applicants}} \times 100\% = \text{(see list below for State values)}$$

(v) A minimum of (individual State values) percent of all veteran applicants shall be inactivated with some reportable service.

$$\frac{\text{Veterans inactivated with some service}}{\text{Veteran applicants}} \times 100 = \text{(see list below for State values)}$$

(d) The ETA shall compare the level of State agency services for veterans versus that for nonveterans by examining rates of service rather than the numbers of persons served to compensate for the differing sizes of comparison groups and to avoid the difficulties associated with establishing absolute numbers under varying conditions, time periods and locations. In addition, the two groups, veterans and nonveterans, shall be compared after adjustments for demographic and other appropriate characterstics to make them as comparable as possible within the limitations of available data systems.

(e) ETA shall establish numerical values for the veterans preference indicators of compliance for each Federal fiscal year for:

(1) Veterans versus nonveterans;

(2) Veterans of the Vietnam era versus nonveterans; and

(3) Disabled veterans versus nonveterans.

(f) Veterans preference indicators of compliance for service to all veterans shall be as follows for FY 1978:

(1) The ratio of veteran applicants counseled to the total number of veteran applicants shall exceed the ratio of nonveteran applicants counseled to the total number of nonveteran applicants by at least 25 percent.

$$\frac{\text{Veteran counseled}}{\text{Veteran applicants}} \div \frac{\text{Nonveterans counseled}}{\text{Nonveteran applicants}} - 1.00 = 25\%$$

(2) The ratio of veteran applicants enrolled in training to the total number of veteran applicants shall exceed the ratio of nonveteran applicants enrolled in training to the total number of nonveteran applicants by at least 5 percent.

$$\frac{\text{Veterans enrolled in training}}{\text{Veteran applicants}} \div \frac{\text{Nonveterans enrolled in training}}{\text{Nonveteran applicants}} - 1.00 = 5\%$$

(3) The ratio of job development contacts made for veterans to the total number of veteran applicants shall exceed the ratio of job development contacts made for nonveterans to the total number of nonveteran applicants by at least 50 percent.

$$\frac{\text{Job development contacts for veterans}}{\text{Veteran applicants}} \div \frac{\text{Job development contacts for nonveterans}}{\text{Nonveteran applicants}} - 1.00 = 50\%$$

(4) The ratio of veteran applicants placed in jobs to the total number of veteran applicants shall exceed the ratio of nonveteran applicants placed in jobs to the total number of nonveteran applicants by at least 10 percent.

$$\frac{\text{Veterans placed}}{\text{Veteran applicants}} \div \frac{\text{Nonveterans placed}}{\text{Nonveteran applicants}} - 1.00 = 10\%$$

(5) The ratio of veteran applicants inactivated with some service to the total number of veteran applicants shall be more than the ratio of nonveteran applicants inactivated with some service to the total number of nonveteran applicants by at least 15 percent.

$$\frac{\text{Veterans inactivated with some service}}{\text{Veteran applicants}} \div \frac{\text{Nonveterans inactivated with some service}}{\text{Nonveterans applicants}} - 1.00 = 15\%$$

(g) Veterans preference indicators of compliance for service to veterans of the Vietnam era are as follows:

(1) The ratio of Vietnam-era veteran applicants counseled to the total number of Vietnam-era applicants shall exceed the ratio of nonveteran applicants counseled to the total number of nonveteran applicants by at least 35 percent.

$$\frac{\text{Vietnam-era veterans counseled}}{\text{Vietnam-era veteran applicants}} \div \frac{\text{Nonveterans counseled}}{\text{Nonveteran applicants}} - 1.00 = 35\%$$

(2) The ratio of Vietnam-era veteran applicants enrolled in training to the total number of Vietnam-era veteran applicants shall exceed the ratio of nonveteran applicants enrolled in training to the total number of nonveteran applicants by at least 10 percent.

$$\frac{\text{Vietnam-era veterans enrolled in training}}{\text{Vietnam-era veteran applicants}} \div \frac{\text{Nonveterans enrolled in training}}{\text{Nonveteran applicants}} - 1.00 = 10\%$$

(3) The ratio of job development contacts made for Vietnam-era veterans to the total number of Vietnam-era veteran applicants shall exceed the ratio of job development contacts made for nonveterans to the total number of nonveteran applicants by at least — percent.

$$\frac{\text{Job development contacts for Vietnam-era veterans}}{\text{Vietnam-era veteran applicants}} \div \frac{\text{Job development contacts for nonveterans}}{\text{Nonveteran applicants}} - 1.00 = 60\%$$

V 42 166 AUG 26 77 UMI

(4) The ratio of Vietnam-era veteran applicants placed in jobs to the total number of Vietnam-era veteran applicants shall exceed the ratio of nonveteran applicants placed in jobs to the total number of nonveteran applicants by at least 15 percent.

$$\frac{\text{Vietnam-era veterans placed}}{\text{Vietnam-era veteran applicants}} \div \frac{\text{Nonveterans placed}}{\text{Nonveteran applicants}} - 1.00 = 15\%$$

(5) The ratio of Vietnam-era veteran applicants inactivated with some service to the total number of Vietnam-era veteran applicants shll be more than the ratio of non-veteran applicants inactivated with some service to the total number of nonveteran applicants by at least 20 percent.

$$\frac{\text{Vietnam-era veterans inactivated with some service}}{\text{Vietnam-era veteran applicants}} \div \frac{\text{Nonveterans inactivated with some service}}{\text{Nonveteran applicants}} - 1.00 = 20\%$$

(h) Veterans preference indicators of compliance for service to disabled veterans are as follows:

(1) The ratio of disabled veteran applicants counseled to the total number of disabled veteran applicants shall exceed the ratio of nonveteran applicants counseled to the total number of nonveteran applicants by at least 100 percent.

$$\frac{\text{Disabled veterans counseled}}{\text{Disabled veteran applicants}} \div \frac{\text{Nonveterans counseled}}{\text{Nonveteran applicants}} - 1.00 = 100\%$$

(2) The ratio of disabled veteran applicants enrolled in training to the total number of disabled veteran applicants shall exceed the ratio of nonveteran applicants enrolled in training to the total number of nonveteran applicants by at least 15 percent.

$$\frac{\text{Disabled veterans enrolled in training}}{\text{Disabled veteran applicants}} \div \frac{\text{Nonveterans enrolled in training}}{\text{Nonveteran applicants}} - 1.00 = 15\%$$

(3) The ratio of job development made for disabled veterans to the total number of disabled veteran applicants shall exceed the ratio of job development contacts made for nonveterans to the total number of nonveteran applicants by at least 75 percent.

$$\frac{\text{Job development contacts for disabled veterans}}{\text{Disabled veteran applicants}} \div \frac{\text{Job development nonveterans}}{\text{Nonveteran applicants}} - 1.00 = 75\%$$

(4) The ratio of disabled veteran applicants placed in jobs to the total number of disabled veteran applicants shall exceed the ratio of nonveteran applicants placed in jobs to the total number of nonveteran applicants by at least 20 percent.

$$\frac{\text{Disabled veterans placed}}{\text{Disabled veteran applicants}} \div \frac{\text{Nonveterans placed}}{\text{Nonveteran applicants}} - 1.00 = 20\%$$

(5) The ratio of disabled veteran applicants inactivated with some service to the total number of disabled veteran applicants shall exceed the ratio of nonveterans inactivated with some service to the total number of nonveteran applicants by at least 25 percent.

$$\frac{\text{Disabled veterans inactivated with some service}}{\text{Disabled veteran applicants}} \div \frac{\text{Nonveterans inactivated with some service}}{\text{Nonveteran applicants}} - 1.00 = 25\%$$

(i) The veterans preference indicator of compliance for State agency action under the mandatory job listing requirements of 38 U.S.C. 2012 shall be: The ratio of the total number of veterans of the Vietnam era and special disabled veterans placed in mandatory listing job openings to total number of individuals placed in mandatory listing job openings shall exceed 7 percent.

(j) Following analysis of the past year's accomplishments, the numerical value for each of the veterans preference compliance indicators will be published in the FEDERAL REGISTER as amendments to paragraphs (f), (g), and (h) of this section.

(k) State agency performance under this subpart shall be reviewed on a quarterly basis by the ETA regional offices during the conduct of regular Operational Planning and Review System (OPRS) reviews. In addition, State agency performance under this subpart shall be formally reviewed by the ETA national office on an annual basis using the floor levels of accomplishment and the veterans preference indicators of compliance. The full results of these reviews shall be incorporated into the Secretary's annual report to the Congress. If a State agency fails to meet three of the five floor levels of accomplishment set forth at paragraph (c) of this section, including the floor level for placement, or if it fails to meet more than one-half of the total number of veterans preference indicators of compliance, with each placement indicator having double weight, ETA shall consider this as evidence that the State agency is not complying with the performance standards at §§ 653.221–226. Such State agencies shall be required to provide documentary evidence to the ETA that their failure is based on good cause. If good cause is not shown, the ETA, pursuant to Subpart H of Part 658 of this chapter, shall formally designate the State agency as out of compliance, shall require it to submit a corrective action plan for the following Federal fiscal year, and may take other action against the State agency pursuant to Subpart H of Part 658 of this chapter.

(l) Even though a State agency veterans' services statistics, including the floor levels of accomplishment and the veterans preference indicators of compliance, indicate adequate services to veterans, the ETA may take corrective action against a State agency pursuant to Subpart H of Part 658 of this chapter if other information comes to the attention of the ETA which indicates that a State agency is not complying with the requirements of this subpart.

Signed at Washington, D.C. this 1st day of August 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS AND CHILDREN

Revision, Reorganization and Republication

V 42 166 A AUG 26 77 UMI

Title 7—Agriculture

CHAPTER II—FOOD AND NUTRITION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER A—CHILD NUTRITION PROGRAMS

PART 246—SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS AND CHILDREN

Revision, Reorganization and Republication

AGENCY: Food and Nutrition Service, U.S.D.A.

ACTION: Final rule.

SUMMARY: These regulations promulgate various changes in requirements for the operation of the Special Supplemental Food Program for Women, Infants and Children (WIC Program). The major changes concern certification of persons, selection of local agencies and food delivery systems and are included to better ensure that Program benefits reach the neediest persons as well as to further ensure Program accountability and operating efficiency.

DATES: The final rules are effective September 26, 1977. Comments are due on the unresolved issues on or before October 10, 1977.

ADRESSES: Send comments to the address below.

FOR FURTHER INFORMATION CONTACT:

Gene Dickey, Director, Special Supplemental Food Division, Food and Nutrition Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202–447–8206.

SUPPLEMENTAL INFORMATION: On February 11, 1977, a notice of proposed rulemaking was published in the FEDERAL REGISTER (42 FR 8647) to revise the regulations for the Special Supplemental Food Program for Women, Infants and Children (WIC).

The proposals were based on comments received on the interim regulations which were published on January 12, 1976 (41 FR 1743, 4251) to implement Pub. L. 94–105, which had amended the authorizing legislation (Section 17 of the Child Nutrition Act of 1966, as amended, 42 U.S.C. 1786).

The Department received 416 responses to the proposed rulemaking. The substantive comments received and the actions taken are discussed below.

DEFINITIONS

Several commenters requested a definition of "members of populations." Since this term might be open to various interpretations, a definition is added which identifies members of populations as a group of persons with a common special need that do not necessarily reside in a defined geographic area, such as migrant populations or off-reservation Indians.

A number of commenters believed that the term "administrative costs" does not clearly identify clinic and nutrition education costs as allowable administrative costs. They suggested that the term "operating costs" was more reflective of the types of costs incurred in administering the WIC Program. Therefore, the term is changed to "operational and administrative costs." Additionally, a few comments were received recommending that the Department allow for the inclusion of outreach expenditures in such costs. It has come to the Department's attention that many needy persons are not aware of the WIC Program. Therefore, in order to extend Program benefits to as many needy persons as possible, the Department has decided to authorize outreach as an allowable operational and administrative cost.

Some comments were received regarding the tax exempt status requirement under the definition of "nonprofit agency." The commenters supported liberalization of the requirement, such as allowing the agency a one-year period to work towards obtaining official tax exempt status. However, the possibility of numerous ineligible agencies participating in the Program may create funding and administrative problems which would damage Program operations. Therefore, the Department stands with the requirement that nonprofit agencies have tax exempt status prior to entering the Program.

Several comments received addressed the definition of "health services." Some desired a narrower definition, others requested more flexibility, and some suggested clarification of the existing definition. In order for the Program to be an adjunct to good health care, some parameters for health services are needed. The definition in the proposed rules did not sufficiently specify what types of health care were required to be made available, but did give examples of typical health services. Consequently, the definition is changed and now defines health services as ongoing, routine pediatric and obstetrical care, with the examples of typical health services remaining.

Many commenters requested changes in the definition of "nutritional need." Most requested the inclusion of other criteria in the nutritional need definition, such as socioeconomic factors and the presence of various diseases and indicators of high risk pregnancy. A number of commenters suggested more specific standards for the given indicators of nutritional need. The Department believes that the criteria in the nutritional need definition are broad enough to encompass all acceptable standards of nutritional need. However, it is the view of the Department and many health and nutrition professionals that merely being an infant of a WIC Program recipient who participated during pregnancy is a nutritional need factor in itself. Since these infants are not likely to exhibit overt nutritional need conditions, it is difficult to assess their need. Consequently, these infants are expressly addressed in the nutritional need definition and in the priority system. In addition, a separate paragraph is added to the definition which is specifically suited to a breastfeeding woman and her nutritional need criteria.

The "State Plan of Management and Operations" is now referred to as the "State Plan of Program Operation and Administration" in order to more clearly describe the general function of the Plan.

REQUIREMENTS OF LOCAL AGENCIES

The section in the proposed rules entitled "Eligibility of local agencies" is changed to "Selection of local agencies" and is reorganized to include all aspects a state agency must consider in selecting a local agency. The section now addresses the Affirmative Action Plan, application by local agencies, Program initiation and expansion, and the local agency priority system.

The proposed rules prescribe a priority system for use by the State agency in selecting new local agencies in a particular area. First consideration is to be given to an agency which could perform all health and administrative services required for participation as a local agency. Second consideration is to be given to a health agency joined with a welfare agency which, in conjunction, can perform all required health and administrative services. Third consideration is to be given to a welfare agency and private physician which, in conjunction, can perform all required health and administrative services.

It was brought to the Department's attention that there are circumstances where a health clinic can work in conjunction with a private physician to provide WIC Program services. An example is a maternal and infant care clinic which provides health care and WIC Program benefits to women and infants, but not to children. If these children were allowed to receive health care through a private physician, the clinic could provide them with all other WIC Program services. The Department believes provision should be made for this type of circumstance. Therefore, in the priority system for the selection of local agencies, third consideration is to be given to a health agency which works in conjunction with a private physician to provide health services to a specific category of recipient, while fourth consideration is to be given to the welfare agency which operates in conjunction with a private physician.

Several commenters opposed the priority system for the selection of local agencies in each area of need. They believed that the State agency should select the types of local agencies as the State agency sees fit. However, the Department believes that if a health agency exists in an area, that agency should receive preference to operate a WIC Program. The primary reason for allowing a welfare agency (which must work with physicians to provide health services) to operate the Program is to reach areas which have no local health agency. Therefore, the priority system for local agencies will remain. Additionally, a commenter suggested that the State agency notify all potential local agencies in the areas in which it is planning to open a WIC Program. If no agency in the area next in line according to the Affirmative Action Plan indicates an interest in operating the Program within 30 days of the public notification, the State agency may then fund an agency from the next area on the Affirmative Action Plan. This suggestion is adopted in the regulations.

Several commenters pointed out that it is inequitable to judge the degree of need of members of populations by the area in which they reside. Therefore, a requirement is added to the Affirmative Action Plan that the State agency rank members of populations according to the need of the population, not the area in which the members are located.

Several commenters supported the rule allowing a welfare agency which enters into written agreements with private physicians to operate a WIC Program. Many commenters requested that the welfare agency compensate the physician for providing health services. However, the legislative purpose of the WIC Program is to provide supplemental foods as an "adjunct to good health care," so WIC resources should be directed toward assuring that food is effectively provided to recipients rather than supplementing existing health services. Therefore, the rule will remain unchanged. However, the Department does concur with the commenters who suggested that private physicians should be allowed to receive program funds for medical tests performed for certification purposes. Financial management instructions will be issued which will outline this as an allowable cost and delineate the circumstances under which it will be allowed.

A number of commenters asked that State agencies be required to notify applicant agencies as to the status of their applications within a specified time period. Additionally, many commenters asked that FNS be required to notify State agencies concerning their Plan of Program Operation and Administration within a specified time limit. These suggestions are adopted in the regulations. State agencies are required to notify applicant agencies within 30 days and FNS must notify State agencies within 30 days. However, notification refers only to the status of the agency's application or Plan. It does not require a decision to be made on the application or Plan within the specified time.

A few commenters requested that the Department allow the WIC Program and the Supplemental Food Program (SFP) to operate in the same geographical area. Many commenters asked that the Department allow the local agencies' geographic areas to overlap. However, the Department believes that this would not be in the best interest of good management or the best use of resources, since both programs have limited funds. This is especially true when other needy areas are waiting to be served. Therefore, the proposed rule will remain unchanged.

Several commenters requested that eligibility determinations be made within ten days of application, and food be provided within ten days of an affirmative determination. The Department believes, however, that the ten day time limit would be overly restrictive. Adequate time must be allowed for the clinic to schedule appointments, complete laboratory work and contact the recipient. Therefore, the rule has been changed to require a determination of a person's eligibility to be made within 20 days of the person's first visit to the local agency to apply for participation in the Program. Food must be provided to that person within ten days of an affirmative determination.

Many comments were received concerning the requirement that the local agency assure that WIC Program recipients are enrolled in a health care system. Several commenters opposed the requirement; many commenters asked that recipients be encouraged, not required, to participate in health services; some commenters supported requiring participation in health services; and a few commenters asked that the rule define the term "enrollment." The intent of the enrollment requirement was to ensure that the WIC Program genuinely operates "as an adjunct to good health care," as mandated by the authorizing legislation. However, it is evident from the comments that this requirement was not well understood by some and opposed by many who operate the WIC Program at the local level. Therefore, the section is changed to only encourage recipients to participate in health services.

Numerous comments were received concerning the proposed requirement that the local agency provide health services. Several commenters suggested that in areas where no health care agency is available, the Department should allow an agency which can perform nutritional assessments and provide nutrition education to operate as a local agency. However, it is believed that Congressional intent is to keep the WIC Program an adjunct to good health care. Consequently, it is necessary to require that local agencies provide certain health services. Also, many commenters objected to the requirement that local agencies offer nursing and physician services, with most commenters arguing that either nursing or physician services were adequate. The Department is aware that there are disparities in the type of health services offered by communities. Therefore, the requirement that local agencies offer nursing and physician services has been deleted. It is required only that appropriate health services be made available to recipients through the local agency.

STATE AGENCY PLAN OF PROGRAM OPERATING AND ADMINISTRATION

The section in the proposed rules entitled "State agency operations" is changed to "State agency Plan of Program Operation and Administration" and is devoted entirely to the requirements pertaining to the State Plan.

The proposed rules require that the average levels and ranges of expenditure and participation over the past two years be provided in the State Plan. Several commenters noted that this information is already contained in reports submitted to FNS. Therefore, the requirement is deleted.

A number of comments were received which addressed the difficulties migrant farmworkers and their families encountered in continuing their participation in the WIC Program. The primary concern was that a person is required to be certified at each new local agency where he applies to participate in the WIC Program. In the case of migrant families who move frequently due to the nature of their employment, this requirement was burdensome for both the local agencies and migrants. Therefore, the regulations contain a provision under which the State agency may allow local agencies to accept a verification of certification from another local agency where the migrant previously participated in the WIC Program, as long as the migrant's certification period is still valid.

INCOME REQUIREMENTS

The proposed rule contained a requirement that all recipients have a gross family income at or below 195 percent of the Secretary's income poverty guidelines. Some commenters supported the income standard, while other commenters opposed setting a uniform income eligibility standard. The reasons most frequently given for opposing the income requirement were the need to preserve the WIC Program as a health-oriented, rather than welfare-oriented, programs and the possible administrative burdens on the local agencies which offer free health care to all persons. Commenters in support of the income requirement emphasized the importance of directing WIC Program benefits to those with low incomes.

The Department strongly believes that the WIC Program should target its resources to low income persons. However, it is also important to strengthen the connection between the WIC Program and the provision of health services, and to maintain the WIC Program as a health and nutrition program. In view of the opposition to the income standard from health and administrative professionals, the Department has decided to delete the proposed income standard for WIC Program eligibility, pending further study of this alternative.

However, Pub. L. 94–105 does require that persons be determined to be "at nutritional risk because of inadequate income and inadequate nutrition." Therefore, inadequate income should be one of the criteria used to determine eligibility for the WIC Program. This criterion should be designed to easily integrate the WIC Program with the health services offered by the local agency and to reduce the administrative burden on the local agency.

The Department has decided to adopt a requirement similiar to that contained in the interim regulations.

Recipients must be eligible for free or reduced price health care at the local agency. That is, if there are income requirements in use in other health pro-

V 42 166 AUG 26 77 7 UMI

grams operated by the local agency, recipients would have to meet one of those income standards in order to be eligible for the WIC Program. If the local agency offered free health care to all, then no income standard would be required for WIC Program participation. However, there is one change from the requirement as given in the interim regulations: The State agency may set or approve an income standard for use by local agencies that is different from the income standards in use in other health programs. The Department believes that this procedure will allow the State agency the necessary flexibility to set income requirements to suit local conditions, maintain the link between the WIC Program and the provision of health services and assure that WIC benefits go to those most in need.

Many commenters requested that certification of recipients be carried out on the basis of inadequate income alone. They believed there was a direct correlation between having low income and being at nutritional risk. Several commenters suggested that eligibility should be based on nutritional need criteria only after the local agency had reached its maximum participation level. At that point, when a caseload slot becomes available, persons waiting to participate in the WIC Program would be selected based on income and nutritional need. The Department has not made a decision on this issue and would like all interested persons to submit comments. For a discussion of the issue and timetable for submission of comments, please refer to the end of this preamble.

NUTRITIONAL NEED PRIORITY SYSTEM

Many commenters opposed the requirement of a nutritional need priority system on the grounds that it would be difficult to administer and the decision as to priority status should be made by the competent professional authority. As more State agencies reach their maximum funding authorization, and their local agencies reach their maximum participation levels, the problem of assigning priority will become even more important. All local agencies should have an equitable and effective means of determining who shall receive Program benefits first. The proposed priority system was developed with the assistance of medical professionals with expertise in maternal and pediatric nutrition and local, State and Federal administrators.

Under the rule, the competent professional is given wide flexibility within each priority category. Therefore, the requirement of a priority system will remain. In addition, several commenters requested that the Department consider an inadequate dietary pattern as equal in priority to anthropometric and hematological indicators, instead of lower in priority. Due to the difficulties of determining an inadequate dietary pattern as an indicator of nutritional need, the Department believes that those persons suffering from anemia, abnormal patterns of growth or medical conditions are deserving of a higher priority level than those with no clinical indicator of nutritional need; therefore, those persons certified on the basis of an inadequate dietary pattern will receive lower priority than persons with clinical indicators of nutritional need.

It was decided that there are some defects in the priority system as contained in the proposed rules. While many commenters supported the rule placing infants of WIC recipients on the Program without a nutritional need determination, these infants were given no place in the priority system. The effect of this rule was that infants of WIC recipients could be placed on the WIC Program before any other eligible person. For example, a relatively healthy infant of a WIC recipient might be placed on the WIC Program before a low birth weight baby. Therefore, in order to remain consistent with the intent of the priority system, infants of WIC recipients are placed in the second priority category. If the infant also exhibits some clinical indicator of nutritional need, then he is given first priority. Additionally, in the proposed rules, pregnant women, infants (or their lactating mother) and children with inadequate dietary patterns were all included in Priority III. However, to be consistent with the purpose of the priority system, it was believed that the women and infants should have priority over children with inadequate dietary patterns. Therefore, the regulations place pregnant women, breastfeeding women and infants with inadequate dietary patterns in Priority IV, and children with inadequate dietary patterns in Priority V. Also, one commenter asked that the rule clarify the place of breastfeeding women in the priority system. The intent of the rule is that a breastfeeding woman may be certified and placed in the priority system on the basis of her own or her infant's nutritional need condition. Therefore, the definition of nutritional need is changed to more clearly reflect this intent.

RECERTIFICATION

A few commenters supported the proposed rule requiring bloodwork at recertification only if the recipient was initially determined to be in nutritional need because of anemia. However, many commenters supported requiring bloodwork for all recipients at recertification. The Department agrees that the local agency should perform a hemoglobin or hematocrit test at all eligibility determinations to detect regression in the recipient's health status, to maintain an ongoing record of the recipient's health status, and for evaluative purposes. Therefore, the regulations require a hemoglobin or hematocrit test for all recipients at each certification visit, if the necessary equipment is available.

A number of commenters supported the provision in the proposed rules that WIC Program recipients may remain in the Program as long as there is a danger of regression in nutritional status without the supplemental foods. Many commenters asked that recipients remain in the Program on the basis of residency and income criteria alone until the local agency reaches 100 percent of its maximum participation level. A few commenters supported the provision in the proposed rules that the competent professional authority may drop recipients from the Program if there are others waiting who are in greater need. An effective nutrition education component should teach recipients to make the proper food choices, and therefore enable them to obtain an adequate diet without participating in the WIC Program. The Department believes that the competent professional authority should retain recipients in the Program if there is a danger of regression in nutritional status, but if there is no such danger and the recipient does not meet the nutritional need criteria, there is no reason for that person to continue in the Program when persons in greater need are waiting to participate in the Program. Therefore, the statement in the proposed rules that recipients may remain in the Program as long as there is a danger of regression in nutritional status without the supplemental foods, remains.

As a result of the changes reflected in the regulations, there is no longer any reason to distinguish between initial certification and recertification, since no distinction is made in the priority system between current recipients and new applicants, and bloodwork is now required in all certifications, if the necessary equipment is available.

Therefore, at each six-month interval, recipients will be required to undergo a complete certification, as if they had just applied for the Program. Thus, any reference to recertification in the proposed rules is delted in the final regulations. An exception is that pregnant women, who may remain on the Program until six weeks postpartum without undergoing another certification.

CERTIFICATION FORMS

The Department received a number of comments on the certification form prescribed in the proposed rules. Many commenters asked that all statements in the form requiring affirmation by the applicants be deleted. A large number of commenters opposed the statement that all food obtained under the WIC Program must be used solely by the recipient, and not shared with the rest of the family. The commenters felt that this issue was an appropriate topic for nutrition education. Some commenters opposed the statement informing applicants that they would be subject to prosecution if they misrepresented information. Much of the opposition to these statements centered on the increased complexity they would bring to the certification form. The Department agrees with these comments as they pertain to all statements, except the one informing recipients that they are subject to prosecution if they misrepresent information. This statement is retained, because it is important that individuals furnish correct information during the certification visit. However, the statement has been rewritten to clarify that it refers only to information provided to determine the eligibility of the applicants, i.e., residence and income eligibility data. The requirement of a statement on who may use food obtained under the Program is deleted altogether. All other statements will still have to be read to the recipients by local agency staff, but they need not be printed on the form.

NOTICE OF INELIGIBILITY

Several commenters opposed the requirement that written notification be given to recipients who are dropped from the Program, as they felt it to be an unnecessary administrative burden. However, the Department continues to believe that the local agency has an obligation to notify a recipient if he is not eligible and to advise the recipient of his right to a fair hearing. Therefore, in addition, the regulations require that the recipient receive written notification within 15 days when the recipient is dropped from the Program between six-month certifications. For example, if a recipient is removed because he or she fails to pick up vouchers within a required time, a written notification, giving the reason for termination, is required. A person found ineligible at a certification visit must be advised in writing that he is ineligible and why he is ineligible. Further, the regulations require that each recipient receive notification, shortly before his certification period expires, that his eligibility for the Program is due to expire.

NUTRITION EDUCATION

A few commenters felt the Department should delete the requirement that the State agency evaluate the progress of nutrition education objectives in areas such as knowledge, attitudes and skills. They felt that it is impossible to assess measurable progress in these areas. The Department agrees that this is difficult to do; therefore, the reference to evaluating knowledge, attitudes and skills is deleted, but the requirement for evaluating nutrition education remains.

SUPPLEMENTAL FOODS

Many commenters opposed the requirement that the competent professional authority tailor the food package to the individual's nutritional needs because they considered the process time-consuming and an administrative burden. However, this requirement corresponds with the intent of the WIC Program, which is targeted to specific individuals determined to be in nutritional need. In addition, the Department feels it is not cost effective to provide food in greater quantities than indicated in the nutritional need determination, or to provide more food than an individual can consume. Additionally, the local agency can use the funds saved through eliminating the excess food to serve more persons. Therefore, the requirement remains.

A few commenters opposed the requirement that the local agency assure that supplemental foods are provided for home consumption only. The requirement is clarified to state that supplemental foods are not for use in institutions such as day care centers or orphanages where meals are provided by the institution.

Several comments were received asking that the Department allow physicians to prescribe infant formula which is not iron-fortified. However, iron is one of the nutrients specifically identified in the authorizing legislation as an essential component of the supplemental foods to be provided. Therefore, it is not appropriate to provide formula which is not fortified with iron, and the rule remains.

A large number of commenters requested a change in the requirements for cereals in the food package for women and children. Commenters were concerned about the level of iron fortification in cereals, the need for the inclusion of whole grain cereals, the sugar content of the cereals, and the artificial flavorings and colorings used in some of the currently authorized cereals. The Department has not made a decision and would like all interested persons to submit comments. For a discussion of the issues and a timetable for submission of comments, please refer to the end of this preamble.

Several commenters requested that infants be allowed to receive adult cereal. However, a diet containing high levels of iron is considered essential for infants up to one year of age. Substituting adult cereals for infant cereals would substantially lower the amount of iron provided. Therefore, the Department has decided not to provide adult cereals to infants.

Several commenters requested that the Department provide an enhanced food package to women who are breastfeeding. The Department believes that the current package provides sufficient supplemental foods for the breastfeeding mother. Therefore, no unique package is provided.

Many commenters supported the supplemental food package directed towards children with special dietary needs. However, many commenters requested that the Department authorize additional foods for these children, including eggs and a greater amount of juice. The special package was designed to provide sufficient nutrients for children who need primarily infant formula. To authorize the provision of foods other than those set forth in the rule would be excessive and unnecessary. Therefore, the special package remains unchanged in the regulations.

FISCAL MANAGEMENT AND ACCOUNTABILITY

Many commenters opposed the changes in the fiscal management and accountability system prescribed for State agencies in the proposed rules. Most believed this would result in an unnecessary administrative burden to State agencies which were already administering the WIC Program in a financially responsible manner. They also opposed the centralization of responsibility at the State level. Proper accounting for funds is one of the most serious problems in a grant program. The Department strongly believes that the State agency must account for funds received and expended, must know at any one time how much money is obligated and must provide accurate and timely reports on expenditures to FNS. Therefore, the requirements for fiscal accountability remain unchanged.

There is some confusion as to the distinction between a fiscal management and accountability system and the State agency's financial management system. Accordingly, the two sections are combined in the regulations under the heading of "Financial management systems" since both systems utilize similar accounting and management principles.

A number of commenters opposed the requirement that the State agency reconcile the value of individual food instruments issued with the value of individual food instruments redeemed. They claim that this is an administrative burden and costly to accomplish. However, the Department believes that it is impossible to properly account for obligations if the issuance and redemption of individual food instruments is not reconciled. Therefore, the requirement of reconciling individual food instruments' dollar value remains in the regulations. A few commenters asked that the rule allow reconciliation of food instruments at the local level. The Department has no objection if the State agency uses local records to reconcile food instruments. The local agency could reconcile the dollar value and send the information to the State agency. However, the State agency bears the responsibility of providing this information to FNS, and must therefore know the number and value of food instruments distributed and the amount of obligations outstanding, as determined by reconciling the value of the individual food instruments issued with the value of individual food instruments redeemed.

FOOD DELIVERY SYSTEM

A substantial number of commenters opposed the requirement of a uniform food delivery system within the jurisdiction of the State agency. They wanted to retain local systems which they claimed are more suited to local needs. A few commenters supported the uniformity requirements set forth in the proposed rules. Several commenters asked for clarification. The Department believes that it is difficult, if not impossible, for the State to properly control a myriad of different local systems, all using different food instruments, different forms and different methods of distributing food. The result is that the State agency never has a clear idea of the amount of funds obligated and expended until the final closeout reports. Therefore, it is the Department's view that some degree of uniformity is desirable. The Department does recognize, however, that there are many situations when the use by the local agency of a different food delivery system than that of the State agency

V 42 166 AUG 26 77 7 UMI

is necessary to serve the needs of recipients. For example, a lack of retail outlets may require one local agency to use a home delivery system. Also, commenters have indicated that under the proposed uniformity requirement, some State agencies would probably request a great number of exceptions, leading to administrative delays. Therefore, the regulations allow the State agency to operate up to three kinds of food delivery systems—home delivery, retail purchase, and direct distribution. However, each type of system must be uniform throughout the jurisdiction of the State agency. This provision will allow the State agency to account for local conditions in designing its food delivery system, while retaining the benefits of a uniform system.

It has come to the attention of the Department that some State agencies have food delivery systems in which the maximum purchase price on the food instrument is the average market price of the supplemental foods provided in that area. Food vendors are paid the maximum purchase price, regardless of the actual purchase price of the supplemental foods. Consequently, recipients who go to stores where prices are above the average must pay the difference between the actual price and the maximum purchase price on the food instrument, and stores with prices below the average price in that area retain the difference. The Department finds it unacceptable that recipients must pay for even a part of the cost of WIC Program foods. Authorizing legislation requires that funds be provided so that supplemental foods will be made available to women, infants and children. It is the purpose of the Program to provide recipients with food that they are unlikely or unable to buy themselves. It is directly contrary to this purpose to require recipients to pay for food. Furthermore, the Department believes that food vendors should not be paid more than the actual price of the supplemental foods at that store. Therefore, a requirement is added in the section on food delivery systems that recipients must receive supplemental food free of charge, and that the food vendor may not be reimbursed for more than the actual purchase price of the supplemental foods.

Several commenters opposed the requirement that the State agency must enter into written agreements with all food vendors participating in the Program. They felt that it would be administratively difficult for the State agency to enter into written agreements with all food vendors, and that the local agency could perform this function. The Department has no objection to the local agency signing the written agreements with food vendors. Therefore, the regulations have been rewritten to allow either the State agency or the local agency to enter into written agreements with food vendors.

The proposed rules also allowed the agreement between the State agency and the food vendor to be achieved through a statement on the food instrument. This was proposed because it would be administratively difficult for the State agency to sign a prior agreement with all food vendors. In view of the fact that local agencies are now allowed to enter into agreements with food vendors, the Department believes that it is no longer desirable to allow the agreement to be achieved through the food instrument. As this type of agreement is a relatively ineffective means of communicating to the food vendor his responsibilities under the Program, the provision allowing the food vendor agreement to be executed through the food instrument has been deleted in the final regulations. All agreements with food vendors will have to be signed, written agreements between the food vendor and the State or local agency.

A number of comments were received on the provisions concerning the controls on recipient and vendor abuse. Some commenters opposed allowing the State agency to remove recipients who abuse the Program. A few commenters supported this section. The Department believes that the State agency should have the discretion to remove recipients who abuse the Program. The State agency can deal with less serious abuses by a warning or other means as the State agency wishes. The provisions concerning recipient and vendor abuse therefore remain unchanged.

Food Instruments

Many commenters asked that we allow the local agency to print food instruments. Some commenters asked that the State agency delegate the responsibility for paying vendors to local agencies. These sections are rewritten to make it clear that the local agency may pay food vendors and print food instruments, except that the food instruments must follow the design of the State agency's uniform food instruments, and bear serial numbers designated by the State agency.

Some commenters opposed the restrictions on mailing of food instruments imposed by the proposed rules, one commenter supported the rule, and a few commenters asked that the Department prohibit the mailing of food instruments altogether. The Department believes that it is important to control the mailing of food instruments, both for reasons of accountability, and because mailing may weaken a major function of the WIC Program, that of providing health services and nutrition education at the local agency. However, the commenters pointed out that forcing recipients to come to the clinic to pick up food instruments could disrupt clinic operations, and in some situations impose hardships on clinics and recipients. Assuming that the State agency is familiar with the local agency's situation in this regard, the rule is changed to give the State agency, rather than FNS, the authority to approve the mailing of food instruments on a local agency-wide basis. However, the State agency must approve a local agency's request to mail food instruments as long as accountability is assured and there are either measures to provide a reasonable level of health care and nutrition education services or the State agency determines that persons in need in rural areas will be unable to participate in the program if food instruments are not mailed.

The Department is aware that some local agencies are issuing up to a six-month supply of food instruments at one visit. In these cases, as in some delivery systems which mail food instruments, it is doubtful that the recipients receive either nutrition education or health services at the clinic during the six-month period. Therefore, the final regulations contain a requirement that the local agency issue not more than a three-month supply of food instruments to each recipient at a single time. This requirement will encourage recipients to attend the clinic more frequently than once every six months, and thus take part in nutrition education classes and health services.

The proposed rules contain a requirement that recipients sign their names upon receipt of foods or food instruments. A few commenters requested that this requirement be deleted in the case of recipients who receive their food instruments in the mail. As it is difficult to require recipients to sign for food instruments which are sent in the mail, this suggestion is adopted in the regulations.

Several commenters requested that the recipients be given a longer period of time than the time allowed by some local agencies for the redemption of food instruments. Apparently, some local agencies give recipients a week or less to use the food instrument. The Department believes that participation in the WIC Program should not place undue burdens on the recipients, especially when such burdens serve no obvious Program purpose, as many recipients may live in remote areas, or have difficulty getting to a retail outlet. It is difficult to see any benefit in requiring recipients to redeem food instruments within one or two weeks, although some limit is needed to allow the State agency to determine its outstanding obligations. Therefore, the regulations require the local agency to allow 30 days for the recipient to use the food instrument to obtain supplemental foods and to print both the date the food instrument may be first used and expiration date on the food instrument. In order not to disrupt existing food delivery systems, an exception to this requirement is provided if the recipient receives the food instrument after the beginning of the month. In that case, the State agency may allow the recipient only to the end of the month to use the food instrument. For the next month, however, the State agency must allow the recipient 30 days to use the food instrument.

The proposed rules require that the food vendor submit the food instrument to the State agency within 60 days of its issuance date. Some commenters opposed this requirement, on the ground that too short a time was allowed. Therefore, the requirement has been changed to allow the food vendor to submit the food instrument 60 days from the last day the food instrument may be used by the recipient. Since in most cases the recipient will have 30 days to use the food instrument, this change will allow the food vendor a maximum of 90 days from the date of issuance to submit the food instrument to the State agency for payment.

The proposed rules require that the food instrument include a statement that food must be used by WIC Program recipients only, and may not be shared with other family members. Many commenters opposed this requirement. In keeping with the deletion of a similar statement from the certification form, this requirement is deleted.

Program Costs

Several commenters requested that allowable costs under nutrition education include the costs of training the staffs of local agencies and of classes which are not directed solely at WIC recipients. The regulations make clear that the expense of training local agencies' staffs is an allowable nutrition education cost. WIC funds should be used to develop nutrition education materials which are directed toward the special needs of WIC recipients; however, it is acceptable for WIC materials and resources to be utilized in classes for both WIC and non-WIC recipients. Similarly, materials and resources developed primarily for other target groups may be used for WIC nutrition education and WIC funds may be used to pay the pro rata share of the costs. When other programs or groups are sharing resources and materials with WIC, the costs should be allocated among the programs on an equitable basis.

Many commenters requested that the reference to "studies" as an unallowable cost be clarified. Upon further review, the Department has decided that there is no need to expand upon the explanation of studies as a cost, as this is addressed in FMC 74-4, Attachment B. Therefore, the reference to studies is deleted in the regulations.

Several commenters requested that FNS allow the cost of medical equipment. The WIC Program is designed to operate as an adjunct to good health care and is to be carried out in agencies that provide health services. WIC Program funds should not be used to equip medical clinics. Therefore, acquisition of medical equipment is not an allowable cost. Also, guidance was requested as to what kind of capital expenditures are allowable. FMC 74-4 states that capital expenditures are allowable at the discretion of FNS, but gives no dollar limit. Therefore, in order to avoid confusion on the part of State and Federal administrators, the regulations require that FNS approve only those capital expenditures above $2,500.

Management Evaluations

In the proposed rules the Department allowed a four-month implementation period for a State agency to establish a management system to evaluate progress on Program objectives. It appears that most State agencies already are using management evaluation techniques which meet the requirements of the rules. Therefore, the four-month implementation period is deleted in the regulations and all State agencies are expected to conduct management evaluations after the regulations are effective.

Administrative Appeal of State Agency Decisions

There was some confusion over what rights food vendors have to appeal decisions regarding their participation in the Program. To clarify this question, the section on administrative appeals is rewritten to include food vendors in the appeal procedure.

Issues for Comment

Eligibility based on low income alone

Presently, the regulations require that persons be found at nutritional risk because of nutritional need and inadequate income in order to participate in the WIC Program. Priorities were set among various nutritional need factors in order to assure that the persons most in need received WIC Program benefits first. The Department has believed that certifying a person on the basis of income alone might weaken the connection between the WIC Program and the provision of health services.

However, the Department also acknowledges that several surveys and studies have demonstrated a link between low income and nutritional risk in children. Also, some medical professionals have expressed the opinion that the medical and nutritional criteria used for determining nutritional need are imprecise and that low income alone is a sufficient indicator of nutritional need.

Therefore, the Department is looking further into this issue. One possible alternative which might be proposed is to add a seventh nutritional need priority level which would include those low income infants and children who because of inadequate economic resources are determined to be at nutritional risk. This would allow local agencies, after giving consideration to Priorities I through VI, to include as Priority VII infants and children who are of low income. This would entail setting an income level under which infants and children must fall in order to be eligible for Priority VII.

The Department would like to receive comments on this issue and suggestions on how to implement such a provision.

Improved Service in Rural Areas

The Department is interested in providing improved service in all its food assistance programs to low income persons in rural areas. The Department would like to receive comments on how the WIC Program could serve this objective, and suggestions on possible modifications in WIC that might facilitate the realization of this goal.

Food Package Cereals

Presently the food package is designed to increase the consumption of foods that provide the nutrients specified in the law known to be lacking in the diets of women and children at nutritional risk: high-quality protein, iron, calcium, vitamin C, and vitamin A. The authorized supplemental foods are iron-fortified infant formula, milk, cheese, iron-fortified breakfast cereal or infant cereal, full-strength fruit or vegetable juice which contains vitamin C, and eggs.

Many comments were received pertaining to the cereals currently meeting the requirements of the WIC food packages for women and children. Specifically, commenters were concerned about the exclusion of cereals not meeting the current requirement for iron fortification, the need for inclusion of whole grain cereals, the sugar content of the cereals, and the artificial colorings and flavorings used in some of the currently authorized cereals. Some commenters requested changes because they believe some of the cereals may be contributory to health problems, may not be in keeping with exemplary food choices, and the WIC food packages should contain only foods that provide an effective educational message. We would like to receive comments on this issue.

The only WIC Program nutrient requirement for cereals is iron. Presently, the regulations specify a minimum iron content of 28 milligrams (mg.) of iron per 100 grams of dry cereal. A one ounce serving of dry cereal fortified at this level would provide 45 per cent of the U.S. RDA for iron for women and children over four years of age. (The U.S. Recommended Daily Allowances (U.S. RDA) refers to a set of standards used by the Food and Drug Administration (FDA) in regulation of food labeling for nutrient content. The Recommended Dietary Allowances (RDA) refers to a set of standards developed by the National Academy of Sciences and are used by the Department for evaluating the nutrient content of the food packages.) To our knowledge, nine cereals meet this requirement. They are: Product 19, Concentrate, Buc Wheats, Corn Total, Kaboom, Total, Malt-O-Meal, Cream of Wheat, and King Vitaman. The Department is seriously considering changing the requirements for cereals and would like to receive further comments on this issue to determine which changes would be in the best interests of the target population.

Exclusion of High Sugar Cereals From the Food Package

The establishment by the Department of a maximum level of sugar for cereals authorized for use in the WIC Program was requested by commenters because of the possible relationship between sugar consumption and (1) dental caries, (2) obesity, and (3) the development of a "sweet tooth." The Department is also concerned about the possible role of sugar in the development of these prevalent health problems in the United States. However, before the Department makes a decision on this request, we would like to solicit further comments in order to clarify the issue. Many sugars, both monosaccharides and disaccharides, are used in food products. These are added to

V4 21166 AUG 26 77 7 UMI

foods in the form of refined sugar, honey, molasses, corn syrups, etc. The comments we received to the proposed rules only specified that "sugar" be limited. Since there is some disagreement in the scientific literature regarding the correlation between various sugars and health problems, we would like to know which sugars commenters would like restricted and at what level. The rationale upon which comments are based is also requested.

Currently, FDA does not require manufacturers to list the sugar content of food products on labels. If the Department establishes a maximum level for the sugar content of cereals to be used in the WIC Program, a mechanism by which this level can be ascertained will have to be implemented. Any suggestions regarding this will be appreciated.

EXCLUSION OF HIGHLY FORTIFIED CEREALS FROM THE FOOD PACKAGE

Some of the cereals that meet the iron requirement contain 100 percent of the U.S. RDA for some nutrients. A few commenters requested the exclusion of cereals that supply this level of any nutrient. It is alleged that consumption of these cereals, especially in large quantities by young children, may result in the ingestion of excessive and possibly toxic levels of some nutrients, particularly vitamins A and D. Since the percentage is based on the U.S. RDA for adults and children over four years of age, the nutrient levels for a serving of cereal may actually contain a larger percentage of the U.S. RDA for children under four years of age. Additionally, the provision of cereals fortified to 100 percent of the U.S. RDA is contradictory to the basic nutrition education premise that nutrients should be obtained from a variety of foods. Eating a variety of foods will provide the essential nutrients, thereby eliminating the need for dietary supplements.

Disallowing cereals which supply 100 percent of the U.S. RDA for any nutrient would decrease the number of cereals eligible for the WIC Program unless additional changes in the current requirement are also instituted. The Department is requesting comments on whether or not cereals containing 100 percent of the U.S. RDA for nutrient(s) should be authorized in this Program. The rationale upon which comments are based is also requested.

REDUCTION OF THE IRON REQUIREMENT FOR CEREALS

A number of commenters requested that we lower the minimum iron requirement for cereals from 45 percent to 25 percent of the U.S. RDA. The reasons for this request were to increase the variety of cereals that are eligible for use in the Program. In addition, comments have been received that suggest the cereals now eligible for use are not well accepted by recipients and consequently are not consumed. Since this change of the iron requirement would allow a large number of pre-sweetened cereals to be eligible for the Program, some commenters requested that a maximum requirement for sugar level be established simultaneously.

Currently, the total food package provides a minimum of 12 mg. of iron per day which is 80 percent of the RDA for iron for children, and 65 percent of the RDA for iron for pregnant and breastfeeding women. If the required iron level for cereal were lowered to 25 percent of the U.S. RDA, the food package would provide a minimum of 7.5 mg. of iron per day which is 50 percent of the RDA for iron for children and 40 percent of the RDA for iron for pregnant and breastfeeding women.

The Department is soliciting comments on whether or not the required iron level for cereals should be lowered. The rationale for comments is also requested.

INCLUSION OF WHOLE GRAIN CEREALS

A few commenters requested that we allow whole grain cereals that contain no more than 15–20 percent sugar, regardless of the iron content. This was requested in order to increase the variety of cereals offered and provide for a source of dietary fiber, certain B vitamins, and trace minerals in the food package. Whole grain cereals would include cereals such as cracked wheat/oats, corn meal, barley, buckheat, shredded wheat, oatmeal, brown rice, bran cereals, etc. The total food package with whole grain cereals would provide a minimum of 3 mg. of iron per day which is 20 percent of the RDA for iron for children and 15 percent of the RDA for iron for pregnant and breastfeeding women.

Please submit your comments regarding this issue.

EXCLUSION OF CEREALS THAT CONTAIN ARTIFICIAL FLAVORINGS AND COLORINGS

A few commenters requested that we exclude any cereal that contains any artificial flavoring or colorings. We would like to solicit comments regarding this request and the rationale upon which such comments are based.

Interested persons may submit comments regarding the above issues to the Director, Special Supplemental Food Program (WIC), Food and Nutrition Service, U.S. Department of Agriculture, Washington, D.C. 20250. To be assured of consideration, such comments should be delivered in person or by mail postmarked on or before October 10, 1977. Copies of all written submissions received will be made available for public inspection in Room 4301, Food and Nutrition Service, 201 14th Street SW., Washington, D.C., during regular business hours (8:30 a.m. to 5 p.m.). All comments will be considered before final rules are published on these issues.

Several comments suggested changes to the regulations which are not in accordance with the provisions of section 17 of the Child Nutrition Act of 1966, as amended (42 U.S.C. 1786). Since the regulations must follow the statutory requirements these suggestions cannot be adopted. In arriving at the revised regulations set forth below, each of the comments received was carefully and fully considered. To the extent that the provisions of the final regulations are at variance with any of the views expressed in the comments, any suggestions or proposals contained in the comments are hereby denied and any objections are overruled for the reasons previously stated.

Accordingly, Part 246 is revised to read as follows:

Sec.
246.1 General purpose and scope.
246.2 Definitions.
246.3 Administration.
246.4 Selection of local agencies.
246.5 State Agency Plan of Program Operation and Administration.
246.6 Agreements with local agencies.
246.7 Certification of persons.
246.8 Supplemental foods.
246.9 Nutrition education.
246.10 Food delivery systems.
246.11 Financial management systems.
246.12 Program costs.
246.13 Program income.
246.14 Distribution of funds.
246.15 Redistribution of funds.

246.24 Fair hearing procedures for recipients.
246.25 Administrative appeal of State agency decisions.
246.26 Miscellaneous provisions.

AUTHORITY: Sec. 10, Pub. L. 89–642, 80 Stat. 889 (42 U.S.C. 1779); sec. 14, Pub. L. 94–105, 89 Stat. 518 (42 U.S.C. 1786).

§ 246.1 General purpose and scope.

(a) This part announces the policies and prescribes the regulations for the Special Supplemental Food Program for Women, Infants and Children, carried out by the U.S. Department of Agriculture (USDA) under section 17 of the Child Nutrition Act of 1966, as amended. Section 17 states that "The Congress finds that substantial numbers of pregnant women, infants and young children are at special risk in respect to their physical and mental health by reason of poor or inadequate nutrition or health care, or both. It is, therefore, the purpose of the program authorized by this section to provide supplemental nutritious food as an adjunct to good health care during such critical times of growth and development in order to prevent the occurrence of health problems."

(b) Section 17 authorizes payment of cash grants to health departments or comparable agencies of States; or to Indian tribes, bands or groups recognized by the Department of the Interior; or to the Indian Health Service (IHS) of the U.S. Department of Health, Education, and Welfare. These entities administer the WIC Program through public health or welfare agencies or private, nonprofit agencies of States, or Indian tribes, or IHS service units. Supplemental foods and nutrition education are provided, as set forth in this part, to infants, children, and pregnant, postpartum and breastfeeding women determined by a competent professional authority to be at nutritional risk due to inadequate nutrition and inadequate income, in order to improve their health status.

§ 246.2 Definitions.

For the purpose of this part and of all contracts, guidelines, instructions, forms, and other documents related hereto, the term:

"Breastfeeding women" means women up to one year postpartum who are breastfeeding their infants.

"Certification" means the use of criteria and procedures to assess and document each potential recipient's eligibility for the Program.

"Children" means persons who are at least one year of age but have not reached their fifth birthday.

"Clinic" means a facility where recipients are certified.

"Competent professional authority" means physicians, registered nurses, nutritionists, dietitians or State or local medically-trained health officials, or persons designated by physicians or State or local medically-trained health officials as being competent professionally to evaluate nutritional need and to authorize supplemental foods.

"Department" means the U.S. Department of Agriculture.

"Dual participation" means simultaneous participation by a recipient in the Program in more than one local agency, or participation in the Program and in the Supplemental Food Program (7 CFR Part 250), during the same period of time.

"Fiscal year" means the period of 12 calendar months beginning October 1 of any calendar year and ending September 30 of the following calendar year.

"FMC 74–4" means Federal Management Circular 74–4, which sets forth principles and standards for determining costs applicable to grants and contracts.

"FMC 74–7" means Federal Management Circular 74–7 which sets forth uniform standards in the administration of grants.

"FNS" means the Food and Nutrition Service of the U.S. Department of Agriculture.

"Food costs" means the acquisition cost of the supplemental foods provided to State or local agencies or to recipients, whichever receives the foods first.

"Food delivery system" means the method used by State and local agencies to provide supplemental foods to recipients under the Program.

"Food instrument" means a voucher, check, coupon or other document that evidences an obligation to a food vendor for supplemental foods delivered to a recipient.

"Health services" means ongoing, routine pediatric and obstetrical care such as infant and child care, prenatal and postpartum examinations, nutritional examinations or screening, diagnosis and treatment or referral for treatment.

"IHS" means the Indian Health Service of the U.S. Department of Health, Education and Welfare.

"Infants" means persons under one year of age.

"Local agency" means a public health or welfare agency or a private, nonprofit health or welfare agency, which directly, or through an agency or a physician with which it has contracted pursuant to § 246.4 of this part, provides health services to recipients. It also means an IHS service unit, or an Indian tribe, band or group which is recognized by the Department of the Interior and operates a health clinic or is provided health services by an IHS service unit.

"Members of populations" means persons with a common special need that do not necessarily reside in a specific geographic area, such as off-reservation Indians or migrant families.

"Nonprofit agency" means a private agency which is exempt from income tax under the Internal Revenue Code of 1954, as amended.

"Nutritional need" means one or more of the following:

(1) For a pregnant, or postpartum woman—

(i) Anemia;

(ii) High risk pregnancy, or a history of premature births, miscarriages, or high risk pregnancies;

(iii) Abnormal pattern of growth such as underweight or obesity;

(iv) Inadequate nutritional pattern.

(2) For an infant or child—

(i) Anemia;

(ii) Abnormal pattern of growth such as underweight, obesity or stunting; including for infants, a birth weight of 2500 grams or less;

(iii) Inadequate nutritional pattern;

(iv) Status as an infant (up to six months of age) of a mother who was a recipient during pregnancy.

(3) For a breastfeeding woman—

(i) Anemia of the breastfeeding woman or the infant she is breastfeeding;

(ii) Abnormal pattern of growth of the breastfeeding woman or the infant she is breastfeeding, such as underweight, obesity or stunting; including, for the infant, a birth weight of 2500 grams or less;

(iii) Inadequate nutritional pattern of the breastfeeding woman or the infant she is breastfeeding;

(iv) A history of premature births, miscarriages, or high risk pregnancies in the breastfeeding woman.

"Nutritional risk" means special risk by reason of both inadequate income and nutritional need.

"Operational and administrative costs" means those direct and indirect costs, exclusive of food costs, which State and local agencies determine to be necessary to support Program operations. Such costs include, but are not limited to, the cost of Program administration, monitoring, auditing, nutrition education, startup, outreach, certification, and developing and printing food instruments.

"Plan of Program Operation and Administration" means the document which describes the manner in which the State agency intends to implement and operate all aspects of Program administration within its jurisdiction.

"Postpartum women" means women up to six months after termination of pregnancy.

"Pregnant women" means women determined to have one or more fetuses in utero.

"Program" means the Special Supplemental Food Program for Women, Infants and Children authorized by section 17 of the Child Nutrition Act of 1966, as amended.

"Recipient participation" means the number of persons for whom supplemental foods or food instruments have been issued for the reporting period.

"Recipients" means pregnant women, breast-feeding women, postpartum women, infants, and children who are receiving supplemental foods or food instruments under the Program.

"SSFD" means the Special Supplemental Food Division of the Food and Nutrition Service of the U.S. Department of Agriculture.

"Secretary" means the Secretary of the U.S. Department of Agriculture.

"State" means any of the fifty States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Trust Territory of the Pacific Islands.

"State agency" means the State health department or agency with comparable responsibilities of a State; or an Indian tribe, band or group recognized by the Department of the Interior; or an intertribal council or group which is an authorized representative of Indian tribes, bands or groups recognized by the Department of the Interior and which has an ongoing relationship with such tribes, bands or groups for other purposes and has contracted with them to administer the Program; or the appropriate area office of the IHS.

"Supplemental foods" means foods which meet the specifications of this part.

§ 246.3 Administration.

(a) Within the Department, FNS shall act on behalf of the Department in the administration of the Program. Within FNS, SSFD and the Regional Offices are responsible for Program administration. FNS will provide assistance to State and local agencies and evaluate all levels of Program operations to assure that the goals of the Program are achieved in the most effective and efficient manner possible.

(b) The State agency is responsible for all operations under the Program within its jurisdiction and shall administer the Program in accordance with the requirements of this part, FMC 74–4, FMC 74–7, and FNS guidelines and instructions. The State agency shall provide guidance to local agencies on all aspects of Program operations.

(c) Each State agency desiring to take part under the Program shall annually enter into a written agreement with the Department for the administration of the

V 42166 AUG 26 77 UMI

Program in the jurisdiction of the State agency in accordance with the provisions of this part.

(d) The local agency shall provide Program benefits to recipients in the most effective and efficient manner, and shall comply with this part, FMC 74-4, FMC 74-7, and State agency and FNS guidelines and instructions.

§ 246.4 Selection of local agencies.

(a) *General.* This section sets forth the procedures the State agency shall perform in the selection of each agency which desires to operate under the Program.

(b) *Application of local agencies.* The State agency shall require each agency which desires approval as a local agency to submit an application which contains sufficient information to enable the State agency to make a determination as to the eligibility of that agency. The State agency shall make the determination in accordance with the eligibility requirements for a local agency as prescribed in this section. The State agency shall notify the agency of the status of its application within 30 days of receipt of the agency's application. If the application is denied, the State agency shall advise the agency of the reasons for denial and the right to appeal as set forth in § 246.25 of this part.

(c) *Program initiation and expansion.* The State agency shall ensure that all Program initiation and expansion within its jurisdiction are executed in accordance with the Affirmative Action Plan, which is established in accordance with paragraph (d) of this section and which is approved by FNS in the State agency's Plan of Program Operation and Administration. The State agency may fund new local agencies without FNS approval as long as the requirements of this part are met. However, the State agency shall submit to FNS for approval, as an amendment to the Plan of Program Operation and Administration, a description of any operations of the new local agency which are inconsistent with State agency operations as approved in the Plan of Program Operation and Administration. The State agency shall assure that there is no operation under the Program in the same geographic area as the Supplemental Food Program (7 CFR Part 250), except where the local agency serves members of populations.

(d) *Affirmative Action Plan.* The State agency shall establish, and when necessary update, an Affirmative Action Plan which provides, in priority order based on relative need, a list of all areas and populations, including a description of such populations, within the jurisdiction of the State agency (except areas under the Supplemental Food Program (7 CFR 250.14)) which are not now operating under the Program or are requesting expansion of their existing operations. The State agency shall submit its Affirmative Action Plan to FNS as a part of the State agency's Plan of Program Operation and Administration. The State agency shall meet the following requirements in connection with the Affirmative Action Plan:

(1) The Affirmative Action Plan shall state the criteria used to determine the relative need of areas and populations included in the Plan. These criteria may include infant mortality, low birth weight, low income and other criteria which are consistent with the intent of the authorizing legislation to make Program benefits an adjunct to good health care. Members of populations shall be given consideration in the Affirmative Action Plan based on criteria which identify the needs of the populations and not the geographic area where they reside. The Affirmative Action Plan may not be approved by FNS unless Indian and migrant populations which exist within the jurisdiction of the State agency are given consideration.

(2) The State agency shall fund those areas or populations most in need first, in accordance with their order of priority as listed in the Affirmative Action Plan. The selection criteria cited in paragraph (e) of this section shall be applied in each area or population before eliminating that area from consideration and serving the next area or population.

(3) The State agency shall provide a written justification for not funding the highest priority area or population, such as inability to administer the Program, lack of interest expressed for operating under the Program, or, for those areas or populations which are under consideration for expansion of an existing operation, a determination by the State agency that there is a greater need for funding in an area or population not operating under the Program.

(e) *Local agency priority system.* If the State agency has not received an application from a public or nonprofit, private health agency which can provide health and administrative services in the area next in line according to the Affirmative Action Plan, before funding a new local agency the State agency shall publish a notice in the media of that area. The notice shall include a brief explanation of the Program, a description of the local agency priority system cited in this paragraph and a request that potential local agencies notify the State agency of their interest within 30 days. Additionally, the State agency shall contact all potential agencies in an area to ensure that they are aware of the opportunity to apply for participation under the Program. If no agency expresses interest within 30 days, the State agency may then proceed with the selection of a local agency in the area next in line according to the Affirmative Action Plan. A State agency may give notice and consider applications in more than one area at the same time, but shall fund new local agencies in conformance with the sequential ranking of the Affirmative Action Plan. The State agency may select as a local agency the following types of agency arrangements, assigning priority to such arrangements in the following order:

(1) First consideration shall be given to a public or nonprofit health agency which can provide health and administrative services.

(2) Second consideration shall be given to a public or private, nonprofit health or welfare agency which must enter into a written agreement with another such agency for either health or administrative services.

(3) Third consideration shall be given to a public or private, nonprofit health agency which must enter into a written agreement with a private physician in order to provide health services to a specific category of recipient—women, infants or children.

(4) Fourth consideration shall be given to a public or private, nonprofit welfare agency which must enter into a written agreement with a private physician to provide health services.

(f) When a health and welfare agency comprise the local agency, both agencies shall in conjunction meet all the requirements of this part and shall enter into a written agreement which outlines all Program responsibilities of each agency. The agreement shall be approved by the State agency during the local agency application process, and shall be on file at both the State and local agency. No program funds shall be used to reimburse the health agency for the health services provided.

(g) When a health or welfare agency and private physicians comprise the local agency, the agency shall have a written agreement **with the private physicians** and shall provide guidance to the private physicians regarding their responsibilities under the Program. The agency shall advise the State agency on its application of the names and addresses of the private physicians participating and obtain State agency approval of the written agreement. A competent professional authority on the staff of the welfare agency shall be responsible for the certification of recipients. No Program funds shall be used to reimburse the private physicians for the health services provided.

§ 246.5 State agency Plan of Program Operation and Administration.

(a) *Requirements for the State agency Plan of Program Operation and Administration.* Each year the State agency shall submit to FNS for approval a State agency Plan of Program Operation and Administration for the following fiscal year. Approval of the Plan by FNS is a prerequisite to the payment of funds to the State agency for operation under the Program. Guidance for the preparation of the Plan shall be provided by FNS. The Plan and all amendments thereto shall be signed by the Chief Health Officer of the State agency (or his equivalent). The Plan shall provide the following:

(1) The names and addresses of the local agencies which are currently operating or are expected to operate during the fiscal year, the area or population served by each local agency, and the number of clinics of each local agency.

(2) A map indicating the areas and populations which will be served under the Program.

(3) A copy of the form to be used for the agreement between the State agency and local agencies.

(4) A current Affirmative Action Plan which is in accordance with the requirements of § 246.4(d).

(5) An estimate of recipient participation for the next fiscal year by category of women, infants, and children.

(6) A description of the financial management system, including a detailed breakdown of the proposed expenditure among the cost categories of operational and administrative costs and food costs.

(7) A description of the methods used to determine nutritional risk which shall include:

(i) For determinations of inadequate income, a description of the income standards prescribed or approved by the State agency for use by local agencies. Such description shall include the procedures used to determine income eligibility under those standards.

(ii) For determinations of nutritional need, a list of the specific nutritional need criteria which cites conditions and indices to be used to determine a person's nutritional need. These criteria shall be listed under each of the six levels of the priority system outlined in § 246.7(b)(2)(ii). The State agency may set further priorities within each nutritional need priority category, according to degree of nutritional risk or age of recipient. These priorities shall be listed in the Plan. If the State agency has no uniform list for use in all local agencies, it must provide in the Plan a description of the State agency criteria used to approve local agency nutritional need criteria.

(8) A plan for the provision of nutrition education services for the fiscal year, including the procedures which shall be used to meet the special nutrition education needs of migrants and Indians. The nutrition education portion of the Plan shall include:

(i) Measurable objectives consistent with the Program nutrition education goals;

(ii) A means of implementing each objective;

(iii) An evaluation component for each objective which includes a systematic procedure for recipient input; and

(iv) The results of the evaluations of the objectives for the prior fiscal year.

(9) A description, in detail, of the type of food delivery system to be used which complies with § 246.10, and where food instruments are used, a sample or facsimile of the food instrument.

(10) A plan for the detection of dual participation within the jurisdiction of the State agency.

(11) A description of the State agency monitoring procedures which comply with the requirements of § 246.20, including the number of reviews of local agencies performed in the last four quarters and the number planned for the upcoming fiscal year.

(12) A description of the State agency audit program procedures which comply with the requirements of § 246.21, including the number of audits performed of local agencies in the last four quarters, the number of local agencies audited in the last four quarters, and the number of audits planned and number of local agencies to be audited in the upcoming fiscal year.

(13) A description of the procedures used to comply with the requirements of title VI of the Civil Rights Act of 1964, including racial and ethnic participation data collection, public notification procedures and the annual civil rights compliance review process.

(14) A description of the resources and staff available to perform State agency responsibilities and to assist local agencies in Program operations, such as any necessary supervision, reviews, training and guidance.

(b) *Amendments.* At any time, the State agency may amend the Plan of Program Operation and Administration to accommodate any changes or budget increases requested. The State agency shall submit such amendments to FNS for approval.

(c) *Submission of Plan to the Governor.* All State agencies, except Indian State agencies, shall submit their Plan of Program Operation and Administration annually to the Governor or his delegated authority for comment as required by Circular A-95 (38 FR 32874), issued by the Office of Management and Budget, September 13, 1973. A period of 45 days from the date the Governor receives the Plan of Program Operation and Administration shall be afforded for such comments prior to submission to FNS. The comments shall be submitted in the Plan of Program Operation and Administration. If the Governor makes no comment, a statement to that effect shall be attached to the Plan of Program Operation and Administration. Amendments to the Plan of Program Operation and Administration need not be submitted to the Governor unless there is a significant change. Although not required, Indian State agencies are encouraged to consult area-wide Federal planning offices in the development of their Plan of Program Operation and Administration.

(d) *State agency notification.* FNS shall notify the State agency in writing of the status of its Plan of Program Operation and Administration within 30 days of the submission of a completed Plan.

(e) *Retention of copy.* A copy of the approved Plan of Program Operation and Administration shall be kept on file at the State agency for public inspection.

§ 246.6 Agreements with local agencies.

(a) The State agency shall enter into a signed written agreement with each local agency which sets forth the local agency's responsibilities under the Program as prescribed in this part. Copies of the agreement shall be kept on file at both the State and local agency for purposes of review and audit in accordance with §§ 246.20 and 246.21.

(b) Each Indian State agency shall assure that all local agencies under its jurisdiction serve primarily Indian populations.

(c) The agreement between the State agency and each local agency shall include provisions assuring that local agencies shall:

(1) Comply with all the fiscal and operational requirements prescribed by the State agency pursuant to this part and FNS guidelines and instructions;

(2) Have the competent professional authority and the facilities and equipment necessary to perform the certification procedures;

(3) Make available appropriate health services to recipients;

(4) Implement a food delivery system prescribed by the State agency pursuant to § 246.10 and approved by FNS;

(5) Provide on a timely basis to the State agency all required information regarding fiscal and program administration in accordance with this part;

(6) Maintain complete, accurate, documented and current accounting of all Program funds received and expended; and

(7) Maintain on file and have available for review and audit all criteria used for certification, including residence information, income standards or other standards used to determine eligibility for free or reduced cost health care and a list of the specific criteria used to determine nutritional need.

§ 246.7 Certification of persons.

(a) *State agency responsibilities.* In determining the eligibility of persons for supplemental foods, the State agency shall perform the following responsibilities:

(1) The State agency shall provide guidance to local agencies regarding eligibility requirements and certification procedures in accordance with this section.

(2) The State agency shall provide or approve standards used by local agencies to determine inadequate income.

(3) The State agency shall maintain a file of all economic standards authorized for use in determining eligibility for the Program, and information supporting approval of the standards, for the purpose of review and audit by the Department as set forth in §§ 246.20 and 246.21.

(4) The State agency shall provide local agencies with a list of specific criteria for use in determining nutritional need which is in accordance with the priorities listed in paragraph (b)(2)(ii) of this section, or approve such a list which is used by local agencies. Such list or lists shall be on file at the State agency.

(5) The State agency shall provide local agencies with a certification form meeting the requirements of paragraph (e) of this section, or approve such forms which are used by local agencies.

(b) *Certification of persons.* To be certified as eligible to receive the supplemental foods under the Program, infants, children and pregnant, post-

V 4 21 66 A AUG 26 77 UMI

partum and breastfeeding women shall meet the following requirements:

(1) *Residence.* They shall be residents of areas or members of populations served by the local agency. If the person is a member of a population and resides outside the local agency's service area, this information shall be noted in the person's certification file.

(2) *Nutritional risk.* They shall be at nutritional risk because of both inadequate income and nutritional need.

(i) *Inadequate income.* Recipients shall meet an income standard provided or approved by the State agency. If none are so provided or approved, they shall be eligible for health care free or at less than the full charge customarily made for health services by the local agency.

(ii) *Nutritional need.* A competent professional authority on the staff of the local agency shall determine if a person is in nutritional need through a medical or nutritional assessment. This determination may be based on data submitted by another competent professional authority. The person's height or length and weight shall be measured, and a hemoglobin or hematocrit test shall be performed if the necessary equipment for such tests is available. However, such hemoglobin or hematocrit tests are not required for infants under six months of age. The competent professional authority shall assure that those persons in greatest nutritional need are placed in the Program first. In determining a person's need for participation in the Program, the following priorities shall be applied when vacancies occur after a local agency has reached its maximum participation level:

(A) *Priority I.* Pregnant women, breastfeeding women and infants in nutritional need as demonstrated by hematological or anthropometric measurements, or other documented medical conditions which demonstrate the person's need for supplemental foods.

(B) *Priority II.* Infants (up to 6 months of age) of WIC recipients who participated during pregnancy, except for infants who qualify for Priority I.

(C) *Priority III.* Children in nutritional need as demonstrated by hematological or anthropometric measurements or other documented medical conditions which demonstrate the child's need for supplemental foods.

(D) *Priority IV.* Pregnant women, breastfeeding women, and infants in nutritional need because of an inadequate dietary pattern, as documented by a person qualified in such assessments.

(E) *Priority V.* Children in nutritional need because of an inadequate dietary pattern, as documented by a person qualified in such assessments.

(F) *Priority VI.* Postpartum women in nutritional need.

(c) *Regression in nutritional status.* Recipients may remain in the Program as long as they are eligible according to economic and residential criteria and there is a possibility of regression in nutritional status without the supplemental foods. However, the competent professional authority determining nutritional need may remove a recipient from the Program at a certification visit if that person, in the competent professional's judgment, is no longer believed to be in nutritional need, or if there are potential recipients waiting who, according to the priority system, are in greater nutritional need.

(d) *Schedule of certification.* The local agency shall certify persons at the time of their entrance into the Program, and at 6 month intervals thereafter, except that pregnant women shall be certified for the duration of their pregnancy and for 6 weeks postpartum. When there are funds available to serve a person, the local agency shall certify the person, or notify the person of his ineligibility for the Program, within 20 days of the person's first visit to the local agency to apply for participation in the Program. During the first visit the person's name, address and date shall be recorded on a certification form which shall be completed at the time of certification. A person who is determined eligible shall receive supplemental foods or food instruments within 10 days of notification of his eligibility.

(e) *Certification forms.* All certification data for each person shall be recorded on a form (or forms) which are provided by or approved by the State agency. The information on the form shall include the following:

(1) The person's name and address.

(2) Date of initial visit to apply for participation.

(3) The criteria used to determine the person's economic eligibility for the Program.

(4) The date of the certification.

(5) The person's height or length, weight and, if taken, hemoglobin and hematocrit test results.

(6) The person's specific nutritional need which qualifies him for the supplemental foods.

(7) The signature and title of the administrative personnel collecting the residence and income data, and the signature and title of the competent professional authority making the nutritional need determination.

(8) A statement saying, "This certification form is being made in connection with the receipt of Federal funds. Program officials may verify information on this form. Deliberate misrepresentation may subject you to prosecution under applicable State and Federal statutes."

(9) After the person has been advised of his rights and obligations as set forth in paragraph (f) of this section, the person or his parent or guardian shall read or be read the following statement and shall undersign on the form:

I have been advised of my rights and obligations under the Program. I certify that the information I have provided for my eligibility determination is correct, to the best of my knowledge.

(f) *Recipient rights and obligations.* The following sentences shall be read by, or read to, the person or his parent or guardian at the time of certification. Where a significant proportion of the area served by a local agency is composed of non-English or limited English speaking persons who speak the same language, the sentences shall be stated to such persons in a language they understand.

(1) Standards for participation in the Program are the same for everyone regardless of race, color, creed, national origin, political beliefs, or sex.

(2) You have the opportunity to appeal any decision made by the local agency regarding your eligibility for the Program.

(3) This local agency will make health services available to all recipients who participate in the Program. You are encouraged to participate in these health services.

(g) *Retention of certification data.* For each person, all pertinent certification data, including the person's certification forms, shall be kept on file. Such files shall be maintained for Federal or State audit or review for a period of three years following the date of submission of the final expenditure report for the period for which the records pertain. The provisions of § 246.16(c)(2) shall be applicable to such files, including the longer retention period which may be required by FNS under certain circumstances.

(h) *Notice of recipient ineligibility or expiration of eligibility.* The following responsibilities shall be performed by the State or local agency:

(1) A person found ineligible for the Program during a certification visit shall be advised in writing of his ineligibility, the reasons for his ineligibility and his right to a fair hearing.

(2) A person found ineligible for the Program at any time after his certification shall be advised, in writing, 15 days before termination of his eligibility, of the reasons for his ineligibility and his right to a fair hearing.

(3) Each recipient shall be notified shortly before the expiration of his certification period that his eligibility for the Program is about to expire.

(i) *Certification of migrant farmworker recipients and dependents.* The State agency may allow the local agencies under its jurisdiction to accept verification of certification from migrant farmworker recipients, or their dependents, who have been participating in the Program in another local agency within or outside of the jurisdiction of the State agency. The verification of certification is valid until the certification period expires. The verification of certification shall include the date certification was performed, the nutritional need criteria of the recipient, the name of the recipient, the date the certification period expires, and the signature of the local agency official.

§ 246.8 Supplemental foods.

(a) *General.* This section prescribes the requirements for providing supplemental foods to recipients.

(b) *State agency responsibilities.* State agencies shall:

(1) Identify foods which are acceptable for use under the Program in accordance with the requirements of this section and provide a list of acceptable foods and maximum monthly quantities to local agencies, State auditors and Department auditors; and

(2) Ensure that local agencies are able to make available at least one food from each group in each food package listed in paragraph (d) of this section. However, this does not mean that the local agency must provide each recipient with a food from each food group.

(c) *Local agency responsibilities.* The State agency shall ensure that the local agencies:

(1) Make available to recipients the supplemental foods, as authorized in paragraph (d) of this section; and

(2) Designate a competent professional authority to prescribe supplemental foods in quantities necessary to satisfy the individual nutritional needs of each recipient, taking into consideration, at each certification, the recipient's age and dietary needs. In the case of breastfeeding infants, consideration shall be given as to whether the mother's breast milk alone is sufficient for the infant's dietary needs. The amount of supplemental foods shall not exceed the maximum quantities specified in this section.

(d) *Food packages.* There are three food packages available under the Program which may be provided to recipients. The authorized supplemental foods shall be prescribed from food packages according to the category and nutritional need of recipient. The food packages are as follows:

NOTE.—The metric units given are mathematical conversions. If packaging practices change, the authorized food quantities will be revised accordingly:

(1) *Food Package I—Infants.* (i) Iron-fortified formula intended for use by infants, which is a complete formula not requiring the addition of any ingredients other than water prior to being served in a liquid state, and which contains at least 10 milligrams of iron per liter of formula at standard dilution which supplies 67 kilocalories per 100 milliliters, i.e., approximately 20 kilocalories per fluid ounce of formula at standard dilution. Concentrated liquid or powdered formula shall be provided, except that ready-to-feed formula may be authorized when the competent professional authority determines and documents that there is an unsanitary or restricted water supply, that there is poor refrigeration or that the person who is caring for an infant may have difficulty in correctly diluting concentrated liquid or powdered formula.

Substitutes. The following types of milk may be substituted for all or part of the iron-fortified formula for any infant beginning at six months of age: Pasteurized whole fluid milk which contains 400 International Units of vitamin D per quart (.946 liters); or evaporated milk which contains 400 International Units of vitamin D per reconstituted quart (.946 liters), or, in Puerto Rico, the Virgin Islands, Alaska, Guam, Hawaii, and the Trust Territory of the Pacific Islands only, dry whole milk which contains 400 International Units of vitamin D per reconstituted quart (.946 liters). However, the recipient's parent or guardian shall be informed that the substitution will result in a reduction of the iron content in the infant food package.

(ii) Infant cereal which contains a minimum of 45 milligrams of iron per 100 grams of dry cereal.

(iii) Single strength fruit juice which contains a minimum of 30 milligrams of vitamin C per 100 milliliters; or concentrated fruit juice which contains a minimum of 30 milligrams of vitamin C per 100 milliliters of reconstituted juice; or infant juice which contains a minimum of 30 milligrams of vitamin C per 100 milliliters.

(iv) The maximum quantity of supplemental foods authorized per month is as follows:

Food	*Quantity*
Iron fortified infant formula:	
Concentrated liquid formula	403 fluid oz. (11.919 l).
Powdered formula	May be substituted at the rate of 8 lb (3.6 kg)/403 fluid oz. (11.919 l) of concentrated liquid formula.
Ready-to-feed liquid formula.	May be substituted at the rate of 26 fluid oz. (.767 l)/13 fluid oz. (.384 l) of concentrated liquid formula.
Whole fluid milk	May be substituted for formula beginning at age 6 mo. at the rate of 1 qt. (.946 l) of whole fluid milk per 13 fluid oz. (.394 l) of concentrated liquid formula.
Evaporated milk	May be substituted for milk beginning at age 6 mo. at the rate of 13 fluid oz. (.384 l) per 13 fluid oz. (.384 l) of concentrated liquid formula.
Whole dry milk	In Puerto Rico, the Virgin Islands, Alaska, Guam, Hawaii, and the Trust Territory of the Pacific Islands only, may be substituted for formula beginning at age 6 mo. at the rate of 1 lb. (.45 kg.)/39 fluid oz. (1 15 l) of concentrated liquid formula.
Infant cereal	24 oz., dry (680.39 g).
Juices:	
Single strength juices	92 fluid oz. (2.721 l).
Frozen, concentrated juices.	May be substituted as long as the reconstituted volume is no greater than the amount authorized for single strength juices.
Infant juice	May be substituted at the rate of 63 fluid oz. (1.863 l)/92 fluid oz. (2.721 l) of single strength juice.

(2) *Food Package II Children and pregnant, postpartum or breastfeeding women.* (i) Pasteurized whole fluid milk which is flavored or unflavored and which contains 400 International Units of vitamin D per quart (.946 liters); or evaporated milk which contains 400 International Units of vitamin D per reconstituted quart (.946 liters); or pasteurized skim or lowfat fluid milk which is flavored or unflavored and which contains 400 International Units of vitamin D and at least 1500 International Units of vitamin A per fluid quart (.946 liters) or the minimum amount required by the Food and Drug Administration, whichever is greater; or nonfat dry milk which contains 400 International Units of vitamin D and at least 2000 International Units of vitamin A per reconstituted quart (.946 liters); or pasteurized cultured buttermilk which contains 400 International Units of vitamin D and at least 1500 International Units of vitamin A per fluid quart (.946 liters); or in Puerto Rico, the Virgin Islands, Alaska, Guam, Hawaii and the Trust Territory of the Pacific Islands only, dry whole milk which contains 400 International Units of vitamin D per reconstituted quart (.946 liters); or domestic cheese (pasteurized process American, Monterey Jack, Colby, natural cheddar or Swiss).

(ii) Cereal (hot or cold) which contains a minimum of 28 milligrams of iron per 100 grams of dry cereal.

(iii) Single strength fruit juice or vegetable juice, or both, which contains a minimum of 30 milligrams of vitamin C per 100 milliliters; or concentrated fruit or vegetable juice, or both, which contains a minimum of 30 milligrams of vitamin C per 100 milliliters of reconstituted juice.

(iv) Eggs, or dried egg mix.

(v) The maximum quantity of supplemental foods authorized per month is as follows:

Food	*Quantity*
Whole fluid milk	28 qt. (26.488 l).
Evaporated milk	May be substituted for whole fluid milk at the rate of 13 fluid ounces (.384 l) per quart (.946 l) of whole fluid milk.
Skim or lowfat milk	May be substituted for whole fluid milk on a quart-for-quart (.946 l) basis.
Nonfat dry milk	May be substituted for whole fluid milk at the rate of 1 pound (.45 kg) per 5 qt (4.73 l) of whole fluid milk.
Cultured buttermilk	May be substituted for whole fluid milk on a quart-for-quart (.946 l) basis.
Whole dry milk	In Puerto Rico, the Virgin Islands, Alaska, Guam, Hawaii, and the Trust Territory of the Pacific Islands only, may be substituted for whole fluid milk at the rate of 1 lb (.45 kg) per 3 qt (2.838 l) of whole fluid milk.
Cheese	May be substituted for whole fluid milk at the rate of 1 lb. (.45 kg) per 3 qt. (2.838 l) of whole fluid milk.
Eggs	2½ doz.
Dried egg mix	May be substituted at the rate of 2 lbs (.9 kg) egg mix per 2½ doz. fresh eggs.
Cereals (hot or cold)	36 oz., dry (1,020 g.).
Juices:	
Single strength juices	276 fluid ounces (8.142 l).
Frozen, concentrated juices	May be substituted as long as the reconstituted volume is no greater than the amount authorized for single strength juices.

V 42166 AUG 26 77 7 UMI

(3) *Food Package III—Children with special dietary needs.* Children with special dietary needs may receive the following supplemental foods if the physician determines and documents that such a child's condition precludes the use of the supplemental foods specified in paragraph (d)(2) of this section.

(i) Iron-fortified infant formula which is a complete formula not requiring the addition of any ingredients other than water prior to being served in a liquid state and which contains at least 10 milligrams of iron per liter at standard dilution which supplies 67 kilocalories per 100 milliliters, i.e., approximately 20 kilocalories per fluid ounce of formula at standard dilution. Concentrated liquid or powdered formula shall be provided except that ready-to-feed liquid formula may be authorized when the competent professional authority determines and documents that there is an unsanitary or restricted water supply, that there is poor refrigeration or that the person caring for a child may have difficulty in correctly diluting concentrated liquid or powdered formula.

(ii) Cereal (hot or cold) which contains a minimum of 28 milligrams of iron per 100 grams of dry cereal.

(iii) Single strength fruit juice or vegetable juice, or both, which contains a minimum of 30 milligrams of vitamin C per 100 milliliters; or concentrated fruit or vegetable juice, or both, which contains a minimum of 30 milligrams of vitamin C per 100 milliliters of reconstituted juice.

(iv) The maximum quantity of supplemental foods authorized per month is as follows:

Foods	Quantities
Iron-fortified infant formula:	
Concentrated liquid formula	403 fluid ounces (11.919 l).
Powdered formula	May be substituted at a rate of 8 lb. (3.6 kg.) per 403 fluid ounces (11.919 l) concentrated liquid formula.
Ready-to-feed liquid formula	May be substituted at a rate of 26 fluid ounces (.767 l) per 13 fluid ounces (.384 l) of concentrated liquid formula.
Cereals (hot or cold)	36 ounces, dry (1020 grams).
Juices:	
Frozen concentrated juices	138 fluid ounces (4.082 l).
Single strength juices	May be substituted as long as the reconstituted volume is no greater than the amount authorized for single strength juice.

§ 246.9 Nutrition education.

(a) *General.* Nutrition education shall be thoroughly integrated into Program operations. Nutrition education shall be designed to be easily understood by individual recipients and shall bear a practical relationship to their nutritional needs and household situations.

(b) *Goals.* Nutrition education shall be based on the following two broad goals:

(1) To emphasize the relationship of proper nutrition to the total concept of good health, with special emphasis on the nutritional needs of pregnant, postpartum, and breastfeeding women, infants and children under five years of age; and

(2) To assist the individual at nutritional risk in obtaining a positive change in food habits, resulting in improved nutritional status and in the prevention of nutrition-related problems through maximum use of the supplemental and other nutritious foods. This use is to be within the context of ethnic, cultural and geographic preferences and with consideration given to environmental limitations.

(c) *State agency responsibilities.* The following are the State agency responsibilities for nutrition education:

(1) When developing nutrition education services for the Program, the State agency shall take into consideration local agency plans and needs, and shall coordinate planning and implementation of Program nutrition education activities with those provided by other sources.

(2) The State agency shall utilize at least one professional person on a full-time, part-time, or consulting basis who is trained as a nutritionist (M.S. or M.P.H.) or dietitian (registered or eligible to take the registration examination). This person shall have the responsibility to plan, direct and coordinate nutrition education under the Program. Where necessary, this person shall provide instructional and technical assistance to local agencies, and shall also provide inservice training in nutrition and instruction techniques for the local agencies' staff.

(3) The State agency shall ensure that the local agency fully performs its responsibilities as set forth in paragraph (d) of this section.

(d) *Local agency responsibilities.* (1) The local agency shall make nutrition education available to all adult recipients and to parents or guardians of infant and child recipients. Where appropriate, nutrition education for child recipients is encouraged.

(2) The local agency shall direct Program funds for nutrition education to the benefit of recipients and local agency staff members in accordance with this part and FNS guidelines.

(3) The local agency shall conduct nutrition education in a manner consistent with the State agency's nutrition education portion of the Plan of Program Administration.

(4) The local agency shall include the following subject matter areas in the instruction given to recipients:

(i) An explanation of the recipient's nutritional need condition, and the importance of the supplemental foods being consumed by the recipient for whom they are prescribed rather than the whole family;

(ii) Reference to the special nutritional needs of recipients and ways to provide them with adequate diets;

(iii) An explanation of the Program as a supplemental rather than a total food program;

(iv) Information on the use of the supplemental foods and on the nutritional value of these foods; and

(v) An explanation of the importance of health care.

§ 246.10 Food delivery systems.

(a) *General.* This section sets forth design and operational requirements for State and local agency food delivery systems.

(b) *Uniform food delivery systems.* The State agency may operate up to three types of food delivery systems: retail purchase, home delivery or direct distribution. Within ten months of the effective date of this part, each type of food delivery system shall be uniform within the jurisdiction of the State agency. When used, food instruments shall be uniform within each type of system.

(c) *State agency responsibilities.* Each State agency is responsible for the fiscal management of, and accountability for, food delivery systems under its jurisdiction and shall comply with the following requirements:

(1) The State agency shall describe in the Plan of Program Operation and Administration all food delivery systems to be used by local agencies under its jurisdiction. FNS may, for a stated cause and by written notice, require revision of a proposed or operating food delivery system and shall allow a reasonable time for the State agency to effect such a revision.

(2) The State agency shall ensure payment to food vendors for food costs incurred by the food vendor in providing supplemental foods to recipients. Actual payment to food vendors may be made by local agencies.

(3) The State agency shall ensure that all food vendors participating in the Program enter into written agreements with the State or local agency. Copies of these agreements shall be on file at the State agency. The agreements shall require the food vendors to:

(i) Ensure that they will provide only the supplemental foods specified in this part when providing foods under the Program;

(ii) Provide supplemental foods at the current price or at less than the current price charged to customers other than recipients;

(iii) When food instruments are used, submit those food instruments for payment within the allowed time limit and accept food instruments from recipients only within the allowable time limit; and

(iv) Comply with the nondiscrimination requirements of Department regulations (7 CFR Part 15).

(4) The State agency shall ensure that food vendors are provided guidance concerning the authorized supplemental foods and applicable FNS guidelines and instructions. This shall include, but not be limited to:

(i) On-site reviews by State or local agency personnel of those food vendors accepting food instruments;

(ii) Transmittal of pertinent information by State or local agencies to participating food vendors; and

(iii) State or local agency training sessions for participating food vendors.

(5) The State agency shall implement a system of management review to limit food vendor and recipient abuses of the Program. The system shall include the following:

(i) The State agency shall ensure that food vendors, after exhausting all rights outlined in § 246.25, are suspended from participation under the Program for a reasonable period of time, not to exceed three years, upon determination that they have committed any of the following abuses of the Program: Providing cash, unauthorized foods, or other items of value to recipients in lieu of authorized supplemental foods; providing less food than called for on and payable with the food instrument; and charging the Program more for supplemental foods than charged other customers for the same food items. Other abuses by food vendors may be dealt with at the discretion of the State agency. Adequate procedure for an appeal from a suspension from participation under the Program shall be provided by the State agency. A food vendor's disqualification from participation in any other FNS program may be grounds for suspension from the Program without a hearing procedure. The food vendor's privilege of serving the Program may not be reinstated until the other program, with regard to which the food vendor was originally disqualified, reinstates the food vendor's privilege.

(ii) The State agency shall establish procedures designed to control recipient abuse of the Program. Recipient abuse includes, but is not limited to, sale of supplemental foods or food instruments to (or exchange with) other individuals or entities and receipt from food vendors of cash or credit toward purchase of unauthorized food, or other items of value in lieu of authorized food. The State agency shall establish sanctions for recipient abuse. Such sanctions may, at the State agency's discretion, include suspension or removal from the Program. Warnings may be given prior to the imposition of sanctions. Before a recipient is suspended or removed from the Program for alleged abuse, that recipient shall be given full opportunity to appeal a suspension or removal as set forth in § 246.24.

(iii) The provision of sanctions for Program abuse to be imposed on food vendors and recipients shall not be construed as excluding or replacing any criminal or civil sanctions or other remedies that may be applicable under any Federal and State statute or local ordinance.

(6) The State agency shall ensure that the food delivery system is compatible with the delivery of health and nutrition education services to the recipients.

(7) The State agency shall control the receipt and issuance of supplemental foods and food instruments.

(8) The State agency shall reconcile the records of receipt, issuance and redemption of supplemental foods or food instruments in accordance with § 246.11 and identify and document the expired, unredeemed food instruments and their value.

(9) The State agency shall ensure that supplemental foods are not issued for use in institutions, such as day care centers.

(10) The State agency shall ensure that recipients sign upon the receipt of supplemental foods or food instruments. This requirement shall not pertain to systems which mail food instruments.

(11) The State agency shall ensure that no conflict of interest exists between any local agency and the food vendor or vendors within the local agency's jurisdiction.

(12) The State agency shall ensure that all local agency food delivery systems are consistent with the requirements of this section.

(d) *Retail purchase systems.* Retail purchase food delivery systems are systems in which recipients obtain supplemental foods by submitting a food instrument to local retail outlets. All retail purchase food delivery systems shall meet the following requirements:

(1) The State agency shall use uniform food instruments within its jurisdiction. The State agency is responsible for the design and printing of the uniform food instruments, and control of the serialization.

(2) The State agency shall develop guidelines for the mailing of food instruments to recipients. Food instruments may be mailed to recipients on a local agency-wide basis only if approved by the State agency. In making its determination regarding the mailing of food instruments by a local agency, the State agency shall consider participation and hardships which may be encountered by the target population of the local agency if food instruments are not mailed. The State agency shall approve a local agency's request for the mailing of food instruments if accountability is ensured and if either a reasonable level of health and nutrition education services can be provided, or the State agency determines that persons in need of the Program in rural areas will be unable to participate in the program if food instruments are not mailed to them. Mailing food instruments on an individual recipient basis shall be permitted only if:

(i) Individual recipients encounter difficulties in personally obtaining food instruments for such reasons as illness, nearness to termination of pregnancy, inclement weather conditions, distances to travel, high cost of travel, or inability to get to the local agency during business hours;

(ii) The reasons for such an individual determination are documented by the State or local agency in the recipient's certification file; and

(iii) The mailing of food instruments to the recipient is discontinued if the recipient's initial hardship is resolved.

(3) All food instruments shall have, clearly indicated on the face, the following:

(i) The first date from which the food instrument may be used by the recipient to obtain supplemental foods.

(ii) The last date for which the recipient may use the food instrument to obtain supplemental foods. This date shall be either 30 days from the date specified in subdivision (i) of this subparagraph or the end of the month for which the food instrument is valid.

(iii) An expiration date by which the food vendor shall be required to submit the food instrument for payment. This date shall be 60 days from the date specified in subdivision (ii) of this subparagraph.

(4) Food vendors may not be paid for food instruments submitted after the expiration date without the approval of FNS.

(5) All food instruments shall have clearly printed on the face, a unique and sequential serial number.

(6) All food instruments shall have clearly indicated on the face, a maximum purchase value.

(7) The State or local agency may not issue to any recipient more than three months supply of food instruments at one time.

(8) The State or local agency shall enter into agreements with more than one food vendor in each local agency service area, unless the State agency determines that it is impossible to enter into agreements with more than one food vendor in the area because of a lack of retail outlets.

(9) The State agency shall ensure that recipients are provided food free of charge. A food instrument may not have a maximum purchase price which is lower than the price of the food for which it will be used. Also, the State agency may not reimburse the food vendor for more than the actual purchase price of the supplemental foods.

(e) *Home food delivery systems.* Home food delivery systems are systems in which food is delivered to the recipient's home. Systems for home delivery of food shall provide for:

(1) Uniform food instruments, where applicable, which comply with all requirements set forth under paragraph (d) of this section;

(2) Procurement of supplemental foods, in accordance with §246.18 which may entail measures such as the purchase of food in bulk lots by the State agency and the use of discounts that may be available to States; and

(3) The accountable delivery of supplemental foods to recipients.

(f) *Direct distribution systems.* Direct distribution food delivery systems are systems in which recipients pick up food from storage facilities operated by the State or local agency. Systems for direct distribution of food shall provide for:

(1) Uniform food instruments, where applicable, which comply with all requirements set forth under paragraph (d) of this section;

(2) Adequate storage and insurance coverage that minimizes the dangers of

V 42166 AUG 26 77 UMI

loss due to theft, infestation, fire, spoilage, or other causes;

(3) Adequate inventory control of food received, in stock, and issued;

(4) Procurement of supplemental foods in accordance with § 246.18, which may entail measures such as purchase of food in bulk lots by the State agency and the use of discounts that may be available to States;

(5) The availability of Program benefits to recipients and potential recipients who live at great distances from storage facilities; and

(6) The accountable delivery of supplemental foods to recipients.

§ 246.11 Financial management systems.

(a) The State agency shall maintain a financial management system which provides accurate current and complete disclosure of the financial status of the Program and includes an accounting for all Program funds received and expended each fiscal year.

(b) The State agency shall maintain its financial accounts in a manner sufficient to permit the preparation of the reports required in § 246.16.

(c) The State agency shall maintain records which identify adequately the source and application of funds expended for Program activities. These records shall contain, but are not limited to, information pertaining to authorizations, receipt of funds, obligations, unobligated balances, assets, liabilities, outlays, and income.

(d) The State agency shall maintain effective control over and accountability for all Program funds, property, and other assets.

(e) The State agency shall compare current and projected funding needs, and develop cost data that identify trends for future budget planning and Program funds control, including, but not limited to, comparisons of actual Program expenditures with budgeted amounts and the development of financial data which provide average food costs and operational and administrative costs.

(f) The State agency shall implement procedures which ensure prompt and accurate payment of allowable costs, and ensure the allowability and allocability of costs in accordance with the cost principles and standard provisions of this part, FMC 74–4 and FNS guidelines and instructions.

(g) The State agency shall implement procedures which accurately identify obligated Program funds at the time obligations are made.

(h) The State agency shall implement procedures which ensure timely and appropriate resolution of audit findings and recommendations.

(i) The State agency shall observe the national goal of expanding the opportunities for minority business enterprises, by encouraging the use of minority-owned banks.

(j) The State agency shall, where applicable, implement procedures to reconcile the number of food instruments issued with food instruments redeemed, and the value of individual food instruments issued with the value of individual food instruments redeemed.

(k) The State agency shall, where applicable, implement procedures to identify unredeemed, expired and unexpired, food instruments and their issuance value, and to make the appropriate adjustments to records and reports on obligations and expenditures.

(l) The State agency shall have procedures for minimizing the time elapsing between the transfer of cash and its disbursement at both State and local agencies.

(m) The State agency shall ensure that all local agencies develop and implement a financial management system consistent with the requirements prescribed by the State agency pursuant to the requirements of this section.

§ 246.12 Program costs.

(a) *General.* The two categories of allowable costs under the Program are as follows:

(1) *Food costs.* Food costs shall not exceed the food vendor's customary price for supplemental foods delivered to the State agency, the local agency, or the recipient, whichever is the first to receive the supplemental foods.

(2) *Operational and administrative costs.* FNS shall reimburse State agencies for allowable operational and administrative costs up to 25 percent of the actual foods costs incurred, except that funds other than Program funds used to purchase food under the Program may not be used as a base for computing the State's allowance for operational and administrative costs. The two types of operational and administrative costs are:

(i) *Direct costs.* Those direct costs which are allowable under FMC 74–4; and

(ii) *Indirect costs.* Those indirect costs which are allowable under FMC 74–4. Food costs may not be used as a basis for computing indirect costs.

(b) *Specific allowable costs.* The following items of cost are specifically identified as illustrative of costs allowable under the Program:

(1) Food costs.

(2) The cost of nutrition education services provided to recipients and parents and guardians of recipients, and used for training of local agency staff members.

(3) The cost of certification procedures including:

(i) Laboratory fees incurred for tests conducted to determine the eligibility of persons to participate in the Program; and

(ii) Expendable medical supplies necessary to determine the eligibility of persons to participate in the Program.

(4) The cost of outreach services.

(5) The cost of administering the food delivery system.

(6) The cost of capital expenditures; *Provided*, That capital expenditures over $2500 are approved by FNS.

(c) *Specific unallowable cost.* The cost of nonexpendable medical equipment is not allowable.

§ 246.13 Program income.

(a) Interest earned on Program funds at the State or local levels shall be used in accordance with Attachment E, FMC 74–7.

(b) Proceeds from the sale of personal property purchased in whole or in part with Program funds shall be handled in accordance with Attachment N, FMC 74–7.

(c) Royalties received from copyrights and patents during the grant period shall be retained by the State agency and be added to the funds already committed to the Program. After termination or completion of the grant, the Federal share of royalties in excess of $200 received annually shall be returned to FNS.

§ 246.14 Distribution of funds.

(a) This section prescribes the procedures for the distribution by FNS of available funds to participating State agencies and by State agencies to local agencies. All Program funds shall be used only for Program purposes. As a prerequisite to the receipt of funds, the State agency shall have executed an agreement with the Department and shall have received approval of its Plan of Program Operation and Administration.

(b) All funds made available to the Department for the Program in any fiscal year shall be provided by FNS to participating State agencies by means of Letters of Credit unless other funding arrangements are made with FNS, except that sufficient funds shall be withheld for funding Federal operating expenses. Program funds shall be used by State agencies to cover those allowable and documented Program costs, as defined in § 246.12, which are incurred by the State agency and participating local agencies within its jurisdiction.

(c) All funds provided by FNS to a participating State agency shall be made available by the State agency to local agencies within its jurisdiction, on the basis of claims submitted monthly, with the exception of those allowable food costs and operational and administrative costs deemed necessary and appropriate for use by the State agency in administering the Program. Funds provided to local agencies may be used only to cover allowable food costs and operational and administrative costs incurred by the local agencies.

(d) Distribution of funds to State agencies shall reflect any changes necessary due to the recovery of unspent funds and shall be consistent with § 246.15.

§ 246.15 Redistribution of funds.

(a) FNS may recover and redistribute funds from a State agency under any of the following conditions:

(1) If FNS determines, through a review of the State agency's reports, program or financial analysis, monitoring, audit or otherwise, that the State agency's performance is inadequate or that the State agency has failed to comply with this part or FNS guidelines and instructions.

(2) If FNS determines, based on State agency reports of expenditures and operations, that the State agency is not expending funds at a rate commensurate with the amount of funds distributed or provided for expenditure under the Program.

(3) If FNS determines that a State agency is not providing full and timely reports in accordance with § 246.16.

(b) FNS shall effect such recoveries of funds through adjustments in the amount of funds provided under the Program.

§ 246.16 Records and reports.

(a) *Recordkeeping requirements.* Each State and local agency shall maintain full and complete records concerning Program operations which comply with the following requirements:

(1) Records shall include, but not be limited to, information pertaining to financial operations, food delivery systems, food instrument issuance and redemption, equipment purchases and inventory, certification procedures, nutrition education, civil rights and fair hearing procedures.

(2) All records shall be retained for three years following the date of submission of the final expenditure report for the period to which the reports pertain. However, FNS may, by written notice, require longer retention of any records deemed by it to be necessary for resolution of an audit or of any litigation. If FNS deems any of the Program records to be of historical interest, it may require the State or local agency to forward such records to FNS whenever either agency is disposing of them. All records, except medical case records of individual recipients (unless they are the only source of certification data), shall be available during normal business hours for representatives of the Department and of the General Accounting Office of the United States to inspect, audit, and copy. Any reports resulting from such examinations shall not divulge names of individuals.

(b) *Financial reports.* All financial data shall be submitted as required by FNS, at a frequency prescribed by FNS.

(c) *Program reports.* All program performance data shall be submitted as required by FNS, at a frequency prescribed by FNS.

(d) *Civil rights.* Each local agency participating under the Program shall submit a report of racial and ethnic participation data, at a frequency prescribed by FNS.

(e) *Audit acceptability of reports.* To be acceptable for audit purposes, all financial and program performance reports shall be traceable to source documentation.

(f) *Certification of reports.* Financial and program reports shall be certified as to their completeness and accuracy by the person given that responsibility by the State agency.

(g) *Use of Reports.* FNS shall use State agency reports to measure progress in achieving objectives set forth in the Plan of Program Operation and Administration. If it is determined, through review of State agency reports, program or financial analysis, or an audit, that a State agency is not meeting the objectives set forth in its Plan of Program Operation and Administration, FNS may request additional information including, but not limited to, reasons for the failure to achieve its objectives.

§ 246.17 Grant closeout procedures.

(a) *General.* State agencies shall submit preliminary and final grant closeout reports for each fiscal year or part thereof. All obligations shall be liquidated before final closure of a fiscal year grant. Obligations shall be reported for the fiscal year in which they occur.

(b) *Grant closeout reports.* State agencies:

(1) Shall submit to FNS, within 30 days after the end of the fiscal year, preliminary financial reports which show cumulative actual expenditures and obligations for the fiscal year, or part thereof, for which Program funds were made available.

(2) Shall submit to FNS, within 90 days after the end of the fiscal year, final fiscal year closeout reports; and

(3) May submit revised closeout reports at any time. However, FNS shall not be responsible for reimbursing unpaid obligations later than one year after the close of the fiscal year in which they were incurred.

(c) *Termination for cause.* FNS may terminate a State agency's participation under the Program, in whole or in part, whenever FNS determines that the State agency has failed to comply with the conditions prescribed in this part, and in FNS guidelines and instructions. FNS shall promptly notify the State agency in writing of the termination and the reasons for the termination, together with the effective date. A State agency shall terminate a local agency's participation under the Program by written notice whenever it is determined by FNS or the State agency that the local agency has failed to comply with the requirements of the Program. When a State agency's participation under the Program is terminated for cause, any payments made to the State agency, or any recoveries by FNS from the State agency, shall be in conformance with the legal rights and liabilities of the parties.

(d) *Termination for convenience.* FNS or the State agency may terminate the State agency's participation under the Program, in whole or in part, when both parties agree that continuation under the Program would not produce beneficial results commensurate with the further expenditure of funds. The two parties shall agree upon the termination conditions, including the effective date thereof and, in the case of partial termination, the portion to be terminated. The State agency shall not incur new obligations for the terminated portion after the effective date, and shall cancel as many outstanding obligations as possible. FNS shall allow full credit to the State agency for the Federal share of the noncancellable obligations, properly incurred by the State agency prior to termination.

§ 246.18 Procurement and property management standards.

(a) State and local agencies shall comply with the requirements of FMC 74–7 and FMC 74–4 procedures for the procurement and allowability of food in bulk lots, supplies, equipment and other services with Program funds. These requirements are adopted by FNS to ensure that such materials and services are obtained for the Program in an effective manner and in compliance with the provisions of applicable law and executive orders.

(b) The standards contained in FMC 74–7 and FMC 74–4 do not relieve the State or local agency of the responsibilities arising under its contracts. The State agency is the responsible authority, without recourse to FNS, regarding the settlement and satisfaction of all contractual and administrative issues arising out of procurements entered into in connection with the Program. This includes, but is not limited to: Disputes, claims, protests of award, source evaluation, or other matters of a contractual nature. Matters concerning violation of law are to be referred to such local, State or Federal authority as may have proper jurisdiction.

(c) The State or local agency may use its own procurement regulations which reflect applicable State and local regulations, provided that procurements made with Program funds adhere to the standards set forth in FMC 74–4 and FMC 74–7.

(d) State and local agencies shall observe the standards prescribed in FMC 74–7, Attachment N, in their utilization and disposition of property acquired in whole or in part with Program funds.

§ 246.19 Claims.

If FNS determines that any Program funds provided to a State agency for food delivery or administrative purposes were, through State agency or local agency negligence or fraud, misused or otherwise diverted from Program purposes, a claim shall be made by FNS against the State agency, and the State agency shall pay promptly to FNS a sum equal to the amount of the administrative funds or the value of supplemental foods or food instruments so misused or diverted. Further, if FNS determines that any part of the money received by a State agency, or supplemental foods purchased or food instruments, were lost as a result of thefts, embezzlements, or unexplained causes, the State agency shall, on demand by FNS, pay to FNS a sum equal to the amount of the money or the value of the supplemental foods or food instruments so lost. The State agency shall have full opportunity to submit evidence, explanation or information concerning alleged instances of noncompliance or diversion before a final determination is made in such cases.

V 42166 AUG 26 77 UMI

§ 246.20 Management evaluation and reviews.

(a) *General.* FNS and each State agency shall establish a management evaluation system in order to assess the accomplishment of Program objectives.

(b) *Responsibility of FNS.* FNS shall establish evaluation procedures to determine whether State agencies carry out the purposes and provisions of this part, the State agency Plan of Program Operation and Administration, and FNS guidelines and instructions. FNS shall take appropriate action as set forth in this part when FNS determines that a State agency has failed to comply with any requirement of this part.

(c) *Responsibility of State agencies.* The State agency is responsible for meeting the following requirements:

(1) The State agency shall establish evaluation and review procedures and document the results of such procedures. The procedures shall include, but not be limited to:

(i) Monitoring of all local Program areas to evaluate management, nutrition education, civil rights compliance, accountability, and financial management systems. The operation of each local agency shall be reviewed annually. However, more frequent reviews may be performed as the State agency deems necessary. The State agency shall provide a continuing evaluation of each local agency through on-site reviews, reviews of local agency reports, and claims;

(ii) Reviewing, or requiring local agencies to review, local food vendors, including on-site visits; and

(iii) Instituting the necessary follow-up procedures to correct identified problem areas.

(2) On its own initiative or when required by FNS, the State agency shall provide special reports on Program activities.

(3) The State agency shall require that local agencies establish Program review procedures to be used in reviewing their operations and those of subsidiaries or contractors.

§ 246.21 Audits.

(a) The Secretary, the Comptroller General of the United States, or any of their duly authorized representatives, shall have access to any books, documents, papers, and records (except medical case records of individuals unless that is the only source of certification data) of the State and local agencies and their contractors, for the purpose of making surveys, audits, examinations, excerpts, and transcripts.

(b) The State agency may take exception to particular audit findings and recommendations. The State agency shall submit a response or statement to FNS as to the action taken or planned regarding the findings.

(c) FNS shall determine whether Program deficiencies have been adequately corrected. If additional corrective action is necessary, FNS shall schedule a follow-up review, allowing a reasonable time for such corrective action to be taken.

(d) Each State agency shall provide for an independent audit of the financial operations of the State agency and local agencies. Audits may be conducted by State and local government audit staffs or by certified public accountants and audit firms under contract to the State or local agencies. Audits shall conform to "The Standards of Audit of Governmental Organizations, Programs, Activities and Functions", issued by the Comptroller General of the United States (1972, for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C., 20402, price 70 cents). An audit shall be used to determine:

(1) Whether financial operations are properly conducted;

(2) Whether the financial reports are fairly presented; and

(3) Whether the entity has complied with applicable laws, regulations, and administrative requirements pertaining to financial management.

(e) Each State agency shall make all State or local agency sponsored audit reports of Program operations under its jurisdiction available for the Department's review upon request. The cost of these audits shall be considered a part of operational and administrative costs and funded from the State or local agency operational and administrative funds, as appropriate.

(f) When completing the Plan of Program Operation and Administration, each State agency shall include a plan for the conduct of audits. The plan shall:

(1) State the scope and frequency of audits of the State agency and local agencies and delineate the procedures that assure audit frequency of not less than once every two years;

(2) Provide a description of the State agency in sufficient detail to demonstrate the independence of the audit organization. Local agencies under the State agency's jurisdiction may be required to submit similar information to the State agency for its use in assuring compliance with this section; and

(3) Provide a description of the method used by the State agency to assure timely and appropriate resolution of audit findings and recommendations.

§ 246.22 Investigations.

(a) The Department may make an investigation of any allegation of noncompliance with this part and FNS guidelines and instructions. The investigation may include, where appropriate, a review of pertinent practices and policies of any State or local agency, the circumstances under which the possible noncompliance with this part occurred, and other factors relevant to a determination as to whether the State or local agency has failed to comply with the requirements of this part.

(b) No State or local agency, recipient, or other person shall intimidate, threaten, coerce, or discriminate against any individual for the purpose of interfering with any right or privilege under this part because he has made a complaint, formal allegation, or testified, assisted, or participated in any manner in an investigation, proceeding, or hearing under this part. The identity of every complainant shall be kept confidential except to the extent necessary to carry out the purposes of this part, including the conduct of any investigation, hearing, or judicial proceeding arising thereunder.

§ 246.23 Nondiscrimination.

(a) The State agency shall comply with the requirements of title VI of the Civil Rights Act of 1964, and the Department's regulations concerning nondiscrimination issued thereunder (7 CFR Part 15), including requirements of racial and ethnic participation data collection, public notification of the nondiscrimination policy and annual reviews to assure compliance with such policy, to the end that no person shall, on the grounds of race, color or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under the Program.

(b) The State agency shall further ensure that no person is subject to any discrimination under the Program because of creed, political beliefs, or sex.

(c) Where a significant proportion of the area served by a local agency is composed of non-English or limited English speaking persons who speak the same language, the State agency shall take action to ensure that Program information in an appropriate language is provided to such persons.

(d) Complaints of discrimination filed by applicants or recipients shall be referred to the Director, Special Supplemental Food Program (WIC), Food and Nutrition Service, U.S. Department of Agriculture, Washington, D.C. 20250.

§ 246.24 Fair hearing procedure for recipients.

(a) Each potential recipient shall be informed of the right to a fair hearing during the initial Program certification. Whenever a person is determined to be ineligible to participate in the Program, the person shall be notified in writing of the reason for his ineligibility and his right to a fair hearing.

(b) Each State agency participating in the Program shall establish a hearing procedure under which a person, or the person's parent or guardian, can appeal from a decision made by a local agency denying such person participation in the Program or suspending such person's participation. If the recipient was already participating in the Program, he shall continue to receive Program benefits until a decision is reached in the fair hearing proceedings. Such hearing procedure shall provide:

(1) A simple, publicly announced method for a person to make an oral or written request for a hearing;

(2) An opportunity for the program to be assisted or represented by an attorney or other persons;

(3) An opportunity to examine, prior to and during the hearing, the documents and records presented to support the decision under appeal;

(4) That the hearing be held within three weeks from the date of receipt of request, be convenient to the person, and that a minimum of ten days written notice be given to the person as to the time and place of the hearing;

(5) An opportunity for the person or his representative to present oral or documentary evidence and arguments supporting his position in accordance with procedures established by the hearing official, and that such procedures shall not be unduly complex or legalistic, and shall take into consideration the person's background and education;

(6) An opportunity for the person or his representative to question or refute any testimony or other evidence and to confront and cross-examine any adverse witnesses;

(7) That the hearing be conducted and the decision made by a hearing official who did not participate in making the decision under appeal or in any previously held conferences;

(8) That the decision of the hearing official be based on the oral and documentary evidence presented at the hearing and that such decision be made a part of the hearing record;

(9) That the person, and any designated representative, be notified in writing of the decision of the hearing official within 45 days from the date of the request for hearing;

(10) That a written record be prepared with respect to each hearing, which shall include the decision under appeal, any documentary evidence admitted and a summary or verbatim transcript of any oral testimony presented at the hearing, the decision of the hearing official, including the reasons therefor, and a copy of the notification to the family concerned of the decision of the hearing official; and

(11) That such written records of each hearing be preserved for a period of three years and be available for examination by the person, or his representative, at any reasonable time and place during such period.

§ 246.25 Administrative appeal of State agency decisions.

The State agency shall provide a hearing procedure whereby an agency whose application is denied by the State agency, or a food vendor which is denied participation in the Program may appeal the denial. Such a procedure at a minimum shall provide for:

(a) An opportunity for the aggrieved agency or food vendor or its representative to present its case;

(b) The opportunity for the agency or food vendor to confront and cross-examine adverse witnesses;

(c) The opportunity for the agency or food vendor to be represented by counsel, if desired; and

(d) An impartial decision-maker, whose conclusion as to the agency's or food vendor's eligibility shall rest solely on the evidence presented at the hearing and the statutory and regulatory provisions governing the Program. The basis for the conclusion shall be stated in writing, though it need not amount to a full opinion or contain formal findings of fact and conclusions of law.

(e) The agency or food vendor shall be notified in writing of the decision concerning the appeal within 60 days from the date of the request for a hearing.

§ 246.26 Miscellaneous provisions.

(a) The value of benefits or assistance available under the Program shall not be considered as income or resources of recipients or their families for any purpose under Federal, State or local laws, including, but not limited to, laws relating to taxation, welfare and public assistance programs.

(b) FNS reserves the right to use information obtained under the Program in a summary, statistical or other form which does not identify particular individuals.

(c) FNS may require the State or local agencies to supply medical data and other information collected under the Program in a form that does not identify particular individuals, to enable the Secretary or the State agencies to evaluate the effect of food intervention upon individuals determined to be at nutritional risk.

(d) Each State agency shall restrict the use or disclosure of information obtained from Program applicants or recipients to persons directly connected with the administration or enforcement of the Program.

(e) Any person who wishes information, assistance, records or other public material shall request such information from the State agency, or from the FNS Regional Office serving the appropriate State as listed below:

(1) Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont: U.S. Department of Agriculture, FNS, New England Region, Northwest Park, 34 Third Avenue, Burlington, Mass. 01803.

(2) Delaware, District of Columbia, Maryland, New Jersey, New York, Pennsylvania, Puerto Rico, Virginia, Virgin Islands, West Virginia: U.S. Department of Agriculture, FNS, Mid-Atlantic Region, One Vahlsing Center, Robbinsville, N.J. 08691.

(3) Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee: U.S. Department of Agriculture, FNS, Southeast Region, 1100 Spring Street NW., Atlanta, Ga. 30309.

(4) Illinois, Indiana, Michigan, Minnesota, Ohio, Wisconsin: U.S. Department of Agriculture, FNS, Midwest Region, 536 South Clark Street, Chicago, Ill. 60605.

(5) Arkansas, Louisiana, New Mexico, Oklahoma, Texas: U.S. Department of Agriculture, FNS, Southwest Region, 1100 Commerce Street, Room 5-D-22, Dallas, Tex. 75202.

(6) Colorado, Iowa, Kansas, Missouri, Montana, Nebraska, North Dakota, South Dakota, Utah, Wyoming: U.S. Department of Agriculture, FNS, Mountain Plains Region, 1823 Stout Street, Denver, Colo. 80202.

(7) Alaska, American Samoa, Arizona, California, Guam, Hawaii, Idaho, Nevada, Oregon, Trust Territory of the Pacific Islands, Washington: U.S. Department of Agriculture, FNS, Western Region, 550 Kearney Street, Room 400, San Francisco, Calif. 94108.

NOTE.—The reporting and/or recordkeeping requirements contained herein have been approved by the Office of Management and Budget in accordance with the Federal Reports Act of 1942.

(Catalog of Federal Domestic Assistance, Program No. 10.557, National Archives Reference Service.)

Signed at Washington, D.C., on August 23, 1977.

CAROL TUCKER FOREMAN,
Assistant Secretary.

ENVIRONMENTAL PROTECTION AGENCY

NOISE EMISSION STANDARDS FOR NEW TRUCK-MOUNTED SOLID WASTE COMPACTORS

V42166 AUG 26 77 UMI

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 205]

[FRL 762-8]

NEW TRUCK-MOUNTED SOLID WASTE COMPACTORS

Noise Emission Standards

AGENCY: Environmental Protection Agency.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes noise emission standards for truck-mounted solid waste compactors. This action is being taken under authority of the Noise Control Act of 1972. Compliance with the proposed standards should, on the average, reduce noise from new conventional truck-mounted solid waste compactors by from 4 to 8 decibels in 1979, and by an additional 3 decibels in 1982. In terms of reduced impact on the nation's population, these reductions, when considered in combination with existing Federal standards for new medium and heavy trucks, should result in a reduction of approximately 71 percent in the severity and extensiveness of noise impact due to solid waste collection by the year 1991. The estimated reduction in noise impact is due in approximately equal measure to the reductions in collection cycle noise brought about by the Federal noise regulation for medium and heavy trucks and to the additional noise reduction expected as a result of this proposed regulation.

DATES: The official docket (Docket Number ONAC 77-1) for the proposed noise emission regulation for Truck-Mounted Solid Waste Compactors will remain open for the submittal of comment until November 25, 1977. At that time, all materials submitted for the record, including transcripts of all public hearings, will become part of the official record. Public hearings will be held on September 27, 1977, commencing at 9:00 a.m. in the Americana City Squire Inn; 790 7th Avenue, New York, New York and on September 29, 1977, commencing at 9:00 a.m., in the Salt Palace, Salt Lake City, Utah.

ADDRESSES: Persons submitting written comments and/or wishing to make a statement at the public hearings should write to the following address:

Director, Standards and Regulations Division, Office of Noise Abatement and Control (AW-471), Truck-Mounted Solid Waste Compactor Docket No.: ONAC 77-1, U.S. Environmental Protection Agency, Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

Mr. Fred Mintz, Program Manager, General Products Branch, at the above address or phone (703) 557-2710.

To receive copies of the Proposed Rule contact:

Mr. Charles Mooney, U.S. Environmental Protection Agency, EPA Public Information Center (PM-215), Room 2194 D Waterside Mall, Washington, D.C. 20460, (202) 755-0717.

SUPPLEMENTARY INFORMATION:

1.0 Introduction

Through the Noise Control Act of 1972, Pub. L. 92-574, 86 Stat. 1234 et seq. 42 U.S.C. 4901 et seq. (the "Act"), Congress established a National policy "to promote an environment for all Americans free from noise that jeopardizes their health and welfare." In pursuit of that policy, Congress stated, in section 2 of the Act, "that, while primary responsibility for control of noise rests with State and local governments, Federal action is essential to deal with major noise sources in commerce, control of which requires National uniformity of treatment."

As part of this Federal action, section 5(b)(1) of the Act requires the Administrator, after consultation with appropriate Federal agencies, to publish a report or series of reports "identifying products (or classes of products) which in his judgment are major sources of noise." The Administrator published in the FEDERAL REGISTER (40 FR 23105, May 28, 1975) a report which identified "truck-mounted solid waste compactors", a class of products in the surface transportation category, as a major source of noise. For brevity, this product may be referred to hereinafter as either "TMSWC", or "compactors."

Section 6(a) of the Act requires the Administrator to publish a proposed regulation for each product which is identified or which is part of a product class identified as a major source of noise, where in his judgment noise standards are feasible. Such regulations are to include standards that set limits on the noise emission from new products which are requisite to protect public health and welfare, taking into account the magnitude and conditions of use of such products (alone or in combination with other noise sources), the degree of noise reduction achievable through the application of the best available technology and the cost of compliance.

Section 6(d)(1) of the Act specifies that the manufacturer of each new product shall warrant to the ultimate purchaser and each subsequent purchaser that the product is designed, built, and equipped so as to conform at the time of sale with the regulation.

Under section 6(e)(1), no State or political subdivision thereof may adopt or enforce any law or regulation which sets a limit on noise emissions from new products regulated by EPA, unless such law is identical to the applicable EPA regulation. The requirement to be "identical" applies to the standard and those elements of the measurement methodology which define the standard; these must be identical to those in the EPA regulation. However, other elements of the State or local law need not be identical. Such elements include the list of persons subject to the regulations, sanctions, enforcement procedures and correlatable or equivalent "short tests" used for enforcement purposes.

Section 6(e)(2) of the Act specifies that nothing in section 6 shall preclude or deny the right of any State or political subdivision thereof to establish and enforce controls on environmental noise and sources thereof through the licensing, regulation, or restriction of the use, operation, or movement of any product or combination of products. Such controls which are reserved to State and local authority under this section include, but are not limited to, the following:

(1) Controls on the time of day during which products may be operated.

(2) Controls on the places or zones in which products may be used.

(3) Controls on the noise emission level of products during use and operation that are enforceable against the consumer.

(4) Controls on the number of products which may be operated at the same time.

(5) Controls on noise emission level from the properties on which products are used.

(6) Controls on the licensing of products.

(7) Controls on the manner of operation of products.

State and local time-of-sale noise emission regulations applicable to products which are not covered by Federal regulation are in no way preempted by these regulations.

Section 10 of the Act establishes prohibited acts in relation to products for which section 6 regulations are applicable. Distribution in commerce of any new product manufactured after the effective date of regulations pursuant to section 6, is prohibited, unless it is in conformity with such regulations. Removal or rendering inoperative of any device or element of design incorporated into any product in compliance with section 6 regulations, other than for purposes of maintenance, repair, or replacement, prior to its sale or delivery to the ultimate purchaser or while it is in use is prohibited. The use of a product which has been tampered with is also prohibited.

Section 11 of the Act specifies enforcement penalties for violation of any prohibited act under section 10. Such penalties for first violations include a fine of not more than $25,000 per day of violation, or imprisonment for not more than one year, or both for knowing or willful violations. The penalties double for subsequent violations.

Section 13 of the Act provides the authority for the Administrator to require a manufacturer to establish and maintain records and make such reports and provide such information as is necessary for him to determine compliance.

Section 15 of the Act establishes a process by which the Federal Government will give preference in its purchasing to products whose noise emissions are significantly below those required by the Federal noise emission standards promulgated pursuant to Section 6 of the Act. Accordingly, the EPA has published procedures for Certification of Low-Noise-Emission Products (LNEP) (40 CFR Part 203). For truck-mounted solid waste compactors, the specific noise emission level criteria required for LNEP determination are contained in § 205.202 (d) subpart F, of the proposed regulation, and are discussed in section 2 of this preamble.

Section 16(d) grants the Administrator the authority to issue subpoenas for the attendance and testimony of witnesses and the production of relevant papers, books, and documents to assist him in obtaining information to carry out the purposes of the Act.

2.0 The Proposed Regulation

The proposed regulation will establish standards for noise emissions resulting from the operation of newly manufactured truck-mounted solid waste compactors. The proposed standard specifies the energy-averaged sound level, in dBA, measured at an 'on axis' distance of 7 meters (23 feet) from the front, rear, and sides of the truck-mounted solid waste compactor, using fast meter response. The measurement procedure used to obtain the data upon which the standards are based is presented in section 205.204 of the proposed regulation. A detailed technical discussion is contained in the "Environmental Impact Statement, Economic Impact Statement and Background Document for Noise Emission Standards for Truck-Mounted Solid Waste Compactors", referred to hereafter as the "Background Document."

The proposed regulation is established in two steps, the first step of which is to take effect January 1, 1979. The second step of the regulation is scheduled to become effective January 1, 1982, concurrently with the second step of the noise regulation for medium and heavy trucks (41 FR 15538, April 13, 1976). The reduced (80 dBA) sound level limit (at full throttle, maximum engine speed) for new trucks in 1982 should permit attainment of the reduced (75 dBA) limit (during the compaction cycle) for compactors with no additional application of noise control technology.

Effective on the dates listed, truck-mounted solid waste compactors shall not produce a sound level in excess of the level shown in Table 2-1, when operated and evaluated according to the methodology provided in § 205.204 of Subpart F.

TABLE 2-1—PROPOSED REGULATORY NOISE EMISSION STANDARDS

Effective date	*Not-to-Exceed sound level*
January 1, 1979	78 decibels.
January 1, 1982	75 decibels.

Machinery-related impulse[1] sounds shall not exceed the average sound level limits by more than 5 decibels.

[1] See discussion of impulse sounds unded 3.5.3.

To ensure lasting benefits from this proposed regulation, the Agency proposes to require that manufacturers design and build each product such that, when properly maintained and used, it will not degrade (increase) in sound level above the applicable levels in Table 2-1 for a specified period of time or use from the date of the product's delivery to the ultimate purchaser. This period is defined by the Agency as the Acoustical Assurance Period (AAP). In the case of truck-mounted solid waste compactors, the Acoustical Assurance Period is 3 years or 7500 operating hours, whichever occurs first.

A manufacturer must develop pursuant to section 205.208-4 of subpart F, an anticipated increase in the sound level of his products during the AAP. The manufacturer must take into account the increase in sound level, expressed as a Sound Level Degradation Factor (SLDF), when making test measurements to show compliance with the applicable standard. Accordingly, the manufacturer must show that his product conforms to a sound level limit defined by the applicable standard of Table 2-1 less the SLDF value.

The Administrator has determined, based upon studies of the noise control technology for compactors, that the proposed standards are feasible and represent those levels of noise requisite to protect the public health and welfare, taking into account the magnitude and conditions of use of such product (alone or in combination with other noise sources), the degree of noise reduction achievable through the application of the best available technology and the cost of compliance as required by section 6(c)(1) of the Noise Control Act.

A subsection of this regulation specifies a Low Noise Emission Product (LNEP) level of 70 dBA, effective January 1, 1978. Ordinarily the LNEP level is set 5 dBA below the regulatory limit, allowing 2 dBA for manufacturing variation and 3 dBA for improved performance. However, for compactors the LNEP level has been set at 70 dBA, 8 dBA below the initial regulatory limit. The reason for this choice is that certain gasoline-powered trucks which use front drive for the pumps, already are close to meeting a 73 dBA level, and therefore an LNEP level of 73 dBA would provide no incentive for further development of technology or acoustical quality control. In addition, there are indications that an electric truck of foreign manufacturers also can meet a 73 dBA limit readily (and possibly 70 dBA as well) so that a 73 dBA level would provide no incentive for improvement on this existing model.

The proposed regulation also incorporates an enforcement program which includes production verification, selective enforcement auditing procedures, warranty, maintenance, compliance labeling and anti-tampering provisions.

EPA is unaware at this time of any manufacturer who would be unable to comply with the proposed standards by the specified effective dates. The Agency solicits submittal of such data or information during the public comment period that substantiates or refutes this view.

3.0 Background Information

3.1 General

The proposed regulation is one of a series of surface transportation noise regulations to be proposed. In arriving at the proposed regulation, the Agency carried out detailed investigations of truck-mounted solid waste compactor design, manufacturing and assembly processes; available noise control technology; noise measurement methodologies; costs attendant to noise control methods; the cost to test machines for compliance; the cost of recordkeeping; possible economic impacts; and the potential environmental and health and welfare benefits associated with the application of various noise control measures. The information summarized briefly herein is presented in detail in the "Background Document".

To meet the requirements of the Act, to consider "the best available technology, taking into account the cost of compliance," the Agency constructed definitions of the terms "best available technology" and "cost of compliance." In doing so, the Agency carefully considered the strict language of the Act, its legislative history, and other relevant data. Based thereon, the following definitions have been established by the Administrator for the purposes of this regulation.

3.1.1 "Best available technology". EPA considers the level "achievable through the application of the best available technology" to be the lowest noise level which can be reliably predicted, based on engineering analysis of products subject to the standard, that manufacturers will be able to meet by the effective date, through application of currently known noise attenuation techniques and materials. In order to assess what can be achieved, EPA has (1) identified the sources of TMSWC noise and the levels to which each of these sources can be reduced, using currently known techniques; (2) determined the level of overall TMSWC noise that will result; (3) assured that such techniques may be applied to the general TMSWC population; (4) assured that such techniques are adaptable to production line assembly; and (5) assured that sufficient time is allowed for the design and application of this technology by the effective dates of the standards.

3.1.2 "Cost of compliance" is defined as the cost of identifying what action must be taken to meet the specified noise emission level, the cost of taking that action, any additional cost of operation and maintenance caused by that action, and costs of noise testing and record keeping required by the regulation.

3.1.3 To determine what constitutes the best available technology and the cost of compliance, the Agency amassed information from a range of sources including: (1) Studies performed by

V 42166 AUG 26 77 7 UMI

Agency personnel; (2) studies performed under contract with the Agency; (3) submissions by other Federal agencies; (4) submission by industry; and (5) data in the available literature.

Representatives of the Agency carried out extensive interviews with key members of firms and trade associations in the TMSWC industry to gain first-hand knowledge of the industry and its products and to obtain and verify technological and financial information. Similar interviews were conducted with key persons in the solid waste collection and management industries, and State and local governments.

3.2 PRODUCT DEFINITION

A truck-mounted solid waste compactor is defined, for purposes of this regulation, as a vehicle comprising a mechanically powered truck cab and chassis or trailer, equipped with a body and machinery for receiving compacting, transporting, and unloading solid waste. The body, which includes a waste-receiving hopper, houses machinery which typically consists of hydraulic actuators (rams) with requisite hydraulic pump, valves, piping, and controls. The hydraulic actuators operate various components that sweep the waste matter into the container portion of the body and compact it. Power generally is drawn from the truck engine by means of a power take-off (PTO) unit, coupled by gears or other mechanical connection to the transmission, engine drive shaft, or fly wheel.

Truck-mounted solid waste compactors are used for the collection of solid wastes in residential and commercial areas. It is estimated that as of 1976 there were approximately 79,000 such units in use, distributed in the following categories:

	Units
Rear-loaders	57,700
Side-loaders	10,900
Front-loaders	10,400

3.2.1 Rear-loaders have a hopper at the rear into which waste materials are dumped by hand or from a container lifted by a winch or hydraulic lift. The waste is swept forward into the main body where it is compacted by hydraulically-operated blades. Rear-loaders typically are used in densely populated urban and suburban areas where handloading of trash generally is necessary.

3.2.2 Side-loaders have a body with openings on either side forward of the midsection. Waste materials are loaded either by hand or by means of a mechanical container lift, and compacted toward the rear by a ram-operated blade. Side-loaders are used mainly for collecting waste and trash in residential areas comprising one or two family housing units.

3.2.3 Front-loaders generally are used to collect waste from commercial facilities and residential apartment complexes. A front-loader is equipped with a pair of hydraulically-operated lifting arms which extend forward of the cab to pick up a specially-designed container. The container is lifted over the cab, inverted, and dumped through an opening in the top of the body into a receiving hopper; the container then is lowered to the ground and the waste is compacted toward the rear of the compactor body.

3.3 SOUND LEVEL DATA

The average maximum steady sound level of the various configurations of TMSWC, during their typical compaction cycles, are summarized in the following listing. The sound level listed for each configuration is the arithmetic means of the sound levels determined for each unit of that type using the measurement procedure outlined in section 3.5 of this preamble.

3.4 NOISE SOURCES IN TRUCK-MOUNTED SOLID WASTE COMPACTORS

The major sources of noise in TMSWC's may be categorized as:

Primary power supply: truck engine; auxiliary engine.
Power transmission features: transmission power take-off (PTO); flywheel PTO; front PTO; other.
Mechanical features of compactor: hydraulic system; container loading system (winch, hydraulic lift); compactor actuation mechanism (ram); hopper closure.

Although not readily susceptible to categorization, other noise sources occur in the operation of a TMSWC including truck brake squeal, the hiss of brake air release, waste compaction related noise, and impulse noises due to impacts between components of the compacting machinery and to banging of cans or containers against the hopper walls by collection personnel. The first type, i.e. machinery-related impacts, can be controlled by design, and the regulation addresses this type. The second type, although partially controllable by use of rubber or similar materials at impact areas, is due mainly to operating practices and the design of containers. Control of this type of impulse noise will depend on appropriate industry practices, with guidance or incentive provided by local regulations regarding waste collection practices and container materials and design.

3.4.1 Primary Power Supply. Truck engines, the primary power source for most compactors may be either gasoline or diesel-fueled. Auxiliary engines, which provide the power on a few units, also may be gasoline or diesel, but generally are gasoline fueled. An electrically-powered truck has appeared on the European market, but is not yet available in the United States.

3.4.2 Power Transmission. A power take off unit, mounted to (1) the engine transmission, (2) the engine flywheel, or (3) connected to the front end of the engine crankshaft, transfers engine power to the hydraulic pump(s) which energizes the compactor's hydraulic system.

3.4.3 Loading Devices. Two types of hydraulically driven container-loading devices are used: mechanical linkages and winches. The front-loader employs a complex, powerful mechanical linkage system which is essential to its operation. Side-loaders and rear-loaders may have either mechanical linkages or winches, but are generally loaded by hand.

3.4.4 Compaction Devices. The compaction of waste materials in front- and side-loaders is achieved through the use of a pusher blade or ram that spans the compactor body and is swept the length of the body by means of a telescoping hydraulic cylinder. Rear-loaders generally use an articulated blade to compact the waste in the hopper and sweep it forward into the body. Other types of compacting mechanisms or principles also may be used. One design employs a rotating auger-like device. Another has a cylindrical body with internal helical ribs that shred and propel the waste materials forward as the cylinder rotates.

3.5 NOISE MEASUREMENT PROCEDURES

3.5.1 Compactor load. There is some evidence that the quantity and type of waste materials loaded in a compactor body affect the noise emission characteristics of the unit in the compacting operation. However, to avoid the difficulties inherent in attempting to define and use a reproducible load of waste materials (standard compactor load), EPA has selected a load condition of no waste material as being the most suitable one for use in measuring the noise emissions of a compactor. This easily controlled and reproducible condition provides a consistent standard for comparison of all types of compactor units. The data collected by EPA has enabled the Agency to establish a correlation between the noise emissions measured in this manner and the noise emitted by TMSWC's in use during a typical collection and compaction process.

3.5.2 Engine Speed. The noise of a truck-mounted solid waste compactor increases markedly with the speed of the engine that powers the compactor. Some units use an engine speed governor, i.e., speed control device, during the compaction cycle to obtain the desired operating conditions and cycle time. If the unit is equipped with such a governor, then the noise measurements are to be made at governed speed, with automatic operation. If the unit is not so equipped, then the noise measurement is to be made at the maximum allowable speed in revolutions per minute (rpm) of the engine or the hydraulic pump, whichever is the lower.

3.5.3. Measurement criteria. During operation of a truck-mounted solid waste compactor, two general types of noise occur. One is a continuous sound due to

operation of the engine, PTO, hydraulic pump and compacting mechanisms throughout the compaction cycle (or loading and compaction cycle if a container is involved). The level of this sound may vary during the compaction cycle. A continuous noise of this type is chararacterized well by the A-weighted sound level, measured on a Sound Level Meter that meets type 1 criteria of ANSI Standard S1.4–1971, using the "fast" meter response. Accordingly, the noise measurement procedure in this regulation calls for observation (or recording) of the average maximum A-weighted sound level, in decibels, that occurs during normal operation of the compactor.

The second type of noise is generally due to impacts between metal parts of the compactor mechanism, e.g., ram cylinder and stop or between a trash container and the compactor walls or blade. The Agency has determined that the A-weighted energy in the impulse, averaged over a 0.125 second time interval, is an appropriate measure of an impulsive sound. This quantity is approximated well by a sound level reading using fast meter response.

3.5.4. Measurement Procedure. The noise sources of a truck-mounted solid waste compactor are found at various locations on the vehicle. To take account of these diverse locations, multiple measurement positions are necessary. However, to provide a measurement procedure that is reasonably simple to carry out and not excessively costly, it is desirable to use the minimum number of measurement positions that will define the sound emissions with acceptable accuracy and repeatability.

Two important aspects of microphone location are the distance of the microphone from the noise source, and the size of the clear test area required to obtain a measurement without significant sound reflections or other interferences.

In addition, the possibility of applying a simplified version of the measurement procedure for in-use enforcement measurements on urban streets suggests the desirability of a relatively close microphone position, because of space and building separation factors.

Consideration of the foregoing factors, discussed in detail in the Background Document, has led the Agency to adopt a measurement procedure for acquiring sound level data on compactor vehicles based on four microphone positions located 7 meters (23 feet) "on axis" from the front, rear, and side surfaces of the vehicle. The measurement obtained at each microphone location is the A-weighted sound pressure level, or sound level, L, in decibels, frequently abbreviated as dBA. The sound levels measured at these four microphone locations are combined on an energy averaged basis.

4.0 RATIONALE FOR STANDARD SELECTION

In arriving at the proposed standards, the Agency examined the various types of residential neighborhoods in which the truck-mounted solid waste compactor contributes to environmental noise. Studies were conducted to determine the contribution by the truck-mounted solid waste compactor to total residential neighborhood noise associated with operation of these units. These investigations indicate that the truck-mounted solid waste compactor is a significant contributor to noise caused annoyance and probability of sleep and speech interference, in urban neighborhoods.

The Agency examined the technology, costs, and economic impact to achieve various reduced noise levels of truck-mounted solid waste compactors. (See section 5.2 of this preamble.) The noise levels examined ranged in value from the present mean levels for the various configurations (from 74 to 84 dBA) to 70 dBA measured at 7 meters. Estimates of the costs to quiet compactor trucks were developed from engineering cost data provided by industry and independent Agency estimates, taking into consideration industry accounting practices and list prices of solid waste compactors.

The Agency also examined the health and welfare benefits that various levels of reduced noise emissions from truck-mounted solid waste compactors would provide to the noise-impacted population. The public health and welfare impact associated with these proposed regulations has been assessed in terms of the number of people impacted by the noise of truck-mounted solid waste compactors, the severity of impact, and the noise impact relief that would be achieved by quieting the compactors. Since the truck engine is a major source of compactor noise, these assessments have taken into account the benefits independently resulting from EPA's recently promulgated regulations, for new medium and heavy trucks.

The benefits attendant to the study levels were assessed using a "fractional noise impact" method. This method determines impact in terms of both extensiveness (i.e., the number of people impacted) and the intensiveness (severity) of impact. Analyses were performed to determine the total potential benefits from the regulation of compactor noise in combination with medium and heavy trucks which are already subject to Federal noise emission standards.

In order to quantify the public health and welfare impact, the number of people impacted at noise exposure levels above L_{dn}=55 were determined and weighting factors were applied to account for severity of exposure. The result was a series of measurements of benefit in terms of reduction in extensiveness and severity of impact relating to annoyance, possibility of sleep and speech interference, and related factors.

The attainment of the estimated health and welfare benefits from reduction in the noise levels of compactors is dependent on the continued compliance of these products with the Federal not-to-exceed noise emission standard. To ensure that manufacturers develop and apply durable sound reduction measures to their products, the Agency believes it is necessary to establish a specific period of time or use during which newly manufactured products must, as a minimum requirement, comply with the Federal standard. It is the Agency's opinion that this time period should be of a duration that is commensurate with average major component repair, replacement or proudct overhaul time periods. The Agency beleives that if a truck mounted solid waste compactor complies with the standard during this initial period (the Acoustical Assurance Period), it is unlikely that the noise emisisons of the compactor will degrade (increase) above the standard for the remainder of the expected life of the product: *Provided*, That the product is properly maintained and used. This places a burden on several parties. First, it requires the manufacturer to design and build the product so that if it is properly maintained and operated, the product will be capable of performing at or below the requisite sound level, and second it relies on the owner/user to properly maintain and use the product. (The responsibility of the owner/user is discussed in other portions of this preamble; see discussion of antitampering infra.)

The Agency considers the concept of an Acoustical Assurance Period necessary because if the product is not built such that it is even minimally capable of meeting the standard while in use over this initial period, when properly used and maintained, then the standard itself becomes a nullity and the anticipated health and welfare benefits become illusory.

The Agency considers the concept reasonable because, in the information available to the Agency, it finds little evidence that the noise levels of compactors will increase significantly over the initial 3 years or 7500 operating hours when the product is properly used and maintained.

In making the determination that the Acoustical Assurance Period for truck-mounted solid waste compactors should be 3 years or 7500 operating hours, EPA took into account the degree and conditions of use of these products, the best maintenance practices attendant to noise control, and the cost of compliance, Among specific factors considered were:

1. The likelihood that acoustical degradation of noise control features and the resultant increase in noise level above the standard would not occur during the Acoustical Assurance Period if the manufacturer uses proper design and quality materials and workmanship;

2. The maintenance normally required on compactors during their early years of use;

3. The relative usage cycles of these products during their early years of use.

It is important to understand what AAP means to the manufacturer. The manufacturer will be held responsible for producing a product that is capable of meeting the standard. He can design and build the product at the level of the standard assuming no degradation in noise control features with time, or build it with noise levels somewhat below the standard to account for some degradation with time. But in neither event can the product exceed the stand-

V42166 AUG 26 77 UMI

ard during the Acoustical Assurance Period.

In fact, in assessing the noise control technology which is needed for compliance with the proposed compactor standards, the Agency found no components which cannot be built to assure minimal or no degradation (increase) in the compactor's sound level, provided that the compactor is well maintained and is operated in a manner consistent with the manufacturers instructions. The compactor industry has stated that it strives to produce a long lasting, durable product by using component parts of high quality and compactor designs which can withstand extensive use. As a result, the Agency has concluded that the AAP requirement will not impose additional maintenance or equipment costs over those already estimated as attributable to the proposed regulation.

EPA is also proposing a procedure whereby the manufacturer must account for sound level degradation in his compliance testing and verification program by applying a Sound Level Degradation Factor (SLDF) to the noise emission standard. This may result in a manufacturer-specific production test level which is lower than that specified by the standard. For example, if a manufacturer estimates that the noise level of his product may increase 3 dBA during the AAP the SLDF would be 3 dBA. Then, for production verification (discussed below), the manufacturer would have to establish that the sound level of his product is 3 dBA lower than that specified by the standard. If a product is not expected to degrade during the AAP, the SLDF would be near or equal to zero. It is EPA's evaluation that in most cases the SLDF would be near or equal to zero.

Manufacturers would be subject to Federal enforcement actions consistent with section 11 of the Noise Control Act if the noise emission level during the AAP exceeds the noise emission standard. It should be clearly understood that this concept does not impose any additional burden on the manfacturer for proper maintenance and use. That is, if the product is not properly maintained and used the manufacturer is relieved of subsequent resulting liability. The responsibility of properly maintaining and using the product rests with the owner/user.

EPA invites comments on the approach it has taken to attain the health and welfare benefits requisite to this regulatory action. EPA also solicits comments on the length of the AAP together with the rationale and data to support the position taken.

5.0 Estimated Impact of Proposed Regulation

5.1 HEALTH AND WELFARE.

The EPA estimates that approximately 17 million persons currently are exposed to residential neighborhood noise levels due to operation of truck-mounted solid waste compactors at noise exposure levels above $L_{dn} = 55$. It is estimated that compliance of compactors with the proposed standards will result in a reduction in the number of persons so exposed to about 6 million persons by 1991, representing about a 65 percent decrease.

As pointed out in section 4.0, the reduction in extensiveness and severity of impact can be evaluated in terms of effects due to individual noisy events, such as sleep and speech interference, as well as effects due to generalized annoyance which can be assessed by reductions in L_{dn}. Detailed information on these impacts is provided in the Background Document. From fractional impact analysis of general annoyance, EPA estimates that the "equivalent number of persons impacted" will decrease from about 1,600,000 in the base year, 1976, to about 470,000 persons in 1991, a relative change in impact of about 71 percent. Part of the estimated reduction in impact is due to the effect of recently promulgated noise standards for medium and heavy trucks; in 1991, the reduced truck noise alone accounts for a reduction of 600,000 equivalent persons impacted. The balance of the estimated reduction, 530,000 equivalent persons, is due entirely to the compactor noise regulation.

Recognition of the intrusive nature of TMSWC noise impact led the Agency to a single-event noise exposure analysis for assessing the health and welfare impact of TMSWC noise control. The benefits of the proposed compactor noise regulation in terms of reduction of single-event impacts, relate to sleep awakening, sleep disturbance, and speech interference. For example, the estimated number of probably sleep disruption events (and similarly for speech interference occurrences) decreases from about 32 million in 1976 to about 7.4 million in 1991 as a result of the regulation.

The foregoing figures indicate that major reductions in health and welfare impact will result from promulgation of the proposed compactor noise regulation. These health and welfare benefits due to reduced trash collection noise will be additive to the benefits obtained as a result of reduced urban noise brought about by the medium and heavy truck noise regulation.

5.2 COST AND ECONOMIC IMPACT.

The cost impact of quieting compactors to meet the proposed regulatory standard may be expressed in terms of increased list price. The Agency's studies indicate that average list price increases for the compactor-truck assembly will range from 6.4 to 12.8 percent, depending on machine type and size, resulting in overall average list price increase of about 10.3 percent for all regulated machines. There are indications that a few small firms in the industry, by virtue of their small market share and related financial and operation factors, would incur higher manufacturing costs resulting in slightly higher list price increases. The Agency will continue to study these potential impacts because it is desirable to achieve the public health and welfare goals of the Act with minimal disruptive impacts from EPA noise regulations. The price elacticity of demand for this equipment is —1.0 (or smaller) which could possibly result in a decrease in demand of 9 percent; manufacturers' total revenues should remain essentially unchanged because of price increases. Some pre-buying is expected to occur prior to the effective date(s) of the regulation. However, the Agency believes this activity will be limited by the available excess production capacity of about 4,000 units, almost entirely rear loaders.

In terms of societal resources, capital costs for the first year of compliance are estimated at about $27 million, with annual costs (including amortized capital cost, operation and maintenance) at $6.5 million. Costs are expected to pass through to the end user, and ultimately the consumer, of waste collection services. Because equipment costs represent a small portion of the total costs of solid waste collection the consequent cost increase for service is expected to be small, an estimated 0.5 percent or less.

Other aspects of potential economic impact due to promulgation of this regulation are detailed below.

1. *Impacts on manufacturers and employment.* Employment is not expected to change significantly. It is possible that from one to three manufacturers of truck-mounted solid waste compactor bodies may cease production of that line of equipment due to industry pressure and competition. Persons who might be affected by such reduction of production amount to less than two percent of the employed population of about 2900 persons within the industry and produce less than three percent of the total units estimated. An offsetting increase in employment is expected to occur due to testing and compliance activity and procurement of noise control components and materials resulting from the regulation.

2. *Impacts on Exports and Imports.* As the noise control treatment generally represents add-on materials or substitute components, or both, machines for export generally can be produced without noise control treatment, if desired. Units produced solely for export need not comply with U.S. noise standards; consequently, impact on exports should be minimal. With respect to imports, the regulation will apply to imported compactors. Consequently, domestic and foreign manufacturers will be affected equally, no adverse competitive impact will result and, therefore, the proposed regulation should have no appreciable impact on the U.S. balance of payments.

3. *Impact on energy use and costs.* The changes in compactor operating conditions associated with the noise control treatment are expected to result in an annual fuel savings of approximately $95 per unit. This should provide a net savings in operating costs, taking into account possible increases in maintenance costs.

5.3 SUMMARY

The Agency has concluded that at this time the regulatory levels and schedule selected represent optimal noise reduction standards for truck-mounted solid waste compactors. Implementation of the regulations is expected to result in a substantial reduction in the number of people impacted by compactor noise.

Technology to achieve the selected levels has been demonstrated, and the effective dates for the noise level limits are coordinated with those for the truck noise standards. The Agency believes that the time schedule for application of the noise standards, corresponding with reduced noise limits for trucks, should allow the manufacturers the lead time requisite to incorporate the necessary design and component changes without production or market disruption.

The cost of compliance and possible economic impacts have been considered and are believed to be reasonable.

6.0 Enforcement

6.1 GENERAL

The EPA enforcement strategy places a major share of the responsibility on the manufacturers for pre-sale testing to determine the compliance of truck-mounted solid waste compactors with these regulations and noise emission standards. This approach leaves the manufacturer in control of many aspects of the compliance program and imposes a minimal burden on the industry. The effectiveness of this strategy necessitates monitoring by EPA personnel of the tests conducted and actions taken by the manufacturers in compliance with this regulation.

The enforcement strategy proposed in this regulation consists of three parts: (1) Production Verification, (2) Selective Enforcement Auditing, and (3) In-Use Compliance.

6.2 PRODUCTION VERIFICATION (PV)

PV is the testing by a manufacturer of early production models of a category or configuration of the product, and submitting a report of the results to the EPA. This process, using the proposed methodology, gives the EPA some assurance that the manufacturer has the requisite noise control technology in hand and the capability to apply it to the production process. Models selected for testing must have been assembled using the manufacturer's normal assembly method and must be units assembled for sale.

PV does not involve any formal EPA approval or issuance of certificates subsequent to manufacturer testing. The proposed regulations would require that prior to the distribution in commerce of any regulated product, that product must undergo production verification. Section 205.205–2(a) would allow a conditional and temporary waiver of this requirement under special circumstances. Responsibility for testing lies with the manufacturer. However, the Administrator reserves the right to be present to monitor any test (including simultaneous testing with Agency equipment) or to require that a manufacturer ship products for testing to the EPA's Noise Enforcement Facility in Sandusky, Ohio, or to any other site the Administrator may find appropriate.

The basic production unit selected for testing purposes is a product configuration, which is a set of compactors grouped together on the basis of parameters proposed in § 205.205–3.

The manufacturer would be required to verify production products of each configuration. The regulation allows manufacturers to group configurations into categories based on the parameters proposed in § 205.205–2 and to verify by category. This is done by selecting the configuration in each category that has the highest level of noise emissions at the end of its defined Acoustical Assurance Period (based on tests or on engineering judgment). If when tested in accordance with the test procedure, that configuration does not exceed a noise level defined by the new product standard minus that configuration's expected noise degradation over its Acoustical Assurance Period, then all configurations in that same category are considered production verified.

The Administrator also reserves the right to test products at a manufacturer's test facility using either Agency equipment or the manufacturer's equipment. This will provide the Administrator an opportunity to determine that the manufacturer's test facility and test equipment meet the specifications proposed in § 205.204. If it is determined that the facility or equipment does not meet these specifications, the Administrator may disqualify them from further use for testing under this subpart.

Under § 205.206(a)(1), the Administrator may require that manufacturers submit to the Agency any product tested or scheduled to be tested pursuant to this regulation or untested products at such time and place as he may designate.

If a manufacturer proposes to add a new configuration to his product line or change or deviate from an existing configuration with respect to any of the parameters which define a configuration, the manufacturer must verify the new configuration either by testing a product and submitting data or by filing a report which demonstrates verification on the basis of previously submitted data. A manufacturer may production verify a configuration at any time during the model year or in advance of the model year if desired.

Production verification is an annual requirement. However, the Administrator, upon request by a manufacturer, may permit the use of data from previous production verification reports for specific configurations or categories.

Production verification performed on the early production models demonstrates that the models conform to the applicable noise emission standard and limits the possibility that non-conforming products are distributed in commerce. Because the possibility still exists that subsequently produced compactors may not conform, selective enforcement auditing (SEA) testing is incorporated in this proposed regulation.

6.3 SELECTIVE ENFORCEMENT AUDITING

Selective enforcement auditing (SEA) is the testing of a statistical sample of assembly line (production) products from a specified product configuration or category to determine whether these products comply with the applicable noise emission standards.

SEA testing is initiated when a test request is issued to the manufacturer by the Assistant Administrator for Enforcement or his designated representative. The test request will require the manufacturer to test a batch of products of a specified category or configuration produced at a specified plant. An alternative category or configuration may be designated in the event that products of the first category or configuration are not available for testing.

The SEA plan employs a technique known as inspection by attributes. The basic criterion for acceptance or rejection of a batch is the number of sample products in the batch which meet the standard rather than the average noise level of the products tested.

A sequential batch sampling inspection plan will be used for SEA testing. Sequential sampling differs from single sampling in that small test samples are drawn from consecutive batches and tested sequentially until a statistically significant conclusion can be drawn rather than one large sample being drawn and tested all at once. It offers the advantage of keeping the number of products tested to a minimum when the majority of products are meeting the standards.

A batch will be defined as the number of products produced during a time period specified in the test request. This will allow the Administrator to select batch sizes small enough to keep the number of products to be tested at a minimum and still to draw statistically valid conclusions about the noise emission performance of all products in that category or configuration.

The sampling plans proposed in this regulation are arranged according to the size of the batch from which a sample is to be drawn. Each plan specifies the sample size and the acceptance and rejection number for the established acceptance quality level (AQL). This AQL is the maximum percentage of products exceeding the applicable noise emission standard that for purposes of sampling inspection can be considered satisfactory. An AQL of 10% was chosen for compactors to take into account some test variability. The number of failing products in a sample is compared to the acceptance and rejection numbers for the appropriate sampling plan. If the number of failures is less than or equal to the acceptance number, then there is a high probability that the percentages of noncomplying products in the batch is less than the AQL and the batch is accepted. If the number of failing products is greater than or equal to the rejection number, then there is a high probability that the percentage of non-complying products in the batch is

V 42166 AUG 26 77 UMI

greater than the AQL and the batch fails.

Since the sampling strategy involves a multiple sampling plan, in some instances the number of failures in a test sample may not allow acceptance or rejection of a batch so that continued testing may be required until a decision can be made to either accept or reject a batch.

When a batch sequence is tested and accepted in response to a test request, the testing is terminated. When a batch sequence is tested and rejected, the manufacturer must cease introducing these products into commerce. If the manufacturer desires to continue production and introduction into commerce of the failed configuration (category), this may be done provided that, under proposed § 205.207–8, all of the products in that category or configuration produced at that plant are tested. The manufacturer may then distribute the individual products that pass the test.

Regardless of whether a batch is accepted or rejected, failed products would have to be repaired or adjusted and pass a retest before they can be distributed in commerce.

The manufacturer can request a hearing on the issue of non-compliance of the rejected category or configuration.

Since the number of compactors tested in response to a test order may vary considerably, a fixed time limit cannot be placed on completing all testing. The proposed approach is to establish a limit on test time per product. It is estimated that manufacturers can test a minimum of five (5) products per day. However, manufacturers are requested to present any data or information that may effect a revision of this estimate.

6.4 ADMINISTRATIVE ORDERS

Section 11(d)(1) of the Act provides that: "Whenever any person is in violation of section 10(a) of this Act, the Administrator may issue an order specifying such relief as he determines is necessary to protect the public health and welfare."

This provision grants the Administrator discretionary authority to issue remedial orders to supplement the criminal penalties of section 11(a). The proposed regulation provides for several types of orders in specified circumstances: (1) Recall orders for failure of products to comply with the regulation (§ 205.209); (2) cease-to-distribute orders for products not properly production verified (§ 205.205–10); and (3) cease-to-distribute orders for failure to test (§ 205.207–9).

In addition, 40 CFR § 205.4(f) provides for cease-to-distribute orders for substantial infractions of regulations requiring entry to manufacturers' facilities and reasonable assistance. These provisions do not limit the Administrator's authority to issue orders, but give notice of cases where such orders would in his judgment be appropriate. In all such cases notice and opportunity for a hearing will be given.

6.5 COMPLIANCE SECTION

The proposed regulation requires that subject compactors be labeled to provide notice that the product complies with the noise emission standard. The label shall contain a notice of tampering prohibitions. The label also contains the effective date of the standard to which the product complies. The EPA is considering requiring that the actual not-to-exceed level of the standard be stated on the label. This would be intended to aid State and local officials in field testing and enforcement of complementary in-use standards. Specific comments on the advantages and disadvantages of including the level of the standard on the compliance label are solicited from all concerned parties. A coded rather than actual date of manufacture has been provided for so as to avoid possible disruption of marketing and distribution patterns.

6.6 IN-USE COMPLIANCE

In-use compliance provisions are included in proposed §§ 205.208–1, 205.208–2, and 205.208–3 to ensure that compactor noise levels are reasonably maintained for the life of the product provided that the compactors are properly maintained, used and repaired. These provisions include a requirement that the manufacturers provide a time-of-sale warranty to purchasers, assist the Administrator in defining those acts that constitute tampering, and finally provide purchasers with instructions specifying the maintenance, use, and repair required to minimize or negate degradation during product use. It should be noted that the warranty is a time-of-sale warranty. Section 6 of the Act requires that a manufacturer warrant to the ultimate purchaser and all subsequent purchasers that at the time-of-sale the product was designed, built, and equipped to comply with the regulations. A warranty claim can be made by a purchaser at any time throughout the actual life of the product so long as it relates back to a non-compliance at the time-of-sale.

6.7 ACOUSTICAL ASSURANCE PERIOD

The manufacturer must design products which will meet the noise standard for the period of time specified as the Acoustical Assurance Period beginning at the date of sale to an ultimate purchaser. EPA does not specify what testing or analysis a manufacturer must conduct to determine that compactors will meet the Acoustical Assurance Period requirement. However, under proposed § 205.208–4, the manufacturer is required to make a determination regarding the expected degradation and to maintain records of the test data or other information upon which the determination was based. This determination may be based on information such as tests of critical noise producing or abatement conponents, rates of noise control deterioration, engineering judgments based on previous experience, and physical durability characteristics of the product or product components.

The mechanism used in this regulation to express the amount of expected degradation, if any, is the sound level degradation factor (SLDF). The SLDF is the degradation (increase in A-weighted sound level which the manufacturer expects will occur on a configuration during the period of time specified as the Acoustical Assurance Period. The manufacturer must determine an SLDF for each product configuration. SLDF for each product configuration.

To ensure that the products will meet the noise standard throughout the Acoustical Assurance Period, proposed § 205.202(c)(2) requires the product to emit a time-of-sale noise level less than or equal to the new product noise emission standard minus the SLDF. In no case shall this noise level exceed the Federal noise standards; i.e. a negative SLDF may not be used. Production verification and selective enforcement audit testing both embody this principle.

If the product's noise level is not expected to deteriorate during the Acoustical Assurance Period when properly used and maintained, the SLDF is zero. If a manufacturer determines that a product configuration will become quieter during the period, the configuration must still meet the standard at the time of sale and an SLDF of zero must be used for that configuration.

It may be that most of the data required to determine an SLDF will already be in the hands of the manufacturer since this information is typically used for general product development work. In any event, EPA is not now proposing to require long term durability tests to be run as a matter of course.

6.8 APPLICABILITY OF PREVIOUSLY PROMULGATED REGULATIONS

Manufacturers who will be subject to the proposed regulation must also comply with the general provisions of 40 CFR Part 205 Subpart A. These include the requirements for inspection and monitoring of manufacturer's actions taken in compliance with the proposed regulation and the requirements for requesting and granting exemptions from this proposed regulation.

Manufacturers producing products subject to the proposed regulation may also be subject to selective enforcement auditing under the Medium and Heavy Duty Truck regulations of 40 CFR Part 205 Subpart B, as subsequent manufacturers. Comments are invited as to each of the above points.

A more detailed description of the enforcement regulation may be found in the Background Document.

7.0 FUTURE INTENT

The Agency is pursuing a strategy through which major contributors to overall residential neighborhood noise will be identified and subsequently regulated. This coordinated approach is necessary because, in residential neighborhoods, a number of different noise sources may be operating at the same time and the quieting of only one such source may not in itself be sufficient to reduce the noise in residential neighborhoods to a level the Agency believes is requisite to protect the public health and welfare.

As indicated in the first EPA Identification of Major Sources of Noise Report (39 FR 22297–99, June 21, 1974), the principal candidates for potential future regulatory efforts are known.

The Agency has underway, or intends to commence, further regulatory action on other noise sources. These include wheel and crawler tractors, buses, motorcycles, pavement breakers and rock drills, and lawnmowers. The levels chosen for the time-phased standards in this proposed rulemaking, while believed to be optimal at present, may be lowered in the future, to be consistent with the overall objective to quiet all major noise sources in order to reduce noise in residential areas.

The Agency believes that the standards here proposed are necessary to protect the public health and welfare and are achievable by the best available technology taking into account the cost of compliance. However, as technological advances occur lower levels may be achievable with such advanced technology. The Agency will consider all new information and data which become available or are presented to it, and may subsequently revise the regulation proposed herein.

8.0 PUBLIC COMMENT

The Agency is committed by statute and policy to public participation in the decision making process for its environmental regulations. Accordingly, EFA encourages and solicits communications and contributions to the public docket on all aspects of the proposed rulemaking, including the identification of truck-mounted solid waste compactors as a major source of noise under section 5 (b)(1) of the Act, (40 FR 23107, May 28, 1975). These contributions are desired from as many diverse views as possible. When received, such information will be fully analyzed and any appropriate changes in the proposed rules will be made and explained in the promulgation of final regulation.

All interested parties are invited to attend public hearings concerning the proposed noise emission regulation for truck-mounted solid waste compactors. Hearings will be held on September 27, 1977, commencing at 9 a.m., in the Americana City Squire Inn, 790 7th Avenue, New York, N.Y., and on September 29, 1977, commencing at 9 a.m., in the Salt Palace, Salt Lake City, Utah. Persons wishing to present their views at either public hearing should notify the Director, Standards and Regulations Division, at the address specified at the beginning of this notice no later than September 9, 1977, so that presentations may be scheduled. It is requested that presentations be limited to 20 minutes to enable all prescheduled persons an opportunity to speak and to permait a question and answer period following each presentation. To the extent that time permits, persons who have not given notice of their intent to speak will be heard following the scheduled statements. It is requested that speakers submit, if practicable, five (5) copies of their statement to the Director, Standards and Regulations Division, prior to the hearing date.

9.0 BACKGROUND DOCUMENT

The EPA has determined that this document contains a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 as amended by Eexecutive Order 11949 and OMB Circular A–107 and certifies that an Economic Impact Statement has been prepared.

The document entitled "Environmental Impact Statement, Economic Impact Statement and Background Document for Noise Emission Standards for Truck-Mounted Solid Waste Compactors" may be obtained from:

U.S. Environmental Protection Agency, EPA Public Information Center (PM–215), Room 2194D, Waterside Mall, Washington, D.C. 20460. Secs. 6, 10, 11, 13, and 15, Noise Control Act, Pub. L. 92–574, 86 Stat. 1237, 1242, 1244, and 1245 (42 U.S.C. 4905, 4909, 4910, 4912, and 4914).

Dated: August 12, 1977.

DOUGLAS M. COSTLE,
Administrator.

In consideration of the foregoing, it is proposed to amend Part 205 by adding Subpart F as follows:

Subpart F—Truck-Mounted Solid Waste Compactors

Sec.
- 205.200 Applicability.
- 205.201 Definitions.
- 205.202 Noise emission standards.
- 205.203 Maintenance of records; submittal of information.
- 205.204 Test procedures.
- 205.205 Production verification.
- 205.205–1 General requirements.
- 205.205–2 Production verification: Compliance with standards.
- 205.205–3 Configuration identification.
- 205.205–4 Production verification report: Required data.
- 205.205–5 Test sample selection.
- 205.205–6 Test preparation.
- 205.205–7 Testing.
- 205.205–8 Addition of, changes to and deviation from a compactor configuration during the year.
- 205.205–9 Production verification based on data from previous years.
- 205.205–10 Cessation of distribution.
- 205.205–11 Labeling-compliance.
- 205.206 Testing by the Administrator.
- 205.207 Selective enforcement auditing requirements.
- 205.207–1 Test request.
- 205.207–2 Test sample selection.
- 205.207–3 Test sample preparation.
- 205.207–4 Testing procedures.
- 205.207–5 Reporting of the test results.
- 205.207–6 Acceptance and rejection of batches.
- 205.207–7 Acceptance and rejection of batch sequence.
- 205.207–8 Continued testing.
- 205.207–9 Prohibition of distribution in commerce: manufacturer's remedy.
- 205.208 In-use requirements.
- 205.208–1 Warranty.
- 205.208–2 Tampering.
- 205.208–3 Instructions for maintenance, use and repair.
- 205.208–4 Sound level degradation factor (SLDF) and retention of durability data.
- 205.209 Recall of non-complying compactors.

Appendix I.

AUTHORITY: Sec. 6, Noise Control Act (42 U.S.C 4095) and additional authority as specified.

Subpart F—Truck-Mounted Solid Waste Compactors

§ 205.200 Applicability.

(a) Except as otherwise provided for in these regulations the provisions of this subpart apply to any truck mounted solid waste compactor (hereinafter compactor) which meets the definition of the term "new product" in the Act.

(b) The provisions of the subpart do not apply to: (1) Non-compacting vehicles that pick up solid waste containers; (2) Non-compacting collection vehicles; (3) Stationary trash compactors; (4) Solid waste containers.

§ 205.201 Definitions.

(a) As used in this subpart, all terms not defined herein shall have the meaning given them in the Act or in other subparts of this part.

(1) "Acceptable Quality Level" (AQL) means the maximum percentage of failing compactors that, for purposes of sampling inspection, can be considered satisfactory as a process average.

(2) "Acceptance of a batch" means that the number of non-complying compactors in the batch sample is less than or equal to the acceptance number as determined by the appropriate sampling plan.

(3) "Acceptance of a batch sequence" means that the number of rejected batches in the sequence is less than or equal to the acceptance number as determined by the appropriate sampling plan.

(4) "Acceptance of a compactor" means that the measured emissions of the compactor when measured in accordance with the applicable procedure, as delineated in this subpart, conform to the applicable standard.

(5) "Batch" means the collection of compactors of the same category or configuration as designated by the Administrator in a test request, from which a batch sample is to be drawn, and inspected to determine conformance with the acceptability criteria.

(6) "Batch size" means the number as designated by the Administrator in the test request of compactors of the same category or configuration in a batch.

(7) "Batch sample" means the collection of compactors of the same category or configuration which are drawn from a batch.

(8) "Batch sample size" means the number of compactors of the same category or configuration in a batch sample.

(9) "Category" means a group of compactor configurations which are identical in all material aspects with respect to the parameters listed in § 205.205–2.

V 42 166 AUG 26 77 UMI

(10) "Compactor" means a truck mounted solid waste compactor, which comprises an engine powered truck cab and chassis or trailer, equipped with machinery for receiving, compacting, transporting and unloading solid waste.

(11) "Configuration" means the basic classification unit of a manufacturer's product line and is comprised of all compactor designs, models or series which are identical in material aspects with respect to the parameters listed in § 205.-205–3.

(12) "Exhaust system" means the system comprised of a combination of components which provide for enclosed flow of exhaust gas from engine exhaust port to the atmosphere.

(13) "Failing compactor" means that the measured emissions of the compactor when measured in accordance with the applicable procedure, as delineated in this subpart, exceed the applicable standard.

(14) "Inspection criteria" means the rejection and acceptance numbers associated with a particular sampling plan.

(15) "Model year" means the manufacturer's annual production period which includes January 1 of such calendar year: *Provided*, That if the manufacturer has no annual production period, the term "model year" shall mean the calendar year.

(16) "Noise control system" includes any part, component or system the primary purpose of which is to control or cause the reduction of noise emitted from a compactor.

(17) "Noise emission test" means a test conducted pursuant to the measurement methodology specified in this subpart.

(18) "Production verification compactor" means any compactor selected for testing, tested or verified pursuant to the production verification requirements of this subpart.

(19) "Rejection of a batch" means the number of non-complying compactors in the batch sample is greater than or equal to the rejection number as determined by the appropriate sampling plan.

(20) "Rejection of a batch sequence" means that the number of rejected batches in a sequence is equal to or greater than the rejection number as determined by the appropriate sampling plan.

(21) "Shift" means the regular production work period for one group of workers.

(22) "Tampering" means those acts prohibited by section 10(a)(2) of the Act.

(23) "Test compactor" means a compactor in a test sample or a production verification compactor.

(24) "Test sample" means the collection of compactors from the same category or configuration which is drawn from the batch sample and which will receive noise emission tests.

(25) "Test sample size" means the number of compactors of the same category or configuration in a test sample.

(26) "Low Noise Emission Product" (LNEP) means any product which emits noise in amounts significantly below the levels specified in noise emission standards under the applicable regulation.

(27) "Sound Level Degradation Factor" (SLDF) means the increase in A-weighted sound level which the product configuration is projected to undergo during the Acoustical Assurance Period when properly maintained and used.

(28) "Warranty" means the warranty required by section 6(d)(1) of the Act.

§ 205.202 Noise emission standards.

(a) *Time-of-sale standard.* Truck-mounted solid waste compactors which are manufactured after the dates listed below shall be designed, built, and equipped so that at the time of sale they will not produce sound emissions in excess of the limits specified for the dates listed.

Effective date:	*Maximum steady sound level limit*
January 1, 1979	78 decibels.
January 1, 1982	75 decibels.

Machinery-related impulse sounds shall not exceed the maximum steady sound level limits by more than 5 decibels.

(b) The standards set forth in paragraph (a) of this section refer to the sound emissions as measured in accordance with the procedures prescribed in § 205.204.

(c) *In-Use Standard.* Following the effective date of the applicable standard, truck-mounted solid waste compactors shall continue to meet the standard for an Acoustical Assurance Period of 3 years or 7500 operating hours after sale to the ultimate purchaser, provided that the product is properly maintained and used in accordance with manufacturers' recommendations: *And provided*, That there has been no tampering with noise control components. At the time of product verification (PV) testing in § 205.205 and selective enforcement auditing (SEA) testing in § 205.207, new truck mounted solid waste compactors must comply with the standards set forth in paragraph (a) of this section minus the sound level degradation factor (SLDF) developed in accordance with § 205.208–4.

(d) *Low Noise Emission Product.* For the purpose of Low-Noise-Emission-Product Certification (LNEP) pursuant to 40 CFR Part 203, truck mounted solid waste compactors subject to this subpart which are procured after January 1, 1978, shall not emit noise in excess of 70 dBA when determined in accordance with the procedures prescribed in § 205.204. LNEP products must meet all requirements contained in paragraph (c) of this section.

(Sec. 10, 15 of the Noise Control Act (42 U.S.C. 4909, 4914).)

§ 205.203 Maintenance of records; submittal of information.

(a) Except as otherwise provided for in the regulation, the manufacturer of any new compactor subject to any of the standards or procedures prescribed in this subpart shall establish, maintain and retain the following adequately organized and indexed records:

(1) General records: (i) Identification and description by category and configuration parameters of all compactors composing the manufacturer's product line for which testing is required under this subpart and the identification and description of all devices incorporated into the compactor for the purpose of noise control and attenuation.

(ii) A description of any procedures other than those contained in this regulation used to perform noise tests on any test compactor.

(iii) A record of the calibration of the acoustical instrumentation as is required by § 205.204.

(iv) A record of the date of manufacture of each compactor subject to this part, keyed to the serial number or other coded identification contained on the label affixed to each compactor pursuant to § 205.205–11.

(2) Individual records for test compactors:

(i) A complete record of all noise emission tests performed for PV and SEA (except tests performed by EPA directly), including all individual worksheets and/or other documentation relating to each test, or exact copies thereof.

(ii) A record and description of all repairs, maintenance and other servicing performed on PV and SEA test products giving the date and time of the maintenance or service, the reason for it, the person authorizing it, and the names of supervisory personnel responsible for the conduct of the maintenance or service.

(3) A properly filed production verification report following the format prescribed by the Administrator in § 205.-205–4 fulfills the requirements of paragraphs (a)(1)(i), (ii), (iii), and (a)(2)(i) and (ii) of this section.

(4) All records required to be maintained under this part shall be retained by the manufacturer for a period of three (3) years from the production verification date. Records may be retained as hard copy or alternatively reduced to microfilm, punch cards, etc., depending on the record retention procedures of the manufacturer; however, if an alternate method is to be used, all required information shall be retained relative to that alternative method.

(b) The manufacturer shall, pursuant to a request made by the Administrator, submit to the Administrator the following information with regard to new compactor production:

(1) Number of compactors, by category or configuration, scheduled for production for the time period designated in the request.

(2) Number of compactors, by category or configuration, produced during the time period designated in the request.

(Sec. 13 of the Noise Control Act (42 U.S.C. 4912).)

§ 205.204 Test procedures.

Conformity of compactors with the standards specified in § 205.202 shall be determined according to the test procedures specified in this section.

(a) *General.* This section prescribes the conditions under which noise emission standard compliance testing shall be conducted and the measurement procedures that shall be used to measure the sound level and to calculate the average sound level of truck-mounted solid waste compactors for which the test is conducted.

(b) *Test site description.* The test site shall consist of an open area above a hard reflecting plane. The reflecting plane shall consist of a surface of sealed concrete or sealed asphalt, shall be flat with ±0.05 meters, and shall extend 1 meter beyond each microphone location. No reflecting surface such as a building, signboard, hillside, etc. shall be located within 15 meters of a microphone location.

(c) *Measurement equipment.* The measurement equipment to be used during noise standard compliance testing shall consist of the equivalent of the following:

(1) Sound level meter and microphone system conforming to the Type I requirements of American National Standards Institute (ANSI) S1.4.1971, "Specification for Sound Level Meters".

(2) As an alternative to making direct measurements using a sound level meter, a microphone or sound level meter may be used with a magnetic tape recorder and/or a graphic level recorder or indicating meter, providing the system meets the requirements of SAE Recommended Practice J184, Qualifying a Sound Data Acquisition System.

(3) A windscreen shall be employed with the microphone during all measurements of compactor noise when the wind speed exceeds 11 km/hr (7 mph). The windscreen shall not affect sound levels from the compactor in excess of 0.5 decibel.

(4) The entire acoustical instrumentation system including the microphone and cable shall be calibrated before and after each test series. A sound level calibrator accurate within ±0.5 dB shall be used to calibrate the acoustic measuring system. A calibration of the instrumentation shall be performed at least annually using methodology of sufficient precision and accuracy to determine compliance with ANS S1.4–1971 and IEC 179. This calibration shall consist, at a minimum, of an overall frequency response calibration and attenuator (gain control) calibration plus a measurement of dynamic range and instrument noise floor.

(5) An anemometer or other device accurate to within ±10 percent shall be used to measure wind velocity.

(6) An indicator accurate to within ±2 percent shall be used to measure speed in RPM of the engine used as a prime mover for the compactor operation.

(7) A barometer accurate to within ±5 percent shall be used for measuring atmospheric pressure.

(8) A stopwatch having an accuracy of better than 1 percent shall be used to measure time intervals.

(9) A thermometer accurate to within ±1 degree shall be used to measure ambient temperature.

(d) *Microphone locations.* The microphone shall be located 1.2±0.1 meters (4 ft±½ ft) above the ground plane and 7±0.3 meters (23 feet±1 ft) from the mid-point of the surface of the truck on the side on which the measurements are being made. Measurements will be made at four microphone positions to the front, rear and each side of the vehicle. (See Figure 1 for layout of microphones at test site.)

(e) *Test conditions.* Noise standard compliance testing shall be carried out under the following conditions:

(1) Zero rain or other precipitation.

(2) Wind speed less than 19 km/hr.

(3) No observer located within 2 meters in any direction of any microphone location, nor shall any person be located between the test machine and microphone(s).

(4) The reflecting plane, described in paragraph (b) of this section, shall be free of flowing or standing water, snow or other covering and any extraneous materials such as gravel.

(5) Sound levels produced by the test compactor shall be at least 10 dB greater than the test site background sound level.

(f) *Test procedure.* (1) The waste compactor equipment shall be operated with the vehicle stationary.

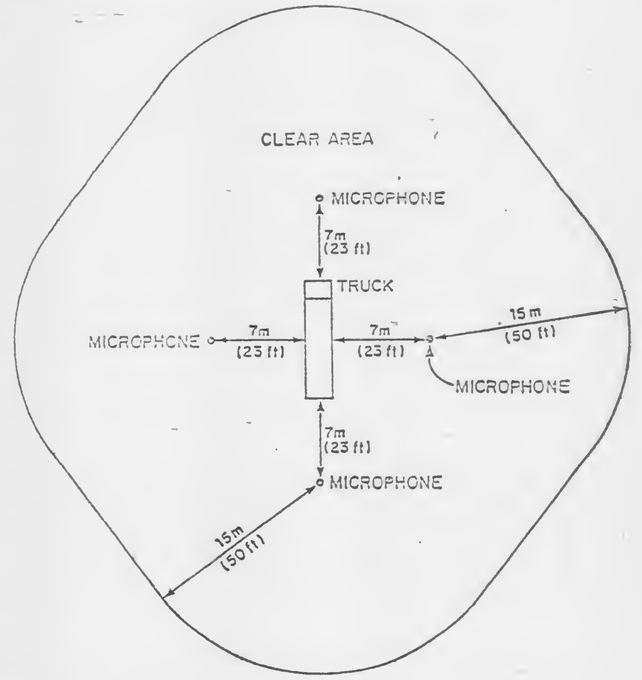

Figure 1 Noise Measurement Site

(2) The vehicle engine will be started and allowed to reach its recommended operating temperature. In addition, if the ambient temperature is below 60°F, the compaction equipment will be operated for enough cycles to allow the hydraulic oil and components to reach a stable operating temperature.

(3) The compaction equipment shall be operated empty. Trucks which normally load containers will be measured loading an empty container.

(4) The compaction equipment shall be operated in accordance with its normal operating procedures. The truck engine will be operated at its speed which is governed for the cycle or, if there is no such speed, the maximum allowable engine or pump speed, whichever is lower.

(5) The waste compaction equipment shall be run through two complete compaction cycles for each noise measurement taken. If the readings differ by more than 2 dB, further readings will be

V 42 166 AUG 26 77 UMI

taken until two agree within 2 dB and the average will be taken.

(6) The meter shall be set for "fast" response and on the "A" weighting network.

(7) Waste compaction equipment cycling noise. The waste compaction equipment will be operated through its normal cycle. The maximum sound level, ignoring any peaks due to impacts, will be recorded with the meter set for "fast" response and "A"-weighting.

(8) Waste compaction equipment impact noise. The waste compaction equipment will be operated through its normal cycle. The peak sound level due to impacts will be recorded with the meter set for "fast" response and "A"—weighting.

(9) The waste compaction equipment will be operated through its normal cycle. The time from the beginning to the end of the cycle will be recorded.

(10) Sound level measurements shall be taken at each of the four microphone positions around the vehicle and the following data will be reported:

(i) Maximum sound level during the compaction and operating cycle at each location, ignoring impacts.

(ii) Maximum impact sound level.

(iii) The four-location energy average for each of the above two data categories computed according to the equation.

$$\overline{L} = 10 \log \left(\sum_{i=1}^{4} 10^{L_i/10} \right) - 6\text{dB}$$

where:

$\overline{L}$ = average sound level, in decibels L_i is the A-weighted sound level corresponding to the i'th microphone location.

(iv) Cycle time.

(g) The Administrator may approve applications from manufacturers for the use of test procedures which differ from those contained in this subpart so long as the alternate procedures have been demonstrated to correlate with the prescribed procedure. To be acceptable, alternate testing procedures shall be such that the test results obtained will identify all those test units which would not comply with the noise emission limit prescribed in § 205.202 when tested in accordance with the procedures contained in § 205.204–1(a). Tests conducted by manufacturers under approved alternate procedures may be accepted by the Administrator for all purposes, including, but not limited to, production verification testing and selective enforcement audit testing.

(h) *References.* Suggested reference material is as follows:

§ 205.205 Production verification.

§ 205.205–1 General requirements.

(a) Every new compactor manufactured for distribution in commerce in the United States which is subject to the standards prescribed in this subpart and not exempted in accordance with § 205.5:

(1) Shall be verified in accordance with the production verification procedures described in this subpart;

(2) Shall be represented in a production verification report, as required by § 205.205–4;

(3) Shall be labeled in accordance with the requirements of § 205.205–11 of this subpart; and

(4) Shall conform to the applicable noise emission standards established in § 205.202 of this regulation.

(b) The requirements of paragraph (a) of this section apply to the new products at the time they first conform to the definition of compactors in this regulation. The responsibility for complying with the requirement of paragraph (a) of this section rests with the manufacturer of the new product at the time the product first conforms to the definition of truck-mounted solid waste compactor in this regulation.

(c) Subsequent manufacturers of a new product which conforms to the definition of truck mounted solid waste compactors in this regulation when received by them from a prior manuufacturer, need not fulfill the requirements of paragraph (a)(1), (2) or (3) of this section where such requirements have already been complied with by a prior manufacturer: *Provided*, That such subsequent manufacturing does not constitute tampering as defined pursuant to § 205.208–2.

(Secs. 10 and 13 of the Noise Control Act (42 U.S.C. 4909, 4912).)

§ 205.205–2 Production verification: compliance with standards.

(a)(1) Prior to distribution in commerce of a compactor of a specific configuration, the first manufacturer of such compactor must verify such configuration in accordance with the requirements of this subpart. However, production verification of a configuration is automatically and conditionally waived by the Administrator without request by a manufacturer for a period of up to 45 consecutive days from the date of distribution in commerce by a manufacturer of the first compactor of that configuration, in order to enable a manufacturer to distribute compactors in commerce pending compliance and to avoid disruption of the manufacturing process. To qualify for such waiver, a manufacturer must conduct any tests required in paragraphs (b) or (c) of this section as soon as weather conditions at a manufacturer's test facility permit after distribution in commerce of the first compactor of a configuration. Such conditions must be documented by the manufacturer and provided to the Administrator on request. Failure to test on such first day will result in automatic and retroactive rescission of the waiver and will render the manufacturer liable for illegal distribution of products in commerce.

(2) At the completion of any 45-day period, the conditional waiver granted under paragraph (a)(1) of this section is rescinded for that configuration unless the manufacturer has complied with the requirements of paragraphs (b) or (c) of this section as appropriate; except that, upon application by a manufacturer and a showing that the weather conditions at the manufacturer's test facility or other conditions beyond the control of the manufacturer made it impossible to conduct the required testing, and that documentation of such conditions is submitted by the manufacturer, the Administrator at his option may extend for a specified period (not to exceed 45 days) conditional production verification for a configuration to enable the manufacturer to comply with the requirements of paragraph (b) or (c) of this section; or he may require pursuant to § 205.207 that the manufacturer ship the test compactor to the EPA test facility for testing by the Administrator.

(b) The production verification requirements with regard to each compactor configuration consist of:

(1) Testing in accordance with § 205.204 of a compactor selected in accordance with § 205.205–5;

(2) Compliance of the test compactor with a sound level such that the arithmetic addition of the Sound Level Degradation Factor (SLDF, determined in accordance with § 205.208–4) to that sound level does not exceed the applicable standards, when tested in accordance with § 205.204.

(3) Submission of a production verification report pursuant to § 205.205–4.

(c)(1) In lieu of testing products of every configuration as described in paragraph (b) of this section, the manufacturer may elect to verify the configuration based on representative testing, the requirements of which consist of:

(i) Grouping configurations into a category where each category will be determined by a separate combination of at least the following parameters (a manufacturer may use more parameters):

(A) Truck Engine Fuel Type: (*1*) Gasoline; (2) Diesel; (3) Other.

(B) Truck Engine Type: (*1*) Piston; (2) Rotary; (3) Turbine; (*4*) Other.

(C) Compactor Type: (*1*) Front Loader; (*2*) Side Loader; (*3*) Rear Loader.

(D) Compactor Power System: (*1*) Direct Drive; (2) Auxiliary Engine; (3) Power Take Off: (*i*) Transmission Mounted; (*ii*) Crankshaft Mounted; (*iii*) Flywheel Mounted.

(E) Hydraulic Power System (*1*) Pump;

(ii)(A) Identifying the configuration within each category which emits the highest sound level (in dBA) at the end of the defined Acoustical Assurance Period based on best technical judgment, emission test data, or both;

(B) If two or more configurations would emit the same sound level described in (c)(1)(ii)(A) of this section, then identifying the configuration that emits the highest sound level when distributed into commerce;

(iii) Testing in accordance with § 205.204 of a compactor selected in accordance with § 205.205–5 which must be a compactor of the configuration which is identified pursuant to paragraph (c)(1)(ii) of this section as having the highest sound level (estimated or actual) within the category;

iv) Compliance of the test compactor with a sound level such that the arithmetic addition of the SLDF to that level does not exceed the applicable standards when tested in accordance with § 205.204; and

(v) Submission of a production verification report pursuant to § 205.205–4.

(2) Where the requirements of paragraph (c)(1) of this section are complied with, all those configurations contained within a category are considered to be represented by the tested compactor and are considered to be production verified.

(3) Where all other requirements of paragraph (c)(1) of this section are complied with except that the manufacturer tests a configuration which does not have the highest sound level in a category [as identified in paragraph (c)(1)(ii) of this section], all those configurations in the category which have sound levels no greater than the tested compactor are considered to be production verified; however, a manufacturer must production verify according to the requirements of paragraphs (b)(1) and/or (c)(1) of this section any configurations in the subject category which have a higher sound level than the compactor configuration tested.

(d) A manufacturer may elect to production verify using representative testing pursuant to paragraph (c) of this section, all or part of his product line.

(e) The manufacturer may, at his option, proceed with any of the following alternatives with respect to any compactor determined not in compliance with applicable standards.

(1) Delete that configuration from the production verification report. Configurations so deleted may be included in a later report under § 205.205–4. However, in the case of representative testing a new test compactor from another configuration must be selected and production verified according to the requirements of paragraph (c) of this section, in order to production verify the category represented by the non-compliant compactor.

(2) Modify the test compactor and demonstrate by testing that it meets applicable standards. All modifications and test results shall be reported in the production verification report. The manufacturer shall modify all production compactors of the same configuration in the same manner as the test compactor before distribution into commerce.

(f) Upon request by the Director, Noise Enforcement Division, the manufacturer shall notify said Director of any production verification testing scheduled by the manufacturer pursuant to this section so that EPA Enforcement Officers may be present to observe and monitor such testing or conduct the testing in lieu of the manufacturer.

(Sec. 13 of the Noise Control Act (42 U.S.C. 4912).)

§ 205.205–3 Configuration identification.

(a) A separate product configuration shall be determined by each combination of the following parameters:

(1) Category parameters listed in § 205.205–2.

(2) Truck Chassis Manufacturer.

(3) Truck Engine Type: (i) Gasoline; (ii) Diesel; (iii) Piston; (iv) Rotary; (v) Turbine; (vi) Number of cylinders and configuration; (vii) Displacement; (viii) Horsepower; (ix) Full load RPM.

(4) Transmission: (i) Automatic; (ii) Manual.

(5) Truck Exhaust System: (i) Horizontal; (ii) Vertical.

(6) Compactor Type: (i) Front loader; (ii) Side loader; (iii) Rear loader.

(7) Compactor Capacity.

(8) Compactor Power System: (i) Power take-off: (A) Transmission mounted; (B) Flywheel mounted; (C) Crankshaft mounted; (D) Full load RPM; (E) Ratio; (F) Manufacturer; (G) Manufacturer's model designation.

(ii) Auxiliary engine: (A) Type: (a) Gasoline; (b) Diesel; (c) Other.

(B) Number of cylinders and configuration.

(C) Manufacturer.

(D) Horsepower.

(E) Displacement.

(F) Full load RPM.

(G) Cooling system.

(H) Manufacturer's model designation.

(I) Exhaust system.

(iii) Direct drive.

(9) Hydraulic power system: (i) Pump: (A) Manufacturer.

(Sec. 13 of the Noise Control Act (42 U.S.C. 4912).)

§ 205.205–4 Production verification report: required data.

(a) Prior to distribution in commerce of any product to which these regulations apply, the manufacturer shall submit a production verification report to the Director, Noise Enforcement Division (EN–387), U.S. Environmental Protection Agency, Washington, D.C. 20460, unless product verification is waived in accordance with § 205.205–2(a) (1) and (2). A manufacturer may choose to submit separate production verification reports for different parts of his product line.

(b) The report shall be signed by an authorized representative of the manufacturer and shall include the following:

(1) The name, location and description of the manufacturer's noise emission test facilities which meet the specifications of § 205.204 and have been utilized to conduct testing pursuant to this subpart: Except that a test facility that has been described in a previous submission under this subpart need not again be described but must be identified as such.

(2) A description of normal predelivery maintenance procedure.

(3) A description of all compactor configurations, as determined in accordance with § 205.205–3, to be distributed in commerce by the manufacturer, including the sound level degradation factor for each configuration and a list identifying or defining any device or element of design (including its location and method of operation) incorporated into compactors for the purpose of noise control and any device that affects noice emission from the compactor and does not operate during the normal operating modes of the compactor. The manufacturer may satisfy the compactor configuration description requirements of this parargaph by submitting as part of the production verification report a copy of his technical sales literature that describes his product line including options, provided that this literature is supplemented with any additional information necessary to fulfill the requirements of this section. If a manufacturer elects to production verify pursuant to § 205.205–2(c), the configuration, within each category, which is estimated to have the highest A-weighted sound level at the end of its Acoustical Assurance Period shall be identified. The manufacturer may estimate the average sound level based on his best technical judgment or data. The criteria used to estimate each sound level shall be stated with the estimates.

(4) The following information for each noise emission test conducted:

(i) The completed data sheet required by § 205.204 for all official tests conducted in accordance with § 205.205–7 including, for each invalid test, the reason for invalidation.

(ii) A complete description of any preparation, maintenance or testing which was performed on the test compactor and which will not be performed on all other production compactors.

(iii) The reason for replacement where a replacement compactor was necessary, and test results, if any, for replaced compactors.

(5) A complete description of the sound data acquisition system if other than those specified in § 205.204.

(6) The following statement and endorsement:

This report is submitted pursuant to Section 6 and Section 13 of the Noise Control Act of 1972. All testing for which data is reported herein is conducted in strict conformance with applicable regulations under 40 CFR Part 205, et. seq. All the data reported herein is a true and accurate representation of such testing. All other information reported herein is, to the best of _____

(company name)

knowledge, true and accurate. I am aware of the penalties associated with violations of the Noise Control Act of 1972 and the regulations thereunder.

(Signed)

_____

(authorized representative)

V 42166 AUG 26 77 UMI

(c) Where a manufacturer elects to submit separate production verification reports for portions of his product line as provided for in paragraph (a) of this section, information provided in previous reports need not be resubmitted: Except, that information necessary to update or make current previously submitted information must be submitted.

(d) Any change with respect to information reported pursuant to this subpart shall be reported as soon as the information becomes available.

(Sec. 13 of the Noise Control Act (42 U.S.C. 4912).)

§ 205.205–5 Test sample selection.

Test compactors of a configuration for which production verification testing is required § 205.205–2 shall be a compactor of the subject configuration which has been assembled using the manufacturer's normal production processes and will be sold or offered for sale in commerce.

(Sec. 13 of the Noise Control Act (42 U.S.C. 4912).)

§ 205.205–6 Test preparation.

(a) Prior to the official test, the test compactor selected in accordance with § 205.205–5 shall not be prepared, tested, modified, adjusted, or maintained in any manner unless such adjustments, preparation, modification or tests are part of the manufacturer's prescribed manufacturing and inspection procedures, and are documented in the manufacturer's internal compactor assembly and inspection procedures, or unless such adjustments or tests are required or permitted under this subpart or are approved in advance by the Administrator. The manufacturer may perform adjustments, preparations, modifications or tests normally performed at the port of entry of the manufacturer to prepare the compactor for delivery to a dealer or customer, provided that such adjustments, preparation, modification, or tests are documented in the production verification report.

(b) Equipment or fixtures necessary to conduct the test may be installed on the compactor: *Provided*, That such equipment or fixtures shall have no effect on the noise emissions of the compactor, as determined by the measurement methodology.

(c) In the event of a compactor malfunction (i.e., failure to start) the manufacturer may perform the maintenance that is necessary to enable the compactor to operate in a normal manner: *Provided*, That such maintenance is documented and reported in the final report prepared and submitted in accordance with this subpart.

(d) No quality control, quality assurance testing, assembly or selection procedures shall be used on the test compactor or any portion thereof, including parts and subassemblies, that will not normally be used during the production and assembly of all other compactors of the category which will be distributed in commerce, unless such procedures are required or permitted under this subpart, or are approved in advance by the Administrator.

(Sec. 13 of the Noise Control Act (42 U.S.C. 4912).)

§ 205.205–7 Testing.

(a) The manufacturer shall conduct one valid test in accordance with the test procedures specified in § 205.204 for each compactor selected for verification testing.

(b) No maintenance will be performed on the test compactors except as provided for by § 205.205–6.

(c) In the event a compactor is unable to complete the noise test, the manufacturer may replace the compactor. Any replacement compactor will be a production compactor of the same configuration as the replaced compactor and will be subject to all the provisions of these regulations. Any replacement shall be reported in the production verification report including the reason for the replacement.

(d) In the event a compactor fails to comply with the standards of this subpart when tested in accordance with the procedures specified in paragraph (a) of this section, the manufacturer may proceed in accordance with § 205.205–2(e).

(Sec. 13 of the Noise Control Act (42 U.S.C. 4912).)

§ 205.205–8 Addition of changes to and deviation from a compactor configuration during the year.

(a) Any change to a configuration with respect to any of the parameters stated in § 205.205–3 shall constitute the addition of a new and separate configuration or category to the manufacturer's product line.

(b) (1) When a manufacturer introduces a new category or configuration to his product line, he shall proceed in accordance with § 205.205–2.

(2) If the configuration to be added can be grouped within a verified category and the new configuration is estimated to have a lower A-weighted sound level than a previously verified configuration with the same category, the configuration shall be considered verified: *Provided*, That the manufacturer submits a report pursuant to § 205.205–4 with respect to such configuration.

(Sec. 13 of the Noise Control Act, (42 U.S.C. 4912).)

§ 205.205–9 Production Verification based on data from previous years.

(a) Production verification of each configuration will be required at the beginning of each year except that in certain instances, the Administrator, upon request by the manufacturer, may permit the use of production verification data for specific configurations from previous production verification reports. Considerations relevant to his decision may include, but are not limited to:

(1) The level of the standard in effect for the year in question;

(2) Performance based on production verification data for previous years;

(3) Performance based on data obtained from selective enforcement testing during previous years; and

(4) The number and type of noise emission design changes incorporated in the new models that affect the noise emission level of that model.

(Sec. 13 of the Noise Conrtol Act (42 U.S.C. 4912).)

§ 205.205–10 Cessation of distribution.

(a) If a category or configuration is found to be non-conforming to this subpart by reason of failure to be properly verified, as required by § 205.205–2, the Administrator may issue an order to the manufacturer to cease to distribute in commerce compactors of that category or configuration. However, such an order shall not be issued if the manufacturer has made a good faith attempt to properly production verify the category or configuration. The burden of establishing such good faith shall rest with the manufacturer.

(b) Any such order shall be issued after notice and opportunity for a hearing.

(Sec. 11 of the Noise Control Act (42 U.S.C. 4910).)

§ 205.205–11 Labeling—compliance.

(a) (1) The manufacturer of any compactor subject to the standards prescribed in §205.202 shall, at the time of manufacture, affix a permanent, legible label, of the type and in the manner described in paragraphs (a) (2), (3) and (4) of this section, containing the information specified in this section, to all such compactors to be distributed in commerce.

(2) A plastic or metal label shall be welded, riveted, or otherwise permanently attached in a readily visible position, on the forward driver's side of the compactor unit body.

(3) The label shall be affixed by the compactor manufacturer, who has verified such compactor pursuant to § 205.205–2, in such a manner that it cannot be removed without destroying or defacing the label, and shall not be affixed to any piece of equipment that is easily detached from such compactor.

(4) The label shall contain the following information lettered in the English language in block letters and numerals, which shall be of a color that contrasts with the background of the label:

(i) The label heading Product Noise Emission Control Information;

(ii) Full corporate name and trademark of manufacturer;

(iii) Identification number;

(iv) Date of manufacture, which may consist of a serial number of code in those instances where records specified in § 205.203(a)(1)(iv) are maintained; and

(v) The statement:

This compactor, when new, is warranted not to exceed the applicable standard effective on (month/year) when tested as prescribed by U.S. EPA. Tampering with any product noise control device or element of design (see owner's manual) or use of this product after such tampering is prohibited by Federal Law.

(b) Any compactor manufactured solely for use outside the United States and not conforming to the noise emission standards for this regulation shall be clearly labeled "For Export Only."

(Sec. 13 of the Noise Control Act, (42 U.S.C. 4912).)

§ 205.206 Testing by the Administrator.

(a) (1) The Administrator may require that a product to be tested pursuant to these regulations or any untested product be submitted to him at such time and place as he may designate for the purpose of conducting tests in accordance with the test procedures described in § 205.204 to determine whether such products conform to applicable regulations.

(2) The Administrator may specify that he will conduct such testing at the manufacturer's facility, in which case instrumentation and equipment of the type required by these regulations shall be made available by the manufacturer for test operations. The Administrator may conduct such tests with Agency equipment, which shall equal or exceed the performance specifications of the instrumentation and equipment specified by the Administrator in this regulation.

(b) (1) If, based on tests conducted by EPA, or other relevant information, the Administrator determines that the test facility does not meet the requirements of § 205.204 (b) and (c) (including any alternate procedures that may be approved under § 205.204(h)), he will notify the manufacturer in writing of his determination and the reasons therefor.

(2) After any notification issued under paragraph (b)(1) of this section has taken effect, no data thereafter derived from such test facility will be acceptable for purposes of this subpart and the Administrator may issue an order to the manufacturer, with respect to the product category or configuration in question, to cease to distribute in commerce compactors of such category or configuration: Except that any such order shall be issued only after notice and opportunity for a hearing. Such notification may be included in any notification under paragraph (b)(1) of this section. A manufacturer may request that the Administrator grant a hearing; such request shall be made not later than 15 days, or other such period as may be allowed by the Administrator, subsequent to notification of the Administrator's intent to issue an order to cease to distribute.

(3) The manufacturer may request in writing that the Administrator reconsider his determination in paragraph (b)(1) of this section based on data or information which indicates that changes have been made to the test facility and such changes have resolved the reasons for disqualification.

(4) The Administrator will notify the manufacturer of his determination with regard to the requalification of the test facility within 10 days of the manufacturer's request for reconsideration pursuant to paragraph (b)(3) of this section.

(Secs. 11 and 13 of the Noise Control Act (42 U.S.C. 4910, 4912).)

§ 205.207 Selective enforcement auditing requirements.

§ 205.207–1 Test request.

(a) The Administrator will request all testing under this subpart by means of a test request addressed to the manufacturer.

(b) The test request will be signed by the Assistant Administrator for Enforcement or his designee. The test request will be delivered by an EPA Enforcement Officer to the plant manager or other responsible official as designated by the manufacturer.

(c) The test request will specify the compactor category or configuration selected for testing, the batch selected for testing, the batch size, the manufacturer's plant or storage facility from which the compactors shall be selected, and the time at which a compactor shall be selected. The test request will also provide for situations in which the selected configuration or category is unavailable for testing. The test request may include an alternative category or configuration selected for testing in the event that compactors of the first specified category or configuration are not available for testing because the units are not being manufactured at the specified plant, are not being manufactured during the specified time, or are not being stored at the specified plant or storage facility.

(d) Any manufacturer shall, upon receipt of the test request: (1) If the manufacturer produces less than 4 of the specified category or configuration of compactor per given period of time specified in the test request, test every compactor produced in two consecutive batches in accordance with this regulation and the conditions specified in the test request.

(i) If one or more of the compactors in a test batch fails to meet the standard, the batch is rejected.

(ii) If one batch is rejected then the batch sequence determined under this paragraph is rejected.

(2) If he produces 4 or more of the specified category or configuration of compactors per given period of time as specified in the test request, select and test a batch sample of compactors from two consecutively produced batches of the compactor category or configuration specified in the test request in accordance with these regulations and the conditions specified in the test request.

(e) (1) Any testing conducted by the manufacturer pursuant to a test request shall be initiated within such period as is specified within the test request. Such test initiation may be delayed for increments of 24 hours or one business day where ambient test site weather conditions in any 24-hour period do not permit testing: *Provided*, That the ambient test site weather conditions for that period are recorded.

(2) The manufacturer shall complete noise emission testing on a minimum of five compactors per day unless otherwise provided for by the Administrator or unless ambient test site conditions permit only the testing of a lesser number: *Provided*, That ambient test site weather conditions for that period are recorded.

(3) The manufacturer shall be allowed 24 hours to ship compactors from a batch sample from the assembly plant to the testing facility if the facility is not located at the plant or in close proximity to the plant: Except, that the Administrator may approve more time based upon a request by the manufacturer accompanied by a satisfactory justification.

(f) The Administrator may issue an order to the manufacturer to cease to distribute in commerce compactors of a specified category or configuration being manufactured at a particular facility if:

(1) The manufacturer refuses to comply with the provisions of a test request issued by the Administrator pursuant to this section; or

(2) The manufacturer refuses to comply with any of the requirements of this section.

(g) A cease-to-distribute order shall not be issued under paragraph (f) of this section if such refusal is caused by conditions and circumstances outside the control of the manufacturer which render it impossible to comply with the provisions of a test request or any other requirements of this section. Such conditions and circumstances shall include, but are not limited to, any uncontrollable factors which result in the temporary unavailability of equipment and personnel needed to conduct the required tests, such as equipment breakdown or failure, or illness of personnel, but shall not include failure of the manufacturer to adequately plan for and provide the equipment and personnel needed to conduct the tests. The manufacturer will bear the burden of establishing the presence of the conditions and circumstances required by this paragraph.

(h) Any such order to cease to distribute shall be issued only after a notice and opportunity for a hearing.

(Secs. 11, 13 of the Noise Control Act (42 U.S.C. 4910, 4912).)

§ 205.207–2 Test sample selection.

(a) Compactors comprising the batch sample which are required to be tested pursuant to a test request in accordance with this subpart will be selected in the manner specified in the test request from a batch of compactors of the category or configuration specified in the test request. If the test request specifies that the compactors comprising the batch sample must be selected randomly, the random selection will be achieved by sequentially numbering all of the compactors in the batch and then using a table of random numbers to select the number of compactors as specified in paragraph (c) of this section based on

V 42166 AUG 26 77 UMI

the batch size designated by the Administrator in the test request. An alternative random selection plan may be used by a manufacturer: *Provided*, That such a plan is approved by the Administrator. If the test request does not specify that test compactors must be randomly selected, the manufacturer shall select test compactors consecutively. The provisions of § 205.205–7 (b) and (c) shall also pertain to this section.

(b) The Acceptable Quality Level is 10 percent. The appropriate sampling plans associated with the designated AQL are contained in Appendix I, Table II of this subpart.

(c) The appropriate batch sample size will be determined by reference to Appendix I, Tables I and II. A code letter is obtained from Table I based on the batch size designated by the Administrator in a test request. The batch sample size will be obtained from Table II of Appendix I of this subpart. The batch sample size will be equal to the maximum cumulative sample size for the appropriate code letter obtained from Table I plus an additional 10 percent rounded off to the next highest number.

(d) Compactors comprising the test sample will be randomly selected from the batch sample using the same random selection plan as in paragraph (a) of this section. Test sample size will be determined by using Table II of Appendix I of this subpart.

(e) The test compactors of the category or configuration selected for testing shall have been assembled by the manufacutrer for distribution in commerce using the manufacturer's normal production process.

(f) Unless otherwise indicated in the test request, the manufacturer will select the batch sample from the production batch next scheduled after receipt of the test request, of the category or configuration specified in the test request.

(g) Unless otherwise indicated in the test request, the manufacturer shall select the compactors designated in the test request for testing.

(h) At their discretion, EPA enforcement officers, rather than the manufacturer, may select the compactors designated in the test request.

(i) The manufacturer will keep on hand all products in the batch sample until such time as the batch is accepted or rejected in accordance with § 205.207–6: Except, that compactors actually tested and found to be in conformance with this regulation need not be kept.

(Sec. 13 of the Noise Control Act (42 U.S.C. 4912).)

§ 205.207–3 Test sample preparation.

Prior to the official test, the test compactor selected in accordance with § 205.207–2 will be prepared in accordance with § 205.205–6.

(Sec. 13 of the Noise Control Act (42 U.S.C. 4912).)

§ 205.207–4 Testing procedures.

(a) The manufacturer shall conduct one valid test in accordance with the test procedures specified in § 205.204 of this subpart for each compactor selected for testing pursuant to this subpart.

(b) No maintenance will be performed on test compactors except as provided for by § 205.207–3. In the event a compactor is unable to complete the emission test, the manufacturer may replace the compactor. Any replacement product will be a production compactor of the same configuration as the replaced compactor. It will be randomly selected from the batch sample and will be subject to all the provisions of these regulations.

(Sec. 13 of the Noise Control Act (42 U.S.C. 4912).)

§ 205.207–5 Reporting of the test results.

(a) (1) The manufacturer shall submit a copy of the test report for all testing conducted pursuant to § 205.207 at the conclusion of each 24-hour period during which testing is done.

(2) For each test conducted the manufacturer will provide the following information:

(i) Configuration and category identification where applicable;

(ii) Sound level degradation factor;

(iii) Year, make, assembly date, and model of compactor;

(iv) Compactor serial number;

(v) Test results by serial numbers; and

(vi) Serial number of the vehicle on which manufacturer has installed the compactor in subdivision (iv) of this subparagraph.

(3) The first test report for each batch sample will contain a listing of all serial numbers in that batch.

(b) In the case where an EPA enforcement officer is present during testing required by this subpart, the written reports requested in paragraph (a) of this section may be given directly to the enforcement officer.

(c) Within 5 days after completion of testing of all compactors in a batch sample, the manufacturer shall submit to the Administrator a final report which will include the information required by the test request in the format stipulated in the test request in addition to the following:

(1) The name, location, and description of the manufacturer's noise emission test facilities which meet the specifications of § 205.204 and were utilized to conduct testing reported pursuant to this section: Except, that a test facility that has been described in a previous submission under this subpart need not again be described, but must be identified as such.

(2) A description of the random compactor selection method used, referencing any tables of random number selection used, name of the person in charge of the random number selection, if the compactor test request specifies a random compactor selection.

(3) The following information for each noise emission test conducted:

(i) The completed data sheet required by § 205.204 for all noise emission tests including for each invalid test, the reason for invalidation.

(ii) A complete description of any modification, repair, preparation, maintenance, and/or testing which was performed on the test compactor and will not be performed on all other production compactors.

(iii) The test results for any replaced compactor and the reason for replacement of the compactor.

(4) A complete description of the sound data acquisition system if other than those specified in § 205.204.

(5) The following statement and endorsement:

This report is submitted pursuant to Section 6 and Section 13 of the Noise Control Act of 1972. All testing for which data is reported herein was conducted in strict conformance with applicable regulations under 40 CFR Part 205 *et seq*. All the data reported herein is a true and accurate representation of such testing. All other information reported here is, to the best of ----------

---

(company name)

knowledge, true and accurate. I am aware of the penalties associated with violations of the Noise Control Act of 1972 and the regulations thereunder.

(authorized representative)

(Sec. 13 of the Noise Control Act (42 U.S.C. 4912).)

§ 205.207–6 Acceptance and rejection of batches.

(a) A failing product is one whose measured sound level is in excess of the sound level equal to the applicable noise emission standard set forth in § 205.202 minus the sound level degradation factor as determined in § 205.208–4 for the category or configuration being tested.

(b) The batch from which a batch sample is selected will be accepted or rejected based upon the number of failing compactors in the batch sample. A sufficient number of test samples will be drawn from the batch sample until the cumulative number of failing compactors is less than or equal to the acceptance number, or greater than or equal to the rejection number appropriate for the cumulative number of compactors tested. The acceptance and rejection numbers listed in Appendix I of this subpart, Table II at the appropriate code letter obtained according to § 205.207–2 will be used in determining whether the acceptance or rejection of a batch has occurred.

(c) Acceptance or rejection of a batch takes place when a decision that a compactor is a failing unit is made on the last compactor required to make a decision under paragraph (b) of this section.

(Sec. 13 of the Noise Control Act (42 U.S.C. 4912).)

§ 205.207–7 Acceptance and rejection of batch sequence.

(a) The manufacturer will continue to inspect consecutive batches until the batch sequence is accepted or rejected. The batch sequence will be accepted or rejected based upon the number of rejected batches. A sufficient number of consecutive batches will be inspected until the cumulative number of rejected batches is less than or equal to the sequence acceptance number, or greater than or equal to the sequence rejection number appropriate for the cumulative number of batches inspected. The acceptance and rejection numbers listed in Table III of Appendix I of this subpart at the appropriate code letter obtained according to § 205.207–2 will be used in determining whether the acceptance or rejection of a batch sequence has occurred.

(b) Acceptance or rejection of a batch sequence takes place when the decision is made on the last compactor required to make a decision under paragraph (a) of this section.

(c) If the batch sequenee is accepted, the manufacturer will not be required to perform any additional testing on products from subsequent batches pursuant to the initiating test request.

(d) The Administrator may terminate testing earlier than required in paragraph (b) of this section based on a request by the manufacturer, accompanied by voluntary cessation of distribution in commerce, from all plants, of compactors from the category or configuration in question: *Provided*, That once production is reinitiated the manufacturer must take the action described in § 205.207–9 (a) (1) and (a) (2) prior to distribution in commerce of any compactor from any plant of the compactor category or configuration in question.

(Sec. 13 of the Noise Control Act (42 U.S.C. 4912).)

§ 205.207–8 Continued testing.

(a) If a batch sequence is rejected in accordance with paragraph (b) of § 205.207–7, the Administrator may require 100 percent testing of all compactors of that category or configuration produced at that plant.

(b) The Administrator will notify the manufacturer in writing of his intent to require 100 percent testing of compactors pursuant to paragraph (a) of this section.

(c) Any tested compactor which demonstrates conformance with the applicable standard may be distributed into commerce.

(d) Any knowing distribution into commerce of a compactor which does not comply with the applicable standard is a prohibited act.

(Sec. 13 of the Noise Control Act (42 U.S.C. 4912).)

§ 205.207–9 Prohibition of distribution in commerce; manufacturer's remedy.

(a) The Administrator will permit the cessation of continuous testing under § 205.207–8 once the manufacturer has taken the following actions:

(1) Submits a written report to the Administrator which identifies the reason for the non-compliance of the compactors, describes the problem and describes the proposed quality control or quality assurance remedies to be taken by the manufacturer to correct the problem or follows the requirements for an engineering change pursuant to § 205.205–9; and

(2) Demonstrates that the specified compactor category or configuration has passed a retest conducted in accordance with § 205.207, and the conditions specified in the initial test request.

(b) Any compactor failing the prescribed noise emission tests conducted pursuant to this Subpart F may not be distributed into commerce until necessary adjustments or repairs have been made and the compactor passes a retest.

(c) No compactors of a rejected batch which are still in the hands of the manufacturer may be distributed in commerce unless the manufacturer has demonstrated to the satisfaction of the Administration that such compactors do in fact conform to the regulation: Except, that any compactor that has been tested and does, in fact, conform with this regulation may be distributed into commerce.

(Secs. 11, 13 of the Noise Control Act (42 U.S.C. 4910, 4912).)

§ 205.208 In-use requirements.

§ 205.208–1 Warranty.

(a) The manufacturer of a compactor who is required to production verify under this part shall include in the owner's manual or in other information supplied to the ultimate purchaser the following statement:

NOISE EMISSIONS WARRANTY

The manufacturer warrants to the first person who purchases this compactor for purposes other than resale and each subsequent purchaser that this compactor was designed, built and equipped to conform, at the time of sale to such first purchaser, with all applicable U.S. EPA noise control regulations.

This warranty is not limited to any particular part, component or system of the compactor. Defects in the design, assembly, or in any part, component, or system of the compactor, which at the time of sale to such first purchaser, cause noise emission levels to exceed Federal standards, are covered by this warranty for the actual life of the compactor.

(b) Not later than the date of submission of the product verification report required by § 205.205–4, the manufacturer shall submit to the Administrator two (2) copies of the written noise emission warranty required by paragraph (a) of this section and two (2) copies of all other information provided to the ultimate purchaser which could reasonably be construed as impacting on the warranty.

(c) Not later than ten (10) days after dissemination, the manufacturer shall submit two (2) representative copies of all information of a general nature, or modifications thereto, which is provided to dealers, zone representatives, or other agents of the manufacturer regarding the administration and application of the noise emission warranty. Information regarding noise emission warranty claims which is provided to a dealer or representative in response to a particular warranty claim or dealer inquiry is not considered to be information of a general nature, if such information does not receive broad dissemination to dealers.

(d) All information required to be forwarded to the Administrator pursuant to this section shall be addressed to: Director, Noise Enforcement Division, (EN–387), U.S. Environmental Protection Agency, Washington, D.C. 20460.

(Sec. 13 of the Noise Control Act (42 U.S.C. 4912).)

§ 205.208–2 Tampering.

(a) For each model year and for each configuration of compactors covered by this part, the manufacturer shall submit to the Administrator a list of those acts which, in the manufacturer's estimation, migh be done to the compactor in use on more than an occasional basis, and result in an increase in noise emission levels above the standards prescribed in § 205.22. The manufacturer shall state his estimate, wherever possible, of the amount of this increase in noise level.

(b) The above information shall be submitted to the Administrator within adequate time prior to the introduction into commerce of each configuration to allow for the development and printing of tampering lists, as provided in paragraphs (c) and (d) of this section.

(c) On the basis of the above information, the Administrator will develop a list of acts which, in his judgment, constitute the removal or rendering inoperative, totally or partially, other than for purposes of maintenance, repair, or replacement, of noise control devices or elements of design of the compactor. This list shall be provided to the manufacturer by the Administrator within 30 days of the date on which the information required in paragraph (a) of this section is submitted by the manufacturer. The list shall be included in the statement to the ultimate purchaser as required by paragraph (d)(2) of this section. If the list is not provided by the Administrator within 30 days of the date on which the information required in paragraph (a) of this section is submitted, the manufacturer shall include only the statement in paragraph (d) (1) of this section until such time as the list has been provided and the owner's manual is reprinted for other purposes.

(d) The manufacturer shall include in the owner's manual the following information:

(1) The statement:

TAMPERING WITH NOISE CONTROL SYSTEM PROHIBITED

Federal law prohibits the following acts or the causing thereof: (1) The removal or rendering inoperative by any person other than for purposes of maintenance repair, or replacement, of any device or element of design incorporated into any new compactor for the purpose of noise control prior to its sale or delivery to the ultimate purchaser or while it is in use, or (2) the use of the compactor after such device or element of design has been removed or rendered inoperative by any person.

(2) The statement:

Among those acts presumed to constitute tampering are are acts listed below.

Immediately following this statement, the manufacturer shall include the list

V 42166 AUG 26 77 7 UMI

developed by the Administrator under paragraph (c) of this section.

(e) Any act included in the list prepared pursuant to paragraph (c) of this section is presumed to constitute tampering; however, in any case in which a prohibited act has been committed and it can be shown that such act resulted in no increase in the sound level of the unit or that the unit still meets the noise emission standard of § 205.202, such act will not constitute tampering.

(f) The provisions of this section are not intended to preclude any State or local jurisdiction from adopting and enforcing its own prohibitions against the removal or rendering inoperative of noise control systems on compactors subject to this part.

(g) All information required by this section to be furnished to the Administrator shall be sent to the following address:

Director, Noise Enforcement Division (EN-387), U.S. Environmental Protection Agency, Washington, D.C. 20460.

(Secs. 10, 13 of the Noise Control Act (42 U.S.C. 4909, 4912).)

§ 205.208–3 Instructions for maintenance, use and repair.

(a)(1) The manufacturer shall provide to the ultimate purchaser of each compactor covered by this subpart written instructions for the proper maintenance, use and repair of the compactor in order to provide reasonable assurance of the elimination or minimization of noise emission degradation throughout the life of the compactor.

(2) The purpose of the instructions is to inform purchasers and mechanics of those acts necessary to reasonably assure that degradation of noise emission level is eliminated or minimized during the life of the compactor. Manufacturers shall prepare the instructions with this purpose in mind. The instructions shall be clear and, to the extent practicable, written in nontechnical language.

(3) The instructions shall not be used to secure an unfair competitive advantage. They shall not restrict replacement equipment to original manufacturer equipment or service to dealer service, unless such manufacturer makes public the performance specifications on such equipment.

(b) For the purpose of encouraging proper maintenance, the manufacturer shall provide a record or log book which shall contain a schedule for the performance of all required noise emission control maintenance. Space shall be provided in this record book so that the purchaser can note what maintenance was done, by whom, where and when.

(c) Not later than the date of submission of the production verification report required by § 205.205–4, the manufacturer shall submit to the Administrator two (2) copies of the maintenance instructions (including the record book) required by paragraphs (a) and (b) of this section.

(d) The Administrator will require modifications to the instructions if they are not sufficient to fulfill the requirements of paragraph (a) of this section.

(e) Information required to be submitted to the Administrator pursuant to this section shall be sent to the following address:

Director, Noise Enforcement Division (EN-387), U.S. Environmental Protection Agency Washington, D.C. 20460.

(Sec. 13 of the Noise Control Act (42 U.S.C. 4912).)

§ 205.208–4 Sound Level Degradation Factor (SLDF) and retention of durability data.

(a) Each manufacturer responsible for compliance with the standards specified in § 205.202 shall develop a Sound Level Degradation Factor (SLDF) for each of its compactor configurations utilizing the records compiled under section (b) of this section.

(b)(1) The manufacturer shall establish and maintain records which demonstrate the increase in noise level which will occur for each product configuration during the specified Acoustical Assurance Period.

(2) The records may include, but need not be limited to, the following:

(i) Durability data and actual noise testing on critical noise producing or attenuating components.

(ii) Sound level deterioration curves on the entire product.

(iii) Data from products in actual use.

(c) The SLDF is to be used in all Production Verification testing and Selective Enforcement Audit testing to determine compliance.

(d) If the manufacturer determines the product's sound level will not increase during the Acoustical Assurance Period when properly used and maintained, the SLDF is zero.

(e) If the manufacturer determines that a product's sound level does not increase, but rather decreases with use, yielding a negative SLDF, he shall use zero as the SLDF in all testing under these regulations, but shall determine and record the actual SLDF.

(Sec. 13 of the Noise Control Act (42 U.S.C. 4912).)

§ 205.209 Recall of non-complying compactors.

(a) Pursuant to section 11(d)(1) of the Act, the Administrator may issue an order to the manufacturer to recall and repair or modify any compactor distributed into commerce which is not in compliance with this subpart.

(b) A recall order issued pursuant to this section shall be based upon a determination by the Administrator that compactors of a specified category or configuration have been distributed in commerce which do not conform to the regulation. Such determination may be based on:

(1) A technical analysis of the noise emission characteristics of the category or configuration in question; or

(2) Any other relevant information, including test data.

(c) For the purposes of this section, noise emissions may be measured by the test prescribed in § 205.204 for testing prior to distribution in commerce or any other test which has been demonstrated to correlate with the prescribed test procedure in accordance with § 205.204(g).

(d) Any order to recall shall be issued only after notification and an opportunity for a hearing.

(e) All costs, including labor and parts, associated with the recall and repair or modification of non-complying compactors under this section shall be borne by the manufacturer.

(f) This section shall not limit the discretion of the Administrator to take any other actions which are authorized by the Act.

(Sec. 11 of the Noise Control Act (42 U.S.C. 4910).)

DEPARTMENT OF LABOR

Employment and Training Administration

[Field Memorandum 347–77]

COMPREHENSIVE MANPOWER PROGRAMS

Guidelines for Review of Planned Performance

In order to provide a common framework of national and regional experience against which to compare performance goals and to identify potential problems with program design and delivery, the Department of Labor has developed guidelines to review prime sponsors' planned performance for Fiscal Year 1978 under title I of the Comprehensive Employment and Training Act (CETA) of 1973, as amended.

The entire text of Field Memorandum No. 347–77 is published here to inform all interested parties of the Department's review procedures.

[Field Memorandum No. 347–77]

TO: ALL REGIONAL ADMINISTRATORS

FROM: FLOYD E. EDWARDS
Administrator, Field Operations

SUBJECT: CETA Title I Review Guidelines for FY 1978

1. *Purpose.* To transmit guidelines for the review of CETA title I annual plans for FY 1978.

2. *Reference.* FM 209–77.

3. *Background.* Grant review guidelines were implemented for the first time in the review of FY 1977 CETA title I grant applications. Much of the criticism of this initial effort was directed toward the technical adequacy of the indicators themselves and the fact that participation in decisions relating to the choice and use of the indicators was limited. In response to this, a work group, consisting of one prime sponsor from each region and one representative from each regional office, was created to identify the best indicators to measure performance and to define methods of computation, given the constraints of the existing data system. Additional projects related to the use of the indicators, including grant review guidelines and FY 1978 performance assessment, were also planned. The group produced a final document (FM–209–77) setting forth 13 performance indicators, grouped into four clusters and related interpretive factors. The cluster approach was used since CETA represents a multiplicity of goals and objectives for which no one performance indicator can adequately measure the effectiveness of a local program.

A subgroup was designated to analyze the data and propose a mechanism to assist in the review of FY 1978 annual plans. The subgroup consisted of three prime sponsor representatives and three regional office representatives, from the larger group, as well as two national office representatives.

4. *Objectives and Mechanism of Review Guidelines.* The primary objective of such a tool is to provide a common framework against which prime sponsors and regional offices can compare FY 1978 annual plans and performance goals to national and regional experience. The subgroup developed a review mechanism to compare planned performance with actual national and regional experience, based on the performance indicators developed by the larger group. This mechanism is to be followed in the review of FY 1978 title I annual plans.

Data for each indicator will be displayed in terms of lowest and highest performance, median (mid-point) and first and third quartiles on both a national and regional level. The exact meaning of median and quartile is in section 6(b) of this memorandum, and in Attachment I, section I.A.

Planned performance in relationship to the regional median and trend toward the first or third quartile will be emphasized in the plan review. Each indicator cluster will include a list of factors the presence or absence of which may affect performance in either direction from the median. Such a list is not intended to be all inclusive nor is it intended to substitute for the knowledge of a Federal Representative and prime sponsor staff about the appropriateness of a plan.

The data displays are intended to provide a good starting point from which to identify potential problems with program design and delivery *before* they are reflected in poor performance.

The review guidelines are *not* to be considered as *performance standards*. The median and other reference points of regional and national experience served only as convenient benchmarks against which prime sponsors' plans can be reviewed and analyzed.

5. *Indicators.* The indicators to be used as the basis for the review of FY 1978 title I annual plans are those developed by the Performance Indicators Work Group published in the FEDERAL REGISTER. However, several indicators have been excluded from this exercise; these are in the earnings cluster, for which no information is available in the planning documents, and the expenditure rate in the fund utilization cluster, because it is the complement of the carry-out rate included in these review guidelines. The following indicators have been included.

a. *Termination Cluster*
- Positive Termination Rate
- Entered Employment Rate—Total Terminations Based
- Entered Employment Rate—Total Positive Terminations Based
- Nondirect Placement Rate—Total Terminations Based
- Nondirect Placement Rate—Total Entered Employment Based

b. *Cost Cluster*
- Cost Per Positive Termination
- Cost Per Entered Employment
- Cost Per Nondirect Placement

c. *Fund Utilization Cluster*
- Carry-out Rate
- Administrative Cost Rate

A description and method of computation for each indicator are included in Attachment II.

6. *Description of Data.*

a. *Data Base.* Data covering FY 1976 and the transition quarter, for 431 prime sponsors, were used to compute the 10 indicators and to determine national and regional medians, quartiles and high and low performance against which the prime sponsor's planned performance will be compared. The data were obtained from the CETA Program Status Summary (PSS), Financial Status Report (FSR) and obligations contained in the Grant Signature Sheet and modifications. Data from these documents are recived in the national office through the Regional Automated System (RAS).

This is the latest data for a full program year that will be available in time for the FY 1978 annual plan review which is to take place during the fourth quarter of FY 1977. A full program year was selected instead of a combination of FY 1976 and FY 1977 to provide later data for a 12-month period because activities associated with a new year would distort termination and cost data. Also, there would be no basis for determining a carry-out rate.

Data for the base period were obtained by a special RAS computer run from reports in the system through November 30, 1976. Missing data were obtained from later regular RAS computer runs or from special runs. Substantially, all of the PSS and FSR data are in the final RAS/QPR run for the subject period dated December 10, 1976. Due to the carry out of unexpended funds into FY 1977, fund availability was understated for a number of prime sponsors. In these cases an upward adjustment was made.

b. *Computation of Quartiles and Medians.* The performance of each prime sponsor was computed for each of the 10 indicators. The results expressed as a percent or dollars were then arrayed in ascending order regionally and nationally starting with the prime sponsor with the lowest computed value to the prime sponsor with the highest computed value. This array was divided into four equal parts, each part containing the performance of 25 percent of all prime sponsors.

The boundary dividing the lower half of the array into two quarters, each containing 25 percent of the sponsors, is designated as the first quartile (Q_1). The boundary dividing the array in half is designated as the median (M) or second quartile. The boundary dividing the upper half of the array in two quarters, each containing 25 percent of sponsors is designated as the third quartile (Q_3). The quartile divisions serve as convenient reference points in the array against which to compare prime sponsor planning goals.

c. *Interpretive Factors.* Data for interpretive factors preprinted in the interpretive factor worksheet (see Attachment I) include selected client characteristics, pre-CETA and post-CETA median wages, percent of cumulative enrollment by activity, percent of accrued expenditures by activity and the local unemployment rate. Data, except for the local unemployment rate, were obtained from the PSS for enrollment, the FSR for accrued expenditures and the Quarterly Summary of Participant Characteristics (QSPC) for characteristics and wage data. The data base for these factors, as for the performance indicators, include cumulative data for FY 1976 and the transition quarter. Prime sponsor data will be compared against the national and regional totals from the final RAS printout for this period dated December 10, 1976. For comparison, the Federal Representative should fill in the appropriate data in the interpretive factor worksheet for the prime sponsor under review to explain program performance. Instructions for completing "sponsor" column are in the worksheets, Attachment I, section II.

7. *Application of review guidelines.* There are separate worksheets for each of the indicator clusters and a worksheet for the interpretive factors to be utilized in annual plan reviews. See Attachment I for an explanation of the five reference points and instructions for the use of the worksheets.

In reviewing prime sponsor planning goals, the following procedures should apply:

a. *Computation of Planning Goals.* The Federal Representative should first compute the FY 1978 performance goals for each of the indicators in the three performance clusters by substituting cumulative planning data through the fourth quarter from the PPS and BIS of the annual plan for the data elements of the formulas in the worksheets. The computed values should be placed in the "results" column of the worksheets.

b. *Comparison to Regional Median.* Planned performance in relation to the regional median will be emphasized in the review process for each indicator in the performance clusters to determine if significant deviation requires an explanation. The national reference points show the relationship between prime sponsor planning goals and regional and national experience. Use of regional comparative data as the reference points against which prime sponsor plans are to be compared to determine significant deviation takes into account programmatic and other facors unique to a particular region, thereby ensuring equitable treatment for as many prime sponsors as possible.

c. *Significant Deviations from the Median.* In general, planned performance close to the middle of the comparative data (median) need not be explained. However, planned performance as indicated on the PPS and BIS should be consistent with the program narrative in the annual plan. In addition, planned performance falling above the regional median for the "termination cluster" and below the regional median for the "cost cluster" and the administrative cost rate in the "fund utilization cluster" may not need explanation. Higher than median positive outcome rates, lower than median costs for positive outcomes and administrative cost rates generally indicate desirable performance and should not require explanation unless there are programmatic or other reasons for doing so. Because the carry-out rate of the "fund utilization cluster" is high for many regions, an explanation may be required for significant deviation below the regional median to be determined by the RA, see 7.c.(1) below. In conducting the review of the annual plan, the following should be observed concerning significant deviation from the median.

(1) *Significant Deviation from the Median which may not Require Explanation.* The review process is designed to examine closely planned performance below the first quartile or above the third quartile, depending on the indicator or cluster being reviewed. RA's should not require written explanation of prime sponsor planning goals which deviate from the regional median to and including the first quartile for indicators in the "termination cluster," and the carry-out rate in the "fund utilization cluster," and from the regional median to and including the third quartile for indicators in the "cost cluster" and the "fund utilization cluster." RA's may request an explanation of planned performance within the limits outlined above when, the reviewer believes the planning goals are unrealistic or serious programmatic problems are evident. This may include planned performance which differs substantially from previous performance without a significant change occurring in program operations or planned performance which may not be achieved because of serious administrative, managerial or fiscal problems. The RA may determine appropriate situations and the amount of detail required for any explanation. The most important thing is consistency between the program narrative and whatever performance is planned. Therefore, even though an explanation of deviation from the median, may not be required, consistency should be insured.

(2) *Significant Deviations from the Median for Which an Explanation is Mandatory.* Where planned performance deviates from the median to fall below the first quartile (Q_1) for indicators in the "termination cluster" and above the third quartile (Q_3) for indicators in the "fund utilization cluster" and "cost cluster," an explanation/justification will be required. This explanation must be as complete and detailed as possible.

Significant deviations from the median where an explanation is mandatory or may be required as determined by the RA, should be explained by the absence or presence of environmental, programmatic and other locally relevent situations which may influence performance from the median. These factors will be discussed in item 8 of this FM.

d. *Incremental Improvement.* In evaluating plans for FY 1978, an additional key element to be considered is each sponsor's previous performance. The concept of incremental improvement is critical to reviewing a sponsor's plan. To determine the extent of improvement over previous performance, Federal Representatives should compute the sponsor's actual achievement for each of the indicators, using the most recent data available in the regional office. Where a prime sponsor's plan deviates significantly from the median, but reasonable improvement over previous performance is planned, such improvement may serve as adequate explanation for deviations. A prime sponsor performing above the median for the termination cluster and below it for the others, should not be permitted "slippage" unless there has been a drastic change in local conditions. In fact, such sponsors may be expected to improve on their performance.

e. *Special Considerations in the Review.* Because of the nature of the data for a few indicators, the following information is provided for your consideration:

(1) For the *carry-out rate* of the "fund utilization cluster," FY 1976 and the transition quarter national and regional experience upon which the guidelines are based indicate median carry-out rates of 11 percent or greater nationally and for nine of the ten regions. This would indicate that expenditures for FY 1976 and the transition quarter were on the low side resulting in a large carry-out of funds into FY 1977. While it is recognized that a certain amount of funds may be necessary to be carried out into the following year providing for a smooth transition of the program, this should be kept to a minimum. Therefore, explanation of deviation from the median below to the first quartile and above to the third quartile may be requested as determined by the RA. An explanation for deviation above the third quartile is mandatory. Additionally, comparison should always be made with the carry-out rate of previous experience. If the planning goal significantly deviates from the median, but a reasonable improvement in the carryout rate is planned when compared to the actual carry-out rate for FY 1976 and the transition quarter, no further explanation may be necessary.

(2) For the *administrative cost rate* in the "fund utilization cluster," the regulations already mandate an adequate explanation with supporting documentation if the planned rate exceeds 20 percent. It is suggested that explanation for significant deviation should not be required above the median for the planning goal until it exceeds 20 percent. In all regions, administrative cost rates above 20 percent will fall above the third quartile (Q_3) and will require an explanation as complete and detailed as possible. The documentation contained in the annual plan should be cited if this is adequate.

8. *Interpretive Descriptions and Interpretive Factors.* Each performance cluster worksheet (see Attachment I to this FM) contains a preprinted list of programmatic and environmental factors, under the heading of Interpretive Descriptions, which may be of assistance in explaining, or raising questions about prime sponsor planned performance. The list, located in the lower left side of each worksheet, is not intended to be all inclusive. The Federal Representative may be aware of other factors unique to the region or prime sponsor area that could explain planned performance. Among the influential factors (whether or not listed in the interpretive description section of the attached cluster worksheets) are those dealing with the prime sponsor's program mix, enrollee characteristics, enrollee pre-CETA and post-CETA wages, and the local unemployment rate.

These factors are all quantifiable and are designated as interpretive factors. They are contained on a separate worksheet in Attachment I for convenience of comparing these factors and using them in combination to explain a significant deviation. Since these factors, except for enrollee wages and the local unemployment rate, can be broken down by their proportion of the prime sponsor's total program, each factor can be compared with other elements of the sponsor's program and regional experience data.

The interpretive factors worksheet will contain regional and national experience data for FY '76 and the transition quarter which has been preprinted on the worksheets. Prime sponsor data to be compared within the program and with regional totals will be filled in by the Federal Representative in a column marked "sponsor." (See Attachment I, section II, for additional instructions.)

The right side of the worksheet contains a short presentation on the use of each of the interpretive factor groups. This presentation is limited but is included to give the Federal Representative an understanding of how the various interpretive factors may be used. The following examples provide the Federal Representative with a fuller range of implications that these factors may have on planned performance:

a. *Enrollee Characteristics.* The Federal Representative should pay particular attention to the types of participants to be enrolled in the program and the possible correlations to the percent of expenditures, cumulative enrollments by program activity, planned performance goals, and program objectives. Prime sponsors may develop and operate programs designed to increase the employability of particular groups of enrollees, with placement in unsubsidized employment not being a program objective. A prime sponsor proposing to serve a significant number of youth and full-time students may be expected to allocate a sizeable portion of funds for work experience activities and have a sizeable percentage of enrollments in work experience activities, accompanied by a relatively low planned "entered employment rate, a relatively high planned "cost per entered empolyment," and a relatively high planned "positive termination" rate. The Federal Representative should then compare planned performance goals for the affected indicators against regional comparative data for the interpretive factors. This comparison may explain significant deviations.

Prime sponsors operating programs or activities stressing service to other groups, generally considered to be "hard to place," e.g., minorities, persons with limited English-speaking ability, older workers and handicapped, may be expected to propose relatively low positive termination rates through frequent turnover, low entered employment rates, high costs per positive termination and high costs per entered employment.

b. *Program Mix.* Prime sponsors may plan to allocate a sizeable portion of funds to classroom training and OJT. These are placement-related activities and planned performance should reflect this. Planned goals for other indicators may be similarly affected by such a distribution of funds. The Federal Representative should review regional data for the affected indicators and the interpretive factors for possible explanation of the sponsor's planned performance.

The interpretive factors and other environmental and programmatic influences, must

V 42 I 166 AUG 26 77 7 UMI

be used with care. Although there may be a precedent to draw certain conclusions from an established correlation of some of these with the planning goals, the danger is to rationalize relationships for others where the correlation is weak or does not exist. It will be incumbent on the Federal Representative, who is knowledgeable concerning the environmental and programmatic aspects of the prime sponsor, to make judgments as to the factors and the strength of the factors considered to be operating to determine if they are adequate to explain planned performance. Where an explanation for deviation from the median is required, it should be documented with appropriate backup in the annual plan and by information available from other sources. Again, consistency between the narrative and planned performance is imperative. Regional offices may wish to establish "review" committees to assure consistency in the application of the interpretive influences on a regional level. Prime sponsors with similar profiles on the interpretive influences could be reviewed together to determine whether legitimate explanations for program deviations in planned performance goals exist.

9. *Training.*

a. *Federal Staff.* In order to ensure a uniform understanding of how to apply the guidelines in your region, it is recommended that regional staff be trained as early as possible. The national office has contacted regional offices offering them assistance in training. For those regions accepting, arrangements were made for selected members of the review guidelines work group and a member of the performance indicators work group to assist in training in the regions.

b. *Prime Sponsor.* Prime sponsors should be provided with a copy of the review guidelines memorandum and attachments as early as possible to become aware of how their plans will be reviewed. Whether prime sponsors are called together for a general orientation to the guidelines or the Federal Representatives review the guidelines with them individually should be decided by the RA.

10. *Action Required.* RAs should distribute this FM as soon as possible to regional staff, prime sponsors and any other person requiring this information. They should also inform prime sponsors and others that these guidelines will be published in the FEDERAL REGISTER.

11. *Inquiries.* Questions should be directed to Henry Rosenbloom or Ric Campbell on 8-376-6390.

12. *Attachments.* (RAs only.)

I. Worksheets.

II. Description of Indicators.

ATTACHMENT I

WORKSHEETS

I. *Performance Cluster Worksheets.* Separate worksheets have been developed fro each of the indicator clusters which include a list of interpretive environmental and programmatic factors to be utilized in plan reviews. The following will describe the format of the cluster worksheets and general procedure for review.

A. The upper part of each worksheet lists the component parts of the cluster, the computation formula; and a space for entering planned outcomes for the prime sponsor being reviewed. Next to the planned result, comparative data, to be used as reference points in either percents or dollars, will be preprinted. The comparative data will be disregions. Five reference points will be included.

1. Lowest Performance (L).
2. First Quartile (Q_1).
3. Median (Mid Point) (M).
4. Third Quartile (Q_3).
5. Highest Performance (H).

The first quartile refers to the point which 25 percent of the prime sponsors fall below in performance.

The third quartile refers to the point in performance where 25 percent of the sponsors fall above.

(The first and third quartiles represent boundaries which include the middle 50 percent, in terms of performance, of prime sponsors.)

In reviewing the plan the regional median will be used as the main reference point by the Federal Representative (see item 7.b of FM). Significant deviations above or below the median, depending on the performance cluster, should be analyzed in terms of various interpretive environmental and programmatic factors.

B. The bottom left hand side of the worksheets will contain a list of interpretive descriptions. These consist of environmental and programmatic factors the presence or absence of which may influence performance. These will be used as a basis for explaining deviations of planning goals. The list will be preprinted on the worksheets but will not be all inclusive. Federal Representatives may be aware of other factors unique to the region or sponsor. In any event, it will be incumbent upon the Federal Representative (working with the prime sponsors) to document the absence or presence of influential factors. Important factors in the interpretive description lists that can be very useful in explaining planned performance are those dealing with program mix, enrollee characteristics, pre-CETA and post-CETA wages and the local unemployment rate. These are classed as interpretive factors and are listed on a separate worksheet of the review guideline package. This worksheet will be discussed in Section II of this Attachment.

C. The bottom right hand side of the worksheets provides space for explanation of planned performance. In general, explanation of planned performance may not be required under the following circumstances:

1. Planned performance which is close to the median.

2. Planned performance falling above the median for indicators in the "termination cluster" and below the median for indicators in the "cost cluster," and for the administrative cost rate in the "fund utilization cluster," unless planning goals are unrealistic or serious programmatic problems are evident.

3. Prime sponsor planning goals deviating significantly from the median, but a reasonable improvement over recent previous performance is planned. A prime sponsor performing above the median for the termination cluster and below it for the others should not be permitted "slippage" unless there has been a drastic change in local conditions. In fact, such sponsors may be expected to improve on their performance.

Significant deviations from the median where an explanation may be required:

The review process is designed to examine closely planned performance below the first quartile or above the third quartile, depending on the indicator or cluster being reviewed. RA's should not require written explanation of prime sponsor planning goals deviating from the regional median to and including the first quartile for indicators in the "termination cluster," and the carryout rate in the "fund utilization cluster," and from the regional median to and including the third quartile for indicators in the "cost cluster" and the "fund utilization cluster." RAs may request an explanation of planned performance within the limits outlined above when, in the opinion of the reviewer, the planning goals are unrealistic or serious programmatic problems are evident. This may include planned performance which differs substantially from previous performance without a significant change occurring in program operations, or planned performance which may not be achieved because of serious administrative, managerial or fiscal problems. The RA may determine appropriate situations and the amount of detail required for any explanation.

Significant deviations from the median where an explanation is mandatory:

An explanation of planning goals falling below the first quartile (Q_1) for indicators in the "termination cluster" and above the third quartile (Q_3) for indicators in the "fund utilization cluster" and "cost cluster," is mandatory. If these deviations occur, an explanation/justification should be as complete and detailed as possible.

Significant deviations from the median for which an explanation may be required or is mandatory, should be explained by the absence or presence of interpretive environmental and programmatic factors which may influence performance from the median. These factors will be pre-printed under the heading of interpretive descriptions on the left hand side of the performance cluster worksheets and on a separate interpretive factor worksheet described in this attachment. Any explanation provided should be documented by appropriate backup in the annual plan and by information available from sources outside the plan.

II. *Interpretive Factors.* An additional worksheet, assisting Federal Representatives in displaying performance in terms of various interpretive factors, is contained in the worksheet package. These factors should be used in conjunction with other influential factors, which are listed in the interpretive description section of the indicator cluster worksheets explaining prime sponsor performance. The interpretive factors include categories of program mix, selected enrollee characteristics, pre-CETA and post-CETA wages and local unemployment rates. The right hand side of the worksheet contains a short description on the use of each section of the interpretive factors which should assist the Federal Representative. The left hand side of the worksheet contains preprinted total national and regional experience based on FY 1976 and the transition quarter. Prime sponsor data to be compared with the preprinted regional and national totals explaining performance should be filled in by the Federal Representative in the "sponsor" column as follows:

A. *Program Mix.*

1. *Percent of Expenditures by Program Activity.* Data for these interpretive factors will be obtained from Section F. of the BIS of the FY 1978 annual plan. Cumulative fourth quarter expenditure data for each activity from F.2.a. through F.2.f. should be divided by cumulative fourth quarter total projected expenditures by program, F.2. The result should be multiplied by 100 and placed in the "sponsor" column beside the appropriate activity.

2. *Percent of Cumulative Enrollment by Program Activity.* Data for these interpretive factors will be obtained from Section II of the PPS of the FY 1978 annual plan. Cumulative fourth quarter total enrollments (a) for each activity from II.A. through II.E. should be added. Cumulative total enrollments (a) through the fourth quarter for each activity should be divided by the total obtained for all activities. The results should be multiplied by 100 and placed in the "sponsor" column beside the activity. Since "other activities" is now receiving special consideration, an entry need not be made on the interpretive factors worksheet. However, if "other activities" is useful in explaining performance, this should be considered in the analysis.

B. *Selected Enrollee Characteristics.* Data for selected enrollee characteristics will be based on the QSPC for FY 1976, including the transition quarter. Since all of the planned enrollee characteristics needed are not available in FY 1978 annual plans, comparable actual data for the previous full year will be used. The assumption is that the characteristics will be similar to the sponsor's FY 1978 program. The proportions of selected characteristics for prime sponsors should be obtained from the final report of the September 1976 RAS/QSPC dated December 10, 1976. This report is available in the regions.

C. *Pre-CETA and Post-CETA Median Wage.* Data for the pre-CETA and post-CETA median wage will also be based on the QSPC for FY 1976, including the transition quarter. Since wages are not available in the FY 1978 planning data, comparable actual data, will be used. The median wages should be obtained from the final report of the September 1976 RAS/QSPC dated December 10, 1976. This report is available in the regions.

D. *Unemployment Rates.* Unemployment rate data will not be included in the interpretive factors worksheet, except for a short description on their use. However, the region should arrange to obtain local, regional and national unemployment rates from sources within the ETA regional office or from the regional office of the Bureau of Labor Statistics. These rates should be compared with unemployment rates of recent periods noting trends that may assist in explaining deviations.

V 42 166 AUG 26 77 UMI

III. Also included is a chart which provides for the display of national and regional reference points and prime sponsor planning goals. Examples of how to complete the chart are provided below and the Federal Representative may display the required data for each indicator similarly. This display is optional and may be helpful to the region and prime sponsor to see relationships more clearly.

INTERPRETIVE DESCRIPTION: See interpretive factors contained in worksheets

EXPLANATION/JUSTIFICATION:

TERMINATION CLUSTER

Lower total positive termination rates (or high non-positive rates) may be due to:

1. High enrollment of hard-to-place groups;
2. High local unemployment rates;
3. Inadequacies in program operation (e.g., assessment, counselling, job development) or in program design (e.g., long "holding" periods before placement, poor coordination between components, classifying applicants as participants prior to actual enrollment in program activities, etc.).

Lower entered employment rates: any of the above plus local emphasis on "employability development" activities (e.g., high school equivalency, youth work experience, etc.) or intertitle transfers leading to other positive "terminations."

Lower nondirect-employment rates: any of the above plus inclusion of direct job referral activities.

INTERPRETIVE DESCRIPTION: See interpretive factors contained in worksheets

EXPLANATION/JUSTIFICATION:

FUND UTILIZATION CLUSTER

CARRY OUT RATE: May be increased by:

- Start up of new activities;
- Supplemental appropriations received late in fiscal year;
- Internal administrative, management, processing or contracting problems;
- Unplanned for events, since original grant approvals.

ADMINISTRATIVE COST RATE: May be increased by:

- High local cost structure, especially salaries, rent;
- Stress on activities requiring proportionally more administration (e.g., classroom training vs. work experience);
- Stress on non-stipended activities (e.g., services);
- Heavy reliance on contractors, subgrants;
- Unplanned carry out of non-administrative costs;
- Heavy use of computers or other hardware;
- High indirect cost rates.

INTERPRETIVE DESCRIPTION: See interpretive factors contained in worksheets

EXPLANATION/JUSTIFICATION:

COST CLUSTER

Higher Costs per positive outcome may be due to any of the factors leading to lowered positive termination rates, (see termination cluster worksheet) plus:

1. High local cost structures for standard items (e.g., wage rates, rental costs);
2. Use of more costly resources (e.g., proprietary schools, computers, special equipment);
3. Emphasis on supportive services (transportation, day care, etc.), classroom training, employability development;
4. Higher than minimum rates for participant stipends, wages;
5. Stress on longer term training for higher skill jobs.

Higher Costs Per Entered Employment may be due to any of the factors contributing to higher positive outcome costs indicated above plus those leading to lowered entered employment rates (see termination cluster worksheet).

Higher Costs Per Nondirect Placement may be due to any of the factors contributing to higher positive outcome costs indicated above plus the inclusion of direct job referral activities.

USE OF INTERPRETIVE FACTORS

A. PROGRAM MIX

1. Expenditures: A high proportion of total funds in classroom, OJT and other activities stressing higher skills increase "costs per." A high proportion in work experience may lower entered employment rates and thereby increase "costs per."

2. Enrollees: A high percentages of enrollees in classroom and OJT should raise expected entered employment and nondirect placement rates; a high percent of enrollees in work experience may lower entered employment rates but should raise expected other positive termination rates.

B. ENROLLEE CHARACTERISTICS: Higher proportions of youth, minorities, high school dropouts, handicapped, offenders and other locally determined groups indicate a stress on services for those most difficult to place, and may lead to longer term or higher cost activities, and may result in lower positive termination rates.

C. POST-CETA, WAGE LEVELS: High post-CETA wages, and wage increases relative to pre-CETA wages may provide evidence for an emphasis on higher quality training and higher skilled jobs, high increases may also indicate a high proportion of participants without prior work experience.

D. LOCAL UNEMPLOYMENT RATES: Also to be considered, but not shown in the interpretive indicator table are local unemployment rates. High local unemployment rates may cause more difficulty in obtaining placements, and may influence sponsors' choice of activities and characteristics of enrollees (less disadvantaged).

INTERPRETIVE DESCRIPTION: See interpretive factors contained in worksheets

EXPLANATION/JUSTIFICATION:

COST CLUSTER

Higher costs per positive outcome may be due to any of the factors leading to lowered positive termination rates, (see termination cluster worksheet) plus:

1. High local cost structures for standard items (e.g., wage rates, rental costs);
2. Use of more costly resources (e.g., proprietary schools, computers, special equipment);
3. Emphasis on supportive services (transportation, day care, etc.), classroom training, employability development;
4. Higher than minimum rates for participant stipends, wages;
5. Stress on longer term training for higher skill jobs.

Higher Costs Per Entered Employment may be due to any of the factors contributing to higher positive outcome costs indicated above plus those leading to lowered entered employment rates (see termination cluster worksheet).

Higher Costs Per Nondirect Placement may be due to any of the factors contributing to higher positive outcome costs indicated above plus the inclusion of direct job referral activities.

USE OF INTERPRETIVE FACTORS

A. PROGRAM MIX

1. Expenditures: A high proportion of total funds in classroom, OJT and other activities stressing higher skills increase "costs per." A high proportion in work experience may lower entered employment rates and thereby increase "costs per."

2. Enrollees: A high percentages of enrollees in classroom and OJT should raise expected entered employment and nondirect placement rates; a high percent of enrollees in work experience may lower entered employment rates but should raise expected other positive termination rates.

B. ENROLLEE CHARACTERISTICS: Higher proportions of youth, minorities, high school dropouts, handicapped, offenders and other locally determined groups indicate a stress on services for those most difficult to place, and may lead to longer term or higher cost activities, and may result in lower positive termination rates.

C. POST-CETA, WAGE LEVELS: High post-CETA wages, and wage increases relative to pre-CETA wages may provide evidence for an emphasis on higher quality training and higher skilled jobs, high increases may also indicate a high proportion of participants without prior work experience.

D. LOCAL UNEMPLOYMENT RATES: Also to be considered, but not shown in the interpretive indicator table are local unemployment rates. High local unemployment rates may cause more difficulty in obtaining placements, and may influence sponsors' choice of activities and characteristics of enrollees (less disadvantaged).

INTERPRETIVE DESCRIPTION: See interpretive factors contained in worksheets

EXPLANATION/JUSTIFICATION:

TERMINATION CLUSTER

Lower total positive termination rates (or high non-positive rates) may be due to:

1. High enrollment of hard-to-place groups;

2. High local unemployment rates;

3. Inadequacies in program operation (e.g., assessment, counselling, job development) or in program design (e.g., long "building" periods before placement, poor coordination between components, classifying applicants as participants prior to actual enrollment in program activities, etc.).

Lower entered employment rates: any of the above plus local emphases on "employability development" activities (e.g., high school equivalency; youth work experience, etc.) or interstate transfers leading to other positive "terminations."

Lower nondirect-employment rates: any of the above plus inclusion of direct job referral activities.

EXPLANATION/JUSTIFICATION:

FUND UTILIZATION CLUSTER

CARRY OUT RATE: May be increased by:

- Start up of new activities;
- Supplemental appropriations received late in fiscal year;
- Internal administrative, management, processing or contracting problems;
- Unplanned for events, since original grant approvals.

ADMINISTRATIVE COST RATE: May be increased by:

- High local cost structure, especially salaries, rent;
- Stress on activities requiring proportionally more administration (e.g., classroom training vs. work experience);
- Stress on non-stipended activities (e.g., services);
- Heavy reliance on contractors, subgrants;
- Unplanned carry out of non-administrative costs;
- Heavy use of computers or other hardware;
- High indirect cost rates.

INTERPRETIVE DESCRIPTION: See interpretive factors contained in worksheets

EXPLANATION/JUSTIFICATION:

COST CLUSTER

Higher costs per positive outcome may be due to any of the factors leading to lowered positive termination rates, (see termination cluster worksheet) plus:

1. High local cost structures for standard items (e.g., wage rates, rental costs);
2. Use of more costly resources (e.g., proprietary schools, computers, special equipment);
3. Emphasis on supportive services (transportation, day care, etc.), classroom training, employability development;
4. Higher than minimum rates for participant stipends, wages;
5. Stress on longer term training for higher skill jobs.

Higher Costs Per Entered Employment may be due to any of the factors contributing to higher positive outcome costs indicated above plus those leading to lowered entered employment rates (see termination cluster worksheet).

Higher Costs Per Nondirect Placement may be due to any of the factors contributing to higher positive outcome costs indicated above plus the inclusion of direct job referral activities.

INTERPRETIVE DESCRIPTION: See interpretive factors contained in worksheets

EXPLANATION/JUSTIFICATION:

TERMINATION CLUSTER

Lower total positive termination rates (or high non-positive rates) may be due to:

1. High enrollment of hard-to-place groups;

2. High local unemployment rates;

3. Inadequacies in program operation (e.g., assessment, counselling, job development) or in program design (e.g., long "holding" periods before placement, poor coordination between components, classifying applicants as participants prior to actual enrollment in program activities, etc.).

Lower entered employment rates: any of the above plus local emphases on "employability development" activities (e.g., high school equivalency; youth work experience, etc.) or intertitle transfers leading to other positive "terminations."

Lower nondirect-employment rates: any of the above plus inclusion of direct job referral activities.

EXPLANATION/JUSTIFICATION:

FUND UTILIZATION CLUSTER

CARRY OUT RATE: May be increased by:

- Start up of new activities;
- Supplemental appropriations received late in fiscal year;
- Internal administrative, management, processing or contracting problems;
- Unplanned for events, since original grant approvals.

ADMINISTRATIVE COST RATE: May be increased by:

- High local cost structure, especially salaries, rent;
- Stress on activities requiring proportionally more administration (e.g., classroom training vs. work experience);
- Stress on non-stipended activities (e.g., services);
- Heavy reliance on contractors, subgrants;
- Unplanned carry out of non-administrative costs;
- Heavy use of computers or other hardware;
- High indirect cost rates.

INTERPRETIVE DESCRIPTION: See interpretive factors contained in worksheets

EXPLANATION/JUSTIFICATION:

COST CLUSTER

Higher costs per positive outcome may be due to any of the factors leading to lowered positive termination rates, (see termination cluster worksheet) plus:

1. High local cost structures for standard items (e.g., wage rates, rental rates);
2. Use of more costly resources (e.g., proprietary schools, computers, special equipment);
3. Emphasis on supportive services (transportation, day care, etc.), classroom training, employability development;
4. Higher than minimum rates for participant stipends, wages.
5. Stress on longer term training for higher skill jobs.

Higher Costs Per Entered Employment may be due to any of the factors attributed to higher positive outcome costs indicated above plus those leading to lowered entered employment rates (see termination cluster worksheet).

Higher Costs Per Nondirect Placement may be due to any of the factors contributing to higher positive outcome costs indicated above plus the inclusion of direct job referral activities.

USE OF INTERPRETIVE FACTORS

A. PROGRAM MIX

1. Expenditures: A high proportion of total funds in classroom, OJT and other activities stressing higher skills increase "costs per." A high proportion in work experience may lower entered employment rates and thereby increase "costs per."

2. Enrollees: A high percentages of enrollees in classroom and OJT should raise expected entered employment and nondirect placement rates; a high percent of enrollees in work experience may lower entered employment rates but should raise expected other positive termination rates.

B. ENROLLEE CHARACTERISTICS: Higher proportions of youth, minorities, high school dropouts, handicapped, offenders and other locally determined groups indicate a stress on services for those most difficult to place, and may lead to longer term or higher cost activities, and may result in lower positive termination rates.

C. POST-CETA, WAGE LEVELS: High post-CETA wages, and wage increases relative to pre-CETA wages may provide evidence for an emphasis on higher quality training and higher skilled jobs, high increases may also indicate a high proportion of participants without prior work experience.

D. LOCAL UNEMPLOYMENT RATES: Also to be considered, but not shown in the interpretive indicator table are local unemployment rates. High local unemployment rates may cause more difficulty in obtaining placements, and may influence sponsors' choice of activities and characteristics of enrollees (less disadvantaged).

INTERPRETIVE DESCRIPTION: See interpretive factors contained in worksheets

EXPLANATION/JUSTIFICATION:

COST CLUSTER

Higher costs per positive outcome may be due to any of the factors leading to lowered positive termination rates, (see termination cluster worksheet) plus:

1. High local cost structures for standard items (e.g., wage rates, rental costs);
2. Use of more costly resources (e.g., proprietary schools, computers, special equipment);
3. Emphasis on supportive services (transportation, day care, etc.), classroom training, employability development;
4. Higher than minimum rates for participant stipends, wages;
5. Stress on longer term training for higher skill jobs.

Higher Costs Per Entered Employment may be due to any of the factors contributing to higher positive outcome costs indicated above plus those leading to lowered entered employment rates (see termination cluster worksheet).

Higher Costs Per Nondirect Placement may be due to any of the factors contributing to higher positive outcome costs indicated above plus the inclusion of direct job referral activities.

V 42 166 A UG 26 77 UMI

PRIME SPONSOR: _____ FEDERAL REPRESENTATIVE _____

INTERPRETIVE FACTORS	Sponsor*	FY 1976 (9/76) Actual Data: Region X	National	USE OF INTERPRETIVE FACTORS
A. Program Mix				A. PROGRAM MIX
1. Percent of Expenditures				1. Expenditures: A high proportion of total funds in classroom, OJT and other activities stressing higher skills increase "costs per." A high proportion in work experience may lower entered employment rates and thereby increase "costs per."
Classroom	____	35	30	
On-job training	____	13	9	
Public Service Employment	____	7	11	
Work Experience	____	38	40	
Services	____	11	8	
Other Activities	____	1	1	
	100%	100%	100%	
2. Percent of Cumulative Enrollments				2. Enrollees: A high percentages of enrollees in classroom and OJT should raise expected entered employment and nondirect placement rates; a high percent of enrollees in work experience may lower entered employment rates but should raise expected other positive termination rates.
Classroom - Prime Sponsor	____	25	24	
Classroom - Voc. Educ.	____	14	9	
On-job training	____	12	9	
Public Service Employment	____	1	4	
Work Experience	____	46	48	
Other Activities	____	2	2	
	100%	100%	100%	
B. Enrollee Characteristics				B. ENROLLEE CHARACTERISTICS: Higher proportions of youth, minorities, high school dropouts, handicapped, offenders and other locally determined groups indicate a stress on services for those most difficult to place, and may lead to longer term or higher cost activities, and may result in lower positive termination rates.
1. Youth: 18 & under	____ %	15 %	36 %	
19 - 21	____	19	21	
2. Education: 8 & under	____	9	13	
9 - 11	____	41	43	
3. Minority: Black	____	11	37	
Spanish-American	____	6	14	
4. Handicapped	____	3	4	
5. Full-time student	____	26	33	
6. Offender	____	10	5	
C. Median Wage				C. POST-CETA, WAGE LEVELS: High post-CETA wages, and wage increase relative to pre-CETA wages may provide evidence for an emphasis on higher quality training and higher skilled jobs, high increases may also indicate a high proportion of participants without prior work experience.
1. Post-CETA	$ ____	$1.23	$2.88	
2. Pre-CETA	$ ____	$2.81	$2.67	
				D. LOCAL UNEMPLOYMENT RATES: Also to be considered, but not shown in the interpretive indicator table are local unemployment rates. High local unemployment rates may cause some difficulty in obtaining placements, and may influence sponsors' choice of activities and characteristics of enrollees (less disadvantaged).

*Columns to be filled in by Federal Representative. See Instructions contained in Attachment 1, Section II.

ATTACHMENT II

INDICATORS

The indicator utilized in this process were developed by the Performance Indicators Work Group as a result of its deliberations during December 1976 and January 1977. However, it was determined that use of the "Earnings Clustre" indicators, would not be practical, since data would not be available from the appropriate planning documents (PPS and BIS). Additionally, the "Expenditure Rate" indicator was omitted.

Termination Rate Cluster. This group of measures indicates the proportions of participants leaving the CETA program achieving the several types of objectives included in the employment and positive outcome categories. Obviously, no one of the measures is sufficient in analyzing or explaining participant outcomes. The cluster must, in addition, be examined in relation to costs, and the interpretive factors.

1. *Positive termination rate:*

$$\frac{\text{Total positive terminations}}{\text{Total terminations}} \times 100$$

This indicator provides a broad measure of planned prfogram success in accomplishing multiple goals. The inclusion of other positive terminations recognize that programs may have additional planned outcomes other than placement. The inclusion of intertitle transfers in other positive terminations and total terminations represents a troublesome distortion which cannot be avoided.

2. *Entered employment rate-total terminations based:*

$$\frac{\text{Entered employment}}{\text{Total termination}} \times 100$$

This indicator provides a general measure of the degree CETA participation will result in employment. The measure disregards the amount of service provided or the source of placements, but these factors should be taken into account during analysis of this indicator.

3. *Entered employment rate-total positive terminations based:*

$$\frac{\text{Entered employment}}{\text{Total positive terminations}} \times 100$$

This indicator provides another method of analyzing the degree CETA participation will result in employment. It focuses on the internal composition of positive outcomes.

4. *Nondirect placement rate-total terminations based:*

$$\frac{\text{Nondirect placements}}{\text{Total terminations}} \times 100$$

This indicator measures the degree employment will result for participants who receive more than a minimal level of CETA services. The obtained employment group is included to take into account those participants who receive significant CETA services and gain employment but for whom the sponsor cannot take actual placement credits.

5. *Nondirect placement rate-total entered employment based:*

$$\frac{\text{Nondirect placements}}{\text{Entered employment}} \times 100$$

This indicator is another measure of employment results for participants receiving more than minimal CETA services. It highlights the composition of the entered employment category.

Cost cluster. This group of indicators measures the costs in achieving positive outcomes in CETA programs. This cluster consists of the rates of total expenditures to termination categories. In addition, the cost factors must be related to quality outcome, difficulty of clientele, and external factors. It should be noted that the ratios for the indicators in the "cost cluster" used to compute the quartile reference points and for planning goals do not represent actual dollars spent or planned to be spent on each enrollee terminating positively, each enrollee entering employment and each enrollee nondirectly placed. This is because total accrued or planned expenditures into which the outcomes are divided reflect costs for all aspects of the prime sponsor's program rather than for any specific outcome. Actual costs can only be obtained by appropriate longitudinal studies. The purpose of these indicators is to provide a common base for comparing prime sponsors. Therefore, the high "costs" obtained for these indicators, especially the highest national and regional reference points for the cost per entered employment and the cost per nondirect placement, and those which may be obtained for planning goals, should be understood in this context.

1. *Cost per positive termination.*

$$\frac{\text{Planned expenditures}}{\text{Total number of positive terminations}}$$

This indicator provides a measure of costs in relation to broad program results, including accomplishment of goals other than placement in employment.

2. *Cost per entered employment:*

$$\frac{\text{Planned expenditures}}{\text{Total number entering employment}}$$

This measure relates costs to the total employment results of a CETA program.

3. *Cost per nondirect placement:*

$$\frac{\text{Planned expenditures}}{\text{Total number of nondirect placements}}$$

This indicator provides a measure of costs in relation to employment results for participants receiving CETA services beyond intake, assessment, and job referral placement.

Fund utilization cluster. These indicators measure the extent total available funds will be utilized during the fiscal year. Since there is general concern about reducing the amount of unspent funds remaining at the end of each fiscal year, a specific measure related to planned carry-out for the year is included. In addition, an indicator on administrative costs is included. Regulations prohibit administrative cost rates of more than 20 percent of total planned costs for all program activities other than PSE.

1. *Carry-out rate:*

$$\frac{\text{Planned carry-out funds}}{\text{Total funds available}} \times 100$$

This indicator describes trends in spending rates.

2. *Administrative cost rate:*

$$\frac{\text{Planned administrative costs}}{\text{Planned expenditures}}$$

This measure relates administrative costs to the overall expenses of a program.

Signed at Washington, D.C., this 11th day of August 1977.

ROBERT J. MCCONNON,
Deputy Assistant Secretary for Employment and Training Administration.

HUMANELY SLAUGHTERED LIVESTOCK

Identification of Carcasses; List of Establishment

V42166A AUG 26 77 UMI

DEPARTMENT OF AGRICULTURE

Food Safety and Quality Service

HUMANELY SLAUGHTERED LIVESTOCK

Identification of Carcasses; List of Establishments

Pursuant to section 4 of the Act of August 27, 1958 (7 U.S.C. 1904), and the statement of policy thereunder in 9 CFR 391.1, the following table lists the establishments operating under Federal inspection pursuant to the Federal Meat Inspection Act, as amended (21 U.S.C. 601 et seq.), which have been officially reported as using humane methods of slaughter and incidental handling of the species of livestock respectively designated for such establishments in the table. Additions to and deletions from this list will be made from time to time as the facts may warrant by notices published in the FEDERAL REGISTER. The establishment number given with the name of the establishment is branded on each carcass of livestock inspected and passed at that establishment. The table should not be understood to indicate that all species of livestock slaughtered at a listed establishment are slaughtered and handled by humane methods unless all such species are listed for that establishment in the table. Nor should the table be understood to indicate that the affiliates of any listed establishment use only humane methods.

Domestic and International Business Administration

EXPORT MONITORING REPORT FOR FERTILIZERS

January–May 1977

United States exports of nitrogen containing fertilizers during the months of January, February, March, April and May 1977, totaled 438,086 content tons. This represents a decrease of 9.1 percent in the export trade in these commodities from the comparable period of 1976, when 482,005 content tons were exported.

Imports of nitrogen containing fertilizers during the January through May period increased 67 percent over the import level of the comparable five months in 1976. Total U.S. imports of nitrogen containing fertilizers during January through May 1977 amounted to 970,679 content tons. This compares with imports during January through May 1976, of 579,434 content tons.

Ammonium phosphate was the nitrogen containing fertilizer material exported in the largest quantity during the five months considered in this report. In the January through May period, 1,270,783 short tons of ammonium phosphate were shipped abroad. This was an increase of 256,149 short tons, or slightly more than 25 percent, above the 1,014,634 short tons of ammonium phosphate exported during the first five months of 1976. Exports of anhydrous ammonia during the first five months of 1977, also exceeded the export level for the same period in 1976. This year, 137,226 short tons of anhydrous ammonia were exported during January through May, an increase of 12,911 short tons, or slightly more than 10 percent above the comparable five months' exports in 1976, of 124,315 short tons. Exports of all the other nitrogen containing fertilizer commodities under monitoring declined from 1976 levels. The 1977 ammonium nitrate exports of 5,849 short tons through May were 13 percent less than the 6,609 short tons shipped abroad during January through May 1976. Urea exports of 125,578 short tons for the first five months of this year, were 51 percent below the 1976 level of 256,748 short tons. Exports of mixed fertilizers totaling 87,360 short tons fell 28 percent from the previous year's level of 121,845 short tons; while ammonium sulfate exports of 138,253 short tons during the first five months of this year were 51.5 percent lower than the 285,419 short tons shipped abroad during January through May 1976.

Of the nitrogen containing fertilizer materials imported, the commodity obtained in the greatest quantity during the five months of January through May, 1977, was urea. A total of 840,123 short tons of this commodity was imported this year, an increase of 231 percent over the 253,645 short tons of urea imported during the same five months of 1976. This exceptionally large increase in urea imports may have resulted from orders placed by apprehensive buyers during the cold spell of December and January, when severe cutbacks in the production of ammonia were anticipated as the result of natural gas curtailments. Because the severe cold spell did not last beyond February, and new ammonia plant production has offset last winter's curtailed output, imports of urea may decrease to more historic levels in forthcoming months. Anhydrous ammonia was the nitrogen containing fertilizer imported in the second largest quantity in the January through May period. The 477,322 short tons of anhydrous ammonia imported during these five months represented a 152,836 short ton increase over the 324,486 short tons imported during the same five months a year earlier.

At the end of May, 1977, contracts for the export of nitrogen containing fertilizer materials through the end of 1977 were slightly less than the quantity committed for export at the end of May, 1976. In May 1977, total export contracts for nitrogenous fertilizers for the remainder of the calendar year were 151,759 content tons. In May 1976, export contracts for the rest of 1976 totaled 188,151 content tons. However, by the end of December 1977, actual total exports will undoubtedly exceed the 151,759 content tons now under contract, as spot sales, which have always constituted a large part of the export trade in these commodities, are not reflected in this contract figure.

Despite some production losses in January and February due to severe winter weather and natural gas curtailment, production during March, April and May was sufficiently above the previous year's level to raise total production of nitrogen containing fertilizer materials during the January–May period covered by this report to slightly over the total for the same five month interval a year earlier. Anhydrous ammonia production was 6,949 short tons during the first five months of 1977, whereas during the same period of 1976 it had totaled 6,863 short tons. Urea production was nearly identical in both 1976 and 1977: 1,720 short tons the first five months of this year; 1,702 short tons in 1976. During the first five months of 1977, there was a 10 percent increase in the output of ammonium nitrate over the preceding year: 3,262 short tons were produced in January–May 1977, compared to production of 2,972 short tons in the like period a year earlier. During the first five months of 1977, ammonium phosphate production also increased 13 percent over the comparable period of 1976, reaching 4,067 short tons compared to the 1976 output of 3,577 short tons.

At the end of the reporting period, it was evident that there would be an adequate world supply of nitrogen containing fertilizers during the crop year ending June 30, 1977, and based on current projections, for the next two or three crop years. About 3 million tons of new anhydrous ammonia capacity is scheduled to become operational in 1977, and, in 1978, another 2.8 million tons of capacity is scheduled to come on-line. World consumption of nitrogen for the 1976 crop year is estimated to have totaled 46.5 million tons of nutrient. While world consumption is expected to increase by about 7 percent in the coming year, production should increase by about 9 percent.

Producers' prices for anhydrous ammonia were reduced from December's level of $180–$190 per ton, to January's $120–$140 per ton, to bring the producers' prices more in line with actual transaction prices and thereby reduce severe discounting. Throughout the remaining months covered in this report, the posted producers' prices for nitrogen containing fertilizer materials remained stable. Actually, transaction prices increased slightly over the five month period. Some of this increase occurred because of fears generated by the mid-winter cold spell that natural gas curtailments, with a consequent loss of ammonia production, would persist. However, as this threat proved short-lived, transaction price increases were minor and temporary, and were never reflected in the posted producers' prices.

Tables of exports, imports, inventories, domestic production and prices follow: [1]

[1] World supply and demand data are not available on a monthly basis. More extensive data on world supply and demand than that contained herein will be included in the Semi-Annual Report to Congress on operations of the Office of Export Administration covering the period ending with the third quarter of 1977.

1/ The data in this table with respect to "Contracts" is based on information obtained from exporters by the Office of Export Administration subject to the confidentiality provisions of the Export Administration Act of 1969, as amended. In a number of instances only one exporter is involved in exports of a stated commodity to a particular country. Therefore, the publication of the data by country of destination could effectively reveal information required to be held confidential. Accordingly, in order to maintain the confidentiality of the information supplied by exporters, this data is published by the area of destination.

2/ Includes non-fertilizer grades of anhydrous ammonia.

V42166 AUG 26 77 UMI

DEPARTMENT OF LABOR

Employment Standards Administration

MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION

General Wage Determination Decisions

General Wage Determination Decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed in construction activity of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24-70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates, (37 FR 21138) and of Secretary of Labor's Orders 12-71 and 15-71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General Wage Determination Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

MODIFICATIONS AND SUPERSEDEAS DECISIONS TO GENERAL WAGE DETERMINATION DECISIONS

Modifications and Supersedeas Decisions to General Wage Determination Decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the Modifications and Supersedeas Decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24-70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 13-71 and 15-71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing General Wage Determination Decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and Supersedeas Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Office of Special Wage Standards, Division of Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rule-making procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Wage Determination Decision.

Group 6	9.46	e	f		
Group 7	9.73	e	f		

CLASSIFICATIONS DEFINITIONS

Group 1 - Warehousemen, yardmen, truck helpers, pickups, station wagons, panel trucks, flat-body material trucks (straight jobs), groucers, washers, firemen, dump trucks (up to 5 cu. yds.);
Group 2 - Tank trucks (straight);
Group 3 - Dump trucks (5 cu. yds. or over), semi-dump trucks, semi-trailers (whether flat,rack or pole and hauled or pushed by trucks or tractors), agitator or mixer trucks (up to 5 cu. yds.), tank trucks (semi);
Group 4 - Lowboy trailers, winch trucks, fork trucks, distributor trucks (front and back end), truck cranes, monirail trucks;
Group 5 - Material checkers & receivers, mechanics helpers;
Group 6 - Agitator or mixer trucks (5 cu. yds. and over);
Group 7 - Tri-axle dump trucks, hydraulic lifts, tailgate trucks, farm type tractors, rose carriers, athey wagons or similar equipment. A-frame, hydro-lifts, dual purpose trucks, end dumpsters, mechanics.

DECISION NO. KY -

FOOTNOTES:

a. Six Paid Holidays: New Year's Day; Memorial Day; Independence Day; Labor Day; Thanksgiving Day; Christmas Day.

b. Employer contributes 4% of the basic hourly rate for 5 years or more of service, or 2% of the basic hourly rate for 6 months to 5 years of service as Vacation Pay Credit.

c. Nine Paid Holidays: New Year's Day, Washington's Birthday, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, Christmas Eve, and Christmas Day provided the employee has worked 30 full days during the 30 calendar days prior to the holiday and the regular scheduled work days immediately preceding and following the holiday.

d. Two Paid Holidays: Independence Day and Christmas Day.

e. Employer contributes $82.33 per month per employee employed 30 days or more.

f. Employer contributes $52.00 per month per employee employed 30 days or more.

DECISION NO. KY77-1110

	Basic Hourly Rates	Fringe Benefits Payments			
		H & W	Pensions	Vacation	Education and or Appr. Tr.
LABORERS:					
Group 1	$ 6.05	.35	.47		
Group 2	6.23	.35	.47		
Group 3	6.63	.35	.47		

LABORERS CLASSIFICATIONS

Group 1 - General laborers; wrecking; labor on buildings, clearing right-of-way and building site; carpenter tenders; truck spotters and dumpers; axe and cross cut saw filer; concrete puddlers and form strippers.

Group 2 - All power driven tools; hod carriers; mason tenders; finisher tenders; mortar mixers; jack hammers; vibrators; wagon drill; core drill; test drill; well drill; concrete pump machine; tunnel boring machine; men in tunnel and crib ditch work; signal men; riprap rock setters and handlers; asphalt rakers; tampers and smoothers; pipelayers; grout pump men; chain saw; pipe cleaning; doping and wrapping; swampers and straight cable hooking; cement guns; grade checkers machine excavating; batch plant scale man; sand hog free air; sand hog compressed air; cutting torch man on salvage work; road form setters; brick slingers; hand spikers; power buggy; handling of creosote material; sandblasters; curing of concrete and apply hardner; air and gas tampers; concrete saw; power posthole diggers and green cut men on concrete work.

Group 3 - Powdermen; blasters.

Page 4

DECISION NO. KY77-1110

POWER EQUIPMENT OPERATORS:	Basic Hourly Rates	Fringe Benefits Payments			
		H & W	Pensions	Vacation	Education and or Appr. Tr.
Class A	$10.45	.40	.45		.05
Class B	8.01	.40	.45		.05
Class C	7.31	.40	.45		.05

CLASSIFICATIONS DEFINITIONS

Class A - Auto patrol, batcher plant, bituminous paver, cableway, central compressor plant, chamfer, concrete mixer (21 cu. ft. or over), concrete pump, crane, crusher plant, derrick, derrick boat, ditching and trenching machine, dragline, dredge operator, dredge engineer, elevating grader and all types of loaders, Rex type machine, hoist (1-drum when used for stack or chimney construction or repair), hoisting engine (2 or more drums), locomotive, motor scraper, carry-all scoop, bulldozer, heavy duty welder, mechanic, orangepeel bucket, pile driver, power blade, motor grader, roller (bituminous), scarifier, shovel, tractor shovel, truck crane, winch truck, push dozer, highlift, forklift (regardless of lift height and except when used for masonry construction), all types of boom cats, core drill, hopto, tow or push boat, A-frame winch truck, concrete paver, gradeall, hoist, hyster, pumperete, Ross carrier, boom, tail boom, rotary drill, hydro hammer, mucking machine, rock spreader attached to equipment, scoopmobile, KeCal loader, tower cranes (French, German and other types), hydrocrane, backfiller, gurries, sub-grader;

Class B - All air compressors (over 900 cu. ft. per min.), bituminous mixer, joint sealing machine, concrete mixer (under 21 cu. ft.), form grader, roller (rock), tractor (50 hp and over), bull float, finish machine, outboard motor boat, flexplane, fireman, boom type tamping machine, truck crane oiler, greaser on grease facilities servicing heavy equipment, switchman or brakeman, mechanic helper, whirley oiler, self-propelled compactor, tractair and road widening trencher and farm tractor with attachments except backhoe, highlift and end loader, elevator (regardless of ownership when used for hoisting any building material), hoisting engine (1-drum or buck hoist), forklift (when used for masonry construction), roll points, grout pump, throttle-valve man, tugger, electric vibrator compactor;

Class C - Bituminous distributor, cement gun, conveyor, mud jack, paving joint machine, roller (earth), tamping machine, tractors (under 50hp), vibrator, oiler, concrete saw, burlap and curing machine, hydro-seeder, power form handling equipment, deckhand steerman, hydraulic post driver, drill helper.

Page 5

DECISION NO. KY77-1110

FOOTNOTES:

a. Six Paid Holidays: New Year's Day; Memorial Day; Independence Day; Labor Day; Thanksgiving Day; Christmas Day.

b. Employer contributes 4% of the basic hourly rate for 5 years or more of service, or 2% of the basic hourly rate for 6 months to 5 years of service as Vacation Pay Credit.

c. Nine Paid Holidays: New Year's Day, Washington's Birthday, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, Christmas Eve, and Christmas Day, provided the employee has worked 30 full days during the 90 calendar days prior to the holiday and regular scheduled work days immediately preceding and following the holiday.

DECISION NO. PA77-4298 Page 2

CLASSIFICATION EXHIBITION:

Group: 1 - Oilers; Greasers; Mechanic's Helper; Spread Oiler (less than one year experience)

Group: 2 - Oiler Driver

Group: 3 - Tractor under 30 HP; Air Compressors; Pump-welding machine; Spray machines; Form Trenchers; Felt Machine

Group: 4 - Concrete Mixer; Concrete Pumps; Hydro-Hammer

Group: 5 - Spreader Oiler (after one year experience in classification)

Group: 6 - Concrete Spreader; Concrete Finishing Machine; Bulldozer; Roller; Trenchmaster; Forklift; Winch Truck; One Drum Hoist; Oil Distributor; Asphalt Roller

Group: 7 - Blade (patrol); Scraper

Group: 8 - Hoist, 2 Drums; Trenching Machine; Pavin; Mixer; Piledriver; Heavy duty Mechanic; Welder; Shovel; Dragline; Clamshell; Orange Peel; Backhoe; Derrick; Crane; Locomotive; Fireman or Boiler; Drydock Machine; Two Drum Winch Truck; Side Boom Cat; Pug Mill Operator on Asphalt Plant; Leverman on Dredge; Engineer on Dredge; Turbine Operator; Gradall Operator; Rotary Well Drilling Operator; Hydreerane; Cleveland type Backfiller; Self-Propelled Spreader Vibrator; Slip Form Paver.

TRUCK DRIVERS:	Basic Hourly Rates	Fringe Benefits Payments			
		H & W	Pensions	Vacation	Education and/or Appr. Tr.
Group: 1 - Single Axle, Tuck and Spreader Truck	$6.93	.50	.40		
Group: 2 - Tandem Axle Trucks, Euclid Trucks, Power Lift Form Trucks and Spreader Trucks	6.99	.50	.40		
Group: 3 - Three-Axle Tandem	7.04	.50	.40		
Group: 4 - Lowboys-Tractor Trailer, Water Pulls	7.12	.50	.40		
Group: 5 - Tandem Dump with Auxiliary End Dump Trailer	7.17	.50	.40		
Group: 6 - Lumber Carrier	7.29	.50	.40

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

INFORMATION AND ASSISTANCE

CUMULATIVE LIST OF PARTS AFFECTED DURING AUGUST

The following numerical guide is a list of parts of each title of the Code of Federal Regulations affected by documents published to date during August.

1 CFR

Ch. I 38891

3 CFR

EXECUTIVE ORDERS:

11126 (Amended by EO 12007) 42839
11221 (See EO 12007) 42839
11472 (Amended by EO 12007) 42839
11514 (See EO 12007 42839
11583 (Amended by EO 12007) 42839
11625 (Amended by EO 12007) 42839
11948 (Superseded in part by EO 12007) 42839
11962 (Revoked by EO 12007) 42839
12006 39081
12007 42839
12008 43373

MEMORANDUMS:

January 2, 1973 (Amended by Memorandum of August 1, 1977) 40169
April 26, 1973 (See Memorandum of August 1, 1977) 40169
December 13, 1973 (See Memorandum of August 1, 1977) 40169
October 29, 1974 (See Memorandum of August 1, 1977) 40169
May 20, 1975 (See Memorandum of August 1, 1977) 40169
August 5, 1975 (See Memorandum of August 1, 1977) 40169
March 25, 1976 (Superseded by Memorandum of August 1, 1977) 40169
April 14, 1976 (See Memorandum of August 1, 1977) 40169
November 5, 1976 (See Memorandum of August 1, 1977) 40169
November 19, 1976 (Supplemented by Memorandum of July 21, 1977) 41401
July 20, 1977 39083
July 21, 1977 41401
August 1, 1977 40169
August 5, 1977 40171
August 11, 1977 42677
August 12, 1977 42185

Title 3—The President

Executive Order 12008 • August 25, 1977

Presidential Management Intern Program

By virtue of the authority vested in me by Sections 3301 and 3302 of Title 5 of the United States Code, Section 301 of Title 3 of the United States Code, and as President of the United States of America, it is hereby ordered as follows:

SECTION 1. There is hereby established the Presidential Management Intern Program, hereafter referred to as the Program, the purpose of which is to attract to Federal service men and women of exceptional management potential who have received special training in planning and managing public programs and policies.

SEC. 2. Outstanding individuals who have pursued a course of study oriented toward public management at a graduate-level educational institution and who, at the time of application, have recently received or will shortly receive an appropriate advanced degree, are eligible to apply for participation in the Program.

SEC. 3. The United States Civil Service Commission, hereafter referred to as the Commission, shall develop appropriate procedures for the recruitment, screening, and selection of applicants possessing the qualifications described in Section 2 of this order. In developing these procedures, the Commission shall be guided by the following principles and policies:

(a) The number of interns participating in the Program shall at no time exceed five hundred.

(b) Final selection of interns shall be made by the head of the department, agency, or component within the Executive Office of the President in which the intern is to be employed, or by the designee thereof.

(c) The procedures so developed shall provide for such affirmative actions as the Commission deems appropriate to assure equal employment opportunity.

(d) To the extent permitted by law, the Commission is authorized to enter into appropriate cooperative arrangements with State and local officials and appropriate private institutions for recruitment and screening of candidates for the Program.

SEC. 4. Upon selection, candidates shall be appointed as interns to positions in Schedule A of the excepted service for a period not to exceed two years. Their tenure shall be governed by the following principles and policies:

V 42 167 AUG 29 77 7 UMI

(a) Interns shall be assigned responsibilities consistent with their public management backgrounds and the purposes of this Program.

(b) Continuation in the Program shall be contingent upon satisfactory performance by the interns throughout the internship period.

(c) Except as provided in subsection (d) of this Section, service as interns shall confer no rights to further Federal employment in either the competitive or excepted service upon expiration of the two-year internship period.

(d) Interns may be granted competitive civil service status if they satisfactorily complete their two-year internships and meet all other requirements prescribed by the Commission.

SEC. 5. The Commission shall prescribe such regulations as may be necessary to carry out the purposes of this order.

Jimmy Carter

THE WHITE HOUSE,
August 25, 1977.

[FR Doc.77-25148 Filed 8-25-77;3:27 pm]

EDITORIAL NOTE: The President's remarks of Aug. 25, 1977, on signing Executive Order 12008, are printed in the Weekly Compilation of Presidential Documents (vol. 13, no. 35).

Memorandum of August 25, 1977

Review of the Economic Analysis and Policy Machinery in the Federal Government

Memorandum for the Heads of Executive Departments and Agencies

THE WHITE HOUSE,
Washington, August 25, 1977.

I have directed my Reorganization Project staff at the Office of Management and Budget to begin a review of the economic policy and analysis machinery of the Federal Government, to look for ways to improve the way economic policy decisions are made and carried out.

This review will focus primarily on the economic policymaking system outside the Executive Office of the President. It will involve 33 agencies employing approximately 5,000 economists.

The review will examine and develop recommendations about the best ways to:

- Eliminate overlapping functions among economic agencies;
- Repair weaknesses or gaps in the Federal Government's capacity to conduct economic analyses of particular industries or regions;
- Link foreign policy with economic decisions; and
- Ensure that economic decisions are carried out.

This effort will require the active participation of Federal departments and agencies. You may be asked to contribute time, resources, and staff assistance. I know that I can count on your support.

In order to inform all affected parties that this review is underway, I have directed that this memorandum be published in the FEDERAL REGISTER.

Jimmy Carter

V42167 AUG 29 77 UMI

Memorandum of August 25, 1977

Reorganization Study of Federal Preparedness and Response to Disasters

Memorandum for the Heads of Executive Departments and Agencies

THE WHITE HOUSE,
Washington, August 25, 1977.

I have directed my Reorganization Project staff at the Office of Management and Budget to carry out a comprehensive study of the Federal Government's role in preparing for and responding to natural, accidental, and wartime civil disasters.

Three different departments have major responsibility for disaster and civil defense preparedness. Many other Federal organizations have some disaster planning, relief, or recovery responsibilities. In national emergencies the resources of the entire Federal Government are on call, but they must be deployed effectively. After local disasters Federal agencies should be effectively coordinated to be able to assist State and local authorities without delay.

A preliminary review indicates that there are opportunities for the Executive Branch to improve its performance in planning for and helping to cope with the effects of major disaster. But this is a shared responsibility. The cooperation of State and local government, Congress, private sector organizations, and individual citizens is essential. Successful completion of this important reorganization study will require their participation as well as the full cooperation of Federal departments and agencies. If you are asked to contribute staff support or other assistance to this effort, I encourage you to do so.

In order to inform all affected parties that the review is underway, I have directed that this memorandum be published in the FEDERAL REGISTER.

Jimmy Carter

[FR Doc.77-25150 Filed 8-25-77;3:29 pm]

V 42 167 A AUG 29 77 7 UMI

Memorandum of August 25, 1977

Comprehensive Review of Federal Food and Nutrition Policy

Memorandum for the Heads of Executive Departments and Agencies

THE WHITE HOUSE,
Washington, August 25, 1977.

I have directed my Reorganization Project staff at the Office of Management and Budget to begin a thorough review of the organization and structure of Federal food and nutrition programs.

The Federal Government is unable to respond as effectively as it should to the important changes taking place in the production, processing, marketing, and consumption of food. As a result, our capability to develop and implement a coherent food and nutrition policy is severely hampered.

This review will focus on seven major areas:

- Production and marketing of food;
- Regulatory activities affecting food which now involve 14 agencies and over 2000 regulations;
- Food research and education which is now conducted by 12 different organizations;
- International activities which involve 12 different organizations;
- Commodity procurement and distribution including the Federal feeding programs;
- Aquaculture activities which are dispersed among three major departments, and
- Conservation activities which affect the availability of good soil and water to grow crops.

The objective of this review is to improve the Government's capability to address the Nation's needs for adequate supplies of reasonably priced, safe, and nutritious foods.

As part of this overall project I have directed OMB's new Regulatory Policy and Reports Management staff to begin a specific review of Federal food inspection, labeling and grading as well as other related food regulatory practices. The comprehensive food and nutrition policy review and the food regulatory policy review will be closely coordinated within the Reorganization Project.

This important effort will need the active participation of the Congress, Federal Departments and Agencies, State and local officials, and the public.

You may be asked to contribute time, resources, and staff assistance to this effort. If so, I hope you will make your best effort to do so.

In order to inform all affected parties that this review is underway, I have directed that this memorandum be published in the FEDERAL REGISTER.

Jimmy Carter

[FR Doc.77-25151 Filed 8-25-77;3:30 pm]

V 42 167 AUG 29 77 UMI

Memorandum of August 25, 1977

Study of Federal Justice System Improvement Activities

Memorandum for the Heads of Executive Departments and Agencies

THE WHITE HOUSE,
Washington, August 25, 1977.

The weaknesses of our present system of justice are painfully clear to many citizens. Lawyers are often available only to the wealthy or the very poor. There are substantial backlogs in the courts. While many people have proposed plans for resolving disputes outside of the courts, few of these plans are now operating. The Federal Government does not bear full responsibility for correcting these inequities, but it should make its own system a model and encourage State and local governments to improve the quality of their systems of justice.

I have therefore directed my Reorganization Project Staff at the Office of Management and Budget to review all Federal activities designed to improve the system of justice in this country. These include: (1) justice research programs; (2) justice information and statistical services; (3) justice policy and planning offices; (4) financial assistance for State and local systems; and (5) other reform activities such as juvenile justice and delinquency prevention programs.

This review will rely heavily on advice and counsel from Congress, Executive departments and agencies, the Judiciary, State and local officials, and the public.

You may be asked to contribute time, resources, and staff support to this effort. I consider this to be a high priority matter, and I know I can count on your cooperation and assistance.

In order to inform all affected parties that this review is underway, I have directed that this memorandum be published in the FEDERAL REGISTER.

Jimmy Carter

[FR Doc.77-25152 Filed 8-25-77;3:31 pm]

V 42 167 AUG 29 77 UMI

Memorandum of August 25, 1977

Examination of the Federal Government's Legal Representation System

Memorandum for the Heads of Executive Departments and Agencies

THE WHITE HOUSE,
Washington, August 25, 1977.

I have directed my Reorganization Project Staff at the Office of Management and Budget to review the Federal Government's system for providing legal advice and representation to its departments, agencies, and regulatory commissions.

This study is designed to improve the way governmental units use the legal resources at their disposal, which include their own legal offices and the services of the Department of Justice, including United States Attorneys. Better use of these resources should help prevent unnecessary litigation and administrative delay by enabling the Federal Government to do a better job of complying with its own rules and regulations.

A second objective will be to improve the way litigation is conducted in order to ensure better and more uniform application of the law.

This study will rely heavily on the advice and counsel of the Congress, Federal departments, agencies, and regulatory commissions, State and local officials, private organizations and the public.

I consider the effective use of legal resources to be a vital part of my Administration's effort to improve the performance of the Federal government; accordingly, I ask for your cooperation in providing staff assistance and other resources to assure the success of this review.

In order to inform all interested parties that this study is underway, I have directed that this memorandum be published in the FEDERAL REGISTER.

Jimmy Carter

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 10—Energy

CHAPTER I—NUCLEAR REGULATORY COMMISSION

PART 50—LICENSING OF PRODUCTION AND UTILIZATION FACILITIES

PART 140—FINANCIAL PROTECTION REQUIREMENTS AND INDEMNITY AGREEMENTS

Revocation or Modification of Certain Reporting Requirements

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Nuclear Regulatory Commission is amending its regulation "Licensing of Production and Utilization Facilities" to revoke the requirement that if the construction or modification of a facility is completed before the earliest date specified in the construction permit the holder of the construction permit shall promptly notify the Commisston for the purpose of accelerating the final inspection. The Commission also is amending its regulation "Financial Protection Requirements and Indemnity Agreements" to modify the repetitive reporting requirements set out in special provisions applicable to licensees furnishing financial protection in whole or in part in the form of adequate resources. These amendments reduce the reporting burden on NRC licensees.

EFFECTIVE DATE: August 29, 1977.

FOR FURTHER INFORMATION CONTACT:

Gerald L. Hutton, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, D.C 20555. Tel. 301–492–7211.

SUPPLEMENTARY INFORMATION: Section 50.55(a) of 10 CFR Part 50 requires that if the construction or modification of a facility is completed before the earliest date specified in the construction permit, the holder of the construction permit shall promptly notify the Commission for the purpose of accelerating the final inspection. A separate report for this event is not necessary and this reporting requirement is being revoked.

Section 140.18 of 10 CFR Part 140 requires that in any case where a licensee undertakes to maintain financial protection in the form specified in § 140.14(a)(2) for all or part of the financial protection required by Part 140, the licensee shall file with the Commission a balance sheet and operating statement prepared and certified by a certified public accountant. This section is being revised so that it no longer requires repetitive reports, but states that the Commission may require the licensee to file with the Commission such financial information as the Commission determines to be appropriate for the purpose of determining whether the licensee is maintaining financial protection as required by Part 140.

Since the amendments set forth below relate to minor matters and are intended to provide relief from, rather than to impose, restrictions under regulations currently in effect, the Commission has found that good cause exists for omitting general notice of proposed rule making and public procedure thereon as unnecessary and for making the rule effective on August 29, 1977, without the customary 30 day waiting period.

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended and Sections 552 and 553 of Title 5 of the United States Code, the following amendments to Title 10, Chapter I, Code of Federal Regulations, Parts 50 and 140 are published as a document subject to codification.

§ 50.55 [Amended]

1. Section 50.55 of 10 CFR Part 50 is amended by deleting the second sentence of paragraph (a).

2. Section 140.18 of 10 CFR Part 140 is revised to read as follows:

§ 140.18 Special provisions applicable to licensees furnishing financial protection in whole or in part in the form of adequate resources.

In any case where a licensee undertakes to maintain financial protection in the form specified in § 140.14(a)(2) for all or part of the financial protection required by this part, the Commission may require such licensee to file with the Commission such financial information as the Commission determines to be appropriate for the purpose of determining whether the licensee is maintaining financial protection as required by this part.

(Sec. 161, Pub. L. 83–703, 68 Stat. 948 (42 U.S.C. 2201); Sec. 201 Pub. L. 93–438, 88 Stat. 1242 (42 U.S.C. 5841).)

Dated at Bethesda, Md., this 17th day of August 1977.

For the Nuclear Regulatory Commission.

LEE V. GOSSICK,
Executive Director for Operations.

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 77–NW–21–AD, Amdt. 39–3025]

PART 39—AIRWORTHINESS DIRECTIVES

Boeing Models B–17 F and G

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This AD is being issued to require inspection of the wing rear spar lower cap on the wing center section. There has been one reported instance of complete spar cap failure.

EFFECTIVE DATE: September 6, 1977.

ADDRESSES: Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Wash. 98124. FAA Northwest Region, 9010 East Marginal Way South, Seattle, Wash. 98108.

FOR FURTHER INFORMATION CONTACT:

Iven Connally, Engineering and Manufacturing Branch, FAA Northwest Region, 9010 East Marginal Way South, Seattle, Wash. 98108. Telephone 206–767–2516.

SUPPLEMENTARY INFORMATION: There has been a complete failure of the rear spar lower cap on the wing center section of a Boeing B–17G that resulted in partial wing failure. A fatigue crack initiated in the spar chord at a $\frac{3}{8}$" dia bolt hole common to the terminal plate. Since this condition is likely to exist or develop in other airplanes of the same design, an airworthiness directive is being issued to require inspection of the rear repair as necessary on all B–17 F and G airplanes.

DRAFTING INFORMATION

The principal authors of this document are Iven Connally, Engineering and Manufacturing Branch, and Jonathan Howe, Regional Counsel, FAA Northwest Region.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended, by adding the following new airworthiness directive:

V 42 167 AUG 29 77 UMI

BOEING. Applies to all B–17 F and G airplanes certified in all categories.

Compliance required within the next 25 hours' time-in-service or within 6 months after the effective date of this AD, whichever comes first, unless already accomplished within the last 25 hours time in service or 6 months, and thereafter at intervals not to exceed 50 hours time in service or 12 months, whichever comes first (from the last inspection).

To detect cracking in the rear spar lower cap center section, P/N 75–3425–2 or 85–3425–2, accomplish the following:

1. Remove the 3 most inboard bolts from the 14 bolt pattern attaching the rear spar center section lower chord P/N 75–3425–2 or 85–3425–2 to the terminal plates, left and right hand sides. These bolts are approximately 40 to 42 inches from the airplane centerline. Using eddy current inspection procedures or boroscope methods in conjunction with dye penetrants, inspect the rear spar lower chord center section for cracks around the bolt holes in both the forward and aft walls of the tube.

2. If cracks are found, replace the spar cap with a serviceable part of the same part number, or repair in accordance with Army T.O. No. 01–20E or other methods approved by the Chief, Engineering and Manufacturing Branch, FAA Northwest Region.

3. After repairs per (2) have been accomplished, reinspect in accordance with (1) at intervals not to exceed 50 hours time in service or every 12 months whichever comes first.

This amendment becomes effective September 6, 1977.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A–107.

Issued in Seattle, Wash., on August 18, 1977.

J. H. TANNER,
Acting Director,
Northwest Region.

NOTE.—The incorporation by reference provisions in the document were approved by the Director of the Federal Register on June 19, 1967.

[FR Doc.77–24935 Filed 8–26–77;8:45 am]

[Docket No. 14815, Amdt. 39–3027]

PART 39—AIRWORTHINESS DIRECTIVES

Rolls Royce Dart Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) which requires inspections for wear and replacement, as necessary, of the flame tube liners and suspension pins on Rolls Royce Dart engines Series 528, 529, and 532 to prevent possible overheating of the turbine rotors which could result in uncontained rotor disc failures.

EFFECTIVE DATE: September 28, 1977.

ADDRESS: The applicable Rolls Royce alert service bulletin may be obtained from Rolls Royce, Ltd., P.O. Box 31, Derby DE 2 8BJ, England.

A copy of the service bulletin is contained in the Rules Docket, Rm. 916, 800 Independence Avenue SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

Donald C. Jacobsen, Chief, Aircraft Certification Staff, AEU–100, Europe, Africa, and Middle East Region, Federal Aviation Administration, c/o American Embassy, Brussels, Belgium. Tel. 513.38.30.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive requiring inspections for wear and replacement, as necessary, of flame tube liners and suspension pins on Rolls Royce Dart series 528, 529, and 532 engines was published at 40 FR 31624. The proposal was prompted by instances where failure of the flame tube suspension system caused overheating of the turbine rotors resulting in uncontained rotor disc failures.

Interested persons have been afforded an opportunity to participate in the making of the amendment, and several comments have been received.

DISCUSSION OF COMMENTS

One commentator stated that its flame tube suspension system inspection program was adequate to correct the problem. The FAA does not have sufficient information to determine whether the commentator's inspection program would be acceptable. However, the proposed AD does provide for the use of an equivalent method of compliance if approved by the Chief, Aircraft Certification Staff, FAA European Region. In addition, a provision has been added to the AD to allow the approval of an increase in the inspection intervals.

This same commentator questioned as to what effect the incorporation of Dart Modification 1736 would have on the proposed AD. The FAA believes, based on the information presently available, that the incorporation of Modification 1736 would not eliminate the need for the actions specified in the proposed AD.

This commentator further questioned whether the FAA approval for an equivalent means of compliance could be obtained from other than the Chief, Aircraft Certification Staff, FAA European Region. Since the FAA European office has the principal responsibility on matters related to this AD, the FAA believes that approval for an equivalent means of compliance with the AD should be obtained from the FAA European office.

Another commentator recommended that the provision in the AD stating that compliance is not necessary if already accomplished within the previous 1,000 hours, be revised to state "unless accomplished within the previous 1,000 hours in accordance with the limits in Dart Service Bulletin Da 72–A413" to indicate that the limits specified in Dart Maintenance Manual are not acceptable for the purpose of this AD. The FAA does not believe the revision is necessary since "unless accomplished" means unless the provisions contained in the AD have been accomplished and the AD references Da 72–A413. However, it should be noted that the reference to 1,000 hours has been deleted to avoid a possible conflict with a repetitive inspection interval which may have already been established by an operator in accordance with Rolls Royce Service Bulletin Da 72–A413.

This commentator also stated that, to be consistent with the service bulletin, no reference should be made to suspension pin wear in paragraphs (c) and (d) of the AD in determining the appropriate reinspection interval. The FAA agrees and the proposed AD is revised accordingly.

Finally, in addition to clarifying changes of a nonsubstantive nature, the proposed AD has been revised to include a new paragraph requiring a reduction of the fleet reinspection time-interval in accordance with paragraph 4B of Rolls Royce Service Bulletin Da 72–A413 if, during a repetitive inspection, flame tube liner wear is found to exceed 0.03 inches on any flame tube of an engine in the operator's fleet. This provision is contained in the referenced service bulletin and was inadvertently omitted in the proposed AD. One commentator objected to this provision in the service bulletin as being an unnecessary burden. The FAA believes that this provision is appropriate in view of the likelihood of the same wear occurring on other engines of the same type that are used in similar operating conditions. Since a situation exists that requires the immediate adoption of this regulation with respect to the reduction in the reinspection interval when appropriate, it is found that notice and public procedure hereon are impracticable and that good cause exists for including the reduction requirement in this amendment.

DRAFTING INFORMATION

The principal authors of this document are F. J. Karnowski, Europe, Africa, and Middle East Region, J. F. Zahringer, Flight Standards Service, and K. May, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new Airworthiness Directive:

ROLLS ROYCE (1971) LIMITED. Applies to Dart engines Series 528, 529, 532, and variants featuring Modifications 748, 1243, 1244, 1432, 1448, or 1607 used on but not limited to Fokker F–27 Marks 200, 400, 600; Fairchild F–27A, F–27F, F–27G, F–27J, F–27M, FH–227, FH–227B, FH–227C, FH–227D, FH–227E; Hawker Siddeley H.S.–748 Series 2A; and Grumman G–159 aircraft.

Compliance is required within the next 500 hours engine time in service after the effective date of this AD, unless already accomplished, and thereafter as indicated.

To prevent excessive wear in flame tube liners and suspension pins that may result in loss of flame tube support causing overheating of turbine rotors and uncontained rotor disc failures, accomplish the following:

(a) Inspect the flame tube liner and suspension pin for wear in accordance with the instructions contained in paragraph 4D of Rolls Royce Dart Alert Service Bulletin Da 72–A413, dated May 2, 1975 (hereafter Rolls Royce Bulletin 72–A413), or an equivalent approved by the Chief, Aircraft Certification Staff, FAA, Europe, Africa, and Middle East Region, c/o American Embassy, APO New York, N.Y. 09667 (hereafter FAA-approved equivalent).

(b) If, as a result of any inspection required by this AD, flame tube linear or suspension pin wear is found to exceed the limits given in paragraph 4A.2 of Rolls Royce Bulletin 72–A413, or an FAA-approved equivalent, before further flight, except that the aircraft may be flown in accordance with FAR §§ 21.197 and 21.199 to a base where the work can be performed, replace the affected part with a serviceable part and reinspect in accordance with either paragraph (c), (d), or (e) of this AD, as applicable.

(c) If, as a result of the initial inspection required by this AD, flame tube liner wear is in excess of 0.030 inch on any one flame tube of an engine in the operator's fleet, determine the flame tube time in service since new or overhauled, establish a fleet reinspection time-interval in accordance with the instructions in paragraphs 4.A(3) and 4.A(4) of Rolls Royce Bulletin 72–A413, or an FAA-approved equivalent, and reinspect in accordance with paragraph (a) of this AD.

(d) If, as a result of any inspection required by this AD, flame tube liner wear does not exceed 0.030 inches for each flame tube of all engines in the operator's fleet, reinspect in accordance with paragraph (a) of this AD at intervals not to exceed 1,500 engine hours time in service from the last inspection.

(e) If, as a result of a repetitive inspection required by this AD, flame tube liner wear exceeds 0.030 inches on any one flame tube of an engine in the operator's fleet, reduce the reinspection time-interval for all engines in the fleet in accordance with paragraph 4B of Rolls Royce Bulletin 72–A413, or an FAA-approved equivalent.

(f) Upon the request of an operator, the Chief, Aircraft Certification Staff, FAA, Europe, Africa, and Middle East Region, may adjust the initial inspection time and the reinspection intervals specified in this AD if the request contains substantiating data to justify the adjustment for that operator.

This amendment becomes effective September 28, 1977.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A–107.

Issued in Washington, D.C., on August 19, 1977.

J. A. FERRARESE,
Acting Director,
Flight Standards Service.

[Airspace Docket No. 76–AL–14]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Control Zone and Transition Area at Aniak, Alaska

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment provides additional airspace (control zone, transition area) to protect aircraft executing approach and departure procedures at Aniak, Alaska.

EFFECTIVE DATE: 0901 G.m.t. December 1, 1977.

FOR FURTHER INFORMATION CONTACT:

John G. Costello, Operations, Procedures, and Airspace Branch, Air Traffic Division, Federal Aviation Administration, 632 Sixth Avenue, Anchorage, Alaska 99501. Telephone 907–265–4271.

SUPPLEMENTARY INFORMATION: The purpose of this amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to alter the Aniak, Alaska, control zone and transition area. The NPRM was published in the FEDERAL REGISTER on January 10, 1977 (42 FR 2078) and a revised NPRM was published in the FEDERAL REGISTER on June 27, 1977 (42 FR 32555). The proposal resulted from a change to the NDB instrument approach procedure and the establishment of a new ILS/DME instrument approach procedure. Interested parties were given 30 days in which to reply. Valid aeronautical objections were received on the original proposal; no objections were received on the revised proposal.

DRAFTING INFORMATION

The principal authors of this document are John Costello, Air Traffic Division, and Donald H. Boberick, Esq., Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 G.m.t., December 1, 1977.

§ 71.171 [Amended]

1. Amend § 71.171 of Part 71 of the Federal Aviation Regulations by amending the Aniak, Alaska, control zone as follows:

ANIAK, ALASKA

Within a 5-mile radius of the Aniak airport (latitude 61°35′ N., longitude 159°32′ W.); within 3 miles each side of the 114° (094° M) bearing from Aniak NDB, extending from the 5-mile radius zone to 8 miles SE of the NDB, and within 2 miles each side of the Aniak localizer (latitude 61°35′02″ N., longitude 159°33′01″ W.) west course extending from the 5-mile radius zone to 6.5 miles west of the localizer. This control zone is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Flight Information Publication Supplement Alaska.

§ 71.181 [Amended]

2. Amend § 71.181 of Part 71 of the Federal Aviation Regulations by amending the Aniak, Alaska, transition area as follows:

ANIAK, ALASKA

That airspace extending upward from 700-feet above the surface within a 22.5 mile radius of the Aniak localizer (latitude 61°35′02″ N., longitude 159°33′01″ W.) extending from a bearing of 238° (218° M) clockwise to 049° (029° M) from the Aniak NDB; within 4.5 miles southwest and 9.5 miles northeast of the Aniak localizer west course extending from the localizer to 25.5 miles west of the localizer; within 9.5 miles southwest and 4.5 miles northeast of the Aniak NDB 114° (094° M) bearing extending from the NDB to 22 miles southeast of the NDB; and within 9.5 miles southeast and 4.5 miles northwest of the Aniak NDB 230° (210° M) bearing extending from the NDB to 24 miles southwest of the NDB.

(Sec. 307(a), Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)) and of sec. 6(c), Department of Transportation Act, (49 U.S.C. 1655(c)).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A–107.

Issued in Anchorage, Alaska, on August 12, 1977.

LYLE K. BROWN,
Director, Alaskan Region.

[FR Doc.77–24937 Filed 8–26–77;8:45 am]

[Docket No. 77–SO–36]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Alabaster, Ala., Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule amends § 71.181 of Part 71 of the Federal Aviation Regulations by altering the Alabaster, Ala., transition area. The existing transition area will be extended two miles Southwest. This is necessary due to establishment of a NDB instrument approach

V42167 AUG 29 77 UMI

procedure to Runway 5 at the Bessemer Municipal Airport.

EFFECTIVE DATE: 0901 Gmt., October 6, 1977.

ADDRESS: Federal Aviation Administration, Chief, Air Traffic Division, P.O. Box 20636, Atlanta, Ga. 30320.

FOR FURTHER INFORMATION CONTACT:

William F. Herring, Airspace and Procedures Branch, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320; Telephone: 404–763–7947.

SUPPLEMENTARY INFORMATION

A new public NDB instrument approach procedure has been developed to Runway 5 at the Bessemer Municipal Airport, Bessemer, Ala. The approach procedure requires that the transition area be extended two miles Southwest and that the floor of controlled airspace be lowered from 1200 to 700 feet within the extension to protect aircraft executing the approach. Therefore, it is necessary to alter the transition area to accommodate the new approach procedure. Since this alteration is minor in nature, notice and public procedure hereon are not considered necessary.

DRAFTING INFORMATION

The principal authors of this document are William F. Herring, Airspace and Procedures Branch, Air Traffic Division, and Eddie L. Thomas, Office of Regional Counsel, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320.

ADOPTION OF AMENDMENT

Accordingly, Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR 71) is amended, effective 0901 GMT, October 6, 1977, by altering the Alabaster, Ala., transition area, as follows:

"* * * long. 86°55'29" W.) * * *" would be deleted and "* * * long. 86°56'29" W.) within 3 miles each side of the 241° bearing from Bessemer RBN (lat. 33°18'42" N., long. 86° 55'25" W.) extending from the 6.5 mile radius to 8.5 miles Southwest of the RBN; excluding that portion which coincides with the Birmingham transition area * * *" would be substituted therefor.

(Sec. 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)) and Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A–107.

Issued in East Point, Ga., on August 17, 1977.

PHILIP M. SWATEK,
Director, Southern Region.

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Control Zone and Transition Area, Albany, N.Y.

Correction

In FR Doc.77–23316 appearing on page 41107 in the issue for Monday, August 15, 1977, the following correction should be made.

In the amendments to § 71.171 appearing after the signature in the third column, line 14 of the quoted amendment now reading, "miles east of the VORTAC; within 2 miles", should read, "miles each side of the Albany VORTAC 181°".

[Docket No. 14245, Amdt. No. 121–136]

PART 121—CERTIFICATION AND OPERATIONS: DOMESTIC, FLAG, AND SUPPLEMENTAL AIR CARRIERS AND COMMERCIAL OPERATORS OF LARGE AIRCRAFT

Proficiency Check Requirements

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment allows a pilot-in-command to satisfy the proficiency check requirements wtihout performing the maneuver to a landing with simulated powerplant failure during each required proficiency check or course of training. The amendment is needed to provide greater operational flexibility and to lessen the need to perform the maneuver in an airplane if the visual simulator is inoperative.

EFFECTIVE DATE: August 29, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Raymond E. Ramakis, Regulatory Projects Branch, Safety Regulations, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591. Telephone 202–755–8716.

SUPPLEMENTARY INFORMATION:

HISTORY

This amendment is based on a notice of proposed rule making (Notice No. 76–17) published in the FEDERAL REGISTER on August 26, 1976 (41 FR 36036). That notice invited comment by all persons interested in the making of the proposed rule. All persons have been afforded an opportunity to participate in the making of this amendment, and due consideration has been given to all matters presented. Four commentators responded to Notice No. 76–17 and all support adoption of the proposal.

DISCUSSION OF COMMENTS

One commentator expressed concern regarding two aspects of the proposal. Opposition was expressed to the requirement that the maneuver be observed by a check airman during the preceding proficiency check or simulator course of training. It was noted that some air carriers use instructors rather than check airman to conduct simulator courses of training and this would compromise their usefulness. The FAA believes that while the subject maneuver may be omitted from a simulator course of training or a proficiency check, the rule should provide that an individual be checked on the maneuver at least once a year by an FAA-designated check airman. If, as the commentator suggests, an individual accomplishes the maneuver during a course of training conducted by a simulator instructor not designated as a check airman, then the maneuver could be omitted on the subsequent proficiency check, and if the cycle continued, the individual could indefinitely avoid being checked on the maneuver by an FAA-designated check airman. This is not the intent of the amendment.

The commentator noted that the proposal would require completion of a proficiency check or course of training within the preceding six calendar months, in order to take advantage of the flexibility to omit the simulated powerplant failure maneuver. Concern was expressed over the effect that this requirement would have on the "grace month" provision of § 121.401(b) of the Federal Aviation Regulations. It is not the intent of this amendment to nullify the grace month rule and reference to the preceding six calendar months has been deleted. Instead, the amendment refers to the preceding proficiency check or simulator course of training under a check airman, whichever was completed later.

Another commentator stated that Notice 76–17 did not properly respond to the overall need for improved visual simulation and that it may encourage airlines to postpone acquisition of improved visual systems. This comment is outside the scope of the notice and is not considered in this rulemaking action.

DRAFTING INFORMATION

The principal authors of this document are William T. Brennan, Air Carrier Regulations Branch, Flight Standards Service, and Peter J. Lynch, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, Appendix F of Part 121 of the Federal Aviation Regulations (14 CFR Part 121) is amended, effective August 29, 1977, by deleting the last sentence in paragraph V(d)(2) and by adding a sentence to the flush paragraph immediately following that paragraph, as follows:

APPENDIX F—PROFICIENCY CHECK REQUIREMENTS

* * * * *

V. Landings and approaches to landings:

* * * * *

(d) Maneuvering to a landing with simulated powerplant failure as follows:

(1) In the case of 3-engine airplanes, maneuvering to a landing with an approved procedure that approximates the loss of two powerplants (center and one outboard engine); or

(2) In the case of other multiengine airplanes, maneuvering to a landing with a simulated failure of 50 percent of available powerplants, with the simulated loss of power on one side of the airplane.

Notwithstanding the requirements of subparagraphs (d)(1) and (d)(2) of this paragraph, in a proficiency check for other than a pilot-in-command, the simulated loss of power may be only the most critical powerplant. However, if a pilot satisfies the requirement of subparagraph (d)(1) or (d)(2) of this paragraph in a visual simulator, he also must maneuver in flight to a landing with a simulated failure of the most critical powerplant. In addition, a pilot-in-command may omit the maneuver required by subparagraph (d)(1) or (d)(2) of this paragraph during a required proficiency check or simulator course of training if he satisfactorily performed that maneuver during the preceding proficiency check, or during the preceding approved simulator course of training under the observation of a check airman, whichever was completed later.

* * * * *

(Secs. 313(a), 601, 602, 604, Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, and 1424); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A–107.

Issued in Washington, D.C., on August 22, 1977.

LANGHORNE BOND,
Administrator.

CHAPTER II—CIVIL AERONAUTICS BOARD

SUBCHAPTER D—SPECIAL REGULATIONS

[Reg. SPR–130, Amdt. 11]

PART 378a—ONE-STOP-INCLUSIVE TOUR CHARTERS

Inclusion of Rental Cars in Tour Package

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: This rule removes a restriction in the Board's One-stop-inclusive Tour Charter (OTC) regulations so as to permit the charter tour operator to offer rental cars or other prepaid individual transportation as part of the tour package. This proceeding was instituted by petition of an operator of OTC's.

DATES: Adopted: August 23, 1977; Effective: August 23, 1977.

FOR FURTHER INFORMATION CONTACT:

Simon J. Ellenberg, Rules Division, Office of General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428 (202–673–5442).

SUPPLEMENTARY INFORMATION: By Notice of Proposed Rulemaking SPDR–57, March 22, 1977, the Board proposed to eliminate a restriction in the OTC rule[1] which prohibits the inclusion of rental cars or other forms of prepaid individual transportation, even on an optional basis, in the ground accommodations and services of the tour package. This unique restriction was originally adopted as one of several elements serving to distinguish the OTC from scheduled services and was premised on a concern that inclusion of rental cars in a tour package might lead to unused, or "throwaway," sleeping accommodations and the resultant abuse of the OTC as a subterfuge for point-to-point transportation plus individual ground transportation at the destination. However, in SPDR–57, the Board pointed out that the restriction no longer appeared to be necessary in light of actual OTC marketing experience and in view of the intervening establishment of the Advance Booking Charter (ABC) rule[2] as a charter mode for air-only transportation.

Pursuant to the Notice, sixteen comments[3] were filed, of which twelve fully supported the proposed rule and three supported it in part.

Supporters of the proposed rule argue that the underlying premise of the rental car restriction is erroneous, in that the availability of rental cars will no more lead to throwaway accommodations than will other tour package elements to which no parallel restrictions apply. It is also contended that the restriction is ineffectual in any event, since rental cars are available to OTC participants by arrangements through retail travel agents or directly with large nationwide rental companies having toll-free telephone reservation systems. These commenters thus argue that the principal effect of the restriction has been to raise costs to OTC travelers (for example, by precluding the use of group car rental rates for which the tour operator could easily arrange) and to render the OTC less marketable, particularly in contrast to the popular "fly/drive" tours available on scheduled services. It is also asserted that the car rental prohibition is legally unnecessary, since the OTC is subject to other substantial restrictions which amply distinguish it from individually ticketed services.

Of the commenters expressing less than full support for the proposed rule, the Board's Office of Consumer Advocate (OCA) and the Office of Consumer Affairs of the Department of Health, Education, and Welfare (HEW) favor a liberalization of the rental car restriction but only to the extent of permitting rental cars to be offered as optional, extra-cost supplements to the tour package. OCA argues that the possibility of throwaway ground accommodations is substantial enough to warrant the retention of some restriction on the tour operator's offering of rental cars. HEW maintains that inclusion of rental cars in the tour package on a nonoptional basis would result in some participants paying for a service which they would neither desire nor use. United Air Lines favors the proposed rule as written, but conditions its support upon retention of the advance purchase period for OTC's.[4] Only TWA opposes any modification of the rental car restriction, on the grounds that the requirement is legally necessary and its elimination would have an adverse effect on both scheduled services and ABC operations.

At the outset, we believe that the comments of tour operators and others are persuasive in demonstrating that the rental car restriction has been costly to OTC operators and participants alike. It seems clear that those OTC travelers who independently make arrangements for rental cars are often prevented by this restriction from enjoying the lower rental rates which would very likely result from the purchasing power of a tour group. Moreover, inasmuch as the tour operator is forbidden from entering the market for OTC rental cars, the operator's loss of potential revenue from that package component cannot help but exert an upward pressure on OTC prices for all participants.

We also agree with the many commenters who contend that there is no legal impediment to the removal of this restriction. As we noted in proposing this amendment, the prohibition on the offering of rental cars places a unique emphasis on only one of several types of goods and services which could theoretically entice the OTC traveler to throw away the remainder of the ground accommodations and use the OTC for point-to-point transportation. Yet no participant in this proceeding has attempted to furnish evidence of, or even

[3] Comments were received from American Automobile Association, Inc., Adventure Tours USA, Inc. and Travel-Go-Round, Inc. jointly, American Express Company, American Society of Travel Agents, Inc., Budget Rent-A-Car, Inc., Charter Travel Corporation, Elkin Tours, Inc. and Del E. Webb World Travel Corporation jointly, Duncan Travel Service, Office of Consumer Affairs of the Department of Health, Education, and Welfare, National Air Carrier Association, Office of Consumer Advocate of the Civil Aeronautics Board, Pan American World Airways, Inc., Donald L. Peysner, Pleasant-Hawaiian Holidays, Inc., Trans World Airlines, Inc., and United Air Lines, Inc.

[4] The possible elimination of the "advance purchase" requirement from the OTC rule is under consideration in another rulemaking proceeding, to which United refers. See Notice of Proposed Rulemaking SPDR–56, February 24, 1977, 42 FR 12066, March 2, 1977, Docket 29926.

V 42 167 AUG 29 77 UMI

allege, any actual occurrence of throwaways in connection with any particular OTC program. In contrast, several commenters have offered market data which tends to substantiate their claim that the non-use of OTC ground accommodations is not practicable in actual experience, and that the OTC is used by travelers who genuinely want to purchase a tour package. Furthermore, any fear of throwaways the Board had at the time the OTC rule was adopted has been largely vitiated by the introduction of the ABC as a lawful means of point-to-point charter air transportation for those prospective passengers who do not actually want a tour package.

In regard to HEW's concern over mandatory inclusion of rental cars in the OTC tour package, we should point out that the concern is misplaced, since we are not now requiring rental cars to be included in the package of ground accommodations; we are simply removing a restriction on the freedom of the tour operator to include such a service in whatever manner he believes will make the total tour package most attractive to consumers at the OTC price that he offers. How widely the service is offered, whether it is made an optional addition to or an integral part of the OTC package, are questions that we believe are best left to the competitive response of the marketplace.

The Board finds that, because this amendment relieves a restriction and public benefit will be derived from putting it into effect without delay, there is good cause to make it effective immediately.

Accordingly the Civil Aeronautics Board hereby amends Part 378a of its Special Regulations (14 CFR Part 378a) effective August 23, 1977, as set forth below:

1. § 378a.2 is amended to read as follows:

§ 378a.2 Definitions.

As used in this part, unless the context otherwise requires—

* * * * *

"Ground accommodations and services" include, but are not limited to, sleeping accommodations for each night of the tour as well as necessary surface transportation for tour participants traveling together between all places on the itinerary, including transportation to and from air and surface carrier terminals utilized at such places other than the point of origin.

* * * * *

2. Section 378a.102 is amended to read as follows:

§ 378a.102 Definitions.

As used in this subpart, unless the context otherwise requires—

* * * * *

"Ground accommodations and services" include, but are not limited to, sleeping accommodations for each night of the tour, necessary surface transportation, and admission to the special event, through the furnishing of tickets or other documents necessary to enable a charter participant to attend the event for each day of the charter during which attendance is feasible.

* * * * *

(Secs. 101, 204, Federal Aviation Act of 1958, as amended, 72 Stat. 737, 743; (49 U.S.C. 1301, 1324).)

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

Correction

In FR Doc. 77-24150 appearing at page 42194 in the issue for Monday, August 22, 1977, the effective date now reading "September 12, 1977" should have read "September 21, 1977".

Title 16—Commercial Practices

CHAPTER II—CONSUMER PRODUCT SAFETY COMMISSION

SUBCHAPTER C—FEDERAL HAZARDOUS SUBSTANCES ACT REGULATIONS

PART 1500—HAZARDOUS SUBSTANCES AND ARTICLES; ADMINISTRATION AND ENFORCEMENT REGULATIONS

Exemption of Plastic Balloon Novelty Items From Classification as Banned Hazardous Substances

AGENCY: Consumer Product Safety Commission.

ACTION: Reissuance of final regulation.

SUMMARY: The Commission reissues a regulation to exempt novelties, consisting of a mixture of polyvinyl acetate, U.S. Certified Colors, and acetone in amounts not exceeding 25 percent by weight, intended for blowing plastic balloons, from classification as "banned hazardous substances" under the Federal Hazardous Substances Act. The Commission exemption regulation requires that the novelty items bear adequate directions and warnings for safe use. The Commission had preproposed the regulation because doubts were raised as to the validity of the exemption as originally issued in 1967, by the Food and Drug Administration.

EFFECTIVE DATE: August 29, 1977.

FOR FURTHER INFORMATION CONTACT:

Elaine Besson, Office of Program Management, Consumer Product Safety Commission, Washington, D.C. 20207 (301-492-6453).

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of April 7, 1976 (41 FR 14790), the Commission reproposed for comment, 16 CFR 1500.85(a)(6), a regulation exempting novelty items intended for blowing plastic balloons from classification as "banned hazardous substances" as that term is used in the Federal Hazardous Substances Act (FHSA) (15 U.S.C. 1261). The novelty items covered by the regulation are mixtures of polyvinyl acetate, U.S. Certified Colors, and acetone in amounts not exceeding 25 percent by weight.

This exemption regulation was originally promulgated by the Food and Drug Administration (FDA) on October 28, 1967 (32 FR 14946) without a notice of opportunity for comment. Issued by FDA as 21 CFR 191.65(a)(6), the regulation was recodified by the Commission on September 27, 1973 (38 FR 27012), as 16 CFR 1500.85(a)(6), due to the transfer of functions under the Federal Hazardous Substances Act to the Consumer Product Safety Commission effective May 14, 1973, by section 30(a) of the Consumer Product Safety Act (15 U.S.C. 2079(a)).

In the April 7, 1976 FEDERAL REGISTER document the Commission explained its decision to propose the plastic balloon novelty item exemption regulation for public comment primarily on the basis of doubts which had been raised as to the validity of FDA's action.

Pending completion of this proceeding and the issuance of a final regulation, the existing exemption has been continued in effect.

COMMENTS ON THE REGULATION

In response to its document of April 7, 1976, inviting comments, the Commission received three responses supporting the exemption, one response which neither supported nor opposed it, and two comments which opposed the exemption. A list summarizing the comments follows.

1. A parent who used the product as a child stated that Federal regulation cannot replace parental guidance and that the relatively low degree of danger presented does not justify removing the plastic balloon mixtures from the market.

2. A consumer, favoring the exemption, expressed his view that the Commission has the burden of finding a product unsafe before removing it from the market.

3. A law firm representing a manufacturer of the product stated that the manufacturer has no knowledge of any claims of physical harm resulting from the use of its product in 6 years of marketing over 55 million tubes of the plastic balloon mixture.

4. The Office of Consumer Affairs (OCA) of the Department of Health, Education and Welfare expressed approval of the Commission's inviting comments on the regulation, but stated that since it had received only one letter in reference to the plastic balloon novelty items, it had insufficient data to either

support or deny the exemption. The one letter which OCA received, written before the Commission's April 7, 1976 request for comments, stated that labeling alone does not make the product safe for small children to use.

5. A consumer, opposed to the exemption, asserted that the many warnings found on the package of one brand of plastic balloon mixtures clearly indicates that the product is hazardous.

6. Another consumer stated that children should not play with the plastic balloon mixture because of the presence of acetone and that any possible instructions for safe use would be inadequate to protect children.

THE COMMISSION'S CONCLUSION

The term "banned hazardous substance" is defined in section 2(q)(1)(A) of the FHSA. A proviso to this section found at 2(q)(1)(B)(i) authorizes the Commission, by regulation, to grant exemptions from classifications as banned hazardous substances for

* * * articles, such as chemical sets, which by reason of their functional purpose require the inclusion of the hazardous substance involved, or necessarily present an electrical, mechanical, or thermal hazard and which bear labeling giving adequate directions and warnings for safe use and are intended for use by children who have attained sufficient maturity, and may reasonably be expected to read and heed such directions and warnings * * *

The Commission concludes that these plastic balloon novelty items meet the above requirements for exemption from classification as banned hazardous substances.

The Commission recognizes that the novelty items contain the hazardous substance, acetone, but finds that the substance's presence is necessary because of its functional purpose. The Commission believes that mixtures intended for blowing plastic balloons which contain not more than 25 per cent by weight of acetone are not capable of causing substantial personal injury or illness. In addition, the exemption regulation requires that the articles bear adequate directions and warnings for safe use. Further it is reasonably expected that since the product is difficult to manipulate, the children using these products will be old enough to be able to read and heed such warnings and directions.

On June 20, 1974, the Commission denied on its merits a petition from Consumers' Union to repeal the exemption regulation and to propose a regulation to classify plastic balloon novelties containing acetone as a banned hazardous substance under the provisions of the FHSA. (petition number HP 74-4). No new data has been brought to the attention of the Commission by commentors on the April 7, 1976 notice or others which convinces the Commission that the existing exemption should now be revoked.

Therefore, the Commission finds that the regulation exempting novelty items intended for blowing plastic balloons should be reissued.

The Commission also finds that the 30-day delayed effective date required by section 553(d) of the Administrative Procedure Act for substantive rules is inapplicable to this regulation because the regulation falls within the exception to the 30-day requirement for rules granting or recognizing an exemption or relieving a restriction. (section 553(d)(1)).

Accordingly, pursuant to provisions of the Federal Hazardous Substances Act (sec. 2(q)(1)(A), proviso, (i), 74 Stat. 374, as amended 80 Stat. 1304-05; 15 U.S.C. 1261(q)(1)(A), proviso (i)) and under authority vested in the Commission by the Consumer Product Safety Act (sec. 30(a), Stat. 1231; 15 U.S.C. 2079(a)), the Commission reissues the regulation at 16 CFR 1500.85(a)(6) as follows:

§ 1500.85 Exemptions from classification as banned hazardous substances.

(a) The term "banned hazardous substances" as used in section 2(q)(1)(A) of the act shall not apply to the following articles provided that these articles bear labeling giving adequate directions and warnings for safe use:

* * * * *

(6) Novelties consisting of a mixture of polyvinyl acetate, U.S. Certified Colors, and not more than 25 per cent by weight of acetone, and intended for blowing plastic balloons.

NOTE.—Because this exemption regulation was not proposed for public comment before being issued by the Food and Drug Administration at October 28, 1967 (32 FR 14946), the Commission proposed the exemption for public comment on April 7, 1976 (41 FR 14790), and reissued it on August 29, 1977. The exemption has continued in effect without interruption during these proceedings.

AUTHORITY: Sec. 2(q)(1)(A)(i), 74 Stat. 374, as amended 80 Stat. 1304-05; 15 U.S.C. 1261(q)(1)(A)(i); sec. 30(a), 86 Stat. 1231; 15 U.S.C. 2079(a).

Effective Date: August 29, 1977.

Dated: August 24, 1977.

RICHARD E. RAPPS,
Secretary, Consumer Product Safety Commission.

[FR Doc.77-24969 Filed 8-26-77;8:45 am]

PART 1505—ELECTRICALLY OPERATED TOYS OR OTHER ARTICLES INTENDED FOR USE BY CHILDREN

Amendment to Labeling Requirement for Date of Manufacture

AGENCY: Consumer Product Safety Commission.

ACTION: Amendment to regulation.

SUMMARY: The Commission issues an amendment to its requirements for electrically operated toys or other electrically operated articles intended for use by children to change the labeling requirement concerning the date of manufacture. The current regulation requires that the shelf pack or package and the instructions provided with the toy be labeled with the date (month and year) of manufacture (or appropriate codes). The amendment will allow as an alternative the date of manufacture to be placed on the toy itself rather than on the instructions provided with the toy. The shelf package is still required to bear the date of manufacture. The Commission believes this amendment will provide some economic benefit to manufacturers while assuring that consumers are as well or better protected as they were before the amendment.

EFFECTIVE DATE: The amendment is effective August 29, 1977.

FOR FURTHER INFORMATION CONTACT:

Elaine Besson, Office of Program Management, CPSC, Washington, D.C. 20207 (301-492-6453).

SUPPLEMENTARY INFORMATION: On September 12, 1974, the Commission received a petition from Hasbro Industries, Inc. requesting that 16 CFR 1505.3, which establishes labeling Requirements for Electrically Operated Toys or Other Electrically Operated Articles Intended for Use by Children, be changed to allow the manufacturer, at his discretion, to put the required date of manufacture label on either the instruction sheet or the toy itself, in addition to putting it on the shelf pack or package. Presently, the regulation requires that the date of manufacture be placed on both the shelf pack of the toy and the instructions that are provided with the toy.

The petitioner points out that if the date labeling were permitted to be placed on the toy, instead of on the instruction sheet, the date labeling would remain with the toy until the toy is eventually discarded. On the other hand, date labeling on the instruction sheet would be lost if the instruction sheet were to be discarded shortly after the toy's purchase.

The Commission agrees with the petitioner that the option of allowing the manufacturer to place the date code on the toy itself instead of on the instruction sheet is as adequate in protecting children from potential electric hazards as the present requirement. The reason that placement of the date code on the instruction sheet was initially required was a concern that the consumer might not keep the shelf pack. The Commission notes that placement of the date on the toy addresses this concern. In addition, the Commission believes the amendment will provide a small economic benefit for manufacturers who prefer not to reprint or date stamp their stocks of instruction sheets or coordinate dated instruction sheets with the appropriate production units of toys.

The Commission is issuing this amendment as a final document without notice and comment procedures because the Commission, for good cause, finds, in accordance with 5 U.S.C. 553(b)(B), the Administrative Procedure Act, that notice and public procedure thereon are unnecessary. Under the amendment manufacturers retain the option (previously the requirement) of placing the date of manufacture on the instruction

V42167 AUG 29 77 UMI

sheet. Therefore, the amendment results in only a minor change to the electrical toy regulation's labeling provisions. In addition, consumers are as well or better protected if manufacturers choose to exercise their option of placing date codes on the toys themselves.

The Commission also notes in accordance with 5 U.S.C. § 553(d)(2), that the normal 30 day period between publication and effective date is inapplicable to this amendment. Section 553(d)(2) creates an exception to the delayed effective date requirement for any substantive rule "which grants or recognizes an exemption or relieves a restriction." Since the amendment relieves a restriction by allowing manufacturers the option of date coding the toys themselves or the instruction sheets, it falls within the exception. The amendment is, therefore, effective immediately upon publication in the FEDERAL REGISTER.

Accordingly, pursuant to provisions of the Federal Hazardous Substances Act (secs. 2(f)(1)(D), (r), (s), (t), 3(e)(1), 74 Stat. 372, 374, 375, as amended, 83 State 187–189; 15 U.S.C. 1261, 1262), and under authority vested in the Commission by the Consumer Product Safety Act (Pub. L. 92–753, sec. 30(a), 86 Stat. 1231; 15 U.S.C. 2079(a)), the Commission amends 16 CFR 1505.3 by adding a new paragraph (b)(1)(iii) and by amending paragraph (b)(3), as follows (paragraph (d) is included for purposes of clarity):

§ 1505.3 Labeling.

(a) * * *

(b) *Specific items.* (1) The toy shall be marked in accordance with the provisions of paragraph (d) of this section to indicate:

(i) * * *

(ii) * * *

(iii) The date (month and year) of manufacture (or appropriate codes). As an alternative to putting this information on the toy itself, it may be included in the instructions provided with the toy (see paragraph (b)(3) of this section below).

(2) * * *

(3) Each toy shall be provided with adequate instructions that are easily understood by children of those ages for which the toy is intended. The instructions shall describe the applicable installation, assembly, use, cleaning, maintenance (including lubrication), and other functions as appropriate. Applicable precautions shall be included as well as the information required by paragraphs (b)(1) and (b)(2) of this section, except that the date of manufacture information described in paragraph (b)(1)(iii) of this section need not be included in the instructions provided with the toy if it is placed on the toy itself. The instructions shall also contain a statement addressed to parents recommending that the toy be periodically examined for potential hazards and that any potentially hazardous parts be repaired or replaced.

* * * * *

(d) *Markings.* (1) The markings required on the toy by paragraph (b) of this section shall be of a permanent nature, such as paint-stenciled, die-stamped, molded, or indelibly stamped. The markings shall not be permanently obliterable by spillage of any material intended for use with the toy and shall not be readily removable by cleaning with ordinary household cleaning substances. All markings on the toy and labeling of the shelf pack or package required by paragraph (b) of this section shall contrast sharply with the background (whether by color, projection, or indentation) and shall be readily visible and legible. Such markings and labeling shall appear in lettering of a height not less than that specified in paragraph (d)(2) of this section, except that those words shown in capital letters in paragraph (e) of this section shall appear in capital lettering of a height not less than twice that specified in paragraph (d)(2) of this section.

(2) Minimum lettering heights shall be as follows:

SURFACE AREA DISPLAY MARKING, MINIMUM HEIGHT OF LETTERING

Square Inches:	*Inches*
Under 5	1/16
5 or more and under 25	1/8
25 or more and under 100	3/16
100 or more and under 400	1/4
400 or more	1/2

Effective date: The amendment is effective August 29, 1977.

Dated: August 24, 1977.

RICHARD E. RAPPS,
Secretary, Consumer Product Safety Commission.

[FR Doc.77-24968 Filed 8-26-77;8:45 am]

Title 28—Judicial Administration

CHAPTER I—DEPARTMENT OF JUSTICE

[Order No. 747-77]

PART 0—ORGANIZATION OF THE DEPARTMENT OF JUSTICE

Subpart X—Authorization with Respect to Personnel and Certain Administrative Matters

DELEGATING PERSONNEL AUTHORITY TO THE DIRECTOR, EXECUTIVE OFFICE FOR U.S. ATTORNEYS

AGENCY: Department of Justice.

ACTION: Final rule.

EFFECTIVE DATE: June 5, 1977.

SUMMARY: Under existing Justice Department regulations, the Office of Management and Finance has authority with respect to non-attorney personnel in U.S. Attorney's Offices, and the Executive Office of U.S. Attorneys. This order transfers to the Director of the Executive Office for U.S. Attorneys, subject to the general supervision of the Attorney General, and under the direction of the Deputy Attorney General, the authority of the Attorney General to take final action in matters pertaining to the employment, direction, and general administration of U.S. Attorney and Executive Office personnel in General Schedule grades, GS–1 through GS–15, and in Wage Board positions, but excluding therefrom all attorney positions. The purpose of this order is to formally announce the transfer of certain authority to the Director of the Executive Office for U.S. Attorneys and to accurately reflect shifts in personnel responsibility within the Department.

FOR FURTHER INFORMATION CONTACT:

William B. Gray, Director, Executive Office for U.S. Attorneys, Department of Justice, Washington, D.C. 20530 (202–739–2121).

By virtue of the authority vested in me by 28 U.S.C. 509, 510 and 5 U.S.C. 301, Chapter I of Title 28, Code of Federal Regulations, is hereby amended effective June 5, 1977, as follows:

Section 0.138 of Subpart X is amended to read as follows:

§ 0.138 Bureau of Prisons, Federal Prison Industries, Immigration and Naturalization Service, Drug Enforcement Administration, Executive Office for U.S. Attorneys, and Law Enforcement Assistance Administration.

The Director of the Bureau of Prisons, the Commissioner of Federal Prison Industries, the Commissioner of the Immigration and Naturalization Service, the Administrator of the Drug Enforcement Administration, and the Director of the Executive Office for U.S. Attorneys are, as to their respective jurisdictions, authorized to exercise the power and authority vested in the Attorney General by law to take final action in matters pertaining to the employment, direction and general administration (including appointment, assignment, training, promotion, demotion, compensation, leave, classification, and separation) of personnel in General Schedule grades GS–1 through GS–15 and in Wage Board positions, but excluding therefrom all attorney positions. Such officials and the Administrator of the Law Enforcement Assistance Administration, are, as to their respective jurisdictions, authorized to exercise the power and authority vested in the Attorney General by law to employ on a temporary basis experts or consultants or organizations thereof, including stenographic reporting services (5 U.S.C. 3109(b)). All personnel actions taken under this section shall be subject to postaudit and correction by the Assistant Attorney General for Administration.

Dated: August 17, 1977.

GRIFFIN B. BELL,
Attorney General.

Title 50—Wildlife and Fisheries

CHAPTER I—UNITED STATES FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 32—HUNTING

Opening of Flint Hills National Wildlife Refuge, Kansas, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special Regulation.

SUMMARY: The Director has determined that the opening to hunting of Flint Hills National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: As established by State law.

FOR FURTHER INFORMATION CONTACT:

Michael J. Long, P.O. Box 128, Hartford, Kansas 66854, telephone 316–364–8381.

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations; Big game, for individual wildlife refuge areas.

Public hunting of deer, with bow and arrows, on the Flint Hills National Wildlife Refuge, Hartford, Kansas, is permitted during periods as established by Kansas State law, but only on the area designated by signs as open to hunting. This open area is delineated on maps available at refuge headquarters, P.O. Box 128, Hartford, Kansas 66854, and from the Area Manager, U.S. Fish and Wildlife Service, Federal Building Room 1748, 601 East 12th Street, Kansas City, Missouri 64106. Refuge hunting shall be subject to the following special conditions:

1. The area is open to big game hunting for white-tailed deer only.

2. The use of rifles or pistols are prohibited on the refuge.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A–107.

Dated: August 22, 1977.

MICHAEL J. LONG,
Refuge Manager.

[FR Doc.77-24999 Filed 8-26-77;8:45 am]

PART 32—HUNTING

Opening of Flint Hills National Wildlife Refuge, Kansas, to Sport Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to sport hunting of Flint Hills National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: Hunting Seasons determined by applicable State Laws.

FOR FURTHER INFORMATION CONTACT:

Michael J. Long, P.O. Box 128, Hartford, Kansas 66854, telephone 316–364–8381.

SUPPLEMENTARY INFORMATION:

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

The public hunting of small game animals, upland game birds, fur bearing animals and non game animals on the Flint Hills National Wildlife Refuge, Kansas, is permitted from October 1, 1977, through September 30, 1978, inclusive, but only on the area designated by signs as open to hunting. This open area is delineated on maps available at refuge headquarters, Hartford, Kansas, and from the Area Manager, U.S. Fish and Wildlife Service, Federal Building Room 1748, 601 East 12th Street, Kansas City, Missouri 64106. Hunting shall be in accordance with all applicable State laws and regulations governing the hunting of small game animals, upland game birds, fur bearing animals and non game animals subject to the following special conditions:

1. The use of rifles or pistols are prohibited on the refuge.

2. Vehicle access shall be restricted to designated parking areas and existing roads.

3. Dogs may be used only for hunting and retrieving small game animals and game birds. Dogs may not be used for hunting fur bearing animals and non-game animals, either by sight or trailing by scent.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A–107.

Dated: August 11, 1977.

MICHAEL J. LONG,
Refuge Manager.

PART 32—HUNTING

Opening of Flint Hills National Wildlife Refuge, Kansas, to Sport Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to sport hunting of Flint Hills National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: Season dates as established by State and Federal Laws.

FOR FURTHER INFORMATION CONTACT:

Michael J. Long, P.O. Box 128, Hartford, Kansas 66854, telephone 316–364–8381.

SUPPLEMENTARY INFORMATION:

§ 32.12 Special regulations; Migratory Game Birds hunting; for individual wildlife refuge areas.

Public hunting of ducks, geese, coots and mergansers on the Flint Hills National Wildlife Refuge, Kansas, is permitted, but only on the area designated by signs as open to hunting. This open area is delineated on maps available at refuge headquarters, Hartford, Kansas, and from the Area Manager, U.S. Fish and Wildlife Service, Federal Building Room 1748, 601 East 12th Street, Kansas City, Missouri 64106. All applicable opening and closing hunting dates as established by State and Federal Laws apply, as well as all other State and Federal regulations. Refuge hunting shall be subject to the following special conditions:

1. Vehicle access shall be restricted to designated parking areas and to existing roads.

2. Blind construction by the public is permitted but limited to temporary above ground construction. Constructed blinds become the property of the government. Blind construction does not constitute a reservation of hunting space. Daily occupancy of blinds erected on refuge hunting units will be determined on a first-come-first-serve basis.

V 42 167 AUG 29 77 UMI

3. The transportation or possession of firearms is not permitted on the Neosho River from the northern refuge boundary to and including the point where the river empties into John Redmond Reservoir, and extending to the southern refuge boundary, as marked by buoys.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: August 22, 1977.

MICHAEL J. LONG,
Refuge Manager.

1. Vehicle access shall be restricted to designated parking areas and to existing roads.

2. Blind construction by the public is permitted but limited to temporary above ground construction. Constructed blinds become the property of the government. Blind construction does not constitute a reservation of hunting space. Daily occupancy of blinds erected on refuge hunting units will be determined on a first-come-first-serve basis.

3. The transportation or possession of firearms is not permitted on the Neosho River from the northern refuge boundary to and including the point where the river empties into John Redmond Reservoir, and extending to the southern refuge boundary, as marked by buoys.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at anytime.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: August 11, 1977.

MICHAEL J. LONG,
Refuge Manager.

PART 32—HUNTING

Opening of the Bombay Hook National Wildlife Refuge, Delaware, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Bombay Hook National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: September 17, 1977 through January 21, 1978.

FOR FURTHER INFORMATION CONTACT:

Don Perkuchin, Bombay Hook National Wildlife Refuge, R.D. No. 1, Box 147, Smyrna, Delaware 19977, telephone 302-653-9345.

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

Public archery hunting of deer is permitted only on the Deer Hunting Area and South Upland Hunting Areas. These open deer hunting areas are shown on maps available at refuge headquarters and from the Regional Director, U.S. Fish and Wildlife Service, One Gateway Center, Suite 700, Newton Corner, Massachusetts 02158. Hunting shall be in accordance with all State regulations covering archery hunting of deer subject to the following special conditions:

1. Hunting by bow and arrow on the Regular Deer Hunting Area is permitted on the first four Saturdays of the season from September 17 through October 8.

2. Hunting by bow and arrow on South Upland Hunting Area is permitted during the entire State season.

3. The number of hunters admitted to the Regular Deer Hunting Area at any one time will be restricted to 80.

4. Permits are required for the Deer Hunting Areas and will be issued on a first-come, first-served basis one hour before shooting time.

5. Hunters using the Deer Hunting Area and the South Upland Hunting Area must show proof of completion of an archery qualification test. This test will consist of placing three out of five arrows in the 9 x 14 inch chest area of a standard size deer target at 25 yards. Hunters qualified in 1974 must requalify. The qualification is valid for three years only.

6. Only blinds, platforms or scaffolds that are erected and removed each day of the hunt may be used. Written permission from the refuge manager is required for the construction or use of any such artificial structure.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107. Administrative needs require that the Bombay Hook Refuge deer hunting season be held concurrent with the Delaware State deer hunting season. It is therefore found impracticable to issue regulations that would be effective 30 days after publication in accordance with Department of the Interior general policy.

WILLIAM C. ASHE,
Acting Regional Director,
Fish and Wildlife Service.

PART 32—HUNTING

Opening of the Bombay Hook National Wildlife Refuge, Delaware, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Bombay Hook National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: (September 15, 1977 through February 28, 1978).

FOR FURTHER INFORMATION CONTACT:

Don Perkuchin, Bombay Hook National Wildlife Refuge, R.D. No. 1, Box 147, Smyrna, Del. 19977, Telephone No. 302-653-9345.

SUPPLEMENTARY INFORMATION:

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

Public hunting of upland game on the South Upland Hunting Area is permitted during the regular State season. This open area, comprising 169 acres, is delineated on maps available at refuge headquarters and from the Regional Director, U.S. Fish and Wildlife Service, One Gateway Center, Suite 700, Newton Corner, Mass. 02158.

Hunting shall be in accordance with all State and Federal regulations covering the hunting of upland game.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107. Administrative needs require that the Bombay Hook Refuge upland game season be held concurrent with the Delaware State hunting season. It is therefore found impracticable to issue regulations that would be effective 30 days after publication in accordance with Department of the Interior general policy.

WILLIAM C. ASHE,
Acting Regional Director,
U.S. Fish and Wildlife Service.

PART 33—SPORT FISHING

Opening of Flint Hills National Wildlife Refuge, Kansas, to Sport Fishing

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to sport fishing of Flint Hills National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: Fishing Seasons as determined by applicable State Laws.

FOR FURTHER INFORMATION CONTACT:

Michael J. Long, P.O. Box 128, Hartford, Kansas 66854, telephone 316-364-8381.

SUPPLEMENTARY INFORMATION:

§ 33.5 Special regulations: sport fishing: for individual wildlife refuge areas.

Sport fishing, including the taking of frogs, on the Flint Hills National Wildlife Refuge, Kansas, is permitted only on the areas designated as open to fishing. These open areas, comprising 1,500 acres of reservoir waters and approximately 28 miles of river and stream channel, are delineated on maps available at refuge headquarters, Hartford, Kansas, and from the Area Manager, U.S. Fish and Wildlife Service, Federal Building Room 1748, 601 East 12th Street, Kansas City, Missouri 64106. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

1. During the period October 1, 1977 through December 31, 1977 only Eagle Creek, the Neosho River and impoundments in the Eagle Creek and Hartford hunting units are open to public fishing, except the Neosho River Oxbow northeast of the Strawn townsite is closed, as marked by buoys.

2. Immediately following the close of the 1977-78 Waterfowl Season, as determined by State and Federal law, all waters within the Flint Hills Refuge are open to sport fishing and the taking of bull frogs through September 30, 1978.

3. Vehicle access shall be confined to existing roads and trails not otherwise marked as closed to vehicle use.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 33. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: August 22, 1977.

Title 45—Public Welfare

CHAPTER I—OFFICE OF EDUCATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 116d—GRANTS TO STATE EDUCATIONAL AGENCIES TO MEET THE SPECIAL EDUCATIONAL NEEDS OF MIGRATORY CHILDREN

Extension of Comment Period on Interim Regulations and Proposed Scheduling of Additional Hearings

AGENCY: Office of Education, HEW.

ACTION: Extension of Comment Period for Development of Permanent Final Regulations and Scheduling of Additional Hearings.

SUMMARY: In the FEDERAL REGISTER of July 13, 1977 (42 FR 36076-36085), the Office of Education published Interim Final Regulations governing the Title I Elementary and Secondary Education Act program for grants to State educational agencies for programs for migratory children. Interested parties were given until August 29, 1977, to comment on these Interim Final Regulations for the purpose of developing permanent final regulations in the future. However, several parties interested in commenting on these regulations have requested the Commissioner of Education to extend the time for comment. In light of this, the Commissioner is taking the following action:

(a) *Extension of Comment Period.* The Commissioner hereby extends the period for receiving written comments for purposes of developing the permanent final regulations for the Program for Grants to State Educational Agencies to Meet the Special Educational Needs of Migratory Children, until December 9, 1977.

(b) *Scheduling of Additional Hearings in Texas and Florida.* The Commissioner will also schedule two more hearings for purposes of gathering further testimony from migratory workers and others interested in the education of migratory children for the development of permanent final regulations for the Title I Elementary and Secondary Education Act Program for Grants to State Educational Agencies for Programs to Meet the Special Educational Needs of Migratory Children. The hearings will be held during November of 1977 in Texas and Florida. If an additional site is necessary, it will be announced later in the FEDERAL REGISTER. The exact locations, dates, and times of these additional hearings will be published in due course in a future notice in the FEDERAL REGISTER.

FOR FURTHER INFORMATION CONTACT:

Mr. Vidal Rivera, telephone 202-245-2427.

Dated August 25, 1977.

JOHN ELLIS,
Acting U.S. Commissioner
of Education.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 905]

[Docket No. AO-85-A8]

ORANGES, GRAPEFRUIT, TANGERINES AND TANGELOS GROWN IN FLORIDA

Decision on Proposed Further Amendment of the Marketing Agreement and Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This decision would amend the Federal marketing agreement and order for fresh oranges, grapefruit, tangerines and tangelos grown in Florida. Growers of these fruits will vote in a referendum to determine if they favor the proposed changes in the order.

The proposed amendment would merge the Shippers Advisory Committee and Growers Administrative Committee to form an administrative committee which reflects both shipper and grower interests. The proposals would authorize separate regulations for Dancy and Robinson varieties of tangerines to recognize seasonal and other differences between the two varieties. In addition, it would change provisions relating to a percentage grade or size limitation to authorize a broader, more representative, basis for computation of shipments of a specified grade or size. It would also make other minor changes in the order to reflect current practices.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, Department of Agriculture, Washington, D.C. 20250 (202-447-3545).

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding:

Notice of Hearing—Issued February 18, 1977; published February 23, 1977 (42 FR 10693); Notice of Recommended Decision—Issued June 7, 1977; published June 13, 1977 (42 FR 30198).

PRELIMINARY STATEMENT

A public hearing was held upon proposed further amendment of the marketing agreement, as amended, and Order No. 905, as amended (7 CFR Part 905), (hereinafter referred to collectively as the "order") regulating the handling of oranges, grapefruit, tangerines and tangelos grown in Florida. The hearing was held, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice (7 CFR Part 900), at Lakeland, Florida, on March 10, 1977, pursuant to notice thereof issued on February 18, 1977.

Upon the basis of the evidence introduced at the hearing and the record thereof, the Acting Administrator, on June 7, 1977, filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision containing notice of the opportunity to file written exceptions thereto. Exceptions were filed by two persons.

The material issues, findings and conclusions, rulings, and general findings of the recommended decision are hereby approved and adopted and are set forth in full herein, subject to correction of inadvertent, grammatical or obvious errors.

Material issues. The material issues of record are as follows: (FEDERAL REGISTER—June 13, 1977 (42 FR 30198))

Material issues. The material issues of record are as follows:

1. Change the definition of "Secretary", "Fruit", "Variety", and "Producer"; replace "standard packed box" with "standard packed carton"; and add a definition of "Committee".

2. Update order provisions relating to district and redistricting.

3. Merge the Shippers Advisory Committee and Growers Administrative Committee into a single committee titled Citrus Administrative Committee.

4. Add authority for a public member to the committee.

5. Revise provisions relating to the committee with respect to: nomination, selection, duties, compensation, and procedure.

6. Delete reference to "supplies on track" from market factors required to be considered by the committee in formulating recommendations for regulation of shipments.

7. Change order provisions relating to a limitation of a portion of a grade or size.

8. Delete the section pertaining to exemptions.

9. Make conforming changes.

Findings and conclusions. The following findings and conclusions on the material issues are based on the record of hearing: (FEDERAL REGISTER—June 13, 1977 (42 FR 30198))

(1) The term "Secretary" should be modified to make it clear that this term includes officials and employees of the Department to whom authority has been delegated by the Secretary of Agriculture to act in his stead. This would recognize that it is not physically possible for the Secretary to perform all of the tasks involved in the administration of all the programs under his jurisdiction. The Secretary has the authority to so delegate and it is customary for him to exercise such authority by arranging for some such tasks to be performed under delegation of authority by persons under his supervision. The current definition does not make this clear, hence, the definition shoud be revised as hereinafter set forth.

Authority should be provided in the order to regulate the handling of Dancy and Robinson tangerines as separate varieties of fruit. Currently, the Dancy and Robinson varieties are included in the same varietal classification. Hence, both varieties are requried to be under the same regulations. This does not permit recognition of the different characteristics of the two varieties. Robinson variety tangerines mature earlier than tangerines of the Dancy variety and attain a slightly larger size at maturity than the Dancy. Hence, a size regulation which permits shipment of smaller sizes of mature Robinson tangerines also permits shipment of immature Dancy tangerines. Inasmuch as there is no current authority to provide separate regulations for Dancy and Robinson tangerines it has been difficult to apply a regulation which recognizes the size and related maturity differences between the varieties. Authority for separate regulation would enable issuance of regulations more appropriate for each variety. Persons familiar with Dancy and Robinson tangerines, including inspectors, can distinguish between the two varieties. Hence, the issuance of regulation recognizing differences in such characteristics as size or quality is appropriate and practical, and would tend to effectuate the purposes of the order and the act and the definition of "variety" should be amended as hereinafter set forth.

An exception was filed by Jeff B. Huppel, Orlando, Fla. This exception commented on Robinson and Dancy varieties of tangerines and the need to recognize seasonal and other differences between the two varieties. As discussed above, such differences are recognized in the authority to issue separate regulations.

The name of the fruit designated in the order as "Murcott Honey oranges" should be changed to "Honey tangerines". The designation of Honey tangerines is descriptive of this variety of fruit as it exhibits features characteristic of the tangerine. This fruit is commonly referred to in the industry as the "Honey tangerine". This has been recognized in the development of State grades applicable to fresh intrastate shipments of this fruit. These standards are identical to the U.S. Standards for Grades of Florida Tangerines with minor exceptions, and in recent years regulations for this fruit under the order have been based on these standards. Therefore, it

is appropriate that the name of this fruit be changed to Honey tangerines, as hereinafter set forth.

The order should provide authority for the committee, with the approval of the Secretary, to recommend inclusion under the order of other varieties of the specified citrus fruits.

The order currently provides for regulation of oranges, grapefruit, tangerines, and tangelos grown in the production area in Florida. Regulation may be applied to new varieties which closely resemble one of the standard varieties but this may not be entirely appropriate and occasionally an unlike variety may be designated and produced in significant quantities. These varieties compete with varieties regulated under the order but are not regulated. The shipment of varieties which are not regulated under the order can adversely affect returns to producers of varieties which are regulated. Hence, the order should contain authority enabling any variety which compete with varieties regulated under the order to be made subject to appropriate requirements the same as varieties covered under the order.

The term "producer" should be redefined as hereinafter set forth to identify those persons who are eligible to participate in referenda and in the election of nominees for positions on the committee and those who are eligible to serve as producer members on the committee. Presently, "producer" is defined in the order as "any person engaged in the production of fruit." Such definition is too broad and could include other individuals who are not recognized by the industry as producers, such as part-time grove employees. The consensus of the industry is that the definition should be amended to make it clear that "producer" or "grower" is a person owning or having control of the disposition of his production. Thus, a producer should be defined as follows: "producer" is synonymous with "grower" and means any person who is engaged in the production for market of fruit in the production area and who has a proprietary interest in the fruit so produced.

The order currently contains a definition of "standard packed box." This is a unit of measure equivalent to one and three-fifths (1⅗) United States bushels of fruit. That term was included in the order to provide a convenient unit upon which to base assessments and reports of fresh shipments. At the time this term was included in the order, and for several years thereafter, the principal container used for shipping fresh citrus fruit was a wood box with a capacity of 1⅗ bushels. This container has now been replaced by a corrugated paperboard carton with a capacity of four-fifths of a bushel. In recognition of this, the Fruit and Vegetable Inspection Division of the Florida Department of Agriculture at Winter Haven, which compiles much of the data used by the committee, has converted all of its fresh citrus records to a four-fifths bushel carton basis. In addition, the Florida Department of Citrus eliminated the 1⅗ bushel box as an approved container, and under the Department of Citrus rules, Chapter 20-39.02, it has adopted the four-fifths bushel as the standard container for shipping fresh citrus. Since the standard packed box is no longer used for packaging citrus fruits, the definition of such term should be deleted from the order. A definition of "carton or standard packed carton" should be included in the order. Carton or standard packed carton should be defined as hereinafter set forth to mean a unit of measure equivalent to four-fifths (⅘) of a bushel of fruit. Likewise, §§ 905.41 Assessments and 905.70 Manifest report should be amended so that such sections refer to "carton or standard packed carton", as hereinafter set forth, as the assessment unit and shipping records of the committee should be related to the standard container commercially used by the industry.

The provisions of current § 905.12, § 905.13, § 905.14, § 905.15, § 905.16, should be redesignated as § 905.13, § 905.15, § 905.16, § 905.17, and § 905.18, respectively in the order to facilitate addition of new § 905.12 Committee. The term "committee" should be defined to mean "the Citrus Administrative Committee established pursuant to § 905.19" as hereinafter discussed.

(2) Redesignated § 905.13 should define the geographic districts into which the production area is divided for purposes of allocating grower positions on the committee. The order contains authority for the committee, with the Secretary's approval, to redefine the districts. Such redefinition was effected most recently in 1966 by amendment of the committee's administrative rules. This action resulted in the reduction of the number of districts from seven to five, and is reflected in the definition of districts set forth in § 905.125. These districts currently constitute an appropriate basis for allocation of producer representation. Since the definition of districts set forth in § 905.12 is obsolete such definition should be replaced with the definition described in § 905.13 hereinafter set forth.

Paragraph (k) of current § 905.31 authorizes the committee, with the approval of the Secretary, to redistrict and reapportion members among districts. The text of § 905.31(k) should be revised and redesignated as § 905.14 in the order. The revision should simplify the language and clearly indicate that only grower membership of the committee is subject to reapportionment. In addition, the date "1980–81" should be substituted for "1965–66." The order currently requires the committee to consider redistricting and reapportionment during the 1965–66 fiscal period, and in each fifth fiscal period thereafter. Since the record indicates that the districts and allocation of members are presently appropriate, the committee should not be required to consider redistricting and reapportionment until the season 1980–81.

(3)–(4) Currently, there are two committees established under the order. The Shippers Advisory Committee (SAC) and the Growers Administrative Committee (GAC). As the name implies, the duties of SAC are largely advisory, its principal function being to evaluate the economic factors enumerated in the order relating to citrus produced in Florida and other states, and, if it deems advisable to regulate any variety as provided in the order, to make a recommendation to the GAC. The GAC has a number of duties which are enumerated in the order. These are largely administrative but they include the responsibility of submitting to the Secretary any recommendation of SAC together with its own recommendations and supporting information related to the economic factors enumerated in the order which have a bearing on the recommendation.

The SAC is comprised of 8 members and alternates, all shippers. At least three positions on SAC are to be filled by persons affiliated with cooperative marketing organizations, and the remainder are to be filled by persons not so affiliated. The GAC is comprised of 8 or 9 members and alternates, currently 9, all growers. The positions on GAC are apportioned among five geographic districts as specified in the order. At least three such positions are to be filled by growers affiliated with cooperative marketing organizations.

At the time the provision for two committees was included in the order, it was believed that the interests of shippers and growers were sufficiently different as to require them to function on different bodies. In recent years these differences have tended to become obscure and the two committees have found it advantageous to meet together in the consideration of matters under the order.

In the consideration of recommendations for regulations the committees normally meet several times each year during the marketing season. Often conditions develop which make it desirable for meetings to be scheduled on short notice. In recent years the Federal Advisory Committee Act which applies to meetings of SAC has affected committee operations in that it requires publication of meeting notices in the FEDERAL REGISTER at least 7 days, and preferably 15 days, in advance of meetings. Since the committees have found that the members of both GAC and SAC can operate in harmony in meetings and other activities under the order, the merging of the two committees into one administrative body would be a reasonable and appropriate means of providing the marketing expertise of shippers to such body without retaining the cumbersome procedures now involved in the operation of SAC. Hence, it is concluded that the order should be amended to abolish GAC and SAC and to provide for establishment and membership of a committee comprised of 8 or 9 grower members and alternates and 8 shipper members and alternates to be named the Citrus Administrative Committee (CAC).

Also, the public interest is to be observed in actions taken under marketing orders, hence, the interests of all groups including growers, handlers, and consumers should be considered. Therefore, the order should provide for a public member on the CAC. Although all com-

V 42 167 A AUG 29 77 7 UMI

mittee meetings are open to the public, there has been little participation by consumers. A public representative on the committee would be in a position to contribute the views of the public, other than that of the industry, to the development of recommendations for regulation designed to serve the interest of both the industry and the public generally. Therefore, it is concluded that the orders should be amended as hereinafter set forth to provide authority for a position of nonindustry member on the committee. Such member should have the same rights and privileges as other members of the committee. It would be appropriate for the grower and shipper members of CAC, with the approval of the Secretary, to establish by an administrative rule specifying the term of office, qualifications, and manner of nomination for persons to fill the public member position and the order should so provide.

(5) Current provisions of the order relating to term of office of members and alternate members of present committees under the order are contained in § 905.21 and § 905.24, respectively. These provisions have proved effective in order operations and should be appropriately modified to make them applicable to the members and alternate members of the Citrus Administrative Committee as hereinafter specified in § 905.20.

Provision for selection of initial members of the Citrus Administrative Committee should be included in the order. The record indicates that an orderly transition from the two committee system to the single committee could be effected if the members and alternate members serving on the present committees under the order were to become the members and alternates of the Citrus Administrative Committee. Inasmuch as the record indicates that the new Citrus Administrative Committee should be comprised of the same number of grower and shipper members as the present committees and qualifications the same, this would be appropriate. It is therefore concluded the order should provide, as hereinafter set forth, that the initial members and alternate members of the Citrus Administrative Committee shall be the same as those serving on the GAC and SAC when the amendment becomes effective establishing CAC.

Provisions relating to nomination of members and alternate members of the GAC and SAC are contained in § 905.22 and § 905.25, respectively. These provisions, with editorial changes and minor revisions, should be made applicable to the nomination of the grower and shipper members and alternate members of CAC as hereinafter specified in § 905.22.

Currently, the order requires the Secretary to give notice of meetings for the purpose of nominating members and alternate members to the GAC and SAC. This function should be assumed by CAC.

The number of committee member and alternate member nominees required to be submitted to the Secretary should be changed in the order to conform to the number of members and alternates to be selected by him. Currently the order requires submission of a specified larger number of nominees for positions to be filled. Evidence indicates that such provision has served no useful purpose in the operation of the order. In selecting members and alternate members to the committee, the order authorizes the Secretary to select from other eligible persons, in addition to the nominees, to insure that the best qualified individuals are selected. Hence, the Secretary may exercise a choice, and submission of a larger number of nominees is unnecessary.

Provisions relating to selection of members and alternate members of the GAC and SAC are contained in § 905.23 and § 905.26, respectively. These provisions, with editorial changes and minor revision, should be made applicable to the selection of members and alternate members of the CAC as hereinafter specified in § 905.23.

Allocation of grower membership among districts should be as set forth in § 905.126 *Subpart—Rules and Regulations*. The allocation set forth in § 905.23 is no longer appropriate. Therefore, the order should be amended, as hereinafter set forth. As so amended § 905.23(a) applicable to grower membership on the Citrus Administrative Committee would reflect the allocation currently set forth in § 905.126. The requirement that at least three of the independent shipper members and alternate members shall also be producers should be deleted. This provision which was designed to assure that SAC would have access to grower expertise within its ranks is inappropriate and unnecessary in the establishment of an administrative committee consisting of both producers and shippers as the interests of both groups are adequately represented on the single committee.

The duties of the GAC contained in § 905.31 should be the duties of the new CAC with two exceptions. The duty to notify the SAC of meetings of the GAC contained in § 905.31(j) should be deleted as GAC and SAC should be abolished as separate entities. As previously discussed, § 905.31(k) which relates redistricting and reapportionment of membership among districts should be redesignated as § 905.14. Therefore, § 905.31 (k) should be deleted. Likewise, in the light of the foregoing, § 905.32 *Duties of the Shippers Advisory Committee* should be deleted.

The order should be amended, as hereinafter set forth, to provide that an alternate member may be reimbursed for reasonable expenses necessarily incurred by him in attendance of meetings and in the performance of other committee business. Authorizing the payment of compensation for alternate members would encourage greater participation in committee activities. Such participation is desirable as it makes available to the committee a broader base of experience and it facilitates alternate members gaining experience in dealing with problems facing the committee. Hence, alternate members would be better prepared to deal with situations in which they may serve as a member. Moreover, since the alternate is serving the interests of the industry, it appears equitable that he be reimbursed for reasonable expenses incurred by him in attending committee meetings or performing other committee business.

The order should provide, as hereinafter set forth, that ten members or alternates acting as members of the CAC shall be necessary to constitute a quorum and ten members, including five grower members, must concur to validate a decision. This is an appropriate requirement and would provide for consideration of matters affecting the industry by a majority of the committee while assuring that growers continue to retain a prominent role in decision-making. Currently, the order provides that five members of either committee are necessary to form a quorum or pass a decision except that the GAC may recommend a regulation of shipments of grapefruit grown in Regulation Area I or Regulation Area II which meet the requirements of Improved No. 2 Grade only upon the affirmative vote of a majority of its members from the regulation area affected. This provision should be carried forward in § 905.34(b) of the amended order to permit such recommendation by a majority of the members from either Regulation Area I or Regulation Area II on the Citrus Administrative Committee.

The notice of hearing contained a proposal which would permit the committee, in cases of emergency, to vote by telephone with the stipulation that two dissenting votes would prevent its adoption.

The proponents stressed that the authority for the committee to consider proposals and vote by telephone is needed to provide flexibility in the operation of the order. They pointed out that situations such as those brought about by hurricanes and freezing temperatures occur and call for quick action which would be facilitated by authorization to vote by telephone. An example was given of a situation which developed as a result of the recent freeze in which action by the Secretary was needed to relax a regulation so the industry could move fruit before the onset of the State's embargo. The committee's action was limited to providing the Secretary with the results of a telephone poll of the members of SAC and GAC and a request that the Secretary relax the regulation. The telephone poll thus taken and the accompanying request did not have the same standing as a formal recommendation developed in accordance with procedures provided under the order.

The opponents objected to the proposal primarily on the basis that telephone voting does not permit the full discussion provided by an assembled meeting. With respect to those situations when action may be needed but the committee finds it difficult or impossible to assemble, they suggested that the Secretary could act without a formal recommendation from the committee.

The advantages of an assembled meeting are recognized, and it is a fact that the Secretary may take actions relative to the order without a formal recommendation from the committee. However, it is recognized also that the committee is established under the order to provide the Secretary with information and recommendations for his consideration in taking actions relative to the order. A committee recommendation arrived at by an authorized telephone vote of the committee along with other available information is of greater assistance to the Secretary than no formal committee recommendation. It is particularly important that the industry sentiment as reflected by an action of the committee be available to the Secretary when he takes action in an emergency situation.

The record indicates that if two dissenting votes are remeived when a matter is presented in a telephone vote this should prevent its adoption. This would appear to constitute an ample safeguard to prevent abuse of the telephone voting procedure. If in the conduct of a telephone vote two members vote in opposition, this may be taken as a signal that an assembled meeting should be scheduled at which the matter can be subjected to a full discussion. Therefore, it is concluded that consistent with the foregoing, and as hereinafter set forth, the order should be amended to authorize the committee to vote by telephone.

Currently, § 905.34(c) relates to giving notice of meetings of the Growers Administrative Committee. This should be made applicable to the Citrus Administrative Committee and designated as § 905.34(d).

(6) In developing its recommendations the Growers Administrative Committee is required by § 905.51 of the order to consider factors relating to citrus fruit produced in Florida and other States including "amount on hand at the principal markets, as evidenced by supplies on track". When the order was initially made effective most of the citrus crop was shipped by rail. The record indicates that in 1975–76 rail shipments accounted for less than 2.5 percent of fresh citrus shipments from Florida. In that year and during the subsequent season the substantial portion of Florida citrus was shipped by truck. Also, trucks are the principal mode of transportation of Texas and California-Arizona citrus fruits. Thus, information as to track supplies of citrus fruits from the different producing areas is no longer indicative of the amount of fruit at the principal markets or suggestive of demand prospects. In view of this development, consideration of the amount on hand at principal markets as evidenced by track supplies should be made non-compulsory.

Ample information is available to the committee at each meeting which is relevant to the analysis of the market for Florida citrus. Section 905.51 of the order requires consideration by the committee of each of the different factors having a bearing on the demand situation. This section should be amended (1) to empower the Citrus Administrative Committee to make recommendations to the Secretary on the basis of specified available information and (2) to make minor editorial changes relative to the deletion of the reference to the Shippers Advisory Committee.

(7) The title of § 905.52 of the order should be changed to "Issuance of Regulations" consistent with terminology currently used in more recently issued marketing orders. The references to Shippers Advisory Committee and Growers Administrative Committee should be deleted and the text revised to reflect the shift to the Citrus Administrative Committee. In addition, the proviso in paragraph (a)(1) pertaining to regulations which provide for regulations limiting a portion of a specified grade or size of a variety should be revised to provide a new basis for determining such percentage. Considerable difficulty has been experienced in achieving compliance when regulations have been in effect under this provision. Initially, the order authorized the limitation of a percentage of a grade or size of fruits on a weekly basis and provided that the quantity permitted to be shipped by a handler would be determined as a percentage of the total quantity of such variety shipped by the handler during the same regulation week. This resulted in violations when handlers based the limited quantity on the quantity they intended to ship and the total quantity actually shipped was less. Reasons given for such discrepancy included interferences such as rain, harvesting delays, and late arrival of trucks at the packinghouse. This resulted in an amendment to the order to provide that the portion of a grade or size of a variety a handler could ship would be set as a percentage of the handler's total shipments of the variety he shipped during the last week preceding the regulation week within the current season. This change was intended to resolve compliance difficulties by permitting handlers to make the calculation of such shipments of a variety based on a known volume of shipments. However, this basis for determining shipments of a portion of a grade or size has likewise produced a substantial number of violations largely due to errors in computation by handlers. The record indicates that compliance and administration of this provision could be improved if the committee performs the computing and notifies each handler of the quantity representing his portion of a grade or size he is permitted to ship when a regulation under this provision is in effect.

The evidence indicates that a further improvement can be made if the determination of such quantity is based on shipments of a period longer than one week. Basing the percentage only on shipments of a preceding week ignores circumstances which may cause a handler to ship a smaller quantity than normal of the variety during a given week, and basing the handler's permitted shipments on that week would result in his being permitted to ship only at a correspondingly reduced level. Consequently, basing the portion on a longer representative prior period would be a more equitable basis for determining the quantity of a portion of a grade or size permitted to be shipped by a handler. To recognize the differences in varieties and seasons the order could provide that the representative period may be different for each variety of fruit as recommended by the committee and approved by the Secretary. It was advanced that a more equitable representative period may be one or two prior seasons and the elapsed number of weeks during the then current season, providing that any implementing rule would provide opportunity for new shippers who have no record of shipments during the representative period to participate and transfers between handlers should be permitted. The notice of hearing contained a proposal to amend § 905.52(a)(5) by substituting "State of Florida Citrus Fruit Laws" for the designation "Florida Citrus Code" which now is seldom used. A modification to the proposal was proposed and supported at the hearing. The modification which would delete "Florida Citrus Code" and insert in lieu thereof "Chapter 601 of the Florida Statutes and Regulations Effective Thereunder" would provide a more specific reference. Therefore, in consideration of the foregoing it is concluded that § 905.52 of the order should be amended, as hereinafter set forth.

(8) Exemption provisions in § 905.54 should be deleted. The exemption procedure therein specified has been effective under rules and regulations for over twenty years. During that time very few growers have applied for exemption and the industry conditions which justified exemptions have changed. The exemption provisions were designed to deal with a situation in which a grower was prevented by regulation from shipping a percentage of his fruit equal to the percentage set forth in the committee's marketing policy. When these provisions were included in the order the major portion of the fruits were shipped to fresh market and there was concern that regulation might prevent a grower from shipping at least the specified share of his crop to fresh outlets. Currently, the processing outlet utilizes a dominant share of the orange and grapefruit crops and a large portion of other citrus fruits. Hence, fruit which does not meet fresh market requirements can be marketed in the processing outlet. Moreover, with an abundance of fruit meeting fresh market requirements it would be extremely difficult to market lower quality fruit under an exemption. It would be detrimental to the interest of the industry to permit the marketing of inferior fruit in fresh channels when ample alternatives exist to permit constructive disposition. Therefore, the exemption provision should be eliminated from the order.

(9) The amendment heretofore recommended will make it necessary to make certain conforming changes in sections not specifically discussed in connection therewith. All such changes should be incorporated in the order as hereinafter set forth.

V 42 167 AUG 29 77 UMI

Rulings on exceptions: One exception was filed by Wilson C. McGee, United Growers and Shippers Association, Inc., Orlando, Fla. The exception expressed views in opposition to: redefining "Secretary" to include officers or employees of the Department to whom authority may be delegated; adding a public member to the committee; merging the Growers Administrative Committee and Shippers Advisory Committee; reimbursing alternate members for expenses incurred in attending committee meetings; revising committee quorum and voting requirements; authorizing the committee to vote by telephone; and revising provisions relating to a limitation of a portion of a grade or size. For the reasons set forth in the recommended decision, each objection submitted by Wilson C. McGee in his exception has been considered in adopting this decision and they are hereby overruled and denied.

In arriving at the findings and conclusions, and the regulatory provisions of this decision, each of the exceptions to the recommended decision was carefully and fully considered in conjunction with the record evidence. To the extent that the findings and conclusions, and the regulatory provisions of this decision are at variance with any of the exceptions, such exceptions are hereby overruled for the reasons previously stated in this decision.

Marketing agreement and order. Annexed hereto and made a part hereof are two documents entitled, respectively, "Order Amending the Order, as Amended, Regulating the Handling of Oranges, Grapefruit, Tangerines and Tangelos Grown in Florida," and "Marketing Agreement, as Further Amended, Regulating the Handling of Oranges, Grapefruit, Tangerines and Tangelos Grown in Florida", which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

It is hereby ordered, That this entire decision, except the annexed marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of the marketing agreement are identical with those contained in the order as hereby proposed to be amended by the annexed order which is published with this decision.

Referendum order. It is hereby directed that a referendum be conducted in accordance with the procedure for the conduct of referenda (7 CFR 900.400 et seq.), to determine whether the issuance of the annexed order as amended and as hereby proposed to be amended, regulating the handling of oranges, grapefruit, tangerines and tangelos grown in Florida is approved or favored by producers, as defined under the terms of the order, who during the representative period were engaged in the production area in the production of the regulated commodity for market.

The representative period for the conduct of such referendum is hereby determined to be August 1, 1976, through July 31, 1977.

The agents of the Secretary to conduct such referendum, jointly or severally, are hereby designated to be William C. Knope and John R. Toth, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, P.O. Box 9, Lakeland, Fla. 33802.

Signed at Washington, D.C. on August 24, 1977.

ROBERT H. MEYER,
Assistant Secretary for Marketing Services.

Order[1] Amending the Order, As Amended, Regulating the Handling of Oranges, Grapefruit, Tangerines and Tangelos Grown in Florida

Findings and determinations. The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon proposed amendment of the marketing agreement, as amended, and Order No. 905, as amended (7 CFR Part 905), regulating the handling of oranges, grapefruit, tangerines and tangelos grown in Florida.

Upon the basis of the record it is found that:

(1) The order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The order, as amended, and as hereby further amended, regulates the handling of oranges (including Temple oranges), grapefruit, tangerines (including Honey tangerines), and tangelos grown in the production area in the same manner as, and is applicable only to persons in the respective classes of commercial and industrial activity specified in, the marketing agreement and order upon which hearings have been held;

(3) The order, as amended, and as hereby further amended, is limited in its application to the smallest regional production area which is practicable, consistently with carrying out the declared policy of the act, and the issuance of several orders applicable to subdivisions of the production area would not effectively carry out the declared policy of the act;

(4) The order, as amended, and as hereby further amended, prescribes, so far as practicable, such different terms applicable to different parts of the production area as are necessary to give due recognition to the differences in the production and marketing of oranges (including Temple oranges), grapefruit, tangerines (including Honey tangerines), and tangelos grown in the production area; and

(5) All handling of oranges (including Temple oranges), grapefruit, tangerines (including Honey tangerines), and tangelos grown in the production area is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects such commerce.

ORDER RELATIVE TO HANDLING

It is therefore ordered, That on and after the effective date hereof the handling of oranges (including Temple oranges), grapefruit, tangerines (including Honey tangerines), and tangelos shall be in conformity to and in compliance with the terms and conditions of the order, as hereby amended as follows:

The provisions of the proposed marketing agreement and order, amending the order, contained in the recommended decision issued by the Acting Administrator on June 7, 1977, and published in the FEDERAL REGISTER on June 13, 1977 (42 FR 30198; FR Doc. 77-16664), shall be and are the terms and provisions of this order, amending the order, and are set forth in full herein.

1. Section 905.1 *Secretary* is revised to read as follows:

§ 905.1 Secretary.

"Secretary" means the Secretary of Agriculture of the United States, or any officer or employee of the United States Department of Agriculture to whom authority has heretofore been delegated, or to whom authority may hereafter be delegated, to act in his stead.

2. Section 905.4 *Fruit* is revised by amending paragraph (f) to read as follows:

§ 905.4 Fruit.

* * * * *

(f) Honey tangerines.

3. Section 905.5 *Variety* is revised by amending paragraphs (i), (j), and (k), and adding new paragraphs (l) and (m). As amended § 905.5 reads as follows:

§ 905.5 Variety.

* * * * *

(i) Dancy and similar tangerines, excluding Robinson and Honey tangerines;

(j) Robinson tangerines;

(k) Honey tangerines;

(l) Naval oranges; and

(m) Other varieties of citrus fruits specified in § 905.4 as recommended by the committee and approved by the Secretary.

4. Section 905.6 *Producer* is revised to read as follows:

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

§ 905.6 Producer.

"Producer" is synonymous with "grower" and means any person who is engaged in the production for market of fruit in the production area and who has a proprietary interest in the fruit so produced.

5. Section 905.10 *Standard packed box* is revised to read as follows:

§ 905.10 Carton or standard packed carton.

"Carton or standard packed carton" means a unit of measure equivalent to four-fifths (⅘) United States bushels of fruit, whether in bulk or in any container.

6. The provisions of §§ 905.12, 905.13, 905.14, 905.15, 905.16 are redesignated as §§ 905.13, 905.15, 905.16, 905.17, and 905.18, respectively, and a new § 905.12 is added reading as follows:

§ 905.12 Committee.

"Committee" means the Citrus Administrative Committee established pursuant to § 905.19.

7. Section 905.13 is revised and a new § 905.14 is added to read as follows:

§ 905.13 District.

(a) "Citrus District One" shall include the Counties of Hillsborough, Pinellas, Pasco, Hernando, Citrus, Sumter, and Lake.

(b) "Citrus District Two" shall include the Counties of Osceola, Orange, Seminole, Alachua, Putnam, St. Johns, Flagler, Marion, Levy, Duval, Nassau, Baker, Union, Bradford, Columbia, Clay, Gilchrist, and Suwannee, and County Commissioner, Districts One, Two, and Three of Volusia County, and that part of the Counties of Indian River and Brevard not included in Regulation Area II.

(c) "Citrus District Three" shall include the County of St. Lucie and that part of the Counties of Brevard, Indian River, Martin, and Palm Beach described as lying within Regulation Area II, and County Commissioner's Districts Four and Five of Volusia County.

(d) "Citrus District Four" shall include the Counties of Manatee, Sarasota, Hardee, Highlands, Okeechobee, Glades, De Sota, Charlotte, Lee, Hendry, Collier, Monroe, Dade, Broward, and that part of the Counties of Palm Beach and Martin not included in Regulation Area II.

(e) "Citrus District Five" shall include the County of Polk.

8. Section 905.14 is revised to read as follows:

§ 905.14 Redistricting.

The committee may with the approval of the Secretary, redefine the districts into which the production area is divided or reapportion or otherwise change the grower membership of districts, or both: *Provided,* That the membership shall consist of at least eight but not more than nine grower members, and any such change shall be based, so far as practicable, upon the respective averages for the immediately preceding five fiscal periods of (1) the volume of fruit shipped from each district; (2) the volume of fruit produced in each district; and (3) the total number of acres of citrus in each district. The committee shall consider such redistricting and reapportionment during the 1980–81 fiscal period, and only in each fifth fiscal period thereafter, and each such redistricting or reapportionment shall be announced on or before March 1 of the then current fiscal period.

9. Delete §§ 905.20 through 905.26 and insert in lieu thereof the following:

§ 905.19 Establishment and membership.

(a) There is hereby established a Citrus Administrative Committee consisting of at least 8 but not more than 9 grower members, and 8 shipper members. Grower members shall be persons who are not shippers or employees of shippers. Shipper members shall be shippers and employees of shippers. The committee may be increased by one non-industry member nominated by the committee and selected by the Secretary. The committee, with the approval of the Secretary, shall prescribe qualifications, term of office, and the procedure for nominating the non-industry member.

(b) Each member shall have an alternate who shall have the same qualifications as the member for whom he is an alternate.

§ 905.20 Term of office.

The term of office of members and alternate members shall begin on the first day of August and continue for one year and until their successors are selected and have qualified. The consecutive terms of office of a member shall be limited to three terms. The terms of office of alternate members shall not be so limited. Members, their alterantes, and their respective successors shall be nominated and selected by the Secretary as provided in §§ 905.22 and 905.23.

§ 905.21 Selection of initial members of the committee.

The initial members of the Citrus Administrative Committee and their respective alternates shall be the members and alternates of the Growers Administrative Committee and the Shippers Advisory Committee serving on the effective date of his amendment. Each member and alternate shall serve until completion of the term for which he was selected and until his successor has been selected and qualified.

§ 905.22 Nominations.

(a) *Grower member.* (1) The committee shall give public notice of a meeting of producers in each district to be held not later than July 10 of each year, for the purpose of making nominations for grower members and alternate grower members. The committee, with the approval of the Secretary, shall prescribe uniform rules to govern such meetings and the balloting thereat. The chairman of each meeting shall publicly announce at such meeting the names of the persons nominated, and the chairman and secretary of each such meeting shall transmit to the Secretary their certification as to the number of votes so cast, the names of the persons nominated, and such other information as the Secretary may request. All nominations shall be submitted to the Secretary on or before the 20th day of July.

(2) Each nominee shall be a producer in the district from which he is nominated. In voting for nominees, each producer shall be entitled to cast one vote for each nominee in each of the districts in which he is a producer. At least three of the nominees and their alternates so nominated shall be affiliated with a bona fide cooperative marketing organization.

(b) *Shipper members.* (1) the Committee shall give public notice of a meeting for bona fide cooperative marketing organizations which are handlers, and a meeting for other handlers who are not so affiliated, to be held not later than July 10 of each year, for the purpose of making nominations for shipper members and their alternates. The committee, with the approval of the Secretary, shall prescribe uniform rules to govern each such meeting and balloting thereat. The chairman of each such meeting shall publicly announce at the meeting the names of the persons nominated and the chairman and secretary of each such meeting shall transmit to the Secretary their certification as to the number of votes cast, the weight by volume of those shipments voted, and such other information as the Secretary may request. All nominations shall be submitted to the Secretary on or before the 20th day of July.

(2) Nomination of at least three members and their alternates shall be made by bona fide cooperative marketing organizations which are handlers. Nominations for not more than five members and their alternates shall be made by handlers who are not so affiliated. In voting for nominees, each handlers or his authorized representative shall be entitled to cast one vote, which shall be weighted by the volume of fruit by such handler during the then current fiscal period.

§ 905.23 Selection.

(a) From the nominations made pursuant to § 905.22(a) or from other qualified persons, the Secretary shall select one member and one alternate member to represent District 2 and two members and two alternate members each to represent District 1, 3, 4, and 5 or such other number of members and alternate members from each district as may be prescribed pursuant to § 905.14. At least three such members and their alternates shall be affiliated with bona fide cooperative marketing organizations.

(b) From the nominations made pursuant to § 905.22(b) or from other qualified persons, the Secretary shall select at least three members and their alternates to repersent bona fide cooperative marketing organizations which are handlers, and the remaining members and their alternates to represent handlers who are not so affiliated.

10. Section 905.31 *Duties of Growers Administrative Committee* is revised by: (1) Revising the title and introductory

V 42 167 AUG 29 77 UMI

sentence thereof; and (2) deleting paragraphs (j) and (k). As amended § 905.31 reads as follows:

§ 905.31 Duties of Citrus Administrative Committee.

It shall be the duty of the Citrus Administrative Committee:

* * * * *

(j) [Deleted]
(k) [Deleted]

§ 905.32 [Revoked]

11. Section 905.32 *Duties of Shippers Advisory Committee* is deleted.

12. Section 905.33 *Compensation and expenses of committee members* is revised to read as follows:

§ 905.33 Compensation and expense of committee members.

The members and alternate members of the committee shall serve without compensation but may be reimbursed for expenses necessarily incurred by them in attending committee meetings and in the performance of their duties under this part.

13. Section 905.34 *Procedure of committees* is revised to read as follows:

§ 905.34 Procedure of committee.

(a) Ten members of the committee shall constitute a quorum.

(b) For any decision or recommendation of the committee to be valid, ten concurring votes, five of which must be grower votes, shall be necessary: *Provided*, That the committee may recommend a regulation restricting the shipment of grapefruit grown in Regulation Area I or Regulation Area II which meets the requirements of the Improved No. 2 grade or the Improved No. 2 Bright grade only upon the affirmative vote of a majority of its members present from the regulation area in which such restriction would apply; and whenever a meeting to consider a recommendation for release of such grade is requested by a majority of the members from the affected area, the committee shall hold a meeting within a reasonable length of time for the purpose of considering such a recommendation. If after such consideration the requesting area majority present continues to favor such release for their area the request shall be considered a valid recommendation and shall be transmitted to the Secretary. The votes of each member cast for or against any recommendation made pursuant to this subpart shall be duly recorded. Whenever an assembled meeting is held each member must vote in person.

(c) The committee may, in cases of emergency, vote by telephone and all such votes must be confirmed in writing. Any proposition so voted upon shall first be fully explained to all members or alternates acting as members. When any proposition is submitted to be voted on by telephone, two (2) dissenting votes shall prevent its adoption.

(d) The committee shall give the Secretary the same notice of meetings as is given to the members thereof.

14. Section 905.51 *Recommendations for regulation* is amended by revising paragraph (a), by deleting paragraph (b) and substituting "committee" for "Growers Administrative Committee" in paragraph (c) and by redesignating paragraph (c) as paragraph (b). As amended § 905.51 reads as follows:

§ 905.51 Recommendations for regulation.

(a) Whenever the committee deems it advisable to regulate any variety in the manner provided in § 905.52, it shall give due consideration to the following factors relating to the citrus fruit produced in Florida and in other States: (1) Market prices, including prices by grades and sizes of the fruit for which regulation is recommended; (2) maturity, condition, and available supply, including the grade and size thereof in the producing areas; (3) other pertinent market information and (4) the level and trend of consumer income. The committee shall submit to the Secretary its recommendations and supporting information respecting the factors enumerated in this section.

(b) The committee shall give notice of any meeting to consider the recommendation of regulations pursuant to § 905.52 by mailing a notice of meeting to each handler who has filed his address with the committee for this purpose. The committee shall give the same notice of any such recommendation before the time it is recommended that such regulation become effective.

15. Section 905.52 *Regulation by the Secretary* is revised by:

(1) Revising the title thereof;

(2) Substituting "committee" for "Shippers Advisory Committee" and the "Growers Administrative Committee" in the first sentence of paragraph (a);

(3) Revising the proviso in subparagraph (1) of paragraph (a);

(4) Substituting "Chapter 601 of the Florida Statutes and regulations effective thereunder" for the "Florida Citrus Code" in subparagraph (5) of paragraph (a);

(5) Deleting "Growers Administrative Committee" in paragraph (b) and "Shippers Advisory Committee and the Growers Administrative Committee" in paragraph (c) and substituting therefor the word "committee"; and

(6) Adding "of any variety" following the words "to any or all shipments" in the first sentence of paragraph (c). As amended § 905.52 reads as follows:

§ 905.52 Issuance of regulations.

(a) Whenever the Secretary shall find from the recommendations and reports of the committee, or from other available information, that to limit the shipment of any variety would tend to effectuate the declared policy of the act, he shall so limit the shipment of such variety during a specified period or periods. Such regulations may:

(1) Limit the shipments of any grade or size, or both, of any variety, in any manner as may be prescribed, and any such limitation may provide that shipments of any variety grown in Regulation Area II shall be limited to grades and sizes different from the grade and size limitations applicable to shipments of the same varieties grown in Regulation Area I: *Provided*, That whenever any such grade or size limitation restricts the shipment of a portion of a specified grade or size of a variety, the quantity of such grade or size that may be shipped by a handler during a particular week shall be established as a percentage of the total shipments of such variety by such handler in such prior period established by the committee with the approval of the Secretary, in which he shipped such variety.

* * * * *

(5) Fix the size, capacity, weight, dimensions, or pack of the container or containers which may be used in the shipment of fruit for export, other than to Canada and Mexico: *Provided*, That such regulation shall not authorize the use of any container which is prohibited for use for fruit under the provisions of Chapter 601 of the Florida Statutes and regulations effective thereunder.

(b) Prior to the beginning of any such regulations, the Secretary shall notify the committee of the regulation issued by him, and the committee shall notify all handlers by mailing a copy thereof to each handler who has filed his address with the committee for this purpose.

(c) Whenever the Secretary finds from the recommendations and reports of the committee, or from other available information, that a regulation should be modified, suspended, or terminated with respect to any or all shipments of any variety of fruit in order to effectuate the declared policy of the act, he shall so modify, suspend, or terminate such regulation. If the Secretary finds that a regulation obstructs or does not tend to effectuate the declared policy of the act, he shall suspend or terminate such regulation. On the same basis, and in like manner, the Secretary may terminate any such modification or suspension.

(d) * * *

§ 905.54 [Revoked]

16. Section 905.54 *Exemptions* is deleted.

§ 905.14 [Redesignated]

A typographical error in § 905.14 (redesignated herein as § 905.16) is corrected by substituting "Township 15 South, Range 32 East;" for "Township 18 South, Range 32 East". As so revised and redesignated said section reads as follows:

§ 905.16 Regulation Area II.

"Regulation Area II" shall include that part of the State of Florida particularly described as follows:

Beginning at a point on the shore of the Atlantic Ocean where the line between Flagler and Volusia Counties intersects said shore, thence follow the line between said two counties to the Southwest corner of Section 23, Township 14 South, Range 31 East; thence continue South to the Southwest corner of Section 35, Township 14 South, Range 31 East; thence East to the Northwest corner of Township 15 South, Range 32 East; * * *

17. The following sections are revised by substituting "committee" for references to "Growers Administrative Committee and Shippers Advisory Committee".

§ 905.27 Failure to nominate.

In the event nominations for a member or alternate member of the committee are not made pursuant to the provisions of § 905.22 * * *

§ 905.28 Acceptance of membership.

Any person selected by the Secretary as a member or alternate member of the committee * * *

§ 905.29 Inability of members to serve.

(a) An alternate for a member of the committee * * *

(b) In the event of the death, removal, resignation, or disqualification of any person selected by the Secretary as a member or an altenate member of the committee * * *

§ 905.30 Powers of the committee.

The committee, * * *

§ 905.35 Right of the Secretary.

The members of the committee (including successors and alternates), and any agent or employee appointed or employed by the committee shall be subject to removal or suspension by the Secretary at any time. Each and every order, regulation, decision, determination, or other act of the committee, * * *

§ 905.36 Funds.

(a) All funds received by the committee * * *

(b) The Secretary may, at any time, require the committee * * *

(c) Upon the removal or expiration of the term of office of any member of the committee * * *

EXPENSES AND ASSESSMENTS

§ 905.40 Expenses.

The committee is authorized to incur such expenses as the Secretary finds are reasonable and likely to be incurred to carry out the functions of the committee * * *

§ 905.41 Assessments.

(a) Each handler who first handles fruit shall pay to the committee, upon demand, such handler's pro rata share of the expenses which the Secretary finds will be incurred by the committee for the maintenance and functioning, during each fiscal period, of the committee established under this subpart. Each such handler's share of such expenses shall be that proportion thereof which the total quantity of fruit shipped by such handler as the first handler thereof during the applicable fiscal period is of the total quantity of fruit so shipped by all handlers during the same fiscal period. The Secretary shall fix the rate of assessment per standard packed carton of fruit to be paid by each such handler. The payment of assessments for the maintenance and functioning of the committee * * *

(b) At any time during or after the fiscal period, the Secretary may increase the rate of assessment so that the sum of money collected pursuant to the provisions of this section shall be adequate to cover the said expenses. Such increase shall be applicable to all fruit shipped during the given fiscal period. In order to provide funds to carry out the functions of the committee established under § 905.19, handlers may make advance payment of assessments.

§ 905.42 Handler's accounts.

(a) * * *

(b) The committee * * *

REGULATIONS

§ 905.50 Marketing policy.

(a) Before making any recommendations pursuant to § 905.51 for any variety of fruit the committee shall, with respect to the regulations permitted by § 905.52, submit to the Secretary a detailed report setting forth an advisable marketing policy for such variety for the then current shipping season. Such report shall set forth the proportion of the remainder of the total crop of such variety of fruit (determined by the committee to be available for shipment during the remainder of the shipping season of such variety) deemed advisable by the committee to be shipped during such season.

(b) In determining each such marketing policy and advisable proportion, the committee shall give due consideration to the following factors relating to citrus fruit produced in Florida and in other States: (1) The available crop of each variety of citrus fruit in Florida, and in other States, including the grades and sizes thereof, which grades and sizes in Florida shall be determined by the committee * * *

(c) In addition to the foregoing, the committee shall set forth a schedule of proposed regulation for the remainder of the shipping season for each variety of fruit for which recommendations to the Secretary pursuant to § 905.51 are contemplated. Such schedules shall recognize the practical operations of harvesting and preparation for market of each variety and the change in grades and sizes thereof as the respective seasons advance. In the event it is deemed advisable to alter such marketing policy or advisable proportion as the shipping season progresses, in view of changed demand and supply conditions with respect to fruit, the committee shall submit to the Secretary a report thereon.

(d) The committee * * *

§ 905.53 Inspection and certification.

(a) Whenever the handling of a variety of a type of fruit is regulated pursuant to § 905.52, each handler who handles any variety of such type of fruit shall, prior to the handling of any lot of such variety, cause such lot to be inspected by the Federal-State Inspection Service and certified by it as meeting all applicable requirements of such regulation: *Provided*, That such inspection and certification shall not be required if the particular lot of fruit previously had been so inspected and certified unless such prior inspection was not performed within such time limitations as may be prescribed pursuant to paragraph (b) of this section. Each handler shal promptly submit, or cause to be submitted, to the committee a copy of each certificate of inspection issued to him covering varieties so handled.

(b) With respect to any variety regulated pursuant to § 905.52(a)(4), the committee * * *

HANDLER'S REPORT

§ 905.70 Manifest Report.

The committee may request information from each handler regarding the variety, grade, and size of each standard packed carton of fruit shipped by him and may require such information to be mailed or delivered to the committee or its duly authorized representative, within 24 hours after such shipment is made, in a manner or by such method as the committee may prescribe, and upon such forms as may be prepared by it.

§ 905.71 Other information.

Upon request of the committee, made with the approval of the Secretary, every handler shall furnish the committee, * * *

MISCELLANEOUS PROVISIONS

§ 905.80 Fruit not subject to regulation.

Except as otherwise provided in this section, any person may, without regard to the provisions of §§ 905.52 and 905.53 and the regulations issued thereunder, ship any variety for the following purposes: (a) To a charitable institution for consumption by such institution; (b) to a relief agency for distribution by such agency; (c) to a commercial processor for conversion by such processor into canned or frozen products or into a beverage base; (d) by parcel post; or (e) in such minimum quantities, types of shipments, or for such purposes as the committee * * *

§ 905.84 Proceedings after termination.

(a) Upon the termination of the provisions of this part, the then functioning members of the committee shall continue as joint trustees, for the purpose of liquidating the affairs of the committee, of all the funds and property then in the possession of or under control of committee, * * *

(b) The said trustees (1) shall continue in such capacity until discharged by the Secretary, (2) shall, from time to time, account for all receipts and disbursements or deliver all property on hand, together with all books and records of the committee and of the joint trustees, to such person as the Secretary may direct; and (3) shall, upon the request of the Secretary, execute such assignments or other instruments necessary or appropriate to vest in such person full title and right to all of the funds, property, and claims vested in the com-

V 42167 A AUG 29 77 UMI

mittee, or the joint trustees pursuant to this part.

(c) * * *

(d) Any person to whom funds, property, or claims have been transferred or delivered by the committee or its members, pursuant to this section, shall be subject to the same obligations imposed upon the members of the committee and upon the said joint trustees.

§ 905.88 Personal liability.

No member or alternate of the committee * *

Subpart—Rules and Regulations

§ 905.120 Nomination procedure.

Meetings shall be called by the committee in accordance with the provisions of § 905.22 for the purpose of making nominations for members and alternate members of the committee. The manner of nominating members and alternate members of the committee shall be as follows:

(a) At each such meeting the Secretary's agent shall announce the requirements as to eligibility for voting for nominees and the procedure for balloting, and shall explain the duties of the committee under §§ 905.51 through 905.89, inclusive.

(b) A chairman and a secretary of each meeting shall be selected.

(c) At each meeting there shall be presented for nomination and there shall be nominated not less than the number of nominees required under the provisions of §§ 905.19 and 905.22, all of whom shall have the qualifications therein provided.

(d) At the meetings of handlers, any person authorized to represent a handler may cast a ballot for such handler.

(e) At each meeting there may be cast at least the number of persons required to be nominated to represent the several districts or groups, as the case may be.

(f) All voting shall be by ballot and all ballots shall be delivered by the chairman or the secretary of the meeting to the agent of the Secretary.

§ 905.125 [Revoked]

§ 905.126 [Revoked]

§ 905.130 [Revoked]

§ 905.132 [Revoked]

Section 905.125 *Redefinition of districts*, § 905.126 *Changes in district representation*, § 905.130 *Exemption certificates*, § 905.131 Issuance of certificates, and § 905.132 *Reports* are deleted.

NON-REGULATED FRUIT

§ 905.140 Gift packages.

During any day any handler may, without regard to the provisions of § 905.52 and § 905.53 and the regulations issued thereunder, ship any variety for the following purpose, and in the following quantity, and types of shipment: (a) To any person one gift package containing such variety, individually addressed to such person, not in excess of two standard packed cartons if such packages are shipped direct to the addressee for use by such person other than for resale; or (b) to any distributor individually addressed gift packages of such variety not in excess of two standard packed cartons each for distribution by such distributor to the respective addressee, but not for resale.

§ 905.141 Minimum exemption.

Any shipment of fruit which meets each of the following requirements may be transported from the production area during any one day by any person or by occupants of one vehicle exempt from the requirements of § 905.52 and § 905.53 and regulations issued thereunder:

(a) The shipment does not exceed a total of 15 standard packed cartons (12 bushels) of fruit either a single fruit or a combination of two or more fruits;

(b) The shipment consists of fruit not for resale; and

(c) Such exempted quantity is not included as a part of a shipment exceeding 15 standard packed cartons (12 bushels) of fruit.

§ 905.145 Certification of certain shipments.

Whenever a regulation pursuant to § 905.52 restricts the shipment of a portion of a specified grade or size of a variety, each handler shipping such variety during the regulation period shall, with respect to each such shipment, certify to the U.S. Department of Agriculture and the committee the quantity of the partially restricted grade or size, or both, contained in such shipment. Such certification shall accompany the manifest of such shipment which the handler furnishes to the Federal-State Inspection Service.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 39]

[Docket No. 15696]

AIRWORTHINESS DIRECTIVES

Gliders

AGENCY: Federal Aviation Administration (FAA) DOT.

ACTION: Withdrawal of notice of proposed rulemaking.

SUMMARY: This notice withdraws a proposal to adopt an airworthiness directive (AD) that would have required an inspection of all control cables and cable sleeves and replacement of specified cables and cable sleeves for certain foreign manufactured gliders. The agency has determined that a lack of unsatisfactory service experience warrants the withdrawal of the proposed AD.

FOR FURTHER INFORMATION CONTACT:

D. C. Jacobsen, Chief, Aircraft Certification Staff, AEU-100, Europe, Africa, and Middle East Region, Federal Aviation Administration, c/o American Embassy, Brussels, Belgium, telephone 513.38.30.

SUPPLEMENTARY INFORMATION: A notice was published in the FEDERAL REGISTER on May 6, 1976, at 41 FR 18681 which proposed to adopt an AD applicable to certain Messerschmitt-Bolkow-Blohm GmbH(MBB), Glasflugel, Schleicher, Start and Flug GmbH, Scheibe, and Schempp Hirth gliders. The proposed AD would have required an inspection of the flight control cable system to check the diameter of cables and sleeves manufactured according to certain specifications and by certain manufacturers and the replacement of specified cables and cable sleeves. Comments from interested persons were invited.

Fourteen comments were received in response to the proposed AD. Only one of the commentators was in favor of adopting the AD as proposed. The major objection raised by the commentators was that the only service experience supporting any AD action involves a single glider model and that the problem with that glider is related to the particular design of that model's rudder control system. Other commentators indicated that they had inspected their control cable systems after receipt of the proposed AD and discovered no defective cables.

Based on these comments, the FAA has reevaluated the need for the proposed AD and has determined that justification does not exist for adopting the AD as proposed and that the proposal should, therefore, be withdrawn. The FAA is continuing to evaluate the need for AD action and, if needed, the form of action to be taken, for the glider model referred to by the commentators.

Withdrawal of this notice of proposed rulemaking constitutes only such action, and does not preclude the agency from issuing another notice in the future, or commit the agency to any course of action in the future.

DRAFTING INFORMATION

The principal authors of this document are D.C. Jacobsen, Europe, Africa, and Middle East Region, T. J. Loftus, Flight Standards Service, and S. Podberesky, Office of the Chief Counsel.

WITHDRAWAL OF THE NOTICE

Accordingly, and pursuant to the authority delegated to me by the Administrator, the proposed airworthiness directive published in the FEDERAL REGISTER on May 6, 1976, 41 FR 18681), titled "Airworthiness Directives—Gliders", is hereby withdrawn.

(Sec. 313(a), Federal Aviation Act of 1958 as amended, (49 U.S.C. 1354(a); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.85).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on August 19, 1977.

P. R. SKULLY,
Director, Flight Standards Service.

AIRWORTHINESS DIRECTIVES

Bell Models 206A, 206B, 206A-1, and 206B-1 Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Withdrawal of Notice of Proposed Airworthiness Directive.

SUMMARY: A proposal to amend Part 39 of the Federal Aviation Regulations (14 CFR Part 39) to add an Airworthiness Directive that would require a one-time magnetic particle inspection of the main rotor hub trunnion, P/N 206-011-113-1, within 100 hours on all Bell Models 206A, 206B, 206A-1, and 206B-1 helicopters was published in 42 FR 31171. In response to comments received as described below, the agency has determined that the proposed Airworthiness Directive be withdrawn.

DATES: Effective August 29, 1977.

FOR FURTHER INFORMATION CONTACT:

Tom A. Dragset, Airframe Section, Engineering and Manufacturing Branch, ASW-212, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas, telephone 817-624-4911, extension 517.

SUPPLEMENTARY INFORMATION: In response to the proposal, seven letters were received from helicopter operators, one from Bell Helicopter Textron, and one from the British Civil Aviation Authority objecting to the proposal. One letter was received from the National Transportation Safety Board supporting the proposal. The general consensus of those objecting to the proposal is that if the main rotor hub trunnion, P/N 206-011-113-1, is properly inspected every 1200 hours in accordance with the Bell Helicopter published maintenance and overhaul procedures, as acceptable level of safety would be insured. The findings of the NTSB suggests a lapse in the inspection standards of the overhaul agency, and it is thought inequitable that all other operators should be unduly burdened. Therefore, the agency has determined that the proposed AD is no required at this time.

DRAFTING INFORMATION

The principal authors of this document are Tom A. Dragset, Aerospace Engineer, Flight Standards Division, and Joseph A. Kovarik, Regional Counsel, Southwest Region, FAA.

WITHDRAWAL OF THE NOTICE

Accordingly, and pursuant to the authority delegated to me by the Administrator (14 CFR 11.89), the proposed airworthiness directive published in the FEDERAL REGISTER on June 20, 1977 (42 FR 31171), is hereby withdrawn.

Withdrawal of this Notice of Proposed Rule Making constitutes only such action and does not preclude the agency from issuing another Notice in the future or commit the agency to any course of action in the future.

Sections 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423; Section 6(c)), Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Fort Worth, Texas, on August 5, 1977.

HENRY L. NEWMAN,
Director, Southwest Region.

[Docket No. 77-WE-27-AD]

AIRWORTHINESS DIRECTIVES

McDonnell Douglas Model DC-8 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rule making.

SUMMARY: This notice proposes to adopt an airworthiness directive (AD) that would require installation of an elevator position indicator system, and modifications to improve clearances on McDonnell Douglas Model DC-8 Series airplanes to preclude jamming of the elevator.

DATES: Comments must be received on or before October 3, 1977.

ADDRESSES: Send comments on the proposal to: Department of Transportation, Federal Aviation Administration, Western Region, Attention: Regional Counsel, Airworthiness Rule Docket, P.O. Box 92007, Worldway Postal Center, Los Angeles, California 90009.

Persons affected by this AD may obtain copies of Douglas DC-8 Service Bulletins 27-254 and 27-262 by writing to: McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California, 90846. Attention: L. A. Eisenberg, CI-750, 54-60.

Copies of the service bulletins are contained in the: Rules Docket in Room 916, 800 Independence Avenue S.W., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

Jerry J. Presba, Executive Secretary, Airworthiness Directives Review Board, Federal Aviation Administration, Western Region, P.O. Box 92007, Worldway Postal Center, Los Angeles, California 90009, telephone 213-536-6351.

SUPPLEMENTARY INFORMATION: AD 77-10-12, Amendment 39-2906 (42 FR 26201), appeared in the FEDERAL REGISTER on May 23, 1977. The AD was issued to require an inspection of the elevator geared tab crank arm assemblies, the gust lock assembly, and existing clearances between the crank arm assemblies and the box section. The inspections were required to preclude crank arm failure or interference which could cause jamming of the elevator surface.

The need for such an inspection became evident as the result of a take-off accident. Investigation of the accident indicated that the airplane was subjected to high tail winds while parked with the gust lock disengaged or broken. These high winds had apparently driven the elevator beyond normal movement limits and caused link failure and jamming of the elevator surface in an airplane nose up position. The jammed elevator was not detected on the subsequent take-off until the plane was ready to lift off.

To preclude the possiblity of such failure and jamming during any future high tail wind or jet blast conditions, McDonnell Douglas has designed modifications to increase clearances between the geared tab links and the geared tab structure. These changes have been issued as McDonnell Douglas DC-8 Service Bulletin 27-262.

Another possible source of elevator jamming prior to take-off is a foreign object becoming lodged between the elevator leading edge and the rear spar of the horizontal stabilizer. The manufacturer has designed an elevator position indicator system which will give positive indication of elevator movement during the preflight control freedom-of-movement check. This system has been issued as McDonnell Douglas DC-8 Service Bulletin 27-254.

Since the possibility of linkage failure during travel beyond normal limits and subsequent elevator jamming or jamming due to foreign objects is likely to exist or develop in other aircraft of the same type design, the proposed AD would require compliance with the clearance rework requirements of DC-8 Service Bulletin 27-262 and the installation requirements of DC-8 Service Bulletin 27-254.

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Information on the economic environmental, and energy impact that might result because of the adoption of the proposed rule is also requested. Communications should identify the airworthiness docket number and be submitted in duplicate to the Department of Transportation, Federal Aviation Administration, Western Region, Attention: Regional Counsel, Airworthiness Rule Docket, P.O. Box 92007, Worldway Postal Center, Los Angeles, California 90009. All communications received before the closing date will be considered by the Administrator before taking action upon the proposed rule. The proposals contained in the notice may be changed in light of comments received. All comments will be available, both before and after the closing date for comments, in the Airworthiness Rule Docket for examination by interested persons. A report summarizing each FAA-public contact, concerned with the substance of the proposed AD, will be filed in the Rule Docket.

V 42 167 AUG 29 77 UMI

DRAFTING INFORMATION

The principal authors of this document are Everett W. Pittman, Aircraft Engineering Division, and Richard G. Wittry, Office of the Regional Counsel.

PROPOSED AMENDMENT

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new airworthiness directive:

MCDONNELL DOUGLAS: Applies to Model DC-8 Series airplanes, certificated in all categories.

Compliance required as indicated.

To prevent failure of the elevator geared tab crank arms and jamming of the elevator surface, comply with the following:

(a) Within the next 12 months after the effective date of this AD, unless already accomplished, improve the elevator geared tab crank assembly clearance by modifying the elevator leading edge cutouts and covers, and modify and reidentify the elevator geared tab link rod end, in accordance with McDonnell Douglas DC-8 Service Bulletin 27-262 dated July 15, 1977 or later FAA approved revision.

(b) Within the next 18 months after the effective date of this AD, unless already accomplished, install an elevator position indicator system in accordance with McDonnell Douglas DC-8 Service Bulletin 27-254 dated March 5, 1975 or later FAA approved revision.

(c) Equivalent modifications may be used when approved by the Chief, Aircraft Engineering Division, FAA Western Region.

(d) Special flight permits may be issued in accordance with FAR's 21.197 and 21.199 to authorize operation of an airplane to a base for the accomplishment of the modifications required by this AD.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.85)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Los Angeles, California on August 18, 1977.

HERMAN C. BLISS,
Acting Director,
FAA Western Region.

[Docket No. 17151; Notice No. 77-18]

THREE POINTER ALTIMETERS

Proposed Prohibition of Use

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The Federal Aviation Administration is considering rule making to prohibit the use of three pointer altimeters on large turbine-powered airplanes. Such a prohibition was recommended by the Special Air Safety Advisory Group. This notice is being issued to invite public comment on this recommendation because insufficient information is presently available to determine whether rule making is warranted.

DATE: Comments must be received on or before November 28, 1977.

ADDRESS: Send comments on the proposal to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket (AGC-24) Docket No. 17151, 800 Independence Avenue SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

Raymond E. Ramakis, Regulatory Projects Branch, Safety Regulations Division, Flight Standards Service, 800 Independence Avenue SW., Washington, D.C. 20591; telephone: 202-755-8716.

SUPPLEMENTARY INFORMATION: This advance notice of proposed rulemaking is being issued in accordance with the FAA's policy for early institution of public proceedings in actions related to rulemaking. An advance notice is issued to invite early public participation in the identification and selection of a course or alternate courses of action with respect to a particular rulemaking problem.

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket, AGC-24, 800 Independence Avenue SW., Washington, D.C. 20591. All communications received on or before November 28, 1977, will be considered by the Administrator before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. A report summarizing each public contact with FAA personnel concerned with this rulemaking will be filed in the public, regulatory docket. All comments received will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

The Special Air Safety Advisory Group (SASAG), comprised of six retired airline captains, was appointed by the FAA in March 1975, to conduct an independent evaluation of the National Aviation System and to submit a report of its findings and recommendations. One recommendation was to prohibit the use of the three pointer altimeter in large, turbine-powered airplanes as a hazard to flight safety because it is easily misread by pilots. Two incidents of near crashes allegedly caused by such misreading were offered to substantiate that finding. Also cited by SASAG were the results of a Naval Research Laboratory (NRL) test on pilot misreadings of three pointer altimeters and NRL altimeter comparison projects which found the three pointer altimeter to be the least desirable type.

An FAA project report on Development of an Independent Altitude Monitor Concept, No. FAA-RD-73-168, dated September 1973, indicates that of the 10.9 percent (average) of total accidents involving flight below a safe level for any reason, only 0.5 percent were related to misreading, mis-setting or malfunctioning of altimeters.

National Transportation Safety Board records for the period of 1966 through 1975 do not directly relate any accidents involving turbine-powered airplanes to misreading of the three pointer altimeter. Furthermore, there have been no complaints, except that of SASAG, or other records on file within the FAA which would identify the three pointer altimeter as a hazard to flight safety.

The FAA believes, however, that because of the SASAG and NRL reports concerning deficiencies in the three pointer altimeter that some action should be taken. In order to make a proper determination, additional information is necessary. To this end, the FAA solicits comments and supporting data from operators, manufacturers, and other interested persons, particularly on the following questions.

1. Is the three pointer altimeter unsafe? Why?

2. What time period should be allowed for replacement of three pointer altimeters, if deemed appropriate, by other approved types, taking into consideration the possible future transition to metric scale measurements? Why?

3. Should installation of three pointer altimeters be allowed in airplanes if they are in addition to other approved types installed at each pilot station which are used as the primary source of altitude information? Why?

4. What economic burden, for each airplane and overall, would each operator be subjected to by replacing each three pointer altimeter now in service on its airplanes? Explain in detail.

[EDR-332, SPDR-60; Docket No. 30654; Dated August 23, 1977]

EXEMPTION OF AIR CARRIERS FROM FILING TARIFFS FOR INTERSTATE AND OVERSEAS CHARTERS

Proposed Rulemaking

AGENCY: Civil Aeronautics Board.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: Air carriers must generally file tariffs with the Board showing their rates, fares, and charges (as well as practices affecting their rates, fares and charges). This notice proposes to exempt air carriers from filing rate tariffs for their interstate and overseas charters. It is in response to a petition by the for their interstate and overseas charters. It is in response to a petition by the National Air Carrier Association asking for a rulemaking to exempt air carriers from filing rate tariffs for all passenger charters (including foreign charters).

DATES: Comments by September 23, 1977.

ADDRESSES: Comments should be sent to Docket 30654, Docket Section, Civil Aeronautics Board, Washington, D.C. 20428. Docket comments may be examined at the Docket Section, Civil Aeronautics Board, Room 711, Universal Building, 1825 Connecticut Avenue, NW., Washington, D.C., as soon as they are received.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Juhnke, Associate General Counsel, Rates and Agreements, 1825 Connecticut Avenue, NW., Washington, D.C., 20428 (202-673-5436).

SUPPLEMENTARY INFORMATION: Section 403(a) of the Federal Aviation Act requires air carriers to file tariffs stating their rates as well as rules and practices affecting their rates; section 403(b) prohibits the carriers from deviating from the rates and practices in their tariffs.[1] The National Air Carrier Association (NACA)[2] has filed a petition asking the Board to institute a rulemaking proceeding that would exempt air carriers from section 403 with respect to passenger charter rate tariffs. As proposed by NACA, the exemption would cover the air carriers' passenger charter operations whether interstate, overseas or foreign. NACA's exemption would not apply to cargo charters or to rules tariffs. In lieu of passenger charter rate tariffs, NACA proposes monthly reports of charter traffic and revenue to permit the Board to monitor charter rates.[3]

Under NACA's proposal, carriers would remain subject to the substantive rate requirements of section 404—i.e., to charge rates that are just, reasonable, nondiscriminatory and not unduly preferential or prejudicial. Thus, the Board would retain the power to investigate charter rates under section 1002 of the Act and, after notice and hearing, to find such rates unlawful and order them canceled. The Board would not have formal advance notice of charter rates with accompanying tariff justifications; nor could the Board use the tariff suspension power in subsections 1002(g) and (j) of the Act to prevent a rate from becoming effective pending an investigation of its lawfulness. If the Board suspected that an individual carrier were charging unlawful rates in a particular market, NACA proposes that it issue an order revoking the tariff-filing exemption for that carrier in that market. The carrier would then file the suspect rate in a tariff and the Board could investigate and suspend the rate.

In support of its proposal, NACA asserts that charter transportation is characterized by arm's length bargaining between the direct air carrier and the tour operator. The result of such bargaining is individualized rates that may vary by length of haul, time of day, day of week, number of flights per program, number of stops per flight, ferry mileage, and in-flight services. Therefore, NACA asserts that charter tariff rates are not readily comparable to one another and are not useful to inform or protect either the public or tour operators.

NACA further claims that tariff filing is a burden on the carriers, both financially[4] and because the 30-day advance-filing requirement prevents carriers from responding to last-minte changes in circumstances. For example, if a tour operator fails to obtain sufficient sales to fill the wide bodied aircraft for which it originally contracted, the carrier cannot substitute smaller equipment at a lower rate unless an appropriate tariff can be filed and put into effect. The proposed post-charter reporting requirement is designed to enable the Board to monitor charter rates to prevent unjust discrimination without the above-described burden to carriers. By revoking the proposed exemption for individual carriers in specific markets, the Board could revert to the traditional means of regulating charter rates where it suspects unlawful pricing.

The Board's Office of Consumer Advocate (OCA) has filed an answer generally supporting NACA's proposal on the theory that the elimination of tariffs will produce cost savings, thereby lowering prices to the ultimate consumer. However, OCA has proposed certain alterations of the scope and duration of the exemption to be granted. Those alterations are discussed below.

Three scheduled carriers (American, Pan American and United) challenge NACA's characterization of the charter market as well as the legal conclusion it draws from that characterization. Those carriers allege that they operate charters pursuant to mileage rate tariffs or widely applicable point-to-point tariffs and find no need to use the negotiated point-to-point rates employed by other carriers. They assert that there are no inherent distinctions between scheduled and charter service that preclude uniform tariffs for the latter, and that the specific factors cited by NACA in this regard—e.g., day-of-week and time-of-day pricing—are common to both types of service By encouraging individually negotiated rates, the scheduled carriers claim that NACA openly seeks to legitimize the type of unjust discrimination that Congress sought to prevent by requiring public tariffs. Without tariffs, smaller tour operators will have no notice of rates which large competitors receive, and the discrepancy in negotiating power of large and small operators will arguably be greater. Moreover, the scheduled carriers fear that tour operators will use their power to evoke uneconomic rates from carriers with excess capacity and to encourage last minute contract breaches.

The scheduled carriers also claim that NACA has overstated the burdens of tariff filing, arguing that NACA's own figures show that tariff-filing expenses are an insignificant portion of total charter costs (12 cents per passenger, or .03 cents per revenue passenger-mile). The scheduled carriers dispute the claim that tariff filing impedes legitimate flexibility. NACA's example on this point—substitution of smaller equipment—amounts to a shifting of the risk of unsold charter seats from the tour operator to the direct air carrier in contravention of the Board's intent under its special charter regulations.

In sum, the scheduled carriers argue that NACA has not shown that tariff filing is an undue burden by reason of special circumstances affecting the operation of passenger charters, or that the proposed exemption from tariff filing is in the public interest. Both findings are required to justify the use of 416(b) of the Act.

Finally, the scheduled carriers argue that the Board has an obligation to insure that charter rates are just, reasonable, and not unjustly discriminatory or unduly preferential or prejudicial. Without tariff filings, the Board cannot prevent by unlawful rate from going into

---

[1] 72 Stat. 758, as amended; 49 U.S.C. 1373.

[2] NACA represents the following supplemental air carriers: Evergreen, McCulloch, Overseas National, Trans International and World.

[3] Specifically such reports would include: (1) By geographic region—revenue aircraft-miles, available seat-miles, revenue passenger-miles, and revenue; and (2) by flight—complete itinerary, revenue aircraft-miles, revenue, seats, and type of charter.

[4] NACA states, "One of the larger supplemental air carriers has estimated that these additional costs exceed $75,000 annually." NACA Petition, p. 13.

V 42 N 167 AUG 29 77
UMI

effect, and it will lose the benefit of scrutiny by third parties who, under the existing scheme, seek to convince the Board to exercise its suspension power. Thus, the scheduled carriers claim that NACA's scheme does not provide the Board a mechanism to fulfill its responsibility to insure lawful charter rates.

Upon consideration of the pleadings, the Board has tentatively determined to adopt a rule exempting carriers from charter tariff filing along the lines suggested by NACA, with certain modifications discussed below. Tariff filing imposes a definite burden, in terms of both its financial effect on the carriers and in terms of the rigidity it imposes on charter marketing. Moreover, tariffs burden the Board's limited resources. We recognize that such burdens may not be overwhelming in an absolute sense, particularly when their effect is spread over the total number of charter passengers. Nevertheless, the burden of charter tariff filing should be measured in relation to the regulatory need for tariffs.

In the five years ended in 1976, the Board has issued only four orders suspending and investigating domestic charter tariffs—three passenger and one cargo. There were no such orders in 1976. Out of several hundreds of domestic charter tariff filings received each year, we have received an average of about three complaints per year. In short, the regulatory activity over charter tariffs, whether on the Board's own motion or upon third-party complaint, has been de minimis in recent years. In view of the lack of active use of charter tariffs as a regulatory tool, we question whether there is sufficient regulatory need to justify the burden of charter tariff filing.

Our action does not imply agreement with NACA's characterization of the marketing of charter trasportation, and we specifically invite comment on the characteristics of charter transportation that bear on the need for tariffs. However, we do note that, under that Board's special charter regulations, we have already exempted tour operators from filing tariffs governing the sale of air transportation to the ultimate consumer. Presumably, there is even less need for tariffs governing the wholesale operations. Finally, we note the regulatory barriers to entry are lower for charters than for scheduled service.[4]

For all of the above reasons, we have tentatively determined that the filing of charter rate tariffs may be an undue burden by reason of special circumstances affecting those operations. However, we have determined to modify NACA's proposal in several ways. NACA's proposed rule applies to interstate, overseas and foreign passenger charters operated by air carriers. NACA has not proposed a similar exemption for charters operated by foreign air carriers. Indeed, NACA finds authority for its exemption proposal in section 416(b) of the Act,[1] and it admits that section 416(b) does not grant authority to exempt foreign air carriers from provisions in the Act. NACA suggests in a footnote that the Board could afford foreign air carriers "similar relief" by amending their foreign air carrier permits. We can find no precedent for granting foreign air carriers an exemption from provisions of the Act by amending their permits. Moreover, there is some question that the Board legally can accomplish through a permit condition what Congress has specifically omitted from its exemption authority. Thus, we have tentatively concluded that we are without authority to exempt foreign air carriers from section 403. Lacking such authority, we do not propose to give air carriers an advantage over their foreign competitors by exempting air carriers from filing tariffs for their foreign charters. Accordingly, the proposed rule applies only to interstate and overseas charters.

Second, while NACA seeks an exemption only for passenger charters, we have tentatively concluded that the regulatory need for cargo charter tariffs is equally insufficient to justify filing cargo charter tariffs. Indeed, if anything, carrier-made cargo charter rates have raised fewer problems than passenger charter rates. Accordingly, the proposed rule covers both passenger and cargo charters.

Third, NACA has proposed a new regular charter reporting requirement outlined in footnote 3 above. Each of the items to be reported appear in the Board's Form 41, Schedule T–6 with two exceptions: revenue passenger-miles and flight itineraries. The former can be derived from items on the T–6, and the latter can be approximated. Accordingly, we have tentatively concluded that the proposed reporting requirement is duplicative and unnecessary.

Fourth, NACA has proposed a specific procedure for market-by-market and carrier-by-carrier revocation of the exemption in the event that the Board concludes that a carrier has charged or is charging an unlawful rate. NACA's proposal for revocation is open-ended, i.e., there is no procedure for reinstating the exemption once it has been revoked. Additionally, we note that the Board has the power to revoke an exemption once granted without specific procedures in this rulemaking. Therefore, we have tentatively determined not to include revocation procedures in the rule.

Fifth, we note that NACA has not proposed to exempt carriers from filing charter rule tariffs. It does not explain why it proposes to treat these tariffs differently or indeed why these tariffs are needed at all. We have followed the NACA's suggestion in this regard, and the proposed rule continues to require the filing of charter rule tariffs that are specified in § 221.38 of our Economic Regulations (14 CFR 221.38.) We recognize, as does the Consumer Advocate, that certain tariff rules may give consumers greater protection than they would otherwise have. For example, a carrier might well attempt to limit by contract its liability for loss or damage to baggage to a greater extent than the Board currently permits in tariff rules. See e.g., Orders 77–2–9, 77–4–73, 77–4–82, 77–5–132. However, a great many tariff rules merely restate requirements of the Board's charter regulations or other matters of concern only to carriers and tour organizers that could easily be specified in their contract alone and not in tariff rules. We specifically invite comment on the need for filing charter tariff rules and the extent to which carriers should be exempt from filing some, or all, of such rules.[5]

Finally, we have tentatively determined not to include the two provisions requested by OCA. OCA would alter NACA's proposal to make carriers file tariffs for any rate which increases a rate in an existing contract. OCA would also limit the conditions under which the Board should permit such increases. The reason we have tentatively determined not to include these proposals is that in the absence of tariffs, changes in contractual rates are properly a matter for courts to resolve, just as would be the case in unregulated industries. To the extent that OCA seeks to avoid price increases to the ultimate passengers, we conclude that such concerns are best met in the context of rules affecting the tour operator/passenger relationship, rather than by regulation of the direct air carrier/tour operator relationship.

Additionally, we have not included OCA's suggestion that the tariff-filing exemption expire in 18 months unless the Board determines that renewal is in the public interest. Once the rule is adopted, the Board can revoke the exemption whenever it finds that it no longer in the public interest. OCA has not shown any reason for requiring an affirmative renewal of the exemption in 18 months.

Accordingly, it is proposed to amend Parts 207, 208, and 221 of the Board's Economic Regulations (14 CFR Parts 207, 208, 221) and Parts 371, 372, 372a, 373, 378, and 378a of the Board's Special Regulations (14 CFR Parts 371, 372, 372a, 373, 378, 378a) as set forth below:

PART 207—CHARTER TRIPS AND SPECIAL SERVICES

1. Amend § 207.4(a) to read as follows:

§ 207.4 Tariffs to be filed for charter trips and special services.

(a) No air carrier shall perform any charter trips or other special services unless such air carrier shall have on file with the Board, to the extent required by this chapter, a currently effective tariff showing all rates, fares, and charges for such charter trips and other special services, and showing the rules, regulations, practices, and services in connection with such transportation including the eligibility requirements for charter groups not inconsistent with those established in this part.

* * * * *

PART 208—TERMS, CONDITIONS AND LIMITATIONS OF CERTIFICATES TO ENGAGE IN SUPPLEMENTAL AIR TRANSPORTATION

2. Amend § 208.32 (a) and (b) to read as follows:

§ 208.32 Tariffs and terms of service.

(a) No air carrier shall perform any supplemental air transportation unless such air carrier shall have on file with the Board, to the extent required by this chapter, a currently effective tariff showing all rates, fares, and charges for the use of the entire capacity or less than the entire capacity (see § 208.6(c)) of one or more aircraft in such supplemental air transportation and showing all rules, regulations, practices, and services in connection with such supplemental air transportation, including eligibility requirements for charter groups not inconsistent with those established in this part.

(b) To the extent that the direct air carrier is required by this chapter to file tariffs covering its charter operations, the total charter price and other terms of service rendered pursuant to this part shall conform to those set forth in the applicable tariff on file with the Board and in force at the time of the respective charter flight, and the contract must be for the entire capacity or for less than the entire capacity (see § 208.6(c)) of one or more aircraft. Where a carrier's charter charge computed according to a mileage tariff includes a charge for ferry mileage, the carrier shall refund to the charterer any sum charged for ferry mileage which is not in fact flown in the performance of the charter: *Provided*, That the carrier shall not charge the charterer for ferry mileage flown in addition to that stated in the contract unless such mileage is flown for the convenience of and at the express direction of the charterer.

* * * * *

PART 221—CONSTRUCTION, PUBLICATION, FILING AND POSTING OF TARIFFS OF AIR CARRIERS AND FOREIGN AIR CARRIERS

3. Amend § 221.3 to add a new paragraph (d) to read as follows:

§ 221.3 Carrier's duty.

* * * * *

(d) *Exemption of direct air carriers' interstate and overseas charter operations.* Notwithstanding any provisions of this chapter, direct air carriers are exempt from section 403 of the Act with respect to charter operations performed in interstate or overseas air transportation: *Provided*, That the exemption granted by this paragraph shall not relieve direct air carriers from filing tariffs setting forth the rules, regulations and practices applicable to charter operations as specified in § 221.38.

PART 371—ADVANCE BOOKING CHARTERS

4. Amend § 371.42 to read as follows:

§ 371.42 Tariffs to be on file for charter trips.

No direct air carrier shall perform any charter trips pursuant to this part unless such air carrier shall have on file with the Board, to the extent required by this chapter, a currently effective tariff for such transportation.

PART 372—OVERSEAS MILITARY PERSONNEL CHARTERS

5. Amend § 372.26 to read as follows:

§ 372.26 Prohibition on operations unless tariffs are observed.

To the extent that the direct air carrier is required by this chapter to file tariffs covering its charter operations, no charter operator shall charter aircraft to provide air transportation to charter participants except in accordance with the rates, fares, and charges and all applicable rules, regulations, and other provisions for such transportation as set forth in the currently effective tariff or tariffs of the direct air carrier or foreign air carrier transporting charter participants; and no such operator shall demand, collect, accept, or receive, in any manner or by any device, directly or indirectly, or through any agent or broker, or otherwise, any portion of the rates, fares, or charges so specified in the tariffs of such air carrier or foreign air carrier, and shall not demand, accept, or receive, either directly or indirectly, any privilege, service, or facility except those specified in the currently effective tariffs of such direct air carrier or foreign air carrier.

PART 372a—TRAVEL GROUP CHARTERS

6. Amend § 372a.26 to read as follows:

§ 372a.26 Prohibition on operations unless tariffs are observed.

To the extent that the direct air carrier is required by this chapter to file tariffs covering its charter operations, no charter organizer shall charter aircraft to provide air transportation to charter participants, and no direct air carrier shall operate such aircraft, except in accordance with the rates, fares, and charges and all applicable rules, regulations, and other provisions for such transportation as set forth in the currently effective tariff or tariffs of the direct air carrier transporting charter participants; and no such organizer shall demand, collect, accept, or receive, in any manner or by any device, directly or indirectly, or through any agent or broker, or otherwise, any portion of the rates, fares, or charges so specified in the tariffs of such direct air carrier, and shall not demand, accept or receive, either directly or indirectly, any privilege, service, or facility except those specified in the currently effective tariffs of such direct air carrier or foreign air carrier: *Provided, however*, That no direct air carrier shall file a tariff which has the effect of changing the charter price specified in any option or proposed charter contract previously filed under § 327.22, except that, if so provided in an option or proposed charter contract filed after January 7, 1974, a direct air carrier may subsequently file a tariff which will have the effect of changing, no later than 60 days prior to the scheduled date of flight departure, the pro rata charter price, but the effect of such change shall be limited either (a) to cause or be a factor in causing the pro rata charter price to increase up to a maximum of 20 percent over the minimum pro rata charter price, or (b) if the increase is more than 20 percent, to require cancellation of the TGC.

PART 373—STUDY GROUP CHARTERS BY DIRECT AIR CARRIERS AND STUDY GROUP CHARTERS

7. Amend § 373.14 to read as follows:

§ 373.14 Tariffs to be filed for charter trips.

No direct air carrier shall perform any charter trips for study group charters unless such air carrier shall have on file with the Board, to the extent required by this chapter, a currently effective tariff for such transportation.

PART 378—INCLUSIVE TOUR CHARTERS

8. Amend § 378.15 to read as follows:

§ 378.15 Tariffs to be filed for charter trips.

No direct air carrier shall perform any charter trips for inclusive tours unless such carrier shall have on file with the Board, to the extent required by this chapter, a currently effective tariff for such transportation.

[1] Section 461(b) provides, in part, "The Board may * * * exempt from the requirements of this title or any provisions thereof * * * any air carrier or class of air carriers, if it finds that the enforcement of this title or such provision * * * is or would be an undue burden on such air carrier or class of air carriers by reason of the limited extent of, or unusual circumstances affecting, the operations of such air carrier or class of air carriers and is not in the public interest."

[4] Orders 72–1–68, 73–3–78, 75–2–18, 75–8–119.

[5] *See, Application of Horbach*, Order 77–3–88 9, p. 4

[5] We note that each of our special charter rules requires the direct air carrier to have on file with the Board a tariff showing its rates, fares and charges in connection with the charter transportation it provides. With the exception of §§ 371.42 and 378a.42 (14 CFR 371.42 and 378a.42), those rules also require tariffs to show the rules, regulations, practices, and services in connection with, such transportation. In proposing editorial amendments to our special charter regulations to effect the proposed exemption in Part 221, we would simplify the special charter regulations by indicating only that the carrier must have tariffs on file to the extent required by Chapter II of Title 14 of the Code of Federal Regulations, without reference to whether such tariffs must contain rates and/or rules.

V 42 167 AUG 29 77 UMI

PART 378a—ONE-STOP-INCLUSIVE TOUR CHARTERS

9. Amend § 378a.42 to read as follows:

§ 378a.42 Tariffs to be on file for charter trips.

No direct air carrier shall perform any charter trips pursuant to this part unless such air carrier shall have on file with the Board, to the extent required by this chapter, a currently effective tariff for such transportation.

REQUEST FOR COMMENTS

Interested persons may take part in the rulemaking by submitting 20 copies of written data, views, or arguments on the subjects discussed. All relevant material received by the dates shown at the beginning of this notice will be considered by the Board before taking final action on the proposed rules.

Individual members of the general public who wish to express their interest as consumers by informally taking part in this proceeding may do so by submitting comments in letter form to the Docket Section, without having to file additonal copies.

(Sec. 102, 204, 403, 416, Federal Aviation Act of 1958, as amended, 72 Stat. 740, 743, 758, 771; (49 U.S.C. 1302, 1324, 1373, 1386))

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

MERGERS AND ACQUISITIONS

Proposed Rulemaking; Extension of Time for Filing Comments

AGENCY: Federal Trade Commission.

ACTION: Extension of time for filing comments.

SUMMARY: The last day for receipt of comments concerning the revised proposed rules implementing Title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976 (relating to premerger notification) is hereby extended to September 30, 1977. The revised proposed rules and a proposed Notification and Report Form were published in the FEDERAL REGISTER, 42 FR 39040, on August 1, 1977. In extending the comment period, the Commission also stated that it does not expect to grant further extension of the comment period beyond September 30, 1977, in view of its obligation to implement the premerger notification requirements of the statute at the earliest possible date.

DATES: Comments must be received on or before September 30, 1977.

ADDRESSES: Send comments to both (1) the Secretary, Federal Trade Commission, Room 172, Washington, D.C. 20580 and (2) Assistant Attorney General, Antitrust Division, Department of Justice, Room 3214, Washington, D.C. 20530.

FOR FURTHER INFORMATION CONTACT:

Malcolm R. Pfunder, Premerger Notification Office, Bureau of Competition, Room 301, Federal Trade Commission, Washington, D.C. 20580, telephone 202-523-3894.

By direction of the Commission.

JAMES A. TOBIN,
Acting Secretary.

[LR-252-74]

INCOME TAX

Mergers and Consolidations of Plans and Transfers of Plan Assets or Liabilities; Public Hearing on Proposed Regulations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Public hearing on proposed regulations.

SUMMARY: This document provides notice of a public hearing on proposed regulations relating to mergers and consolidations of retirement plans and transfers of plan assets or liabilities.

DATES: The public hearing will be held on September 30, 1977 beginning at 10:00 A.M. Outlines of oral comments must be delivered or mailed by September 19, 1977.

ADDRESS: The public hearing will be held in the I.R.S. Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue NW., Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT:

George Bradley of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224, 202-566-3935, not a toll-free call.

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed regulations under sections 401 (a) (12) and 414(1) of the Internal Revenue Code of 1954. These proposed regulations appeared in the FEDERAL REGISTER for July 1, 1977 (42 FR 33770).

Internal Revenue Code sections 401(a) (12) and 414(l) were enacted by the Employee Retirement Income Security Act of 1974 (Pub. L. 93-406). Title I of that Act also enacted into law a substantially identical provision to section 414(l) of the Code to be administered by the Department of Labor. For this reason, the Internal Revenue Service has invited representatives of the Department of Labor to be present at the scheduled hearing, and these representatives may address questions to persons making oral presentations at the hearing.

The rules of § 601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR Part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed rulemaking and who desire to present oral comments at the hearing on the proposed regulations should submit an outline of the comments to be presented at the hearing and the time they wish to devote to each subject by September 19, 1977. The outlines should be submitted to the Commissioner of Internal Revenue, Attention: CC:LR:T (LR-252-74), Washington, D.C. 20224. Each speaker will be limited to 10 minutes for an oral presentation exclusive of time consumed by questions from the panel for the Government and answers to these questions.

An agenda showing the scheduling of the speakers will be made after outlines are received from the speakers. Copies of the agenda will be available free of charge at the hearing.

ROBERT A. BLEY,
Director, Legislation and Regulations Division.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 85]

[FRL 782-1]

EMISSION CONTROL SYSTEM PERFORMANCE WARRANTY REGULATIONS

Public Workshops

AGENCY: Environmental Protection Agency.

ACTION: Notice of Public Workshops.

SUMMARY: Notice is hereby given that the Environmental Protection Agency will hold three workshops to discuss the two Notices of Proposed Rulemaking presently pending regarding the Emission Performance Warranty of section 207(b) of the Clean Air Act. Those Notices were published on May 25, 1977 at 42 FR 26742 (regarding the short test of section 207 (b) (1) of the Act), and at 42 FR 26757 (regarding the warranty of section 207 (b) (2) of the Act). The comment periods for these proposed regulations have previously been extended to October 7, 1977, by notices published on August 9, 1977 (42 FR 40221).

DATES AND ADDRESS: The workshops will be held from 9:00-12:00 (warranty) and 1:30-4:30 (short test) at the following locations and dates:

SEPTEMBER 23

John C. Kluczynski Federal Building, Room 3619, 230 South Dearborn Street, Chicago, Ill. 60604.

SEPTEMBER 28

Federal Building, 26 Federal Plaza, Room 305, New York, N.Y. 10007.

SEPTEMBER 30

Pacific Power and Light Company Building, Second floor Auditorium, 920 SW. 6th Street, Portland, Oreg. 97204.

FOR FURTHER INFORMATION CONTACT:

Mr. David Feldman, Mobile Source Enforcement Division, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, 202-755-0298; or Mr. Paul Lapsley, Regulatory Management Staff, Office of Mobile Source Air Pollution Control, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, 202-755-0596.

SUPPLEMENTARY INFORMATION: The goal of these workshops is to meet with those parties potentially affected by the Performance Warranty (section 207 (b) of the Clean Air Act). These parties include individuals engaged in or facing implementation of automotive inspection/maintenance (I/M) programs, the aftermarket parts and service industry, automobile manufacturers and dealers, public interest groups, automobile owner associations, and vehicle owners. The discussion will center around the day-to-day difficulties encountered in setting up and operating I/M programs. Although the Environmental Protection Agency (EPA) is not required to seek this additional public participation, EPA believes that these discussions will facilitate the rulemaking process.

The workshops will be informal. EPA representatives will answer questions regarding the interpretation and rationale for the provisions of the proposed regulations. Comment is requested concerning the anticipated effectiveness of the regulations, and suggestions and criticisms are welcomed.

EPA is particularly interested in eliciting comment on the warranty issues arising as a result of the August 7, 1977, passage of amendments to the Clean Air Act. Among the changes in the Clean Air Act which affect the 207(b) warranty are:

1. A reduction of the performance warranty to 24 months or 24,000 miles, except that with respect to the "emission control device or system," coverage by the performance warranty is for 5 years or 50,000 miles, whichever occurs first.

2. Burden of proof of proving owner's abuse or improper maintenance to invalidate the warranty.

3. Establishment of rights of the owner to have section 207(b) warranty service provided by any establishment using certified parts, to the extent permitted by the Magnuson-Moss Act or any other act affecting warranties.

4. Addition of provisions making it a prohibited Act to not honor a section 207(b) warranty claim.

5. Addition of provisions intended to lessen the anti-competitive effects of the warranty.

Due to these changes the Agency has determined that the warranty aspects of the May 25 publication (42 FR 26759) will be reproposed in total in the near future, with a subsequent period for the submission of written comments allowed. Nevertheless, the Agency wishes to encourage submission of comments to the May 25 proposal with regard to all aspects of the warranty regulations—including suggestions for modifications or additions under the new legislation. Those parties wishing to withhold comment until viewing the revised publication should note that the comment period will be held to a maximum of 60 days given the fact that much of the reproposal will be unchanged from the present package.

The above does not apply to the Short Test Establishment proposal of May 25 (42 FR 26742) which is unaffected by the new Clean Air Act Amendments and thus is not expected to be reproposed. All comments to that aspect of the Emissions Performance Warranty must be submitted by October 7, 1977, to ensure full consideration prior to final rulemaking.

With regard to the Short Test Establishment proposal, EPA is particularly interested in discussing:

1. Suggestions for a uniform format to be used in recording the results of short tests administered in inspection lanes.

2. Who would most appropriately establish the short test cutpoints—EPA or the individual states which would be employing the short tests in I/M programs?

3. Anticipated problems in assuring that vehicles are tested under proper conditions (e.g., engine operated at 2500 rpm for 15-30 seconds prior to initiating idle test, vehicle in neutral during idle test, proper inertia weight used in loaded test, etc.)

4. Suggestions on labeling of vehicles to make certain that they are properly identified by the inspection lane operators (i.e., should the necessary information be incorporated into the vehicle identification number or be placed on an under-the-hood label).

Dated: August 23, 1977.

RICHARD D. WILSON,
Acting Assistant Administrator for Enforcement.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[46 CFR Part 176]

[CGD 76-162]

EXPIRATION DATE STICKERS

Proposed Requirements

AGENCY: Coast Guard, DOT.

ACTION: Proposed rule.

SUMMARY: The Coast Guard is proposing to amend the regulations for small passenger vessels under 100 gross tons that carry passengers or passengers for hire under the provisions of Subchapter T by requiring them to display an expiration date sticker that terminates concurrently with the vessel's Certificate of Inspection. The purpose of this proposed rule is to make the public aware of small passenger vessels not in compliance with the Coast Guard inspection requirement and thereby reduce the likelihood of similar casualties.

DATE: Comments must be received on or before November 28, 1977.

ADDRESSES: Comments should be submitted to Commandant (G-CMC/81), U.S. Coast Guard, Washington, D.C. 20590. Comments will be available for examination at the Marine Safety Council (G-CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Captain George K. Greiner, Marine Safety Council (G-CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590 (202-426-1477).

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this proposed rulemaking by submitting written views, data, or arguments. Each person submitting a comment should include his name and address, identify this notice (CGD 76-162) and the specific section of the proposal to which his comment applies, and give the reasons for his comment. The proposal may be changed in light of comments received. No public hearing is planned, but one may be held at a time and place to be set in a later notice in the FEDERAL REGISTER if requested in writing by an interested person raising a genuine issue and desiring to comment orally at a public hearing.

DRAFTING INFORMATION

The principal persons involved in drafting this proposal are: Mr. John A. Crawford, Project Manager, Office of Merchant Marine Safety, and Lieutenant William R. Kerivan, Project Attorney, Office of the Chief Counsel.

DISCUSSION OF THE PROPOSED REGULATION

The National Transportation Safety Board stated recently, in the review of the foundering of a small passenger vessel, that Coast Guard safety regulations for small passenger vessels are not fully effective unless the public knows that these vessels are required to carry a current Certificate of Inspection. The Board further recommended that the boating public (passengers and owners) be made more aware of the existing laws and regulations covering small passenger vessels.

The Coast Guard believes that this may best be accomplished by the issuance of a distinctive inspection sticker. When an inspection of small passenger vessels determines that they are in compliance with all applicable rules and regulations they will be issued an inspection sticker.

The sticker will state the expiration date of the vessel's Certificate of Inspection and must be displayed on the exterior of the vessel so that it is visible

V42167 AUG 29 77 UMI

to passengers or prospective boarding teams. The Coast Guard believes that this will deter the operation of non-certificated small passenger vessels because the public and Coast Guard boarding teams will be able to easily recognize those vessels not in compliance with the inspection regulations.

In consideration of the foregoing, it is proposed that Part 176 of Title 46 of the Code of Federal Regulations be amended by adding a new § 176.01-45 to follow § 176.01-40 and to read as follows:

§ 176.01-45 Certification expiration date sticker.

(a) The owner of a vessel that is issued a Certificate of Inspection under the provisions of this subchapter shall ensure that a Certification Expiration Date Sticker CG------ is affixed on a place that is

(1) On the vessel;

(2) On a glass or smooth metal surface from which the sticker may be easily removed.

(3) Readily visible to each boarding passenger and to patrolling Coast Guard law enforcement personnel; and

(4) Acceptable to the Coast Guard marine inspector.

(b) A Certification Expiration Date Sticker CG------ is provided by the Officer in Charge, Marine Inspection upon issuance or renewal of the Certificate of Inspection.

NOTE.—Because of different vessel configurations more than one CG------ sticker may be required on some vessels to comply with the requirements of this section.

(Sec. 3, 70 Stat. 152, 46 U.S.C. 390b, Sec. 6(b), 80 Stat. 937, 49 U.S.C. 1655(b)(1), 49 CFR 1.46(b).)

NOTE.—The Coast Guard has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: August 19, 1977.

O. W. SILER,
Admiral,
U.S. Coast Guard Commandant.

[BMCS Docket No. 77; Notice No.77-6]
[NHTSA Docket No. 1-11; Notice 07]

MOTOR CARRIER SAFETY
Rear End Underride Protection

AGENCY: Federal Highway Administration and National Highway Traffic Safety Administration, DOT.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The Department of Transportation issues this advance notice to solicit comments and information on revisions to the Federal Motor Carrier Safety Regulations Section 393.86 and the Federal Motor Vehicle Safety Standards Part 571. Such amendments would consider the means for providing improved rear end protection on heavy motor vehicles manufactured after a certain date to prevent the underriding of vehicles which impact the rear of these heavy vehicles.

DATE: Comments must be received on or before November 30, 1977.

ADDRESS: BMCS Docket No. 77, Room 3402, Bureau of Motor Carrier Safety, 400 Seventh Street SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Mr. D. W. Morrison, Chief, Vehicle Requirements Branch, Bureau of Motor Carrier Safety (202-426-1700); or Mrs. K. S. Markman, Attorney, Office of the Chief Counsel (202-426-0786), Federal Highway Administration. Mr. Timothy Hoyt, Office of Crashworthiness, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, D.C. 20590 (202-426-2264).

SUPPLEMENTARY INFORMATION: The Department of Transportation has in effect regulations applicable to commercial vehicles operated in interstate or foreign commerce (Section 393.86 of the Federal Motor Carrier Safety Regulations) which address the problem of rear underride. In 1969 the Department of Transportation proposed rulemaking on Rear Underride Protection for all trailers and trucks with gross vehicle weight rating over 10,000 pounds. The Department concluded in June of 1971 that the safety benefits achievable in terms of lives and injuries saved would not be commensurate with the cost of implementing the proposed requirements.

The principal reasons for issuing this advance notice are: First, the need to reassess the requirements of Section 393.86 of the FMCSR and to reassess the need for a Federal motor vehicle safety standard. The condition of traffic and the mix of large and small motor vehicles in highway transportation has changed and will continue to change. The question now is whether the present rear end protective requirements are adequate. Second, Congressional interest is high as evidenced by the Subcommittee for Consumer of the Senate Committee on Commerce, Science, and Transportation which held oversight hearings on auto-truck crash safety on March 16, 1977. Third, the Insurance Institute for Highway Safety (IIHS) of Washington, D.C., recently petitioned for more stringent rear end protection than currently required by the Department of Transportation.

A research report accompanied that petition containing data concerning impacts of compact and subcompact cars against two types of rear end protection devices mounted on trailers. Motion pictures documented these crash tests. One of the devices met the present underride requirements of the FMCSR (49 CFR 393.86). The other device not only met but exceeded the present protective standards required by Section 393.86, being lower and stronger with little or no added weight. That device was designed by the researcher. Complimentary copies of the report, "Eliminating Automobile Occupant Compartment Penetration in Moderate Speed Truck Rear Underride Crashes: A Crash Test Program," are available upon request from the: Insurance Institute for Highway Safety, Attention: Dr. William Haddon, Jr., Watergate Six Hundred, Washington, D.C. 20037.

The intent of considering more stringent rear end underride prevention requirements (lower and stronger) and broader application of those requirements would be to reduce the severity of accidents in which passenger cars collide with the rear ends of heavy motor vehicles. When an accident of this type occurs, the front end of the car can penetrate uder the rearmost structure of the heavy vehicle. The result can be serious injury to, or death of, occupants of the passenger car.

Engineering changes in the design and manufacture of heavy vehicles could reduce the severity of these accidents. Configuration of the rear end of the truck or trailer so that the substantive structure of the front end of a passenger car would impact a rear end protection device could prevent underride and dissipate crash forces thereby decreasing the severity of the accident.

The potential scope of the problem can be examined through existing information on rear end collisions. In 1974, 575 accidents which involved rear end collisions with commercial motor vehicles were reported by motor carriers subject to the requirements of 49 CFR 394. Those accidents resulted in 57 deaths and 727 injuries. In 1975, the comparable figures were 936 accidents, 49 deaths, and 1,268 injuries. Increased production, sale and use of smaller passenger cars can compound the problem. Estimates from 1976 data are 988 accidents, 87 deaths and 1,258 injuries. It should be noted that these data are only a subset of all truck/auto accidents, since they are limited to reports submitted by interstate commercial carriers. These accident data cover rear end collisions where both vehicles are moving, where truck are stopped for traffic lights, or where trucks are parked. The FHWA accident data does not show other causal factors such as speed of automobile, alcohol involvement, or other automobile driver effects. To determine the effect of these factors special studies utilizing followup questionnaires or field investigations would be required. Notwithstanding who was at fault, there is a need to reassess the adequacy of the rear end protection requirements to improve the survivability of persons involved in these type collisions.

Information available from the National Highway Traffic Safety Administration's (NHTSA) Fatal Accident Reporting System (FARS) and State Accident Summary data indicate the incidence of automobile rear end collisions with trucks may be as high as 40,000 collisions, and result in as many as 200 to 300 fatalities and approximately 8,600 personal injuries. The extent to which underride protection could have reduced the severity cannot currently be ascertained.

The imposition of more stringent requirements for rear underride protection was first considered in 1967, when an Advance Notice of Proposed Rulemaking (ANPRM) was issued (32 FR 200 on October 14, 1967) inviting the public to comment on the question of whether a Federal motor vehicle safety standard on underride protection should be issued under the authority of Section 103 of the National Traffic and Motor Vehicle Safety Act of 1966, 15 U.S.C. 1392 (32 FR 14279). On March 13, 1969, the Department issued a Notice of Proposed Rulemaking, which proposed a rear underride protection standard applicable to trailers and trucks having a gross vehicle weight rating of more than 10,000 pounds, except for pole trailers and truck tractors (34 FR 5383). That notice proposed to require a maximum clearance of 18 inches for rear end protection devices and to require those devices to withstand a static forward load of 75,000 pounds. A second Notice of Proposed Rulemaking issued on August 11, 1970 (35 FR 12956), reduced the proposed loading requirement to 50,000 pounds but retained the 18-inch maximum ground clearance feature.

The proposed Federal motor vehicle safety standard on rear underride protection evoked a large number of comments. The comments argued that the proposed standard would impose impracticable burdens on the motor carrier industry, and that the requirement for an underride guard that fell within 18 inches from the ground (with the vehicle unloaded) would create severe operational difficulties. Finally, the NHTSA, which administers the Federal motor vehicle safety standards, terminated the effort to create a standard on rear underride protection in a notice issued on June 15, 1971 (36 FR 11750). The agency concluded that the benefits achievable by such underride devices were few and were outweighed by the cost of implementing the requirements.

Nevertheless it is the conclusion of the Department of Transportation that the present requirements should be reexamined because the problem of rear underride accidents remains, and it is likely to become more severe as automobiles become smaller and are used in greater numbers. Improved rear end protection devices on heavy motor vehicles that may contribute substantially to saving lives and preventing injuries may be possible without incurring either unacceptable costs or unacceptable restrictions on operations.

Section 393.86 currently requires every commercial motor vehicle, except truck tractors, pole trailers, and vehicles engaged in driveaway-towaway operations, manufactured after 1952 to be equipped with a rear end protection device constructed in such a manner that the clearance from the ground does not exceed 30 inches with the vehicle unloaded; that the device shall not be more than 24 inches forward from the rear of the vehicle, and that the width shall not be less than 18 inches inboard from each side. Vehicles which are constructed in a manner in which the body, chassis, wheels or other parts afford the equivalent protection need not have additional devices. The rule has not been changed in 25 years.

It is to be noted that safety authority of the FMCSR covers only commercial vehicles engaged in interstate commerce. To the extent, however, that States have adopted the FMCSR as intrastate requirements they tend to influence the application of new or more stringent requirements on fleets under State jurisdiction. At present, 30 States have adopted § 393.86 as law. Further, the issuance of a Federal motor vehicle safety standard by the NHTSA could extend underride protection criteria to all trucks and trailers manufactured after the effective date of the standard.

With respect to research on this problem, a few studies have been directly associated with vehicle penetration into the rear of heavy vehicles. The recent IIHS study is the latest. The NHTSA completed a study in 1971 entitled "Underride/Override of Automobile Front Structures in Intervehicular Collisions." It was conducted by Cornell Aeronautical Laboratory, Inc. (now CALSPAN, Inc.), in Buffalo, New York. Their principal recommendations were:

1. Energy absorbing (yielding) rear underride guards for optimum protection of large sized passenger cars.

2. Additional testing needed for underride guard strength and width requirements.

3. Underride guard to ground clearance should not exceed 24 inches and preferably 18 inches for smaller cars.

4. Underride protection should be mounted on the extreme rear of the vehicle.

The FHWA has a major multiyear heavy truck research project underway, including finite examination of a selected nationwide sample of truck collisions which should provide more information on automobile-truck collisions. These data will not be available for about another year.

Currently, the FHWA is formulating a new research effort to establish the level of rear underride protection needed to reduce injuries and fatalities in a variety of realistic accident situations. This will be an attempt to develop a number of rear underride designs to determine the desired level of performance, giving due consideration to cost, weight, and operational problems. Results of this contract effort will be used in determining what form any amendments to FMCSR Section 393.86 and FMVSS Part 571 should take.

In the mean time, public comments are requested on the following specific areas of interest to assist in developing effective underride performance requirements for heavy duty motor vehicles:

1. What should be the maximum allowed clearance between the ground and the bottom of the rear underride protection device with the vehicle unloaded, and why?

2. How far forward should the device be permitted from the rearmost protrusion of the vehicle, and why?

3. What should the longitudinal static strength be, and why?

4. What considerations should be given to other parts of the rear end of the vehicle such as tires, axles, body, and frame?

5. How wide should the protective device be? Should it extend its protection to the entire width of the vehicle's rear end, or why not?

6. What vehicles, if any, should be excluded from the underride requirements, and why?

7. Should some vehicles because of operational difficulties, such as loading or unloading, be permitted to use hinged or folding devises? A sketch or photograph may clarify.

8. What are the initial costs and weights, fuel operating costs and load revenue losses, dimensions, and strengths of rear end protection devices presently installed on new motor vehicles? Also, what are the production volumes which this information is based on?

9. What percentage of the annual commercial vehicle mileage is traveled with loads: (a) within 200 pounds of GVWR, (b) within 100 pounds of CVWR, (c) within 50 pounds of GVWR, (d) at GVWR, (e) in excess of GVWR?

10. What percentage of trucks and trailers have structures that would effectively prevent underride located permanently within (a) 15 inches of the rearmost protrusion of the vehicle, (b) 24 inches of the rearmost protrusion of the vehicle?

11. What rear end protection devices would you recommend? What vehicle types would these be applicable to? If designs are available please furnish drawings, material specifications and estimated costs and weights. Also, please estimate fuel operating costs and load revenue losses.

Those desiring to comment on this advance notice of proposed rulemaking are asked to submit in writing 4 copies of their views, data, and arguments. All communications received will be considered before taking action to propose revisions to the present requirements for underride protection. Any proposed ideas contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date, for examination by interested persons in the docket room of the Bureau of Motor Carrier Safety, Room 3402, 400 Seventh Street SW., Washington, D.C. 20590. If it is determined to be in the public interest to proceed further after summarizing the comments and considering the available data and comments received in response to this advance notice, a notice of proposed rulemaking will be issued.

V 42 167 AUG 29 77 UMI

The principal authors of this notice are Mr. D. W. Morrison, Vehicle Requirements Branch (BMCS), and Mrs. K. S. Markman, Office of Chief Counsel (BMCS).

This advance notice of proposed rulemaking is issued under the authority of Section 204 of the Interstate Commerce Act (49 U.S.C. § 304), Section 6 of the Department of Transportation Act (49 U.S.C. § 1655), and the delegations of authority by the Secretary of Transportation and the Federal Highway Administrator at 49 CFR 1.48 and 49 CFR 301.60, respectively. This notice is also promulgated under the authority of the NHTSA found at: Sec. 103, 112, 119, Pub. L. 89-563, 80 Stat. 718 (15 U.S.C. 1392, 1401, 1407); delegation of authority at 49 CFR 1.50.

Issued on August 25, 1977.

ROBERT A. KAYE,
Director, Bureau of Motor Carrier Safety, Office of Safety, Federal Highway Administration.

ROBERT L. CARTER,
Associate Administrator, Motor Vehicle Programs, National Highway Traffic Safety Administration.

Office of Hazardous Materials Operations

[49 CFR Parts 172, 173, 174, and 176]

[Docket No. HM-143; Notice 76-11]

BLASTING AGENTS

Public Conference

AGENCY: Materials Transportation Bureau, DOT.

ACTION: Notice of Public Conference.

SUMMARY: A Public Conference will be held on September 23, 1977, in Room 3201 of the Trans Point Building located at 2100 Second Street SW., Washington, D.C. The Conference will open at 9:30 a.m., and will be for the purpose of discussing the proposals in Docket HM-143; Notice 76-11. This will be an informal conference and not a judicial or evidentiary type hearing. There will be no cross-examination of persons presenting statements.

DATES: Date of Conference September 23, 1977. Docket No. HM-143; Notice 76-11 will be reopened on September 16, 1977, and comments may be submitted through October 10, 1977. All comments should be addressed to the Section of Dockets at the following address.

ADDRESSES: Any person wishing to present oral or written statements at the Conference should notify the Section of Dockets, Office of Hazardous Materials Operations, Department of Transportation, Washington, D.C. 20590 (202-426-2077) prior to September 20, 1977.

SUPPLEMENTARY INFORMATION: On November 26, 1976, the Materials Transportation Bureau (MTB) published in Docket HM-143 a Notice of Proposed Rulemaking (41 FR 52083) which proposed the following amendments to Parts 172, 173, 174, and 176 of the Department's Hazardous Materials Regulations:

1. Remove the shipping name, Nitro Carbo Nitrate (NCN);
2. Add a new shipping name, Blasting Agent, n.o.s., and a new class, Blasting Agent;
3. Provide packagings for blasting agents; and
4. Provide a new label and a new placard for blasting agents.

On July 25, 1977, Monsanto Company petitioned MTB for an informal conference on blasting agents, in accordance with 49 CFR § 102.25. Monsanto objected to the proposed rule on the general ground that the proposal would create a new hazard class based not upon the intrinsic characteristics, kind, or degree of hazard presented by the material but upon the material's end use. In support of their petition for a public conference, Monsanto argued that NCN is an oxidizer with an excellent safety record and it was wrong in principle to include in a single class materials which differ greatly in the degree and kind of hazard simply because they may be used for the same purpose. Further, Monsanto believes if the facts were fully understood the proposal would be either dropped or modified to retain the oxidizer classification for NCN. Monsanto asserted that there is wide-spread opposition to the proposal and that a public conference could explore the objections of other interested parties in addition to permitting Monsanto to explain its position and answer questions from the Office of Hazardous Materials Operations.

AUTHORITY: 49 U.S.C. 1803, 1804, 1808; 49 CFR 1.53(e) and paragraph (a)(4) of App. A to Part 102.

Issued in Washington, D.C., on August 24, 1977.

ALAN I. ROBERTS,
Director, Office of Hazardous Materials Operations.

ADVISORY COUNCIL ON HISTORIC PRESERVATION

EXECUTED MEMORANDA OF AGREEMENT

Pursuant to Section 800.6(a) of the Council's "Procedures for the Protection of Historic and Cultural Properties" (36 CFR Part 800), notice is hereby given that the following Memoranda of Agreement were executed during the months of June, July, and August 1977. The Memoranda of Agreement were executed in fulfillment of Federal agencies' responsibilities for protection of properties on or eligible for inclusion in the National Register of Historic Places in accordance with Section 106 of the National Historic Preservation Act of 1966 (16 U.S.C. 470f, as amended, 90 Stat. 1320).

Los Esteros, Guadalupe County, New Mexico, affected by the proposal to construct the Los Esteros Dam and Reservoir, undertaken by the U.S. Army, Corps of Engineers (6/6/77).

Old Stone Star Brewery, Bexar County, San Antonio, affected by the restoration of the Old Star Brewery complex, undertaken by the U.S. Department of Commerce, Economic Development Administration (6/13/77).

Knife River Indian Villages National Historic Site, Billings County, North Dakota, affected by archeological investigations, undertaken by the U.S. Department of the Interior, National Park Service (6/13/77).

Historic Property at 401 South Mill Avenue, City of Tempe, Maricopa County, Arizona, affected by the completion of the University-Hayden Butte Neighborhood Development Program, undertaken by the City of Tempe (6/15/77).

Middletown South Green Historic District, Middletown, Connecticut, affected by the development of low income apartments for the elderly, undertaken by the U.S. Department of Housing and Urban Development (6/21/77).

700-714 Spruce Street, Society Hill Historic District, Philadelphia County, Philadelphia, Pennsylvania, affected by the proposal to approve HUD Project No. PA-A-4-21 in the Washington Square East Urban Renewal area, undertaken by the U.S. Department of Housing and Urban Development (6/22/77).

Hudson-Meng Bison Kill Site, Nebraska, affected by the permit for archeological research, undertaken by the U.S. Department of Agriculture, Forest Service (7/7/77).

Riverside Historic District, Evansville, Indiana, affected by the proposal to fund a Housing Rehabilitation Program, undertaken by the City of Evansville, Department of Metropolitan Development (7/11/77).

Cape Lookout National Seashore, Carteret County, North Carolina, affected by the use of a trailer for temporary restrooms, undertaken by the U.S. Department of Interior, National Park Service (7/11/77).

Lander Cutoff, Oregon Trail, Lincoln County, Wyoming, affected by improvements to U.S. 89 (Wyoming Project F-010-3(19)), undertaken by the U.S. Department of Transportation, Federal Highway Administration (7/11/77).

F. E. Booth Company, F. Alioto Fish Company Pier, Point Reyes National Seashore, California, affected by their proposed demolition, undertaken by the U.S. Department of the Interior, National Park Service (7/13/77).

Navajo Indian Reservation, New Mexico, affected by the proposal to authorize landmodifying activities to facilitate the development of the Navajo Indian Irrigation Project, undertaken by the U.S. Department of the Interior, Bureau of Indian Affairs (7/13/77).

Bank Street Historic District, New London, Connecticut, affected by the construction of a boardwalk, undertaken by the New London Redevelopment Agency (7/20/77).

Bank Street Historic District, New London, Connecticut, affected by the facade and interior improvement program, undertaken by the New London Redevelopment Agency (7/20/77).

Historic Properties, City of Albany, New York, affected by the funding of community development projects, undertaken by the City of Albany Urban Renewal Agency (7/21/77).

Haydenville Historic Town, Haydenville, Hocking County, Ohio, affected by the abandonment of the rail line between Nelsonville and Oldtown undertaken by Interstate Commerce Commission (7/22/77).

Santa Cruz River Park Archeological District and Convento, Arizona, affected by the development of the Santa Cruz River Park undertaken by the City of Tucson (7/25/77).

Alamo Canyon, Bandelier National Monument, New Mexico, affected by the proposal to conduct a data recovery program at archeological sites numbered LA-13659 and LA-12117, undertaken by the U.S. Department of the Interior, National Park Service (7/25/77).

Historic Properties, Norfolk, Virginia, affected by the proposal to execute the Downtown-West Conservation Project, undertaken by the Norfolk Redevolpment and Housing Authority (7/25/77).

Historic Properties, Seattle, Washington, affected by the implementation of the project I-90-1 from the Junction of SR 5 to Junction of SR 405, undertaken by the U.S. Department of Transportation, Federal Highway Administration (7/31/77).

Main Post Office, Cleveland, Cuyahoga County, Ohio, affected by the proposal to replace the exterior façade, undertaken by the U.S. Postal Service (8/1/77).

Pipestone Architectural District, Pipestone, Minnesota, affected by the proposal to fund Year III, Community Development Project-Historic Preservation of Central Business District, undertaken by the City of Pipestone (8/3/77).

Ninety Six National Site, Greenwood County, South Carolina, affected by archeological investigations, undertaken by the U.S. Department of the Interior, National Park Service (8/3/77).

Lamberton Street Interceptor, Trenton, New Jersey, affected by the construction of a sewer interceptor, undertaken by the Environmental Protection Agency (8/15/77).

North Fork Lake and Granger Lake Archeological Districts, Williamson County, Texas, affected by the construction of North Fork Lake and Granger Lake, undertaken by the U.S. Army, Corps of Engineers (8/15/77).

Historic Properties, Baltimore, Maryland, affected by the construction of City Boulevard and Interstate Highway I-395, undertaken by the U.S. Department of Transportation, Federal Highway Administration (8/15/77).

ROBERT M. UTLEY,
Deputy Executive Director.

CIVIL AERONAUTICS BOARD

[Docket Nos. 31053, 31054, 31055, 31058, 31310; Order 77-8-109]

ALLEGHENY AIRLINES, INC.

Order Dismissing Complaints and Soliciting Comments on Use of Discount Fares to Stimulate Long-Term Efficiencies

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 23rd day of August 1977.

Alegheny Airlines, Inc. (Allegheny) proposes a one-way "SimpleSaver" fare in nine major, dense-traffic markets.[1] Allegheny does not hold nonstop authority in any of the markets and operates through-plane service in only a few. It is a minor traffic participant in all the markets. The proposal is made as a one-year experiment; the fares are discounted approximately 30 percent from Allegheny's normal coach fares; and their availability would be limited to the 35-percent capacity limitation now applicable for "Freedom" fare travel. The fares are not combinable with other fares for beyond-segment travel, and are subject to a total of 11 blackout days around Thanksgiving, Christmas, and the New Year. As indicated, the fare is necesarily available inly in multistop or connecting service by virtue of Allegheny's certificate authority.

Allegheny supports its proposal on the basis of what the fares will produce for its system—it makes no attempt to evaluate the effect of the fares if extended more widely throughout the domestic airline network, and alleges that its concept is closely patterned after the "economy" fare offered by Texas International Airlines, Inc. (TXI) on its Dallas/Ft. Worth-Los Angeles multistop service.[2]

---

[1] Revisions to Airline Tariff Publishing Company, Agent, Tariffs CAB Nos. 259 and 142. The markets: Boston-Chicago, Boston-St. Louis, Chicago-New York, Chicago-Providence, Chicago-Hartford, Chicago-Albany, New York-Detroit, New York-Louisville. Allegheny withdrew the fare in the New York-Cincinnati market.

[2] Order 77-5-68, May 13, 1977.

V42167 AUG 29 77 UMI

Allegheny's justification rests substantially upon an alleged significant price elasticity in the markets involved. "A reduction in the price of air transportation," the carrier says, "results in a more than proportionate increase in the number of passengers who can afford to travel." The carrier clearly sees the "SimpleSaver" as highly elastic since it forecasts a 70 30-percent generation' diversion ratio, and a resulting $3.6 million net contribution to its profit.[5] It also refers to its inferior operating authority in these nine markets, and consequent small participation, as "built-in" safeguards against significant diversion from the primary carriers. Finally, Allegheny contends that "even with strict application of capacity controls, so as to assure that no full-fare passengers traveling over the intermediate segments will be displaced by the discount passengers, there will be more than adequate capacity to accommodate the projected 'SimpleSaver'-fare passengers."

American Airlines, Inc. (American), Northwest Airlines, Inc. (Northwest), Trans World Airlines, Inc. (TWA), and United Airlines, Inc. (United) have filed complaints covering a wide range of issues. In their broadest outline, the key targets are (1) "ratesetting" by a minor participant with minimal exposure to risk; (2) certain structural problems, as detailed below, which result from differences in the way local service carriers and trunkline carriers are regulated for ratemaking purposes; (3) the economic "dead-weight loss" of an artificial pricing situation which will shift traffic from lower-cost nonstop to higher-cost multistop and or connecting services; (4) Allegheny's narrow calculation of "generation" and its implication that the "SimpleSaver" fare would be economically sound on an industry basis; and (5) the investigation now in progress of an allegedly "less disruptive" "SimpleSaver" prototype—the Dallas Fort Worth-Los Angeles "economy" fare offered by TXI—which allegedly should be resolved before further "experiments" of this type are begun.

The allegations relating to "structural problems" focus upon Allegheny's flexibility as a local service carrier both to directly subsidize "SimpleSaver" fares by pricing the short-haul intermediate segments up to 130 percent of the Phase 9 formula coach fare,' to offset revenue loss over the long-haul "SimpleSaver" multisegment markets, and to "take" a general fare increase for itself by raising fares in its monopoly markets any time it wishes up to the 130-percent level. The complainants contend that trunkline carriers are, on the other hand, denied this cross-subsidy flexibility, and that "SimpleSaver" will eventually cost them a needed general fare increase. It is argued that they either allow Allegheny to siphon off their traffic and reduce their load factors, or that they match the fares. In the former case, future calculations of return on investment will disallow certain real costs because the trunkline carriers will have failed to meet the load-factor standard. In the latter case, certain real costs will be disallowed because of the discount-fare adjustment. In essence, this is a "Catch-22" situation from the complainants point of view.

The argument that traffic will shift from less costly nonstop services to more costly multistop services as a result of the "SimpleSaver" price advantage is most fully developed by TWA. TWA argues that long-haul traffic, which should be most efficiently transported on nonstop flights, may be diverted to multistop flights by an arbitrary pricing scheme which reflects more the quality of service than the cost of producing it. Thus, the essence of TWA's point is that to meet Allegheny's fare the nonstop carriers will be forced to adopt Allegheny's short-haul approach, even though it conflicts with the underlying long-haul nature of their operations.

All of the complainants contest Allegheny's estimate of new traffic "generation" from the fare, contending that its narrow focus, restricted as it is to its own operations, conceals a bald-faced grab for its competitor's traffic. The complainants agree in contending that competitive response in matching the fare requires that it be evaluated from the standpoint of overall industry generation, and that diversion of revenue from major operators in the markets must be netted against the profits which Allegheny foresees for itself. American and Northwest estimate the "worst-case" systemwide diversion of revenue from the "SimpleSaver" fare as "more than $7 million" and "$7.6 million", respectively. This compares with Allegheny's projected $3.6 million profit for its own operation.

The final point made by the complainants is that "SimpleSaver' is not a "novel experiment" deserving of an opportunity to prove itself but, rather, is only a derivative of an earlier "experiment" instituted by TXI, now currently under investigation. They caution against further expansion of an as yet inadequately tested concept and interim extension of that experiment into additional markets. Several complainants also point out that "SimpleSaver' is potentially much more disruptive than TXI's fare, both because of the greater number of markets involved (nine versus TXI's one) and the fact that Allegheny has a much larger presence in several of these markets.[6]

In answer Allegheny alleges that it will "enforce capacity control provisions to assure no impact upon passengers in the intermediate and beyond markets"; sharply contests claims that all of its "SimpleSaver" traffic will be diverted from other carriers (without, however, providing any estimate of that portion of "generated" traffic which would not otherwise have flown); and argues poverty, deficits and its evident need for additional revenue. The carrier further contends that the estimates of revenue dilution put forth by American and Northwest are overstated because they take no account of generation from surface modes, which Allegheny anticipates. Finally, Allegheny contends that the specific nature of these particular markets (principally stagnant long-term traffic growth) and the inherent inferiority of its multistop service create natural restrictions on the spread of a similar fare approach throughout the domestic system.

Upon consideration the Board finds that the complaints do not set forth sufficient facts to warrant investigation and consequently the requests for suspension will be denied and the complaints dismissed.

In our last formal evaluation of discount fares, Phase-5 of the DPFI, we observed that "the tension between the long and short-term impact of promotional fares poses a serious dilemma for economic regulation."[8] We said that the difficulty with the argument in favor of discount fares is "that there is no showing on this record (Phase 5) which would support a finding that the additional traffic volume generated by the discount fares results in significantly lower overall unit costs in the long run. Rather the evidence is to the contrary."[7] At that time, discount fares seemed profitable in the short run but the record clearly showed that they burdened profits over the longer term—that carriers were arranging equipment purchases and operating flights based upon gross traffic (including those passengers traveling at so-called "fill-up" fares) and that, once having introduced a discount fare, carriers found it competitively difficult to withdraw it.

In the intervening years since the Board evaluated the role of discount fares, operating conditions in the industry have changed substantially. Generally speaking, carriers are replacing and revamping present aircraft and are not investing in major re-equipment programs. The carriers are adding seats in planes already owned and operating. The cost of fuel is now three times the level just a few years ago, and amounts to some twenty percent of total operating cost. In a word, the economics of the industry is considerably tighter than when we expressed our concerns that an unregulated array of discount fares could lead to normal-fare passengers shouldering the cost of excess capacity. We intend to evaluate Allegheny's fare against this background.

In its request for suspension, TWA, in particular among the complainants, argues that nonstop service is the most

[5] Allegheny is essentially projecting a more-than-tripling of traffic from a less-than-one-third reduction in price. This is, however, based upon traffic generation to its own services, as opposed to overall attraction of new air travel in the markets, contrary to the presumption in Phase 5 of the Domestic Passenger-Fare Investigation, (DPFI) that estimates of generation should relate to the system as a whole.

[8] Order 72-12-18, December 5, 1972.

[7] Ibid., p. 47.

efficient to provide, as well as the most satisfactory for the consumer. We do not dispute this contention in the abstract. However, in particular circumstances and markets, nonstop service may not be the most economic to provide from the viewpoint of the air transportation system as a whole. The answer may depend on the carriers' various operations in particular markets and on the behavior of traffic in the market place. Stated differently, there may be long-term cost savings to carriers, particularly important to them in the present high-cost environment, which can be fairly traded for offering the traveling public a special lower price for an admittedly lesser quality service.

This is the essential question posed by such fare concepts as the "SimpleSaver" fare: Whether or not long-term benefits—which may be gained by encouraging traffic to switch from nonstop services to multistop/connecting services by appropriately structured fare discounts — outweigh considerations of short-run profit-impact. Inducing long-haul traffic to function as "fill-up" traffic on multistop/connecting flights, being operated in any event to serve intermediate-point markets, may enable the industry to provide adequate services to the longer-haul traffic market with less capacity. The multistop / connecting flights serve the longer-haul market as a common product, and the longer-haul traffic which can switch to such services can be carried at fares reflecting the marginal costs of "fill-up" traffic rather than at the full cost of a nonstop service. Thus, a special lower fare for the "secondary" service has the potential of enabling the carriers to provide adequate service at lower cost and, at the same time, to offer a price/quality of service option to the traveling public.

This price/quality option is premised on two crucial assumptions: that the "SimpleSaver" market traffic will be carried on a "fill-up" basis and will not burden the primary traffic (the local traffic in the respective intermediate markets) in terms of higher fares or reduced service quality, and that the longer-haul carriers reduce nonstop capacity to reflect the reduced demand for this service.[9] If these assumptions prove untrue and are not achieved, the economic justification for the price/service option is destroyed.

The air transport network is a complex of intertwined flights and many "nonstop" markets of any distance, such as New York–Chicago for the complainant carriers in this case, are in fact "multi-stop" flights in other "nonstop" markets. Flights are operated for a variety of reasons which go beyond optimizing load factor; flights are operated for aircraft positioning purposes, to provide primarily mail and cargo service, to pick up high-revenue feeder traffic for carriage to beyond points or to supplement through traffic with traffic at intermediate points, etc. Thus, it is not always easy to distill the primary purposes of a flight from the bundle of services offered, and forecasting the marketplace reaction to application of theoretically sound pricing concepts is complex indeed. For these reasons, the Board has decided that, although we will dismiss the complaints, we will at the same time solicit comments from industry and any interested persons on whether or not, in view of present circumstances in the industry, we should encourage carrier discount-fare filings premised on a price/quality of service option such as is discussed in this order. We do not intend this request for views to impinge in any way on the formal rulemaking review of discount-fare policy as announced in the Board's advance notice of proposed rulemaking (PSDR-47). In summary, our action in this order approves what we believe to be a sound pricing concept, but seeks comments to assist us in our consideration of future discount-fare proposals in which the same or similar concepts may appear.

Accordingly, pursuant to the Federal Aviation Act of 1958, and particularly sections 204(a), 403, 404, and 1002:

It is ordered, That: 1. The complaints in Dockets 31053, 31054, 31055, and 31058 be dismissed;

2. All persons interested in commenting on the question of whether or not discount-fare pricing, through cost-quality of service tradeoffs, can encourage a more efficient reallocation of resources and lower fares be directed to file an original and three copies of such comments in Docket 31310 no later than 15 days after service of this order. Responsive comments may be filed no later than thirty days after service of this order.

3. Individual members of the general public who wish to express their interest as consumers by informally taking part in the proceeding may do so by submitting comments in letter form to the Docket Section, Docket 31310, without having to file additional copies; and

4. Copies of this order will be served upon all certificated scheduled carriers.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,[9]
Secretary.

[FR Doc.77-24986 Filed 8-26-77;8:45 am]

[9] Two other factors are involved. A discount is necessary to cause longer-haul passengers to use the inferior multistop service and can be justified by the lower marginal costs of carrying this traffic on multistop service. A more difficult question is how much of a discount is needed to cause this shift. Also of concern is the quality of service vis-a-vis the price paid by the passengers using the intermediate-point services.

[9] All members concurred.

[Docket No. 30635]

ARIZONA SERVICE INVESTIGATION

Hearing

Notice is hereby given, pursuant to the provisions of the Federal Aviation Act of 1958, as amended, that a hearing in the above-entitled proceeding will be held commencing on October 4, 1977, at 9:30 a.m. (local time) in the Regency Ballroom D, Hyatt Regency Hotel, 122 N. 2d Street, Phoenix, Arizona, before the undersigned Administrative Law Judge.

For information concerning the issues involved and other details in this proceeding, interested persons are referred to the Prehearing Conference Report, served on August 8, 1977, and other documents which are in the docket of this proceeding on file in the Docket Section of the Civil Aeronautics Board.

Dated at Washington, D.C., August 23, 1977.

FRANK M. WHITING,
Administrative Law Judge.

[Docket No. 30332; Agreement C.A.B. 27601 R-2—R-4 et al; Order 77-8-114]

IATA

Agreements Adopted Relating to Cargo Matters; Order

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 23rd day of August, 1977.

Agreements have been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers and other carriers embodied in the resolutions of the Traffic Conferences of the International Air Transport Association (IATA). (Docket 30332, Agreement C.A.B. 26701 R-2 through R-4, R-6, R-8, R-10; Agreement C.A.B. 26703; Agreement C.A.B. 26704; Agreement C.A.B. 26707, R-1 through R-5, R-7 through R-18, R-20 through R-24, R-26, R-29, R-30.) The agreements were adopted at the Composite Cargo Conference held in Vancouver during May 1977, or at the 9th Meeting of the Cargo Traffic Procedures Committee held in Geneva, February 28–March 4, 1977.

AGREEMENT C.A.B. 26707

This agreement, adopted at the Vancouver Conference, would revalidate without change numerous existing resolutions governing matters such as rate construction rules and charges for ancillary services. The bulk of the amendments proposed are of a technical or procedural nature. Substantive amendments of concern to the Board include those on live animal rates, excess value charges, charges for disbursements, and charges for preparation of air waybills.

Live Animal Rates—For U.S. points, the agreement generally proposes rates equal to 100 percent of the general cargo rate (GCR) for cold-blooded animals (defined as fish, frogs, iguanas, insects, reptiles, turtles and worms), and equal to 110 percent of the general cargo rate for warm-blooded animals; minimum charges for all live-animal shipments would be set at 110 percent of the usual minimum charge. However, such rate

V 42 N 167 AUG 29 77 UMI

levels would apply only on transportation within the Western Hemisphere and transpacific areas. For transatlantic transportation, the 100 and 110 percent rate levels would apply only from the United States; the resolution is silent on transportation to the United States, and would thus leave carriers free to continue charging the higher rates currently in effect in their tariffs for shipments to the United States from certain countries.[1]

The proposed live animal rates represent an improvement over the previous IATA levels of 125 percent of the GCR for cold-blooded animals and 150 percent for warm-blooded animals, which the Board disapproved last year.[2] The new agreement is in general conformance with the Board's June 26, 1973, decision in the U.S. domestic Investigation Of Premium Rates for Live Animals and Birds, Docket 21474, and will be approved subject to several conditions. First, as indicated the agreement does not cover transatlantic transportation to the United States and we will therefore condition our approval to require that the 100 and 110 percent levels apply equally in both directions.[3] Second, although cold-blooded animals would be charged no premium over the GCR, minimum charges per shipment would be subject to the same 10 percent premium over the general minimum charges as would shipments of warm-blooded animals. There would seem to be little rationale for this discrepancy, and the Board will therefore apply a condition to limit the minimum charge for cold-blooded animals to the regular general commodity minimum charge. Finally, we will condition the proposed definition of cold-blooded animals, which seems unduly restrictive, to include all animals which can be shipped in sealed containers and require no ventilation.[4]

Excess-Valuation Charges—Charges for excess value have long been a matter of serious concern to the Board. By Order 76–1–17, we disapproved the provision of IATA Resolution 503 which reflected a charge of 0.40 percent (i.e., 40 cents per $100 valuation) on that portion of the shipper's declared value for carriage which is in excess of the Warsaw Convention liability limit of $20.00 per kg., as well as the minimum excess value charge of $1.00. The Board disapproved the 0.40 percent charge and the $1.00 minimum on the basis that only two carriers had submitted any data in support of the charge, and their submissions were inadequate or unpersuasive.

The new agreement again proposes a charge of 0.40 percent on the excess valuation. We have reviewed the carriers' current tariff provisions on excess-value charges, and find that most carriers still apply a charge of 0.40 percent on the total declared value, contrary to the Board's policy that excess-value charges should apply only to the declared value not already covered by the carriers' basic liability under Warsaw; in addition, the carriers generally apply a minimum charge ranging from 40 cents to $1.00. In these circumstances, the Board believes that the public and shippers' interest will be best served by approving the new resolution, which properly applies the excess-value charge only to excess value. However, we still have serious reservations about the level of the charge and thus will limit our approval to one year. Extension of Board approval will depend on carrier justification to be submitted at the end of a one-year period, showing actual experience under the revised resolution.[5]

Charges for Disbursements—Currently, IATA Resolution 509 and the carriers' tariffs provide a charge for collection by the carrier from the consignee for disbursements of three percent of the total disbursement, with a minimum of $5.50, from the United States; and a charge of five percent with a minimum of $10.00, to the United States. The carriers now propose increased charges of five percent (minimum $7.50) from the U.S. and seven percent (minimum $15.00) to the U.S. The U.S. carriers' domestic tariff provisions generally set forth a charge of three percent, with a minimum of $5.50, for similar service in domestic and U.S./Canada transborder transportation, and we perceive no reason why the costs of providing this service should be so much higher in other, international markets as to justify the substantially higher charges proposed here. No showing in support of this discrepancy has ever been made. We will therefore disapprove the proposed increases and hold the charges at their current levels. The carriers are, of course, free to present such data as may cost-justify the proposed charges.

AGREEMENT C.A.B. 26701

Adoped at the 9th Cargo Traffic Procedures Committee Meeting, this agreement would revalidate and amend various resolutions governing live animals regulations, C.O.D. procedures, use of unit load devices, air waybill format and related matters. Most of the amendments are of a technical or clarifying nature. Of more substance are the changes proposed in the live animals regulations and C.O.D. procedures. Resolutions 511a (IATA Live Animal Regulations) and 512a (C.O.D. Procedures) would be amended to prohibit acceptance of live animal consignments on a C.O.D. basis. This proposal is based on Recommendation No. 7 of the International Conference on Transportation of Live Animals, which urged acceptance of live animals on a prepaid basis only.[6] As this proposal may be of particular interest to shippers, we are not taking action on it in this order, but will establish procedures for the receipt of carrier justification, comments from interested persons, and replies.[7]

AGREEMENT C.A.B. 26703

This agreement, adopted at the Vancouver Conference, would amend Resolution 021LL (Special Rules for Currency Adjustments—Cargo Rates) governing currency conversion procedures for cargo rates. Briefly, the agreement would amend the conversion rules for payment outside the country where transportation commences. Currently, such rates are converted from the currency of the country of origin into the currency of payment by using the market rate of exchange or the IATA Resolution 021b rate, whichever produces the higher amount.[8] The amendments propose a process by which such conversions would take place, in effect, at a rate about midway between the market rate and the 021b rate. The minutes of the conference make it clear that the reason for the proposed change is numerous complaints from importers in strong-currency countries over continued use of the 021b rates and the fear of government action in response to such complaints. For instance, a shipment from the United States to Germany, rated at $106, is currently converted to deutschemarks at the 021b rate of $1=3.250 DMK for collect payment, resulting in a charge of DMK 344.50, whereas the market rate of about 2.34 would result in a charge of DMK 248.50; under the new agreement use of the 021b rate would be modified to produce a charge of DMK 292.50.

The Board will approve the agreement, but cautions the carriers that our conditions on 021LL imposed by Orders 74–4–145, April 26, 1974, and 72–2–22, February 3, 1977, covering U.S.-destined and U.S.-originating transportation, respectively, remain in force. Under Order 74–4–145, foreign-currency rates for shipments destined to U.S. points, whether prepaid or collect, must be converted at the market rate of exchange for payment in U.S. dollars. And under Order 77–2–22, U.S. dollar rates for U.S.-originating collect shipments must be converted at the market rate of exchange where payment is made in another currency.[9] We fail to understand why the IATA carriers persist in using the old 021b exchange rates for conversion into the actual currency of payment when such rates are totally unrealistic in terms of today's currency values. We recognize that some carriers favor use of the market rates of exchange, and they are to be commended for their position. One can only assume that other carriers wish to continue overcharging passengers and shippers by using the 021b rates. The usual rationale advanced in support of the 021b rates, the avoidance of "losses in revenue," is unconscionable, and we would emphasize that the Board intends to maintain its conditions on the various IATA resolutions concerning the use of market rates of exchange.

AGREEMENT C.A.B. 26704

Also adopted at Vancouver, this agreement would revise various currency-related surcharges on cargo rates from foreign points to align such rates more closely to current currency values, and will be approved.

The Board, acting pursuant to section 102, 204(a) and 412 of the Act, makes the following findings:

1. It is not found that the following resolutions, incorporated in the agreements indicated, are adverse to the public interest or in violation of the Act provided that approval is subject, where applicable, to conditions previously imposed by the Board:

Agreement CAB	IATA No.	Title	Application
26707:

R-26	680	Diplomatic Bags (Amending)	1;2;3;1/2;2/3;3/1; 1/2 3.
R-29	1008	Glossary of Air Traffic Terms Commonly Used (Amending)	1;2;3.
R-30	1600j	Instructions for Use of Manual Air Waybill (Amending)	1;2;3.
26701:			
R-2	003	Standard Resission Resolution	1;2;3;1/2;2/3;3/1; 1/2 3.
R-3	023	Fractionless Billing (New)	1;2;3;1 2;2 3;3;1; 1 2 3.
R-4	509	Charges for Disbursements (Amending)	1;2;3;1/2;2/3;3/1; 1/2 3.
R-6	511b	IATA Live Animals Board (Revalidating and Amending)	1;2;3.
R-8	520	Unit Load Devices Board (Revalidating and Amending)	1;2;3;1;2;2 3;3 1; 1/2 3.
R-10	600j	Manual Air Waybill/Consignment Note (AWB) (Amending)	1;2;3.
26703	021LL	Expedited—Special Rules for Currency Adjustments (Cargo Rates) (Revalidating and Amending).	1;2;3.
26704	022gg	JT12 (North Atlantic) Adjustment Factors for Sales of Cargo Air Transportation (New).	1/2.

C.A.B. 26707 as indicated, are adverse to the public interest or in violation of the Act provided that approval is subject, where applicable, to conditions previously imposed by the Board and, in additon, subject to the conditions set forth below:

Agreement CAB	IATA No.	Title	Application
26707:			
R-7	116a	Meeting Cargo Rates and Practices (New)	1; 2; 3; 1/2; 2 3; 3 1; 1/2 3.
		Provided that all notices sent or received pursuant to Resolution 116a shall be filed with the Board at the same time and in the same manner as circulated to the carriers; provided further that any unprotested amendment, change, deletion, or addition to the North Atlantic, Pacific or Western Hemisphere Cargo rate sinuctures and related resolutions, whether or not in air transportation as defined by the act, shall be filed with the Board under sec. 412 of the act and approved by the Board prior to being placed in effect.	
R-10	503	Charges in Relation to Value (Revalidating and Amending)	1; 2; 3; 1/2; 2/3; 3/1; 1/2/3.
		Provided that approval is limited through Sept. 30, 1978.	

[1] From the U.K., for instance, the tariffs provide for levels of 125 percent of the GCR for cold-blooded animals and 150 percent of the GCR for warm-blooded animals.

[2] Order 76–1–17, January 5, 1976.

[3] The proposed resolution apparently does not cover U.S. points in Traffic Conference 3 (Asia/Australia/Interpacific) and we will apply a similar condition there.

[4] These last two conditions on cold-blooded animals are consistent with similar conditions the Board placed on an earlier IATA live animal rate resolution, in Order 74–8–68, August 16, 1974.

[5] That report should include data showing the total shipments and number of shipments assessed excess value charges; amount of excess-value revenues; number of claims filed; and costs directly related to excess value such as claims expense on excess-value shipments.

[6] The International Conference was attended by representatives of governments, carriers, the IATA Secretariat, the Air Transport Association, the International Committee on Laboratory Animals, the International Society for the Protection of Animals, the International Union for Conservation of Nature and Natural Resources, and the World Wildlife Fund.

[7] We will also request comments on Resolution 512c (Agreement C.A.B. 26707, R–19) which proposes a charge of $2.50 for preparation of air waybills.

[8] The Resolution 021b rates reflect the parities of the U.S. dollar with other currencies prior to the February 1973 devaluation of the dollar.

[9] Where collect payment on such U.S.-originating shipments is made in U.S. dollars, the charges must not exceed the U.S. dollar amounts published in the carrier's official tariff on file with the Board.

V 42167 AUG 29 77 UMI

Agreement CAB	IATA No.	Title	Application
R-14	509	Charges for Disbursements (Revalidating and Amending).	1; 2; 3; 1/2; 2/3; 3/1; 1/2/3.
		Provided that approval of the resolution shall not constitute approval of any increase in the level of charges to or from United States points.	
R-15	511	Rates for Live Animals (Revalidating and Amending). Provided that: a. Cold-blooded animals are those which can be shipped in sealed containers and require no outside ventilation and include, but are not limited to, fish, frogs, iguanas, insects, reptiles, turtles and worms. b. The minimum charge to/from United States points for cold-blooded animals shall not exceed the applicable minimum charge specified in Resolution 501.	1.
R-17	511	Rates for Live Animals (Revalidating and Amending). Provided that: a. Cold-blooded animals are those which can be shipped in sealed containers and require no outside ventilation and include, but are not limited to, fish, frogs, iguanas, insects, reptiles, turtles, and worms. b. The minimum charge to/from United States points for cold-blooded animals shall not exceed the applicable minimum charge specified in Resolution 501. c. The rates and minimum charges to/from United States points for warm-blooded aninials shall not exceed 110 pct of the applicable general cargo rates and minimum charges, respectively.	3;1/2;2/3;3/1;1/2/3.

Accordingly, *it is ordered, That:*

1. Those portions of Agreements C.A.B. 26707, C.A.B. 26701, C.A.B. 26703 and C.A.B. 26704 set forth in finding paragraph 1 above be approved subject, where applicable, to conditions previously imposed by the Board;

2. Those portions of Agreement C.A.B. 26707 set forth in finding paragraph 2 above be approved subject, where applicable, to conditions previously imposed by the Board and subject in addition to the conditions stated therein;

3. Tariff provisions implementing the agreements approved here shall be marked to expire not later than September 30, 1979, with the exception of tariff provisions implementing Agreement C.A.B. 26707, R-10, which shall be marked to expire not later than September 30, 1978;

4. Carrier justifications and comments from interested persons regarding Agreement C.A.B. 26701, R-5 and R-7, and Agreement C.A.B. 26707, R-19, shall be submitted not later than 30 days after the date of service of this order; and

5. Replies to justifications and comments received in response to ordering paragraph 4 above shall be submitted not later than 45 days after the date of service of this order.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board:

PHYLLIS T. KAYLOR,
Secretary.

DEPARTMENT OF COMMERCE

Domestic and International Business Administration

SEMICONDUCTOR TECHNICAL ADVISORY COMMITTEE

Partially Closed Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. V, 1975), notice is hereby given that a meeting of the Semiconductor Technical Advisory Committee will be held on Thursday, September 15, 1977, at 9:30 a.m. in Room 3817, Main Commerce Building, 14th and Constitution Avenue NW., Washington, D.C.

The Semiconductor Technical Advisory Committee was initially established on January 3, 1973. On December 20, 1974 and January 13, 1977, the Assistant Secretary for Administration, approved the recharter and extension of the Committee, pursuant to Section 5(c)(1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. Sec. 2404(c)(1) and the Federal Advisory Committee Act.

The Committee advises the Office of Export Administration, Bureau of East-West Trade, with respect to questions involving (A) technical matters, (B) worldwide availability and actual utilization of production technology, (C) licensing procedures which affect the level of export controls applicable to semiconductor products, including technical data or other information related thereto, and (D) exports of the aforementioned commodities and technical data subject to multilateral controls in which the United States participates including proposed revisions of any such multilateral controls.

The Committee meeting agenda has seven parts:

GENERAL SESSION

(1) Opening remarks by the Chairman.
(2) Presentation of papers or comments by the public.
(3) Review of membership status.
(4) Selection of new committee chairman.
(5) Review of export control regulations including the Commodity Control List with a view towards their simplification and clarification.
(6) New business.

EXECUTIVE SESSION

(7) Discussion of matters properly classified under Executive Order 11652 dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The General Session of the meeting is open to the public, at which a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

With respect to agenda item (7), the Acting Assistant Secretary of Commerce for Administration, with the concurrence of the delegate of the General Counsel, formally determined on January 27, 1977, pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended by Section 5(c) of the Government In The Sunshine Act, P.L. 94-409 that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1). Such matters are specifically authorized under criteria established by an Executive Order to be kept secret in the interests of the national defense or foreign policy. All materials to be reviewed and discussed by the Committee during the Executive Session of the meeting have been properly classified under Executive Order 11652. All Committee members have appropriate security clearances.

Copies of the minutes of the open portion of the meeting will be available upon written request addressed to the Freedom of Information Officer, Room 3012, Domestic and International Business Administration, U.S. Department of Commerce, Washington, D.C. 20230.

For further information, contact Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, Domestic and International Business Administration, Room 1617M, U.S. Department of Commerce, Washington, D.C. 20230, telephone: 202-377-4196.

The Complete Notice of Determination to close portions of the series of meetings of the Semiconductor Technical Advisory Committee and of any subcommittees thereof was published in the FEDERAL REGISTER on March 2, 1977 (42 FR 12078).

Dated: August 24, 1977.

RAUER H. MEYER,
Director, Office of Export Administration, Bureau of East-West Trade, U.S. Department of Commerce.

Economic Development Administration

LUMURED CORP.

Petition for a Determination of Eligibility To Apply for Trade Adjustment Assistance

A petition by Lumured Corporation, 292 Smith Street, Woodbridge, New Jersey 07095, a producer of ladies' handbags, was accepted for filing on August 22, 1977, pursuant to Section 251 of the Trade Act of 1974 (P.L. 93-618) and Sec-

V 42 167 AUG 29 77 UMI

tion 315.23 of the Adjustment Assistance Regulations for Firms and Communities (13 CFR Part 315). Consequently, the United States Department of Commerce has initiated an investigation to determine whether increased imports into the United States of articles like or directly competitive with those produced by the firm contributed importantly to total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of the petitioning firm.

Any party having a substantial interest in the proceedings may request a public hearing on the matter. A request for a hearing must be received by the Chief, Trade Act Certification Division, Economic Development Administration, U.S. Department of Commerce, Washington, D.C. 20230, no later than the close of business of the tenth calendar day following the publication of this notice.

JACK W. OSBURN, JR.,
Chief, Trade Act Certification Division, Office of Planning and Program Support.

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

INTERNATIONAL WHALING COMMISSION REGULATION PROHIBITING ALL TAKE OF BOWHEAD WHALES

Modification of Public Hearing Date

On August 18, 1977, notice was given in the FEDERAL REGISTER (42 F.R. 41655) that informal public hearings would be held in Washington, D.C., and Alaska to facilitate the presentation of comments from interested persons on the International Whaling Commission's deletion of native exemption for the subsistence harvest of bowhead whales.

The hearing time and date scheduled for Barrow, Alaska, has been changed from 1:00 p.m., September 13, 1977, to 9:00 a.m., September 12, 1977. All other hearing dates, times, and places remain as published in the August 18, 1977, FEDERAL REGISTER Notice (42 FR 41655).

Dated: August 24, 1977.

WINFRED H. MEIBOHM,
Associate Director, National Marine Fisheries Service.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

CERTAIN MAN-MADE FIBER TEXTILE PRODUCTS FROM THE PHILIPPINES

Level of Restraint; Correction

AUGUST 24, 1977.

On August 9, 1977, there was published in the FEDERAL REGISTER (42 FR 40304) a letter dated August 5, 1977 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs amending and extending the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of October 15, 1975, between the Governments of the United States and the Republic of the Philippines. The level of restraint established in the August 5 letter for knit T-shirts, other shirts (including blouses), and tops and vests in Category 218/219/224 (part) should have been expressed in dozens, instead of square yards equivalent.

Accordingly, there is published below a letter of August 24, 1977 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs amending the directive of August 5, 1977, effective on August 29, 1977, to show a level of restraint of 719,393 dozen for Category 218/219/224 (part), instead of 11,292,334 square yards equivalent.

ROBERT E. SHEPHERD,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance, U.S. Department of Commerce.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

August 24, 1977.

COMMISSIONER OF CUSTOMS,
Department of the Treasury, Washington, D.C.

DEAR MR. COMMISSIONER: This directive amends but does not cancel, the directive issued to you on August 5, 1977 by the Chairman of the Committee for the Implementation of Textile Agreements, concerning imports into the United States of certain specified categories of cotton and man-made fiber textile products, produced or manufactured in the Philippines.

The second paragraph of the directive of August 5, 1977 is amended, effective on August 29, 1977, to show the following level of restraint for Category 218/219/224 (part), produced or manufactured in the Philippines and exported to the United States during the fifteen-month period which began on October 1, 1976 and extends through December 31, 1977:

Category:	*15-mo level of restraint* [1]
218/219/224 (part) [2]------	719,393 doz.

[1] The level of restraint has not been adjusted to reflect any imports after Sept. 30, 1976.

[2] In Category 224, only T.S.U.S.A. Nos. 382.-0455 and 382.7879.

The actions taken with respect to the Government of the Republic of the Philippines and with respect to imports of man-made fiber textile products from the Philippines have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

ROBERT E. SHEPHERD,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance.

COMMISSION ON FEDERAL PAPERWORK

PUBLIC MEETING

Notice is hereby given of the fifteenth regular meeting of the Commission on Federal Paperwork to be held on September 9, 1977, in Room 2154, Rayburn House Building, Washington, D.C.

The meeting will begin at 9 a.m. and will continue until approximately 12 noon. The meeting will be open to the public. The Commission will review progress on approved projects, including reports in the following areas: Information Resource Management, Federal Reports Act of 1942/The Clearance Process, Ombudsman Activities, Summary Impact Studies, Information Value/Burden Assessment, Service Management and the Final Summary Report.

Anyone wishing to attend the meeting is invited. For further details, contact the Commission on Federal Paperwork, Room 2000, 1111 20th Street NW., Washington, D.C. 20582, telephone 202-653-5400.

FRANK HORTON,
Chairman.

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

PROCUREMENT LIST 1977

Addition

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Addition to procurement list.

SUMMARY: This action adds to Procurement List 1977 a service to be provided by workshops for the blind or other severely handicapped.

EFFECTIVE DATE: August 29, 1977.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 2009 14th Street North, Suite 610, Arlington, Virginia 22201.

FOR FURTHER INFORMATION CONTACT:

C. W. Fletcher, 703-557-1145.

SUPPLEMENTARY INFORMATION: On July 1, 1977 the Committee for Purchase from the Blind and Other Severely Handicapped published a notice (42 FR 33788) of proposed additions to Procurement List 1977, November 18, 1976 (41 FR 50975).

After consideration of the relevant matter presented, the Committee has determined that the service listed below is suitable for procurement by the Federal Government under 41 U.S.C. 46-48(c), 85 Stat. 77.

Accordingly, the following service is hereby added to Procurement List 1977:

SIC 7349

Janitorial Services, Naval Air Station, Whidbey Island, Oak Harbor, Washington. For the following buildings only: 12, 18, 100, 103, 108, 110, 113, 116, 124, 126, 365, 369, 371, 385, 386, 960, 961, 975, 994 and 2547.

C. W. FLETCHER,
Executive Director.

COUNCIL ON ENVIRONMENTAL QUALITY

ENVIRONMENTAL IMPACT STATEMENTS

The following is a list of environmental impact statements received by the Council on Environmental Quality from August 15 to August 19, 1977. The date of receipt for each statement is noted in the statement summary. Under Council Guidelines the minimum period for public review and comment on draft environmental impact statements is forty-five (45) days from this FEDERAL REGISTER notice of availability. (October 10, 1977) The thirty (30) day period for each final statement begins on the day the statement is made available to the Council and to commenting parties.

Copies of individual statements are available for review from the originating agency. Back copies are also available at 10 cents per page from the Environmental Law Institute, 1346 Connecticut Avenue, Washington, D.C. 20036.

DEPARTMENT OF AGRICULTURE

Contact: Mr. Errett Deck, Coordinator, Environmental Quality Activities, U.S. Department of Agriculture, Room 307A, Washington, D.C. 20250 (202-447-6827).

FOREST SERVICE

Final

Buck Creek and Yellow Mules Permit, Gallatin National Forest, Gallatin and Madison Counties Mont., Aug. 19: The proposed action is the granting of a special use permit to Burlington Northern Railroad to construct a road through sections of the Gallatin National Forest, Montana. The purpose of the 3.4 miles of road is to allow Yellowstone Pine Lumber Company to gain access to Burlington Northern lands for timber harvest. The timber site is intermingled with 27.1 acres in the Buck Creek and Yellow Mule drainages of Gallatin National Forest. The project will affect water quality and quantity, wildlife habitat, esthetics, and increase wildfire hazards. Comments made by: EPA, DOI, USDA, State and local agencies. (ELR Order No. 71020.)

SOIL CONSERVATION SERVICE

Draft

Roosevelt Water Conservation District Floodway, Maricopa and Pinal Counties, Ariz. Aug. 16: Proposed is the construction of a structural measure for watershed protection and flood prevention located in Maricopa and Pinal Counties, Arizona. The flood prevention purposes will be achieved by installing 27.36 miles of floodway. The floodway will provide an outlet for flood flows, for existing and planned floodwater structures, through the Gila River Indian Reservation to the Gila River. It will also provide an outlet for the coordinated system of floodwater drains that will be installed between the existing and planned floodwater retarding structures and the floodway. (ELR Order No. 70998.)

DEPARTMENT OF COMMERCE

Contact: Dr. Sidney R. Galler, Assistant Secretary for Environmental Affairs, Environmental Affairs, Department of Commerce, Washington, D.C. 20230, (202-377-4335)

NATIONAL OCEANIC AND ATMOSPHERIC ADMIN.

Final

California Coastal Zone Management Program, California, Aug. 16: Proposed is the approval of the Coastal Zone Management Program application of the State of California pursuant to Pub. L. 92-583. Approval would permit implementation of the proposed program, allowing program administrative grants to be awarded to the State, and require that Federal actions be consistent with the program. Approval and implementation of the program will restrict or prohibit land and water uses in certain parts of the California coast, while promoting and encouraging the development and use activities in other parts. Comments made by: AHP, USDA, DOC, COE, DOD, HEW, HUD, DOI, DOT, ERDA, EPA, State and local agencies, concerned groups and individuals. (ELR Order No. 70994.)

AIR FORCE

Contact: Col. Luis F. Dominguez, Department of the Air Force, Room 5D 431, Pentagon, Washington, D.C. 20330 (202-697-7799).

Draft

Space Shuttle Program, Vandenberg AFB, Santa Barbara County, Calif., Aug. 18: The proposed action comprises construction, activation, and operation of Space Shuttle facilities at Vandenberg AFB and Port Hueneme Harbor, Calif. There are seven elements in the proposed action, namely: Landing strip extension and other modifications; New Orbiter processing facilities adjacent to VAFB; new facilities at Port Hueneme Harbor to receive, process, and store Shuttle Extenal Tanks (ETs) and recovered spent Solid Rocket Boosters (SRBs) delivered by sea; new marine facility on the VAFB coast for receipt of ETs and SRBs; a tow route for transporting the Orbiter; and modified, expanded support facilities at SLC-6 for handling of cryogenic propellants. (ELR Order No. 71012.)

DEPARTMENT OF DEFENSE

ARMY CORPS

Contact: Dr. C. Grant Ash, Office of Environmental Policy Department, Attn: DAEN-CWR-P, Office of the Chief of Engineers, U.S. Army Corps of Engineers, 1000 Independence Avenue SW., Washington, D.C. 20314 (202-693-6795).

Draft

Michigan City Harbor, O & M, Porter and LaPorte Counties, Ind., Aug. 18: Proposed is the continued operation and maintenance of the Michigan City Harbor, Indiana Navigation Project. A diked containment structure for the polluted dredged material removed from the Harbor, with an incorporated effluent filter, will be constructed on a 3.5 acre land site adjacent to Trail Creek. Harbor sediments classified as unpolluted or suitable for unrestricted or open-lake disposal by Region 5, USEPA, will be dredged as needed to provide for safe navigation and deposited in an open-lake disposal site. Adverse effects include permanent loss of terrestrial vegetation and associated wildlife occupying the contained disposal site. (Chicago) (ELR Order No. 71008.)

Broadway Lake Demonstration Project, Anderson County, S.C., Aug. 18: The proposed action consists of a demonstration project in which the U.S. Army Corps of Engineers will present a plan to remove sediment and aquatic weeds from shoaled areas in the upper reaches of Broadway Lake in South Carolina in order to restore environmental quality. Lake biota would be adversely impacted by the combined effects from dredging and lake drawdown. Adverse effects would range from overt, acute effects visible in the form of fish kills to the less obvious subtle change or degradation in aquatic community structures. (Savannah District.) (ELR Order No. 71007.)

Final

Town Bluff Dam and Sam Rayburn Dam, several counties in Texas, Aug. 17: Proposed is an integrated operation and maintenance program at the Town Bluff Dam—B.A. Steinhagen Lake and the Sam Rayburn Dam and Reservoir. The program consists of flood control, generation of hydroelectric power, water conservation, fish and wildlife conservation and public recreational facilities development. Adverse effects include increased sanitation problems, altered water quality and chemistry caused by storage, and the displacement of some wildlife species. (Fort Worth District.) Comments made by: EPA, DOI, USDA, DOC, FPC, HEW, DOT, State and local agencies interest groups. (ELR Order No. 71006.)

ENVIRONMENTAL PROTECTION AGENCY

Contact: Please refer to the separate notice published by EPA in this issue of the FEDERAL REGISTER for the appropriate EPA contact.

Draft

Ottumwa Generating Station, NPDES Permit, Iowa, Aug. 16: Proposed is the issuance of a new source NPDES permit for discharge of wastewaters from Iowa Southern Utilities' proposed Ottumwa Generating Station (OGS). The proposed site for the 727 megawatt coal-fired steam-electric generating station is located adjacent to the Des Moines River approximately 8 miles northwest of Ottumwa, Iowa. OGS will utilize a closed-cycle cooling system and will require make-up water at a rate of 17 cfs at maximum load conditions. Total discharge to the Des Moines River is estimated to be 1.4 cfs at maximum load conditions. The Des Moines River will be impacted by water withdrawal and wastewater discharge. (Region VII.) (ELR Order No. 70997.)

Ghent Generating Station, Units 3 and 4, Carroll County, Ky., Aug. 19: Proposed is the expansion by Kentucky Utilities of the Ghent Station by adding two 500 megawatt units which will approximately double the station's electrical generating capacity. The expansion will involve: the additional clearing of 13.3 acres to add to 60 acres formerly cleared during construction of the existing units 1 and 2, two generating units, a 660 foot stack, two mechanical draft cooling towers, expansion of the switchyard, expansion of ash pond, new water intake and discharge structures and a 40 mile long 345 kilovolt transmissionline to the Frankfort area. Adverse effects include increased noise and air pollution during construction. (ELR Order No. 71019.)

DEPARTMENT OF HUD

Contact: Mr. Richard H. Broun, Director, Office of Environmental Quality, Department of Housing and Urban Development, 451 7th Street SW., Washington, D.C. 20410 (202-755-6308).

V 42 167 A AUG 29 77 UMI

Draft

Oak Park Development, Ventura County, Calif., Aug. 17: The proposed project provides for the development of 6517 dwelling units in an urbanized portion of Ventura County, California. The project will include 1445 units of detached single family housing and 600 apartment units. The project will contain 2847 acres; 1,246 acres will be developed for the above uses and the balance will remain in open space. HUD will insure a mortgage on the land to enable the developer to borrow funds to grade the site, construct roads, sewers, storm drainage, and water lines, and provide other on-site improvements. Adverse impacts will effect identified Chumash Indian sites, ambient air quality, and public services. (ELR Order No. 71003.)

Riverside Green and Riverside Hills Subdivisions, Franklin County, Ohio, Aug. 19: Proposed is the development of two subdivisions in Columbus, Ohio. Riverside Green development involves the subdivision of a 164 acre tract of land into 880 dwelling units, including school and commercial areas. The Riverside Hills project involves the development of a 155 acre tract of land into 568 dwelling units, including space for schools and commercial use. Adverse effects include the removal of vegetation and wildlife habitat, increased storm water run-off, conversion of agricultural land to urban use, and increased traffic and air and noise pollution levels. (ELR Order No. 71018.)

Final

Proposed Cimarron Subdivision, Harris County, Tex., Aug. 15: The proposed action is the acceptance for HUD home mortgage insurance purposes of the Harris Co. Municipal Utility District No. 148, known as the Cimarron Subdivision, in Harris County, Texas. The project will consist of 2688 single family homes plus recreational facilities. Adverse impacts include removal of potential forest land and livestock grazing land and an increased demand on fossil fuels through heavy dependence on the automobile for transportation. Comments made by: COE, AHP, USDA, EPA, DOT, State and local agencies, concerned interest groups. (ELR Order No. 70993.)

DEPARTMENT OF INTERIOR

Contact: Mr. Bruce Blanchard, Director, Environmental Project Review, Room 4256 Interior Bldg., Department of the Interior, Washington, D.C. 20240 (202-343-3891).

BUREAU OF LAND MANAGEMENT

Final

Pacific Power and Light Co., 500 kV Powerline, Oregon, Aug. 15: Proposed is the construction, operation, and maintenance of a 500,000 volt electric transmission line by Pacific Power and Light Company. The project would be located between the Midpoint Idaho substation and a new substation site northeast of Midford, Oregon. Capable of carrying 1500 megawatts of electric energy, the new powerline would utilize the large blocks of excess Wyoming Power. The proposed action would result in an increment of damage to the soil, vegetation, wildlife population and habitat, and the cultural and esthetic resources of the area. Comments made by: AHP, USDA, EPA, DOI, State and local agencies concerned interest groups. (ELR Order No. 70990.)

BUREAU OF RECLAMATION

Draft

Pecos R. Basin Water Salvage Project, New Mexico and Texas, Aug. 18: The proposed project is a phreatophyte management program consisting of the selective cleaning of saltcedar from the flood plain of the Pecos River from Santa Rosa, New Mexico to Girvin, Texas. The area of clearing extends through Guadalupe, DeBaca, Chaves, and Eddy Counties in New Mexico and through Loring, Reeves, Ward, Crane, and Pecos Counties in Texas. To date, 53,950 acres have been selectively cleared; additional clearing is planned on 24,000 acres—14,000 acres scheduled for selective clearing and 10,000 (within McMillan Delta) deferred until provision has been made for replacement of terminal storage. (ELR Order No. 71010.)

Final

San Juan Powerplant Expansion, San Juan County, N. Mex., Aug. 18: Proposed is the construction and operation of 3 additional operating units at the existing San Juan plant, 12 miles north of Farmington. At the projected date of completion in 1981 the four units will produce a net total generating capacity of 1588 MWe. As each unit becomes operational, new areas will be mined on the existing Western Coal Company mine lease area. The primary adverse impact of project implementation is the temporary disturbance of 2,800 acres of land during the mining operation. Comments made by: AHP, USDA, COE, DOC, HEW, DOI, DOT, EPA, ICC, State and local agencies concerned groups and individuals. (ELR Order No. 71009.)

Esquatzel Coulee Wasteway, Franklin County, Wash., Aug. 18: The proposed project would enlarge 3.2 miles of constructed temporary channel of the Esquatzel Coulee Wasteway in Franklin, Washington. The constructed reach would be extended .9 mile downstream and 1.5 miles of constructed channel upstream from the reach would be abandoned. Five thousand linear feet of unstable banks in the natural reaches of the wasteway would be sloped and stabilized. Adverse impacts include reduction of vegetation at borrow sites; displacement of 85 acres of agricultural land and 10 acres of undisturbed land; and acquisition of 300 acres of farm land and 1,500–2,000 acres of rangeland. Comments made by: DOI, USDA, COE, HEW, AHP, EPA, FPC, HUD, DOT, State and local agencies concerned groups and individuals. (ELR Order No. 71011.)

NATIONAL PARK SERVICE

Draft

Cumberland Island National Seashore, Ga., Aug. 16: This statement consists of a general management plan and wilderness proposal for Cumberland Island National Seashore, Georgia, to provide for development of visitor facilities on the island and mainland, establish visitor programs and use levels, generate resource management policies, and propose 20,645 acres for wilderness designation. Cumberland Island is situated in southeastern Georgia just north of the St. Mary's River, which forms the Georgia/Florida state line. Adverse effects of the proposed plan include disturbance of natural features as a result of visitor developments and intensified use. (ELR Order No. 70995.)

Draft

Cumberland Gap N.P. Master Plan, Kentucky, Tennessee, and Virginia, Aug. 19: Proposed is a master plan for the Cumberland Gap National Historical Park, located in Kentucky, Virginia, and Tennessee. The plan calls for relocation of U.S. 25E, re-creating the wilderness appearance of historic Cumberland Gap, construction of a motor-history trail serving Hensley Settlement, and boundary changes requiring land acquisition in Kentucky and Tennessee. The relocation of U.S. 25E will have significant economic, ecologic, and sociologic impacts on the park and region. (ELR Order No. 71015.)

Supplement

Olympic National Park, Master Plan (S-1), Wash., Aug. 16: This statement supplements a final EIS filed with CEQ in July 1976. The supplement presents additional information on two proposals in the final statement on the master plan—i.e., addition of the Point of the Arches area to the park and deletion of lands at La Push from the park. Addition of lands along the shore of Ozette Lake, which was mentioned in the final EIS, is discussed more thoroughly since it was included in the act of October 21, 1976, which revised the boundary of Olympic National Park (ELR Order No. 70996.)

DEPARTMENT OF TRANSPORTATION

Contact: Mr. Martin Convisser, Director, Office of Environmental Affairs, U.S. Department of Transportation, 400 7th Street, SW., Washington, D.C. 20590, (202) 426-4357.

FEDERAL AVIATION ADMINISTRATION

Final

Hollywood-Burbank Airport, Calif., Aug. 19: Proposed is the public acquisition and continued operation of the existing Hollywood-Burbank Airport. Lockheed Air Terminal, Inc., the current owner/operator, has given notice that it will close the airport to public use, and divest itself of the airport facility. The alternatives to public acquisition and operation of the airport consist of two basic options: "No Action" and the substitution of "Alternative Transportation Modes" for the transportation functions presently served by the Airport. (Western Region.) Comments made by: EPA, HUD, DOT, State and local agencies, concerned groups and individuals. (ELR Order No. 71013.)

FEDERAL HIGHWAY ADMINISTRATION

Draft

Hooper Rd. and Hardin Blvd.—Hooper Rd. Connection, East Baton Rouge Parish, La., Aug. 16: This statement discusses the impacts which may result from the construction of two projects in East Baton Rouge Parish, Louisiana, State Project No. 255–02–20 begins at the junction of Plank Road and Harding Boulevard and continues in a northeasterly direction for approximately 2,700 feet, where it merges into the existing alignment of Hooper Road. It is at this point that State Project No. 255–02–14 begins. This project proceeds east along the existing alignment of Hooper Road, for a distance of approximately 3.9 miles, to its terminus approximately 1,000 feet east of Blackwater Bayou. A 4(f) statement is included. (Region 6.) (ELR Order No. 70999.)

Route 168—Great Bridge By-pass, Chesapeake County, Va., Aug. 15: Proposed is the construction of Route 168 Great Bridge By-pass located within the city of Chesapeake. The facility will consist of two 24 foot wide lanes separated by a 40 foot wide depressed median, beginning just south of Kegman Road and proceeding in a northerly direction for 4.4 miles to the intersection of Oak Grove Road and Battlefield Boulevard. The entire facility will be on new location and will cross the Chesapeake and Albemarle Canals. Adverse effects include the relocation of 29 families and 2 businesses and the destruction of approximately 2.6 acres of wetlands. (Region 3.) (ELR Order No. 70992.)

Washington Forest Highway, Route 32 Improve, Skagit and Whatcom Counties, Wash., Aug. 17: The proposed action is to reconstruct the Bacon Creek to Goodell Creek segment of Washington FH 32 following the existing highway alignment with minor exceptions. This route is located in Skagit and Whatcom Counties and follows the Skagit River along the north shore. The proposal will provide a two-lane, paved road adequate for diversified highway uses, which include local, residential, and community travel, but predominantly recreational travel. The proposed project is approximately 9.4 miles in length. Approximately 153 acres of land will be required for right-of-way. (Region 10.) (ELR Order No. 71005.)

Final

I-35E, South Junction I-35 to Junction T.H. 110, Dakota County, Minn., Aug. 17: Proposed is the building of 13 miles of a four to six lane freeway, designated I-35E, on new alignment through north-western Dakota County, Minnesota. The proposed action would begin at its interchange with I-35 in Burnsville, pass through the cities of Apple Valley and Eagan, and terminate near its interchange with T.H. 110 in Mendota heights. Adverse effects include the displacement of 20 existing homes and 250 acres of farm lands, removal of 28 acres of wetland, 275 acres of deciduous trees, and several hundred acres of wildlife habitat. (Region 5.) Comments made by: DOI, USDA, COE, EPA, DOT, AHP, State and local agencies, interest groups. (ELR Order No. 71004.)

Ocean Boulevard, Morris-Ocean Ave., Monmouth County, N.J., Aug. 16: Proposed is the construction on new alignment of an urban highway, Ocean Boulevard, from its present terminus at Morris Avenue North to Ocean Avenue (N.J. Route 36) in the City of Long Branch, N.J. The total project length is approximately 9000 feet or 1.6 miles. The minimum right-of-way of 110 feet will provide for a land-service facility with two travel lanes plus paved shoulders in each direction separated by a narrow grassed mall. Adverse effects include the displacement of 158 individuals and 11 businesses. A preliminary 4(f) discussion is also included. (Region I.) Comments made by: AHP, FEA, USCG, USDA, HEW, HUD, DOI, EPA, State, and local agencies. (ELR Order No. 71000.)

Sprain Brook Pkwy., Westchester County, N.Y., Aug. 19: The proposed project is the extension of the Sprain Brook Parkway from the Cross Westchester Expressway (CWE) (I-287) northerly to the Hawthorne Interchange, a distance of 2.7 miles. This project originates in the Village of Elmsford at the interchange with CWE and continues northerly until it passes under Grasslands Road about 800 feet west of the Bradhurst Ave.-Knollwood Rd. intersection. The project terminates about 1000 feet north of N. Hospital Rd. after passing under it. The proposed section would be the third and final section, completing the Parkway. Subject to the alternate chosen, 8 to 46 residences will be displaced. (Region 1.) Comments made by: USDA, HEW, DOI, FPC, EPA, USCG, State, and local agencies interest-groups. (ELR Order No. 71014.)

Freeman Mill Road, Meadowview to Randleman Rds., Guilford County, N.C., Aug. 17: Proposed is the relocation of Freeman Mill Road (S.R. 1398) in the City of Greensboro, N.C., from the proposed relocation of U.S. 220 at Meadowview Road to Randleman Road, a freeway into the central area of the city. The proposed action will serve as a connector between these two freeway facilities, and is approximately 1.4 miles in length. Adverse effects include the acquisition of private land for public use and the relocation of 121 families, two churches, and 7 businesses. (Region 4.) Comments made by: DOI, USDA, EPA, GSA, HEW, HUD, State, and local agencies. (ELR Order No. 71002.)

U.S. 69, Bryan County, Okla., Aug. 15: Proposed is the improvement of U.S. 69 near Armstrong in Bryan County northerly 25.0 miles to just south of Atoka in Atoka County. Adverse effects include the displacement of 25 families, 10 businesses, the reduction of 1000 acres of private rural lands, and the taking of 16 acres of Durant Fish Hatchery Lands, a Section 4(f) undertaking. (Region 6.) Comments made by: DOI, State, and local agencies. (ELR Order No. 70991.)

Supplement

I-380, Black Hawk County (S-1), Iowa, Aug. 19: This statement supplements a final EIS filed with CEQ in June 1975 concerning I-380 in Linn, Benton, Buchanan and Black Hawk Counties. The supplement relates to the section of I-380 from near U.S. 218 in Waterloo easterly through Evansdale to Iowa 297. Adverse impacts include the additional acquisition of 25 acre of agricultural cropland, 24 acre of municipal row-crop, 16 acres of woodland, and 3 acres of residential land. (ELR Order No. 71017.)

The CEQ FEDERAL REGISTER notice of August 5, 1977 listed the Final environmental impact statements for Loop 1 (Mo Pac Blvd.)—South Section (ELR Order No. 70925) and Loop 1 (Mo Pac Blvd.)—North Section (ELR Order No. 70926), but omitted the word "Final" before these two listings.

NICHOLAS C. YOST,
Acting General Counsel.

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

PROCUREMENT POLICY ADVISORY COMMITTEE

Meeting

AUGUST 23, 1977.

In accordance with provisions of Public Law 92-463 (Federal Advisory Committee Act) the Procurement Policy Advisory Committee will hold its next meeting from 9:00 a.m. to 3:30 p.m., Tuesday, September 27, 1977, in Building 1, Lobby 1, Hughes Aircraft Company, Centinela and Teale Avenues, Culver City, California. This meeting will be open to the public. The purpose of the meeting is to discuss those subjects included on the following agenda:

9–9:15 a.m.—Opening remarks.
9:15–10:15 a.m.—Summary Report on New Department of Energy.
10:15–10:30 a.m.—Break.
10:30 –12m—Discussion of Committee Recommendations: a. Organizational Conflicts of Interest; b. Standard Reporting Requirements; c. Contract Funding Problems.
12m–1:15 p.m.—Lunch.
1:15–2:30 p.m.—Discussion of Committee Recommendations (continued): d. Handling and Protection of Intellectual Property; e. ERDA Procurement Practices.
2:30–2:45 p.m.—Break.
2:45–3:15 p.m.—f. ERDA's Role and Mission.
3:15–3:30 p.m.—Closing remarks.
3:30 p.m.—Adjournment.

Practical considerations may dictate unannounced alterations in the agenda or schedule.

Mr. Stephen W. Rowen, Chairman of the Committee, will preside.

With respect to public participation in agenda items, scheduled above, the following requirements shall apply:

(a) Persons wishing to submit written statements on agenda items may do so by mailing 12 copies thereof post-marked no later than September 15, 1977, to the Director of Procurement, Room C-167, U.S. Energy Research and Development Administration, Washington, D.C. 20545. Comments shall be directly relevant to the above agenda items. Minutes of the meeting will be kept open for 30 days for the receipt of written statements for the record.

(b) Information as to whether the meeting has been rescheduled or relocated can be obtained by a prepaid telephone call on September 20, 1977, to Mr. Harry Tayloe, Division of Procurement, on 301–353–5526 between 8:30 a.m. and 5:00 p.m., e.s.t.

(c) Questions at the meeting may be propounded only by members of the committee and ERDA officials assigned to participate with the committee in its deliberations.

(d) Seating will be made available to the public on a first-come, first-served basis.

(e) The use of still, movie, and television cameras, the physical installation and presence of which will not interfere with the course of the meeting, will be permitted both before and after the meeting and during any recess. The use of such equipment will not, however, be allowed while the meeting is in session.

(f) Copies of minutes will be made available for copying, following their certification by the chairman, in accordance with the Federal Advisory Committee Act, at the Energy Research and Development Administration's Public Document Room, 20 Massachusetts Avenue, N.W., Washington, D.C. 20545, upon payment of all charges required by law.

HARRY L. PEEBLES,
Deputy Advisory Committee Management Officer.

FEDERAL ENERGY ADMINISTRATION

ANTHRACITE COAL CONFERENCE

Public Hearing

Notice is hereby given that the Federal Energy Administration (FEA) on behalf of the Anthracite Coal Conference, will hold a public hearing on Friday, September 16, 1977, 10:00 a.m., at the Gus Genetti Motor Lodge, Route 309, Hazleton, Pennsylvania 18201.

The objectives of the Anthracite Coal Conference are to make recommendations to the FEA with respect to the increased utilization of anthracite coal as a readily available energy source and the maintenance of fair and reasonable consumer prices for such supplies. In support of this commitment, Mr. Schlesinger has charged the FEA with the responsibility for studying ways to improve the production of anthracite coal. This is an essential part of meeting the National Energy Plan of increasing coal production by ⅔ (over one billion tons) by 1985. It is the first important step in identifying specific measures for increasing our reliance on coal and as a result of this prototype study similar efforts concerning other types of coal can commence. The study of the utilization of anthracite coal must be completed and presented to Mr. Schlesinger

V42167 AUG 29 77 UMI

by mid-October, closely coinciding with the formation of the Department of Energy.

The Anthracite Coal Conference, which is composed of senior level Federal and State officials, industry representatives and other individuals with extensive anthracite experience, is in the process of developing policy recommendations for the final report to Mr. Schlesinger. As a result, it has been determined that a public hearing will provide the FEA an opportunity to receive comments and recommendations from interested persons who have expertise in various areas of anthracite coal.

The Chairman of the meeting is empowered to conduct the hearing in a fashion that will, in his judgment, facilitate the orderly conduct of business. Oral presentations will be limited to fifteen minutes. Any member of the public who wishes to file a written statement will be permitted to do so, either before or ten days after the hearing. Those wishing to present oral statements must notify Stephen Minihan or Beth Nelson, FEA Headquarters, Room 3502, 12th and Pennsylvania Avenue, N.W., Washington, D.C. 20461 (202) 566-6230. These requests to appear must be received by Friday, September 9, 1977, to be accompanied by three copies of the prepared statement.

Transcripts of the hearing will be available for public review and copying at the Freedom of Information Public Reading Room, Room 2107, FEA Headquarters, 12th and Pennsylvania Avenue, N.W., Washington, D.C. 20461 between the hours of 8:00 a.m. and 4:30 p.m. Monday through Friday, except Federal holidays. Any person may purchase a copy of the transcript from the reporter.

Issued at Washington, D.C. on August 23, 1977.

ERIC J. FYGI,
Acting General Counsel.

[FR Doc.77-24869 Filed 8-26-77;8:45 am]

CONSUMER AFFAIRS/SPECIAL IMPACT ADVISORY COMMITTEE

Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92-463, 86 Stat. 770), notice is hereby given that the Consumer Affairs/Special Impact Advisory Committee will meet Tuesday, September 20, 1977, at 9 a.m., Room 5041, FEA Headquarters, 12th and Pennsylvania Avenue NW., Washington, D.C.

The purpose of the Committee is to provide the Federal Energy Administration with advice concerning the impact of FEA policies nd programs on consumers and special impact groups.

The agenda for the meeting is as follows:

1. Old Business. Report on the Status of CA/SI Advisory Committee Recommendations and Requests and FEA Commitments
2. Pending Policy Issues.
3. Subcommittee Reports: Energy Consumption Problems and Utilities; Transportation Programs; Energy Legislation and Regulations; Energy Efficiency Standards Conservation and Ecology.
4. Discussion. Status of the National Energy Act.
5. Items for Discussion at the Next Meeting.
6. Public Comment.

The meeting is open to the public. The Chairman of the Committee is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Committee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Georgia Hildreth, Acting Director, Advisory Committee Management (202) 566-9996, at least 5 days prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Further information concerning this meeting may be obtained from the Advisory Committee Management Office.

The transcript of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 2107, FEA, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays. Any person may purchase a copy of the transcript from the reporter.

Issued at Washington, D.C., on August 23, 1977.

ERIC J. FYGI,
Acting General Counsel.

[FR Doc 77 24867 Filed 8-26-77;8:45 am]

CONSUMER AFFAIRS/SPECIAL IMPACT ADVISORY COMMITTEE SUBCOMMITTEES

Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92-463, 86 Stat. 770), notice is hereby given that subcommittees of the Consumer Affairs/Special Impact Advisory Committee will meet Monday, September 19, 1977, at the location and time indicated below.

The objective of the subcommittees is to make recommendations to the parent Committee with respect to matters concerning consumer aspects of FEA policies and programs.

The agenda and schedule of meetings is as follows:

ENERGY CONSUMPTION PROBLEMS AND UTILITIES

Room 3000A, FEA Headquarters, 12th and Pennsylvania Avenue, NW., Washington, D.C. 9 a.m.

Agenda: Discussion and Development of Recommendations on the National Energy Act—Utility Issues.

TRANSPORTATION PROGRAMS

Room 5041, FEA Headquarters, 12th and Pennsylvania Avenue, NW., Washington, D.C. 9 a.m.

Agenda: Discussion and Development of Recommendations on National Energy Act—Transportation Issues; Gasohol.

ENERGY LEGISLATION AND REGULATIONS

Room 3000A, FEA Headquarters, 12th and Pennsylvania Avenue, NW., Washington, D.C., 1 p.m.

Agenda: Discussion and Development of Recommendations on National Energy Act; Proposed FEA Regulations; Other Energy Related Legislation.

ENERGY EFFICIENCY STANDARDS CONSERVATION AND ECOLOGY

Room 5041, FEA Headquarters, 12th and Pennsylvania Avenue, NW., Washington, D.C., 1 p.m.

Agenda: Discussion and Development of Recommendations on National Energy Act—Conservation Issues; Solar Energy.

The subcommittee meetings are open to the public. The Chairman of each subcommittee is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with a subcommittee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Georgia Hildreth, Acting Director, Advisory Committee Management (202) 566-9996, at least 5 days prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Further information concerning these meetings may be obtained from the Advisory Committee Management Office.

The transcript of the meetings will be available for public review at the Freedom of Information Public Reading Room 2107, FEA, Federal Building, 12th and Pennsylvania Avenue, NW., Washington, D.C between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays. Any person may purchase a copy of the transcript from the reporter.

Issued at Washington, D.C. on August 23, 1977.

ERIC J. FYGI,
Acting General Counsel.

[FR Doc.77-24868 Filed 8-26-77; 8:45a.m.]

FEDERAL MARITIME COMMISSION

CONFERENCES IN THE TRADES TO, FROM AND BETWEEN UNITED STATES ATLANTIC AND GULF PORTS AND PORTS IN CENTRAL AND SOUTH AMERICA AND THE CARIBBEAN

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to Section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street NW., Room 10126; or may inspect the agreement at the field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California, and San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before September 19, 1977. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the Commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of Agreement Filed by:

Wade S. Hooker, Esquire, Casey, Lane & Mittendorf, 26 Broadway, New York, N.Y. 10004.

Agreements to modify the respective organic agreements of the following seven members of the Associated Latin American Freight Conferences (ALAFC) have been assigned the agreement number shown:

Atlantic and Gulf/West Coast of South America Conference—2744-40
Atlantic and Gulf/Panama Canal Zone, Colon and Panama City Conference—3868-25
United States Atlantic and Gulf-Jamaica Conference—4610-26
United States Atlantic and Gulf-Santo Domingo Conference—6080-25
Leeward and Windward Islands and Guianas Conference—7540-30
East Coast Colombia Conference—7590-26
United States Atlantic and Gulf-Haiti Conference—8120-20

The Agreements provide that the self-policing, enforcement and cargo inspection activities for each conference are to be conducted pursuant to the provisions relevant thereto as set forth in the organic agreement of the ALAFC and that such activities are to be carried out by the neutral body engaged by ALAFC for that purpose.

By Order of the Federal Maritime Commission.

Dated: August 22, 1977.

JOSEPH C. POLKING,
Acting Secretary.

CONTINENTAL NORTH ATLANTIC WESTBOUND FREIGHT CONFERENCE

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to Section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street NW., Room 10126; or may inspect the agreement at the field Offices located at New York, N.Y., New Orleans, La., San Francisco, Calif., and San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before September 19, 1977. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the Commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of Agreement Filed by:

Howard A. Levy, Esq., Suite 727, 17 Battery Place, New York, N.Y. 10004.

Agreement No. 8210-36, among the members of the above-named conference, adds traffic to inland U.S. points via North Atlantic ports to the scope of the agreement. The conference at present has such inland authority only in Europe on cargo moving via Bordeaux/Hamburg range ports.

Cargo moving on a through bill of lading and transhipped at a conference port as part of an all-water movement to or from ports outside the scope of the conference is excepted from the agreement.

By Order of the Federal Maritime Commission.

Dated: August 24, 1977.

JOSEPH C. POLKING,
Acting Secretary.

[No. 77-45]

HAWAII MEAT CO., LIMITED V. MATSON NAVIGATION CO.

Filing of Complaint

AUGUST 22, 1977.

Notice is hereby given that a complaint filed by Hawaii Meat Company Limited against Matson Navigation Company was served August 22, 1977. The complaint alleges violations by respondent of section 16, 18, and 19 of the Shipping Act, 1916 in connection with its assessment of rates and charges for transportation.

Hearing in this matter, if any is held, shall commence on or before February 22, 1978. The hearing shall include oral testimony and cross examination in the discretion of the presiding officer only upon a proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matters at issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record.

JOSEPH C. POLKING,
Acting Secretary.

V 42 167 AUG 29 77 UMI

FEDERAL POWER COMMISSION

[Docket No. RP77-110]

ALABAMA-TENNESSEE NATURAL GAS CO.

Order Rejecting Proposed PGA Tariff Revisions

AUGUST 18, 1977.

On July 19, 1977, Alabama-Tennessee Natural Gas Co. (Alabama-Tennessee) tendered for filing in the above docket certain proposed revisions to its tariff PGA clause [1], which are requested to become effective on August 18, 1977. For the reasons set forth below the Commission finds that Alabama-Tennessee's filing must be rejected.

In support of the proposed revisions to its PGA clause, Alabama-Tennessee states that it is "* * * engaged in efforts to supplement its present gas supply from Tennessee Gas Pipeline Co., its sole supplier, which has been subjected to severe curtailments in recent years. In order to contract for any new supply or supplies, it is necessary that Alabama-Tennessee be able to recoup from its customers the cost of such new supplies. The purpose of this filing is solely to accomplish this purpose."

Public notice of Alabama-Tennessee's filing was issued on August 3, 1977, providing for protests or petitions to intervene to be filed on or before August 15, 1977. On August 5, 1977, the Tennessee Valley Municipal Gas Association (TVM) [2] filed a petition to intervene in the proceeding and, in addition, protested Alabama-Tennessee's filing, requested that it be rejected, or in the alternative, that it be suspended for the maximum period of five months. Alabama-Tennessee answered in opposition to TVM on August 17, 1977. The Commission finds that the petitioners have demonstrated an interest in this proceeding warranting their participation and the petitions to intervene shall accordingly be granted.

TVM alleges that Alabama-Tennessee's proposed revisions to its PGA clause would be contrary to the Commission's regulations and policies and would result in unfair charges to the company's jurisdictional customers. TVM raises the following specific objections to the revisions proposed by Alabama-Tennessee:

"(a) Alabama-Tennessee would pass on to its customers the cost of demand charges paid by Alabama-Tennessee to its suppliers but would not credit the customers with demand charge credits received from these suppliers.

(b) Section 154.38(d)(4)(ii) of the Commission's Regulations requires separate provisions for adjustments of rates due to changes in the cost of gas purchased from producers and pipelines. Alabama-Tennessee proposes to provide for changes in the combined average cost of gas purchases from both producers and pipelines.

(c) The proposed PGA revision provides for rate adjustments related to changes in Alabama-Tennessee's average cost of gas due to changes in load factor.

(d) The proposed PGA revision would track transportation charges, although this is not provided for in the Commission's regulations."

TVM's objection stated in paragraph (a) above is without merit. Pursuant to section 22 of Alabama-Tennessee's tariff, the jurisdictional portion of demand charge credits received from its supplier are flowed through to the jurisdictional customers.

The objection stated in paragraph (b) above is also without merit. It is true that the applicable regulations require that the cost of gas purchased from producer and pipeline suppliers must be separately established. This is required because producer-related PGA rate adjustments can be filed only semi-annually, whereas pipeline related increases can be tracked at any time provided the change amounts to at least one mill. Separate computation is necessary to insure that no producer-related increases are included in PGA rate changes except semi-annually. Alabama-Tennessee acknowledges in its answer of August 17, 1977, that it will be necessary to compute individually the cost incurred in the purchase of gas from each supplier, and that such computations will be subject to the Commission's review and approval. It should be understood, however, that Alabama-Tennessee shall not be permitted to include producer-related cost changes except in its semi-annual filings.

The objection stated in paragraph (c) above is also without merit. Alabama-Tennessee is not permitted to file a PGA rate adjustment based solely on a change in the load factor at which it purchases gas from its pipeline supplier. However, in the event the supplier changes its rate, Alabama-Tennessee may give effect to the actual load factor in determining the unit charge in its own rates. This is the normal practice and is not inconsistent with the intent or specific terms of the Commission's PGA regulations.

The Commission is constrained to agree with the objection stated in paragraph (d) above. The Commission's PGA regulations simply do not provide for the inclusion of transportation charges as part of a pipeline's cost of purchased gas. Based on the fact that the proposed PGA clause revisions do not comply with the Commission's applicable regulations, the Commission finds that Alabama-Tennessee's filing must be rejected. The Commission shall so order.

The Commission orders:

(A) Alabama-Tennessee's filing in this docket is rejected without prejudice to its refiling without the inclusion of transportation charges.

(B) The above-named petitioners are permitted to intervene in this proceeding, subject to the Commission's rules and regulations.

(C) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP77-555]

ARKANSAS LOUISIANA GAS CO.

Application

AUGUST 19, 1977.

Take notice that on August 8, 1977, Arkansas Louisiana Gas Company (Applicant), P.O. Box 21734, Shreveport, Louisiana 71151, filed in Docket No. CP77-555 an application pursuant to Section 7(c) of the Natural Gas Act and Section 157.7(g) of the Regulations thereunder (18 CFR 157.7(g)) for a certificate of public convenience and necessity authorizing the construction and for permission for and approval of the abandonment, during the 12-month period beginning on December 22, 1977, and operation of field gas compression and related metering and appurtenant facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

The stated purpose of this budget-type application is to augment Applicant's ability to act with reasonable dispatch in the construction and abandonment of facilities which would not result in changing Applicant's system salable capacity or service from that authorized prior to the filing of the instant application.

Applicant states that the total cost of the proposed construction and abandonment would not exceed $3,000,000 and that the cost of any single project would not exceed $500,000. It is indicated that these costs would be financed by Applicant from cash on hand and from cash generated from normal internal sources and from short-term bank loans and other short-term borrowings utilized in the normal operation of Applicant's total business.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 9, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action

to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Section 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24891 Filed 8-26-77;8:45 a.m.]

[Docket No. ER77-553]

ARKANSAS POWER & LIGHT CO.

Filing of Letter Agreement

AUGUST 22, 1977.

Take notice that on August 11, 1977, Arkansas Power & Light Company (AP&L) tendered for filing a Letter Agreement dated August 1, 1977 between the Southwestern Power Administration (SPA) and AP&L. AP&L states that the Agreement provides for the sale by AP&L of firm capacity and associated energy to SPA for the period between August 1, 1977 and August 31, 1977. AP&L states that SPA shall pay the sum of $370,500.00 for the capacity purchased and that the energy charge is to be an amount per kilowatt-hour equal to the incremental cost of such energy experienced by the Middle South Utilities System during the month of August 1977, plus 10 percent thereof for administrative and overhead costs. AP&L requests an effective date of August 1, 1977, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 2, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24898 Filed 8-26-77;8:45 a.m.]

[Projected No. 2613]

BATES MANUFACTURING CO. AND AUGUSTA DEVELOPMENT CORP.

Application for Transfer of License and Approval of Lease

AUGUST 23, 1977.

Public notice is hereby given that an application was filed on June 15, 1977, under the Federal Power Act, 16 U.S.C. §§ 791a–825r, by Bates Manufacturing Company (Transferor) and Augusta Development Corporation (Transferee) (Correspondence to: Irving Isaacson, Esq., Brann and Isaacson, 140 Lisbon Street, Lewiston, Maine) for transfer of the Transferor's interest in the license for Project No. 2613. The project is located on Moxie Stream, a tributary of the Kennebec River, in Somerset County, in the vicinity of Skowhegan, Dower-Foxcraft, and Farmington, Maine. The other joint licensees of the project are Central Maine Power Co., Scott Paper Co., Kennebec River Pulp and Paper Co., and Milstar Manufacturing Corp.

Also included in the application was a request for approval of a lease of the Transferee's interest in the project to Edwards Manufacturing Co., Inc.

The project consists of a dam and reservoir with a surface area of 2,370 acres, and stores water and regulates stream flow for the benefit of downstream hydroelectric projects.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 3, 1977, file with the Federal Power Commission, 825 N. Capitol Street NE., Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR § 1.8 or § 1.10 (1977). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24974 Filed 8-26-77;8:45 am]

[Docket No. ER77-558]

BOSTON EDISON CO.

Rate Supplement Filing

AUGUST 19, 1977.

Take notice that Boston Edison Company on August 15, 1977, filed a proposed rate supplement to impose a charge, which Edison states is designed to accomplish the mandate of the United States Court of Appeals for the District of Columbia Circuit in *Boston Edison Co. v. FPC*, Nos. 75–2123 and 76–1392, May 17, 1977. Edison states that the charge would recover the additional Rate S–4 revenues owed to Edison under the Court's decision with interest at 9 percent per annum. The Company requests that the proposed rate supplement be permitted to become effective 30 days from the date of filing. The affected wholesale customers are the Towns of Concord, Norwood and Wellesley, Massachusetts, and the Municipal Light Board of Reading, Massachusetts, which Edison states were served with copies of the filing. Rate S–4 is the subject of the proceedings in ER76–90.

Any person desiring to be heard or to protest said proposed rate supplement should file a petition to intervene or protest with the Federal Power Commission, Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 6, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of the proposed rate supplement are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24882 Filed 8-26-77;8:45 am]

[Docket No. ES77-52]

CENTRAL ILLINOIS PUBLIC SERVICE CO.

Application

AUGUST 23, 1977.

Take notice that on August 11, 1977, the Central Illinois Public Service Company (Applicant), filed an application with the Commission, pursuant to Section 204 of the Federal Power Act, seeking authorization to issue from time to time its unsecured promissory notes to evidence borrowings of money to be made by it from banks and its unsecured promissory notes in the form of commercial paper in the aggregate principal amount not exceeding $120,000,000. The Applicant requests exemption of its securities from the competitive bidding requirements of the Commission Regulations.

Applicant is incorporated under the laws of the State of Illinois, with its principal business office at Springfield, Illinois and is engaged in the generation, transmission, distribution and sale of electrical energy within the State of Illinois.

Notes (with varying maturities) issued to commercial banks will mature not more than 12 months from the date of issue and will bear interest at a rate

V 42 167 AUG 29 77 UMI

which will be either the prime rate of interest prevailing at such bank on the date each such borrowing is made or the applicable prime rate or rates of interest prevailing at such bank during the term of the note, determined each three-month period of the note. All notes will bear final maturities of on or before December 31, 1979.

Notes issued to commercial paper dealers will have varying maturities of not more than nine months from the date of issue and will be issued and sold (in varying amounts or denominations of not less than $50,000 each) at a discount which will not exceed the discount rate per annum prevailing at the date of issue for commercial paper of comparable quality and maturity sold by issuers thereof to commercial paper dealers. All notes will bear final maturities of on or before December 31, 1979.

The proceeds from the issuance of the notes and/or commercial paper is expected to provide the Applicant with flexibility in meeting its financial requirements for its construction program for the remainder of 1977 and the years 1978 and 1979.

Any person desiring to be heard or to make any protest with reference to the Application should on or before September 9, 1977, file with the Federal Power Commission, Washington, D.C. 20426, petitions or protests in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Persons wishing to participate as a party in a hearing must file petitions to intervene in accordance with the Commission's Rules. The Application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 77-24880 Filed 8-26-77;8:45 am]

[Docket No. CP77-562]

CITIES SERVICE GAS CO.

Application

AUGUST 22, 1977.

Take notice that on August 11, 1977, Cities Service Gas Company (Applicant), P. O. Box 25128, Oklahoma City, Oklahoma 73125, filed in Docket No. CP77-562 an application pursuant to Section 7 of the Natural Gas Act for permission and approval to abandon the use of an existing meter as a direct sales facility and for a certificate of public convenience and necessity authorizing the operation of such meter as an additional town border meter for the city of Neodesha, Kansas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is indicated that in Docket No. G-14721, 20 FPC 460 (1958), Applicant was authorized to acquire certain facilities from Eastern Kansas Gas Company and provide natural gas service for resale to the City of Neodesha in Wilson County, Kansas, and to render direct interruptible service to the City of Neodesha Light Plant. This service has continued since that time, it is said.

Applicant indicates that at the time its "grandfather" certificate was issued in Docket No. G-298, (4 FPC 471 (1943)), Applicant was making a direct industrial sale to a refinery owned and operated by Standard Oil of Indiana near Neodesha, Kansas, and that this refinery was later operated by American Oil Company.

It is stated that in 1970, the refinery operation was closed down and the refinery was turned over to the City of Neodesha which planned to operate the refinery electric generating equipment as a peaking facility for power generation for the city. Applicant indicates that at such time, it amended its direct sale contract with the City of Neodesha to include the supply of gas on a direct sales basis for the operation of this auxiliary power plant through the existing refinery sales meter, and that due to inability to adapt the generator at the refinery to its operations, the City of Neodesha never began the operation of the auxiliary power plants as planned and the area was later turned into an industrial park. Gas was taken by the City of Neodesha at the existing sales meter at the refinery site and resold by the city to five small business establishments in the area, it is said.

Applicant states that it was unaware that this gas was not being used in the operation of the auxiliary power plant, as covered by its contract with the City of Neodesha, until it became necessary to activate its currently effective curtailment plan and the sales meter was curtailed on the basis of this being a sale to a power plant (Priority 5). Applicant indicates that at that time it was advised by the city that such curtailment was adversely affecting the small business establishments in the area.

Concurrently, Applicant proposes to operate existing sales meter at the former refinery site as an additional town border for the City of Neodesha, Kansas, and to abandon the use of such meter as a direct sales facility. Applicant indicates that future sales to the city through this meter would be made under the existing resale contract with the City of Neodesha and would be made under Applicant's FPC Gas Rate Schedule F-2.

No new facilities are necessary to effectuate this change, it is said.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 12, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Section 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 77-24881 Filed 8-26-77;8:45 am]

[Docket No. CP77-551]

CITIES SERVICE GAS CO.

Application

AUGUST 19, 1977.

Take notice that on August 4, 1977, Cities Service Gas Company (Applicant), P.O. Box 25128, Oklahoma City, Oklahoma 73125, filed in Docket No. CP77-551 an application pursuant to Section 7(c) of the Natural Gas Act and Section 157.7(c) of the Regulations thereunder (18 CFR 157.7(c)), for a certificate of public convenience and necessity authorizing the construction, during the calendar year 1978, and operation of facilities to make miscellaneous rearrangements on its system, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

The stated purpose of this budget-type application is to augment Applicant's ability to act with reasonable dispatch in making miscellaneous rearrangements which would not result in any material change in the service presently rendered by Applicant.

Applicant states that the total cost of the proposed facilities would not exceed $300,000, which cost would be financed from treasury cash.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 9, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Section 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Application

AUGUST 19, 1977.

Take notice that on August 4, 1977, Cities Service Gas Company (Applicant), PO Box 25128, Oklahoma City, Oklahoma 73125, filed in Docket No. CP77-550 an application pursuant to Section 7(c) of the Natural Gas Act and Section 157.7(b) of the Regulations thereunder (18 CFR 157.7(b)) for a certificate of public convenience and necessity authorizing the construction during the calendar year 1978, and operation of facilities to enable Applicant to take into its certificated main pipeline system natural gas which would be purchased from producers and other similar sellers thereof, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

The stated purpose of this budget-type application is to augment Applicant's ability to act with reasonable dispatch in connecting to its pipeline system supplies of natural gas which may become available from various producing areas generally co-extensive with its pipeline system or the system of other pipeline companies which may be authorized to transport gas for the account of or exchange with Applicant.

Applicant states that the total cost of the proposed facilities would not exceed $7,000,000 with no single project to exceed a cost of $1,500,000. These costs would be financed from treasury cash, it is said.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 9, 1977, file wtih the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24881 Filed 8-26-77;8:45 am]

[Docket No. CP70-258]

CITIES SERVICE GAS CO.

Petition To Amend

AUGUST 19, 1977.

Take notice that on August 10, 1977, Cities Service Gas Company (Petitioner), P.O. Box 25128, Oklahoma City, Oklahoma 73125, filed in Docket No. CP70-258 a petition to amend the Commission's order of July 22, 1970, issued in the instant docket (44 FPC 149) pursuant to Section 7(c) of the Natural Gas Act so as to provide for the utilization of an existing exchange point located at the outlet of Petitioner's Hugoton Compressor Station in Grant County, Kansas, which point was previously used for delivery of exchange volumes of gas from Petitioner to Kansas-Nebraska Natural Gas Company, Inc. (Kansas-Nebraska) also as a point for receipt of volumes of gas from Kansas-Nebraska to Petitioner, all as more fully set forth in the petition to amend on file with the Commission and open to public inspection.

Petitioner indicates that on July 22, 1970, it was authorized to exchange up to 150,000 Mcf of natural gas per day with Kansas-Nebraska pursuant to an exchange agreement dated March 27, 1970, and that under the terms of the exchange agreement, as amended, Petitioner delivers volumes of gas to Kansas-Nebraska at:

(1) The outlet of Petitioner's Hugoton Compressor Station, Grant County, Kansas;
(2) The Copeland Delivery Point, Haskell County, Kansas;
(3) The Unruh Delivery Point, Edwards County, Kansas;
(4) The Deerfield Delivery Point, Kearny County, Kansas;

and Kansas-Nebraska redelivers equivalent volumes of gas to Petitioner at the Haven Exchange Point, Reno County, Kansas.

It is stated that as a result of the exchange and transportation arrangement between Petitioner and Colorado Interstate Gas Company (CIG) certificated in Docket No. CP76-415 on May 9, 1977, which is now in operation, volumes of gas purchased by Petitioner in South Central Wyoming are being delivered by CIG to Kansas-Nebraska at the Deerfield Exchange Point for Petitioner's account. As Kansas-Nebraska is unable to redeliver all of the exchange volumes to Petitioner at the Haven Exchange Point, it has become necessary to make arrangements for another point of delivery of volumes of gas from Kansas-Nebraska to Petitioner, it is indicated. Consequently, Kansas-Nebraska has agreed to backflow volumes of gas from the Deerfield Exchange Point to the existing exchange point at the outlet of Petitioner's Hugoton Station and deliver exchange volumes to Petitioner at this point.

Petitioner states that it and Kansas-Nebraska have amended their existing exchange agreement to provide that the exchange point at the outlet of Petitioner's Hugoton Compressor Station may be used for either the delivery or receipt of gas by either party.

No new facilities are necessary to effectuate this proposal, it is said. Petitioner asserts that the subject proposals is necessary to bring additional volumes of gas purchased in the South Central Wyoming area into its pipeline system.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before September 12, 1977 file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must

V 42167 A AUG 29 77 UMI

file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24909 Filed 8-26-77;8:45 am]

[Docket No. CP75-158]

CONSOLIDATED GAS SUPPLY CORP.

Petition To Amend

AUGUST 22, 1977.

Take notice that on July 29, 1977, Consolidated Gas Supply Corporation (Petitioner), 445 West Main Street, Clarksburg, West Virginia 26301, filed in Docket No. CP75-158 a petition to amend pursuant to Section 7 of the Natural Gas Act the Commission's order of May 29, 1975 (53 FPC ____), as amended by orders issued August 18, 1976 (56 FPC ____) and May 25, 1977 (57 FPC ____) in the instant docket, so as to modify a previously certificated major pipeline replacement project by substituting an 1100 horsepower compressor facility for an 800 horsepower facility at Petitioner's Yellow Creek Station, Calhoun County, West Virginia, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

It is indicated that the May 29, 1975, order authorized the construction, during the years 1975 through 1979, of approximately 119 miles of pipeline and certain compressor facilities which were designed to replace the Petitioner's existing West Virginia wet gas transmission system. The May 25, 1977, order authorized Petitioner to construct and operate an 880 horsepower compressor station near Yellow Creek in lieu of the 1320 horsepower Burnt House station theretofore authorized, it is said.

Petitioner indicates that at the time the Yellow Creek station was designed, Petitioner believed that a suitable 880 horsepower engine was available which could be installed at the Yellow Creek facility. However, Petitioner asserts that it has recently learned that such engine is not available and wishes to use an engine of comparable size and quality (i.e., the Cooper-Bessemer GMV-10-TF 1100 horsepower compressor engine) which would cost approximately $873,100.

Petitioner states that the substitution of the 1100 horsepower compressor engine would cause no substantial changes in the design capacity and operating conditions reflected in the flow diagrams attached to the original application. Furthermore Petitioner anticipates that no significant changes in environmental impact would occur by reason of the proposed modification of the Yellow Creek Station project.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before September 8, 1977 file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24894 Filed 8-26-77;8:45 am]

[Docket No. RP72-134; (PGA77-8) (PGA77-9)]

EASTERN SHORE NATURAL GAS CO.

Purchased Gas Cost Adjustment to Rates and Charges

AUGUST 22, 1977.

Take notice that Eastern Shore Natural Gas Company (Eastern Shore) on July 27, 1977, tendered for filing the following revised tariff sheets:

First Revised Sheet No. 3B Superseding Substitute Original Sheet No. 3B.
Forty-Fifth Revised Sheet No. 3A Superseding Forthy-Fourth Revised Sheet No. 3A.
Second Revised Sheet No. 3B Superseding First Revised Sheet No. 3B.
Forthy-Fifth Revised PGA-1.

The First Revised Sheet No. 3B tracks reductions in rates to be effective April 1, 1977, filed by Eastern Shore's sole supplier, Transcontinental Gas Pipe Line Corporation (Transco) for sales of natural gas from its Washington Storage Field under the WSS rate schedule.

The Forty-Fifth Revised Sheet No. 3A and PGA-1 and the Second Revised Sheet No. 3B will increase the demand and commodity charges of Eastern Shore's Rate Schedules CD-1, CD-E, G-1, E-1, I-1, GSS-1, PS-1, LGA, and WSS-1. The proposed increases to Eastern Shore's rates track proposed increases to the demand and commodity charges to Transco's CD, G, E, PS, GGS, and LGA Rate Schedules, which were filed on July 1, 1977, in Docket No. RP77-108 and were accepted for filing and suspended for five months by the Commission's Order of July 20, 1977. Eastern Shore requests an effective date for its revised tariff sheets filed herein concurrent with the effective date ultimately assigned to Transco's revised tariff sheets to Second Revised Volume No. 1 and Original Volume No. 2 of its FPC Gas Tariff.

§ 923.51 Mediation.

Eastern Shore requests waiver of the notice requirements of Section 154.22 of the Commission's Regulations and of Section 20.2 of the General Terms and Conditions of its Tariff, to the extent necessary to permit the proposed tariff sheets to become effective on the dates requested, to coincide with the proposed effective dates of Transco's rate changes. In support of its request, Eastern Shore states that Transco did not mail its revised tariff sheets, filed in Docket No. RP77-108, to Eastern Shore until June 30, 1977.

Copies of this filing have been mailed to each of the Company's jurisdictional customers and to interested State Commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 29, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-25010 Filed 8-26-77;8:45 am]

[Docket Nos. CP77-269, CP77-270, CP77-271, CP77-272, CP77-330, CP77-331, and CP77-332]

EL PASO EASTERN CO., EL PASO LNG TERMINAL CO., EL PASO NATURAL GAS CO., UNITED LNG CO., AND UNITED GAS PIPE LINE CO.

Availability of Final Environmental Impact Statement

AUGUST 23, 1977.

Notice is hereby given in the above dockets that on September 1, 1977, as required by Section 2.82(b) of Commission Order No. 415-C, a Final Environmental Impact Statement (FEIS) prepared by the staff of the Federal Power Commission was made available. The FEIS deals with the applications filed by El Paso Eastern Company (Docket Nos. CP77-330, CP77-331, CP77-270), El Paso LNG Terminal Company (Docket No. CP77-269), El Paso Natural Gas Company (Docket No. CP77-332), United LNG Company (Docket No. CP77-272), and United Gas Pipe Line Company (Docket No. CP77-271) which relate directly or indirectly to a proposal by El Paso Eastern Company, pursuant to Section 3 of the Natural Gas Act, to import liquefied natural gas (LNG) from Algeria to a terminal to be located in the vicinity of Port O'Connor, Texas, on Matagorda Bay. Approval of the applications would authorize the construction and operation of facilities necessary to unload, store, revaporize, and distribute the imported LNG. These facilities include unloading and service platforms, three 100,000 cubic meter storage tanks, vaporizer units, and other appurtenant structures. The use of seawater is proposed for regasifying the LNG; proposed initial dredging in connection with the terminal would total 29.3 million cubic yards. A total of 463 miles of pipeline would be required in order to transport the regasified LNG from the terminal to Waha, Texas.

This FEIS has been circulated to Federal, state, and local agencies and all parties to the proceeding. This FEIS has been placed in the public files of the Commission and is available for public inspection both in the Commission's Office of Public Information, Room 1000, 825 North Capitol Street NE., Washington, D.C. 20426, and at its regional office located at 819 Taylor Street, Fort Worth, Texas 76102. Copies of the FEIS are available in limited quantities from the Federal Power Commission's Office of Public Information, Washington, D.C. 20426.

KENNETH F. PLUMB,
Secretary.

[Docket No. RM77-14]

GAS RESEARCH INSTITUTE

Granting Petitions to Intervene

AUGUST 23, 1977.

Timely petitions to intervene in the above-captioned proceeding were filed by Colorado Interstate Gas Company, Boorklyn Union Gas Company, and Southern Natural Gas Company. Each of the petitioners alleges that it will be affected by the subject proceeding and that its interests will not adequately be represented by other parties. No objections to the petitions have been received.

Pursuant to Section 3.5(a) (30) of the Commission's General Rules, the above petitioners are hereby permitted to intervene in the captioned proceeding subject to the Commission's rules and regulations: *provided, however,* That participation of the intervenors shall be limited to the matters affecting asserted rights and interests specifically set forth in the petitions to intervene; *and provided, further,* That the admission of such intervenors shall not be construed as recognition by the Commission that they might be aggrieved by any order entered in this proceeding.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24981 Filed 8-26-77;8:45 am]

[Docket No. CP70-289]

INTER-CITY MINNESOTA PIPELINES LTD., INC.

Petition To Amend

AUGUST 23, 1977.

Take notice that on August 15, 1977, Inter-City Minnesota Pipelines LTD., Inc. (Petitioner), 612 Cloquet Avenue, Cloquet, Minn. 55720, filed in Docket No. CP70-289 a petition to amend the Commission's order of August 10, 1970, as amended, issued in the instant docket (44 FPC 262) pursuant to Section 3 of the Natural Gas Act so as to authorize the continued importation of natural gas from Canada at an increase import rate of $2.16 (United States) per million Btu's effective September 21, 1977, all as more fully set forth in the petition to amend on file with the Commission and open to public inspection.

It is stated that pursuant to the Commission's order of August 10, 1970, ICG Transmission Limited (Transmission) was authorized, inter alia, to import into the United States up to 38,000 Mcf of gas per day (12,481,000 Mcf per year) from Canada through pipeline facilities crossing the international border near Sprague, Manitoba; to export to Canada up to 36,366 Mcf per day (12,144,000 Mcf per year) of this gas near Baudette; and to reimport up to 22,023 Mcf per day (7,715,000 Mcf per year) of this gas at International Falls, Minn. The National Energy Board of Canada (NEB) issued Licenses on August 4, 1970 with coincident authorizations, it is said.

Petitioner stated that by an order issued September 26, 1973, it was substituted for Transmission as holder of import-export authorization in the captioned docket, and authorization was granted to import an increased volume of 10,296 Mcf of gas per day (305,000 Mcf per year) at Sprague; export the increased amount at Baudette; and reimport at International Falls an increased volume of 9,500 Mcf of gas per day (985,000 Mcf per year). The NEB similarly modified the Licenses. Petitioner indicates that all natural gas imported and exported in accordance with the above authorizations is purchased from Transmission pursuant to agreement, as restated recently by amending agreement dated July 18, 1977.

It is stated that on July 21, 1977, the National Energy Board established a new border export price to be charged by Transmission of $2.16 (United States) per million Btu's effective September 21, 1977. Consequently, Petitioner request that the Commission amend its existing authorization to reflect the increased border price of $2.16 (United States).

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before September 13, 1977 file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24973 Filed 8-26-77;8:45 am]

[Docket No. CP77-560]

KENTUCKY GAS STORAGE CO.

Application for Certificate of Public Convenience and Necessity and of Request for a Disclaimer of Jurisdiction

AUGUST 23, 1977.

Take notice that on August 11, 1977, Kentucky Gas Storage Company (Applicant), 100 St. Ann Building, Owensboro, Ky. 43201, filed in Docket No. CP77-560 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing (1) the construction and operation of certain facilities necessary to develop, operate, and maintain the White Plains Gas Field located in Hopkins and Muhlenburg Counties, Ky., as an underground storage reservoir to render natural gas storage service for certain natural-gas companies; (2) the operation of an existing 51-mile, 12-inch diameter pipeline for the transportation of natural gas in interstate commerce in connection with such storage service; (3) the transportation of gas to certain industrial customers and right-of-way grantors in Kentucky presently being served from the pipeline with gas produced and purchased in Kentucky; and (4) the transportation and delivery of the balance, if any, of the gas remaining in the White Plains Field, or its thermal equivalent, to Orbit Gas Co. (Orbit), at a rate of up to 3,000 Mcf per day. Take further notice that Applicant also requests, on behalf of certain producers in Kentucky who are presently selling gas for consumption within Kentucky, a disclaimer of jurisdiction with respect to the sale of gas by various producers to Orbit and the sale of gas by Orbit to certain industrial customers referred to above under the terms of existing contracts. The details of the proposals are more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant is a general partnership recently organized under the laws of Kentucky specifically to develop and operate the White Plains Gas Field as a natural gas storage reservoir, it is indicated. The application shows that the existing general partners of the organization are Bay State Energy Resources, Inc. (a subsidiary of Bay State Gas Co.), Storage Development Corp., and Gas Storage, Inc. (a subsidiary of the Southern Connecticut Gas Co.) and that Energy Storage Ventures, a Massachusetts partnership, would operate the storage system for Applicant. The application further states that the partnership would have a capital structure composed of 25 percent equity and 75 percent debt, with approximately 48 percent (or $2,600,000) of total required equity funds to be obtained from the three existing general partners. It is indicated that the remaining equity consisting of approximately $3,000,000, would be obtained

V 42 167 A AUG 29 77 UMI

from other utility customers, institutional investors, or other private investors who would become partners of Applicant.

Applicant states that it has acquired the working interest and storage rights in the presently producing White Plains Gas Field for the sum of $1,500,000, and seeks authorization to construct and operate the facilities necessary to convert the field to an underground natural gas storage facility with top storage capacity of 4,600,000 Mcf and to render long-term natural gas storage for the following companies: Bay State Gas Supply, Inc. (a subsidiary of Bay State Gas Co.), Chattanooga Gas Co., Fayetteville Gas System, Knoxville Utilities Board, Middle Tennessee Natural Gas Utility District, Nashville Gas Co., Inc., Natural Gas Utility District of Hawkins County, The Southern Connecticut Gas Co., United Cities Gas Co., and Volunteer Natural Gas Co. (hereinafter collectively referred to as Buyers). It is indicated that each of the Buyers would be permitted to inject into and withdraw from the storage field on the following basis:

Company	Maximum storage volume 1,000 ft³	Maximum daily quantity 1,000 ft³ per day
Bay State Gas Supply, Inc. (Bay State Gas Co.)	1,625,000	10,720
Chattanooga Gas Co.	550,000	3,640
Fayetteville Gas System	10,000	(a)
Knoxville Utilities Board	200,000	1,300
Middle Tennessee Natural Gas Utility District	30,000	200
Nashville Gas Co.	1,200,000	7,950
Natural Gas Utility District of Hawkins County	20,000	130
The Southern Connecticut Gas Co.	450,000	2,980
United Cities Gas Co.	400,000	2,650
Volunteer Natural Gas Co.	115,000	760
Total	4,600,000	30,429

Applicant proposes to purchase from these Buyers or on the open market 3,400,000 Mcf of cushion gas at an estimated cost of $1.78 per Mcf including the cost of transportation to Applicant's facilities. Buyers would supply the required compressor fuel to Applicant at no charge and would make available from existing interestate gas supply contracts an additional 4,600,000 Mcf to be stored in the White Plains Field for their account, it is said. Applicant proposes to render the service to Buyers during the initial injection and withdrawal periods on a best efforts basis, and on a firm basis thereafter. Under Applicant's proposed gas storage tariff, Buyers would pay Applicant a monthly demand charge of $14.083 per Mcf multiplied by the maximum daily quantity specified in the gas storage agreements for the storage service, it is indicated.

As an integral part of its storage program, Applicant seeks authority to operate an existing 51-mile, 12-inch diameter pipeline system which would connect the White Plains Field with the pipeline facilities of both Texas Gas Transmission Corp. (Texas Gas) and Midwestern Gas Transmission Co. (Midwestern) in Daviess County, Ky. Applicant states that it has entered into a contract to purchase the pipeline from the existing owner, National Pipeline Co., for the sum of $50,000 per mile and that the pipeline would be used to transport injection and withdrawal volumes to and from storage for the Buyers.

During the injection period, April 1 through October 31 of each year, it is stated that Buyers would request East Tennessee Gas Pipeline Co. (East Tennessee) and Tennessee Natural Gas Lines, Inc. (Tennessee Natural) to receive designated daily injection volumes at various existing points of delivery for transportation and delivery to Tennessee Gas Pipeline Co., a Division of Tenneco Inc. (TGP). TGP would then transport all designated daily volumes so received for delivery to Texas Gas at an existing point of interconnection in Washington County, Miss., and Texas Gas would then transport all daily volumes so received for delivery to Applicant at a point of interconnection with Applicant's 51-mile pipeline to be constructed in Daviess County, Ky., it is said. Applicant states that it would then transport the volumes so received through the existing pipeline to the White Plains Field for injection and storage.

During the withdrawal period, November 1 through March 31 of each year, it is stated that Applicant would transport designated daily withdrawal volumes through the existing 51-mile pipeline to a point of interconnection with Midwestern to be constructed in Daviess County, Ky. Midwestern would transport the volumes received from Applicant at the new point of delivery to TGP at an existing point of delivery in Sumner County, Tenn., and TGP would then transport and deliver the withdrawal volumes received from Midwestern to East Tennessee and Tennessee Natural for redelivery to Buyers, it is said.

It is said that as a condition to the contract for the purchase of the 51-mile pipeline from National Pipeline Co., Applicant must obtain authorization to provide certificated transportation services for four industrial customers, National Southwire Aluminum Co., Southwire Co., National Aluminum Corp., and Borg Warner Corp., located adjacent to the pipeline. Applicant states that the four companies presently receive through the pipeline intrastate natural gas that is purchased in the White Plains Field from Orbit. Applicant further states that the production, transportation, and use of this gas is wholly within the Commonwealth of Kentucky and that the pipeline which Applicant proposes to acquire is the only means by which those customers can receive gas produced from the White Plains Field. In accordance with the stated contract condition, Applicant requests authority to transport up to 10,000 Mcf per day to the four companies at a rate of 0.14156¢ per Mcf per mile transported.

Applicant further requests a disclaimer of jurisdiction by the Commission over sales of gas by various producers to Orbit and over sales of gas by Orbit to the four industrial customers mentioned above under the terms of existing contracts. Applicant states that the requested exemptions are required as a condition to the contract for the purchase of the pipeline and that the exemptions would be limited to existing points of receipt and delivery.

Orbit retained ownership and production rights to the gas remaining in the White Plains Field when it transferred its storage rights in the field to National Steel Co., it is asserted. Applicant states that its contract with National Steel Co. for the purchase of the field provides that upon commencement of storage operations, Applicant must deliver the balance of gas remaining in the field, if any, or its thermal equivalent, to its owner, Orbit, or to existing customers of Orbit, at a rate of up to 3,000 Mcf per day. It is said that the exact volume of the reserved gas at the time Applicant commences operations would be determined by independent engineering analysis. The application further states that if the total volume of gas reserves belonging to Orbit equals or exceeds 200,000 Mcf, Applicant would purchase up to 300,000 Mcf from Orbit at a price of one dollar per Mcf, to be sold and delivered to existing right-of-way customers on behalf of Orbit. In accordance with the stated contract provision, Applicant requests authority to deliver to Orbit, or to existing customers of Orbit, the balance of any reserve gas or its thermal equivalent at a rate of up to 3,000 Mcf per day and states that it would meet its delivery obligation, if any, to Orbit from gas purchased for use as cushion gas in the field.

Applicant further states that Orbit presently renders gas service to 43 farm tap customers of the pipeline under regulation of the Kentucky Public Service Commission (KPSC). The application shows that the obligation to render this service was incurred under right-of-way agreements signed during original pipeline construction, and that currently eight commercial and 35 residential customers purchase approximately 18,000 Mcf per year under these agreements. The contract for the purchase of the pipeline provides that Applicant must obtain authority to continue transportation service to these right-of-way grantors, it is said. Therefore, Applicant requests authority to receive from Orbit and transport for delivery to the right-of-way grantors on behalf of Orbit sufficient quantities of gas to meet the terms of these agreements. It is stated that sales of gas to these grantors would continue to be regulated by the KPSC.

Applicant proposes to construct two compressor stations, a central meter station, one pipeline meter and regulating station, approximately 12 miles of various sized field gathering lines, small equipment, and administration buildings to implement its storage proposal. Fifteen of the existing 22 wells in the White Plains Field will be converted to injection/withdrawal wells, four to observation wells and three will be abandoned, it is said. In addition, Applicant proposes to drill 30 new injection/withdrawal wells and two new observation wells.

The application shows that the estimated cost of the proposed facilities, including acquisition, field development, and storage gas acquisition costs, is $22,242,300, and that the required development and construction funding would be obtained from conventional short-term lending institutions.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 14, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24979 Filed 8-26-77;8:45 am]

[Docket No. ER77-388]

LAKE SUPERIOR DISTRICT POWER CO.

Order Denying Motion for Reconsideration

AUGUST 22, 1977.

On June 24, 1977, the Commission issued an order in this docket which accepted the filing of proposed contracts between Lake Superior District Power Company (Lake Superior) and its customers, Medford Electric Utility and the City of Wakefield, and suspended the effectiveness of the proposed rates contained in the contracts for two months until September 1, 1977, when they are to become effective subject to refund.

On July 25, 1977, Lake Superior filed an "Application for Rehearing" of the June 24, 1977 order. Since the order is interlocutory, no application for rehearing is permitted.[1] However, the Commission will treat the application as a Motion For Reconsideration of the order. On July 27, 1977, Medford Electric Utility filed a response to Lake Superior's filing.

Lake Superior's Motion recites nine arguments in support of reconsideration. Many of the reasons set forth in the filing were considered by the Commission prior to the issuance of the June 24, 1977 order.[2] The remaining assertions by Lake Superior are either unfounded or unsubstantiated. Accordingly, the motion for reconsideration must be denied.

The Commission finds: Lake Superior's Motion For Consideration of July 25, 1977, should be denied.

The Commission orders:

(A) Lake Superior's Motion For Reconsideration of July 25, 1977, is hereby denied.

(B) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP73-91 (PGA77-2b)]

McCULLOCH INTERSTATE GAS CORP.

Revised Purchased Gas Adjustment Rate Increase Filing

AUGUST 22, 1977.

Take Notice that on July 29, 1977, McCulloch Interstate Gas Corporation ("McCulloch Interstate") tendered for filing copies of Substitute Tenth Revised Sheet No. 32 to its FPC Gas Tariff Original Volume No. 1, as required under the Commission's Rules and Regulations under the Natural Gas Act.

McCulloch Interstate's Substitute Tenth Revised Sheet No. 32 provides for a Purchased Gas Adjustment rate increase of 23.31¢ per MMBtu, effective April 2, 1977. McCulloch Interstate's filing is made in order to: (1) recover the balance in McCulloch's Unrecovered Purchased Gas Cost Account as of December 31, 1975 and December 31, 1976 (2) to provide for a current Gas Cost Adjustment in order to permit McCulloch to recover the higher gas purchases, and (3) to recover a carrying surcharge of nine percent (9%) permitted under Ordering Paragraph (D) of Opinion 770.

This revised rate increase reflects the resolution of issues between McCulloch Interstate and the Commission staff, in an informal conference held on June 23, 1977, which was directed by the Commission in its Order of June 8, 1977, in this docket proceeding. (Paragraph C).

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 29, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-25012 Filed 8-26-77;8:45 am]

[Docket No. CP77-567]

MICHIGAN WISCONSIN PIPE LINE CO.

Pipeline Application

AUGUST 19, 1977.

Take notice that on August 15, 1977, Michigan Wisconsin Pipe Line Company (Applicant), One Woodward Avenue, Detroit, Mich. 48226, filed in Docket No. CP77-567 an application pursuant to Section 7(c) of the Natural Gas Act, as amended, for a certificate of public convenience and necessity authorizing (1) the construction and operation of facilities necessary to connect to its existing offshore gathering system, gas reserves underlying South Marsh Island Area Blocks 136 and 137, offshore Louisiana (the Block 137 field), (2) the construction and operation of pipeline facilities necessary to reinforce said gathering system, and (3) the construction and operation of an interconnection between the existing pipeline systems of Applicant and United Gas Pipe Line Company (United) in St. Mary Parish, La. all as more fully set forth in the application on file with the Commission and open to public inspection.

The application indicates that as a result of active drilling and development programs in offshore Louisiana, proven reserves of approximately 143 Bcf in addition to potential reserves of 61 Bcf have been developed in the Block 137 field, and that of such proven and potential reserves, Continental Oil Company (Conoco) has agreed to sell to Applicant all of the gas atributable to Conoco's one-half (½) and one-third (⅓) interest in the reserves underlying Block 136 and Block 137 respectively pursuant to a contract which is currently being finalized. The remaining one-half

[1] See Section 1.34 of the Commission's Rules of Practice and Procedure, which requires a final decision or order before an application for rehearing can lie.

[2] The effect on the financial integrity of the Company, the fact that a shorter suspension period would still provide for refunds, the fact that Lake Superior previously had fixed-rate contracts with its customers, the fact that the suspension order will not modify proposed rates prior to the effective date.

V 42 N 167 AUG 29 77 UMI

(½) interest in Block 136 is committed to Texas Eastern Transmission Corporation (Texas Eastern), and the remaining two-thirds (⅔) interest in Block 137 is committed in equal portions to Texas Eastern and United.

Applicant states that a westerly leg of its existing offshore gathering system presently terminates in South Marsh Island Area Block 108, and that to connect the reserves underlying the Block 137 field, that it is proposing to construct approximately 13.5 miles of 16" O.D. pipeline connecting the "A" production platform for the Block 137 field and the westerly terminus of its existing offshore gathering system in Block 108. Applicant also proposes to install and operate on the "A" production platform gas measurement facilities and cause to have installed 1000 horsepower of compression. Applicant states that the cost associated with the aforementioned pipeline, measurement, compression, and associated appurtenances is estimated to be $10,436,520.

The application further indicates that Texas Eastern and United have expressed their intention to have their aforementioned dedicated supplies transported by Applicant and redelivered or exchanged for their accounts at mutually agreeable locations. Applicant states while the pipeline systems of Texas Eastern and Applicant are interconnected at various locations within the State of Louisiana, there presently are no existing interconnections between the pipeline systems of United and Applicant. Accordingly, to effectuate redelivery of the gas transported by Applicant for United, Applicant proposes to construct a new interconnection which will be located downstream of Applicant's Patterson Compressor Station in St. Mary Parish, Louisiana, which will comprise two (2) 10" meter runs, including associated appurtenances. Applicant estimates that the cost of the interconnection will be $346,070.

The application further indicates that to effectuate onshore deliveries from the Block 137 field and other offshore area blocks, provide additional transportation service for others, and to provide flexibility in the operation of its offshore system, that it further proposes to construct and operate 29.9 miles of 30" diameter pipeline paralleling and looping an existing section of 30" pipeline, the loop to be constructed between its existing Block 188 offshore compressor station and Eugene Island Area Block 77. Incident to the construction of the loop, Applicant states that it also will construct and operate a new manifold platform in Block 77 which will facilitate making the necessary tie-in of the proposed loop with its existing offshore pipeline system. The cost attributable to the proposed loop and platform is estimated by the Applicant to be $29,491,230.

The application indicates that the facilities for which authorization is requested are estimated in total to cost $40,352,400. Applicant contemplates that the construction will be financed with treasury funds, retained earnings, and other funds generated internally, together with borrowings from banks under short-term lines of credit as may be required. Applicant further anticipates that any bank borrowings will subsequently be permanently financed as market conditions permit.

Any person desiring to be heard or to make any protest with reference to said application, on or before September 12, 1977, should file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24904 Filed 8-26-77;8:45 am]

[Docket Nos. CP75-278, CP75-283 and CP75-556]

MICHIGAN WISCONSIN PIPE LINE CO. ET AL.

Application and Consolidation

AUGUST 22, 1977.

Take notice that on August 8, 1977, PGC Coal Gasification Company (PGC) and Natural Gas Pipeline Company of America (Natural) (Applicants), 122 South Michigan Avenue, Chicago, Illinois 60603, filed in Docket No. CP77-556 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale by PGC to Natural of commingled natural gas and synthetic gas produced from coal; and authorizing Natural to file and make effective revisions in the general terms and conditions of its FPC Gas Tariff designed to permit recovery through Natural's purchased gas cost adjustment clause of all costs associated with the purchase of the commingled natural gas and synthetic gas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is indicated that by an interim agreement dated March 11, 1977, PGC and ANG Coal Gasification Company (ANG) have agreed, subject to negotiation and execution of necessary joint ownership and other agreements, to construct a coal gasification plant in Mercer County, North Dakota, which would be capable of producing 125,000 Mcf per average day of high Btu synthetic gas owned by PGC and ANG, and that there would be an equal sharing of all costs, obligations, plant output and project revenues.

It is stated that pursuant to and subject to the provisions of a precedent agreement to be entered into by and between PGC, Natural, ANP, Michigan Wisconsin Pipe Line Company (Michigan Wisconsin), and Great Lakes Transmission Company (Great Lakes), PGC proposes to sell to Natural quantities of commingled natural gas and synthetic gas thermally equivalent to PGC's share of the synthetic gas produced by the plant less line loss and applicable fuel. The sale would take place at an existing point of delivery between Natural and Michigan Wisconsin near Woodstock, Illinois, and the synthetic gas would be transported from the plant to Thief River Falls, Minnesota through proposed facilities of Great Lakes, and, as part of a commingled stream, from Thief River Falls to Woodstock, through existing and proposed facilities of Great Lakes and Michigan Wisconsin. Applicants assert that the Mercer County coal gas would be used to meet requirements of Natural's existing customers and would offset increases in curtailments which would otherwise be experienced by the customers.

It is indicated that the gas purchase agreement to be entered into by Applicants provides for, inter alia:

(1) a charge designed to recover, during the construction and testing periods, the cost of funds invested in the project, including a 12 percent return on equity, and, during the testing period, operation and maintenance expenses, the cost of coal and transportation costs; and

(2) a charge designed to recover, during the operational period, the cost of service of the plant, including a 15 percent return on equity, the cost of coal and transportation costs.

Applicants state that in the event gas production falls below 75 percent of normal plant capacity for more than 25 consecutive days, the agreement provides for reduction (or if below 25 percent of normal plant capacity, elimination) of the return on equity. Natural requests authorization to file and make effective revisions in its purchased gas cost adjustment clause designed to permit current recovery of all charges incurred by Natural under the gas purchase agreement. Applicants state that these provisions, as well as federal loan guarantees, are necessary to permit financing of the coal gasification plant.

The instant application may involve common questions of law or fact with the applications pending in Docket No. CP75-278 in which PGC, ANP, and Michigan Wisconsin propose to undertake the coal gasification project and in Docket No. CP76-283 in which Great Lakes proposes to transport the commingled stream of gas. Therefore, the proceeding on the instant application is consolidated for hearing with the proceeding in Docket No. CP77-278, et al.

Any person desiring to be heard or to make any protest with reference to the application in Docket No. CP77-556 should on or before September 12, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules. Any person who has heretofore filed in the consolidated proceeding in Docket No. CP75-278, et al., need not file again.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24892 Filed 8-26-77;8:45 am]

[Docket No. CP70-24]

MIDWESTERN GAS TRANSMISSION CO.

Petition to Amend

AUGUST 19, 1977.

Take notice that on August 3, 1977, Midwestern Gas Transmission Company (Petitioner), P.O. Box 2511, Houston, Texas 77001, filed in Docket No. CP70-24 a petition to amend pursuant to Section 7 of the Natural Gas Act the Commission's order issued April 30, 1970 in Docket No. CP70-19, et al. (43 FPC 635) so as to authorize the installation of a 3,260 horsepower Centaur Turbine-Centrifugal compressor unit to replace the originally installed 2,710 horsepower compressor unit at Compressor Station No. 2227, all as more fully set forth in the petition which is on file with the Commission and open to public inspection.

Petitioner states that the April 30, 1970 order authorized Petitioner to construct and operate a new Compressor Station No. 2227 on its northern system which would contain a 3,165 horsepower turbine-centrifugal type compressor, but due to the need for the prompt commencement of service and a limited availability of compressor equipment at the time, Petitioner installed a 2,710 horsepower Centaur Turbine - Centrifugal Solar compressor. Petitioner further states that it has been advised by the manufacturer of the 2,710 horsepower compressor that such unit was in need of immediate overhaul and that this overhaul would require approximately 45 days and cost an estimated $45,570 and that in overhauling such a unit certain of the component parts would be replaced with a resulting upgrading of the horsepower rating thereof to 3,260 horsepower. Furthermore, Petitioner was advised that in contrast to the estimated downtime of 45 days for the overhaul of the 2,710 horsepower unit and the resultant loss of system capacity for that period, Petitioner could replace the 2,710 horsepower unit with a new unit rated at 3,260 horsepower which would require a minimum amount of downtime and cost an estimated $77,000.

Accordingly, Petitioner seeks authorization to replace the 2,710 horsepower unit with a new 3,260 horsepower unit.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before September 9, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24890 Filed 8-26-77;8:45 am]

[Docket No. ER77-552]

MISSISSIPPI POWER & LIGHT CO.

Agreement for Purchase of Power

AUGUST 22, 1977.

Take notice that on August 11, 1977, Mississippi Power & Light Company (Mississippi) tendered for filing an unexecuted Agreement for Purchase of Power. Mississippi indicates that this Agreement provides for the sale of electric energy by Mississippi to Magnolia Electric Power Association (Magnolia), to be delivered to a point near McComb, Mississippi.

Mississippi states that its Rate Schedule REA-14 (revised) incorporated in the Agreement was heretofore filed with the Commission on October 6, 1976, as Company's service rate schedule applicable to all existing and new points of delivery. Mississippi further states that by order of the Commission on August 27, 1976, (Docket No. ER76-830), Rate Schedule REA-14 (Revised) became effective December 1, 1976, subject to refund.

Mississippi requests that the Commission waive applicable notice requirements and permit the Agreement to become effective on July 13, 1977, the date service was initially rendered.

Mississippi states that a copy of this filing has been mailed to Magnolia.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 2, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RI77-68]

MULLINS & PRICHARD

Amended Petition for Special Relief

AUGUST 19, 1977.

Take notice that on August 5, 1977, Mullins & Prichard, 416 Oil & Gas Building, New Orleans, Louisiana 70113, filed an amended petition for special relief in the above-captioned docket number. On May 2, 1977, Mullins & Prichard filed a petition for special relief seeking to increase the rate charged for gas from Well No. 1-A, Section 2-T18S-R11E, Shell Island Pass Field, St. Mary Parish, Louisiana, from 30.0988 cents per Mcf plus 7 cents tax reimbursement, to $1.20 per Mcf plus 7 cents tax reimbursement at 15.025 psia. By this amendment Mullins & Prichard seek to withdraw their request to receive $1.20 per Mcf, and to substitute therefor a rate of $1.10 per Mcf, plus reimbursement of all applicable severance or gathering taxes.

Any person desiring to be heard or to make any protest with reference to said petition should on or before September 12, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24887 Filed 8-26-77;8:45 am]

V42167A AUG 29 77 UMI

[Docket No. CP 77-537]

NATURAL GAS PIPELINE CO. OF AMERICA

Application

AUGUST 22, 1977.

Take notice that on July 29, 1977, Natural Gas Pipeline Company of America (Applicant), 122 South Michigan Avenue, Chicago, Illinois 60603, filed in Docket No. CP77-537 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of facilities for the receipt into its system of natural gas to be produced from reserves located in the S. E. Aylesworth Area, Bryan and Marshall Counties, Oklahoma, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant indicates that Lone Star Gas Company, a Division of Enserch Corporation, (Lone Star) and Pioneer Gas Products Company (Pioneer) have entered into a twenty (20) year gas purchase contract (Pioneer Contract) dated February 24, 1977 providing for the sale and purchase of natural gas to be produced from gas reserves in the S. E. Aylesworth Area.

Applicant further states that pursuant to the Precedent Agreement dated May 6, 1971, between Lone Star and Applicant, Lone Star is required to tender for sale to Applicant any new gas reserves acquired by any Lone Star affiliate including the gas to be purchased by Lone Star under the Pioneer Contract, as authorized by order issued February 9, 1973, in Docket No. CP71-274. Furthermore, Lone Star, by Partial Assignment of a contract dated June 1, 1977, has assigned to Applicant 75 percent of such gas available from Pioneer, it is said

Applicant proposes to construct and operate measuring facilities, 8-inch tap connection and approximately twenty-seven (27) miles of 8-inch pipeline from the S. E. Aylesworth Area to Applicant's existing 10-inch pipeline in Section 7, Township 7 South, Range 3 East, Love County, Oklahoma. It is stated that the estimated cost of these facilities is $2,157,000, which cost will be met from funds on hand.

Applicant estimates that its share of the proved natural gas reserves committed by the contract to be approximately fifteen 15,000,000 Mcf with a deliverability of 6,000 Mcf per day.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 8, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24895 Filed 8-26-77;8:45 am]

[Docket No. CP77-539]

NATURAL GAS PIPELINE CO. OF AMERICA

Application

AUGUST 19, 1977.

Take notice that on August 1, 1977, Natural Gas Pipeline Company of America (Applicant), 122 South Michigan Avenue, Chicago, Illinois 60603, filed in Docket No. CP77-539 an application pursuant to Section 7(c) of the Natural Gas Act and Section 157.7(g) of the Regulations thereunder (18 CFR 157.7 (g)) for a certificate of public convenience and necessity authorizing the construction and for permission and approval of the abandonment, for a twelve-month period commencing October 1, 1977, and the operation of field gas compression and related metering and appurtenant facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

The stated purpose of this budget-type application is to augment Applicant's ability to act with reasonable dispatch in the construction and abandonment of facilitie which would not result in changing Applicant's system salable capacity or service from that authorized prior to the filing of the instant application.

Applicant states that the total cost of the proposed construction and abandonment would not exceed $3,000,000 and that the cost of any single project would not exceed $500,000. Applicant states that these costs would be financed from funds on hand.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 8, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulation under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24883 Filed 8-26-77;8:45 am]

[Docket No. CP77-540]

NATURAL GAS PIPELINE CO. OF AMERICA

Application

AUGUST 19, 1977.

Take notice that on August 2, 1977, Natural Gas Pipeline Company of America (Applicant), 122 South Michigan Avenue, Chicago, Illinois 60603, filed in Docket No. CP77-540 an application pursuant to Section 7(c) of the Natural Gas Act and Section 157.7(b) of the Regulations thereunder (18 CFR 157.7(b)) for a certificate of public convenience and necessity authorizing the construction during the twelve-month period commencing October 1, 1977, and operation of facilities to enable Applicant to take into its certificated main pipeline system natural gas which would be purchased from producers and other similar sellers thereof who have received authorization from the Commission to sell natural gas to Applicant, all as more fully set forth in the application on file with the Commission and open to public inspection.

The stated purpose of this budget-type application is to augment Applicant's ability to act with reasonable dispatch in connecting to its pipeline system supplies of natural gas which may become

available from various producing areas generally co-extensive with its pipeline system or the system of other pipeline companies which may be authorized to transport gas for the account of or exchange with Applicant.

Applicant states that the total cost of the proposed facilities would not exceed $12,000,000, with no single onshore project to exceed a cost of $1,500,000, and with no single offshore project to exceed a cost of $2,500,000. It is stated that the proposed facilities would be financed from funds on hand.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 8, 1977, filed with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1,8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24912 Filed 8-26-77;8:45 am]

[Docket No. ER77-556]

NIAGARA MOHAWK POWER CORP.

Tariff Filing

AUGUST 22, 1977.

Take notice that Niagara Mohawk Power Corporation (Niagara), on August 15, 1977, tendered for filing as a rate schedule, a transmission agreement between Niagara and Consolidated Edison Company of New York, Inc. (Con Ed), dated May 27, 1977.

Niagara indicates that the service to be rendered by Niagara provides for the transmission of power and energy between Niagara's transmission connections with Rochester Gas and Electric Corporation (Rochester) and Niagara's transmission connection with Con Ed at the Pleasant Valley 345 Kv substation.

Niagara states that transmission capacity to be made available to Con Ed will be equivalent to that amount of power not to exceed 100 megawatts, which Con Ed will schedule on a daily basis for delivery from Rochester.

Niagara states that copies of this filing were served upon Con Ed and the Public Service Commission of the State of New York.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 7, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP77-557]

NORTHERN NATURAL GAS CO.

Pipeline Application

AUGUST 19, 1977.

Take notice that on August 9, 1977, Northern Natural Gas Co., (Applicant), 2223 Dodge Street, Omaha, Nebr., filed in Docket No. CP77-557 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Applicant to sell natural gas to Panhandle Eastern Pipe Line Co. (Panhandle). Northern also requests the Commission to grant a temporary certificate for the proposed sale, all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicant has contracted to purchase thirty-one and twenty-five hundredths percent (31.25%) of Exxon's production from Eugene Island Block 332 and thirty-three and one-third percent (33⅓%) of Mobil's interest in West Cameron Block 617, Offshore Louisiana. Applicant has entered into certain transportation arrangements with Panhandle and Trunkline Gas Company which provide for the transportation and redelivery of such gas to Applicant's system.

As partial consideration for the transportation of Applicant's offshore gas, Panhandle has a continuing option to purchase up to twenty percent (20%) of the volume of Applicant's Block 332 and Block 617 gas received by Trunkline.

Accordingly, Applicant proposes to sell natural gas to Panhandle for resale in interstate commerce. The gas will be sold to Panhandle on a monthly cost of service basis, which cost represents Applicant's cost of gas at the point of delivery to Trunkline. The estimated average cost of service per Mcf for the first year of operations is $2.15 for Block 332 and $2.07 for Block 617.

Any person desiring to be heard or to make any protest with reference to said application, on or before September 12, 1977, should file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP73-8 (PGA77-11)]

NORTH PENN GAS CO.

Proposed Changes in FPC Gas Tariff

AUGUST 22, 1977.

Take notice that North Penn Gas Co. (North Penn) on August 1, 1977, tendered for filing proposed changes in its FPC Gas Tariff, First Revised Volume No. 1, pursuant to its PGA Clause for rates to be effective August 1, 1977.

North Penn states that the proposed decrease in rates reflects the decrease in rates filed by Consolidated Gas Supply Corp. on July 8, 1977 for effectiveness August 1, 1977, and will decrease North Penn's jurisdictional revenues by approximately $2.5 thousand annually.

North Penn is requesting a waiver of any of the Commission's Rules and Regulations in order to permit the proposed rates to go into effect as proposed.

V 42 167 AUG 29 77 UMI

Copies of this filing were served upon North Penn's jurisdictional customers, as well as interested state commissions.

Any persons desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 30, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-25011 Filed 8-26-77;8:45 am]

[Docket No. CP75-287]

NORTHWEST PIPELINE CORP.

Petition To Amend

AUGUST 19, 1977.

Take notice that on August 2, 1977, Northwest Pipeline Corp. (Petitioner), P.O. Box 1526, Salt Lake City, Utah 84110, filed in Docket No. CP75-287, a petition to amend pursuant to Section 7 of the Natural Gas Act the Commission's order issued September 26, 1975 (54 FPC —), as amended on January 16, 1976 (55 FPC —), in the instant docket by authorizing an increase in the seasonal quantity of natural gas which it is authorized to sell and deliver pursuant to Petitioner's Storage Gas Service Rate Schedule SGS-1 and by authorizing a reallocation of the peak day, best efforts seasonal quantities of natural gas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Petitioner states that by the Commission's order of September 26, 1975, it was authorized to increase its firm winter service under its Rate Schedule SGS-1 from 240,000 Mcf up to 300,000 Mcf per day and to increase the seasonal quantity from 8,500,000 Mcf to 9,300,000 Mcf per winter season. It is stated that said order was amended January 16, 1976 by authorizing Petitioner to sell and deliver on a best efforts basis, up to an additional 71,800 Mcf on a daily basis for the period of October 16, 1975 through April 16, 1976.

It is stated that in response to its petition to amend further filed June 1, 1976, the Order of September 26, 1975, the Commission issued a temporary certificate on September 1, 1976 authorizing Petitioner, inter alia, to increase its seasonal SGS-1 service from 9,300,000 Mcf to 10,100,000 Mcf and set the matter for hearing. It is said that on October 15, 1976 the temporary certificate was amended to authorize the realloaction of SGS-1 sales and deliveries as proposed by Petitioner in its petition to amend filed September 3, 1976. Petitioner indicates that the hearings ordered by the Commission were held and the Administrative Law Judge issued his initial decision on May 18, 1977, recommending that certificates be issued granting the authorizations requested by Petitioner in the above-mentioned filings and the authorization requested by Washington Natural Gas Co. (Washington Natural), the Jackson Prairie Storage Project Operator, in its related filings in Docket No. CP75-110.

Petitioner requests in the instant Petition to Amend that the Commission's September 26, 1975 order be further amended to authorize an increase in the seasonal quantity which Petitioner is authorized to sell and deliver pursuant to its FPC Gas Rate Schedule SGS-1 from 10,100,000 Mcf to 10,800,000 Mcf and a reallocation of the peak day, best efforts and seasonal quantities which Petitioner proposes to sell and deliver pursuant to its FPC Gas Rate Schedule SGS-1 during the 1977-78 heating season.

It is said that the Eighth Revised Appendix C to the June 25, 1970 agreement among the three owners of Jackson Prairie set forth the contemplated expansion of Jackson Prairie which expansion will result in a Zone 2 inventory increase of 1,600,000 Mcf, of which 700,000 Mcf will be additional working gas and 900,000 Mcf will be additional cushion gas, for a total inventory of 26,900,000 Mcf consisting of 10,800,000 Mcf of working gas and 16,100,000 Mcf of cushion gas. No increase in the peak day or best efforts capability of the Jackson Prairie Project is proposed.

It is indicated that letter agreements between Petitioner and its SGS-1 customers have been executed reflecting the agreed upon allocations of the additional storage volumes for the 1977-78 heating season.

Petitioner indicates that the Washington Water Power Co. (Water Power), an owner of one-third of the current working gas inventory, has offered to release a portion, 7,824 Mcf daily and 281,679 Mcf seasonally, of its owned storage capacity to Petitioner so that Petitioner can make additional storage service available to Intermountain Gas Company, one of its other SGS-1 purchasers for the 1977-78 heating season.

The petition indicates the presently effective daily and seasonal allocations for the 1977-78 heating season, as temporarily authorized by the Commission's October 15, 1976 order are as follows:

	Daily quantity				Total daily quantity		Seasonal quantity	
	Firm		Best efforts					
	1,000 ft³	Therms	1,000 ft³	Therms	1,000 ft³	Therms	1,000 ft³	Therms
California-Pacific Utilities Co.	4,231	44,330	718	7,525	4,949	51,855	136,055	1,425,856
Cascade Natural Gas Co.	26,800	280,864	4,522	47,405	31,322	328,269	860,739	9,020,545
Intermountain Gas Co.	18,559	194,509	3,775	39,580	22,334	234,089	689,917	7,230,330
Northwest Natural Gas Co.	38,296	401,342	6,273	65,765	44,569	467,107	1,238,571	12,975,424
Peoples Natural Gas, Division of Northern Natural Gas Co.	514	5,387	120	1,254	634	6,641	17,313	181,440
Southwest Gas Corp.	11,600	121,568	2,775	29,095	14,375	150,663	399,533	4,092,786
Washington Natural Gas Co. and Washington Water Power Co., jointly	200,000	2,096,000	53,587	561,840	253,587	2,657,840	6,776,872	71,021,619
Total	300,000	3,144,000	71,770	752,464	371,770	3,896,464	10,100,000	105,848,000

The proposed reallocation for the 1977-78 heating season is as follows:

	Daily quantity				Total daily quantity		Seasonal quantity	
	Firm		Best efforts					
	1,000 ft³	Therms	1,000 ft³	Therms	1,000 ft³	Therms	1,000 ft³	Therms
California-Pacific Utilities Co.	4,231	44,330	718	7,525	4,949	51,855	145,925	1,529,290
Cascade Natural Gas Co.	26,800	280,864	4,522	47,405	31,322	328,269	923,272	9,675,891
Intermountain Gas Co.[1][2]	26,384	276,509	3,775	39,580	30,159	316,089	1,014,904	10,636,189
Northwest Natural Gas Co.	38,296	401,342	6,273	65,765	44,569	467,107	1,361,476	14,268,268
Peoples Natural Gas, Division of Northern Natural Gas Co.	514	5,387	120	1,254	634	6,641	18,503	193,914
Southwest Gas Corp.	11,600	121,568	2,775	29,095	14,375	150,663	417,600	4,376,448
Washington Natural Gas Co., and Washington Water Power Co., jointly [1][2]	192,175	2,014,000	53,587	561,840	245,762	2,575,850	6,918,320	72,504,000
Total	300,000	3,144,000	71,770	752,464	371,770	3,896,464	10,800,000	113,184,000

[1] The daily allocation set forth above reflects the release by water power of 82,000 therms (7,824 M ft³) of daily storage capacity.
[2] The seasonal allocations set forth above reflects the release by water power of 2,952,000 therms (281,629 M ft³) of seasonal storage capacity.

Petitioner asserts that the availability of the additional 700,000 Mcf of working gas inventory proposed herein can provide Petitioner's customers with additional volumes of natural gas to assure further adequate and reliable service within the market areas served by Petitioner's customers. Petitioner further asserts that the grant of the authorization requested would permit Petitioner to import additional volumes of natural gas during the summer months which would otherwise be lost to markets in the Pacific Northwest.

Applicant states that it does not propose any additional facilities to render the increased service and that additional volumes of gas to be delivered to Jackson Prairie for storage will be made available from Petitioner's present supply without curtailing any of Petitioner's customers' firm requirements.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before September 9, 1977 file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24911 Filed 8-26-77;8:45 am]

[Docket No. CP77-536]

NORTHWEST PIPELINE CORP.

Application

AUGUST 22, 1977.

Take notice that on July 29, 1977, Northwest Pipeline Corp. (Applicant), P.O. Box 1526, Salt Lake City, Utah 84110, filed in Docket No. CP77-536 an application pursuant to Section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities and further authorizing a reallocation of natural gas service for Washington Natural Gas Co. (Washington Natural), an existing customer of Applicant, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant indicates that Washington Natural proposes to reallocate natural gas service between the existing Redmond delivery point and a proposed Duvall-Cottage Lake delivery point in King County, Wash. and that Washington Natural has requested that Applicant help effectuate the proposed reallocation of service by reducing the daily contract quantity at the Redmond delivery point by 1,622 Mcf and by reallocating equivalent volumes to the proposed Duvall-Cottage Lake delivery point. It is said that without the proposed reallocation, Washington Natural would have to install four or five miles of supply main from the Clearview Gas Station to the Duvall-Cottage Lake area and enlarge the Clearview Gate Station which would cost approximately $370,000. Applicant further states that the reduction in the volumes of gas which Applicant is authorized to sell and deliver to Washington Natural at the Redmond delivery point would not affect Washington Natural's service to its existing customers in that area.

Applicant further seeks authorization to commence construction of the Duvall-Cottage Lake Meter Station which, it is said, would involve a combination 4 inch orifice type meter run and a positive displacement type meter with a 4 inch bypass, complete with appurtenances, adjacent to the right-of-way of the Applicant's existing 26 inch Ignacio to Sumas line located in Section 9, Township 26 North, Range 6 East, King County, Wash. Applicant estimates that the cost of constructing the facilities is $70,800 which cost would be reimbursed by Washington Natural to Applicant.

Any person desiring to be heard or to make any protest with reference to said application should on or before Stepember 8, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket Nos. ER76-319 and ER76-811]

PACIFIC GAS & ELECTRIC CO.

Compliance Filing

AUGUST 23, 1977.

Take notice that Pacific Gas & Electric (PG&E) on August 8, 1977, tendered for filing revised tariff sheets.

PG&E indicates that this filing is in compliance with the Commission Order Approving Settlement issued in the above-noted dockets on July 8, 1977.

PG&E states that copies of this filing have been served upon all parties in this proceeding.

Any person desiring to protest said filing should file a protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C., 20426 in accordance with Section 1.10 of the Commission's Rules of Practice and Procedure (18 CFR, 1.10). All such protests should be filed on or before September 9, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP76-473]

PANHANDLE EASTERN PIPE LINE CO.

Petition To Amend

AUGUST 22, 1977.

Take notice that on August 8, 1977, Panhandle Eastern Pipe Line Co. (Petitioner), P.O. Box 1642, Houston, Tex. 77001, filed in Docket No. CP76-476 a petition to amend the Commission's order of November 3, 1976, issued in the instant docket (56 FPC ——) pursuant to Section 7 of the Natural Gas Act and Section 157.7(b) of the Commission's Regulations under the Act (18 CFR 157.7(b)) so as to authorize an increase in the total authorized expenditure limitation contained in Petitioner's presently effectively budget-type certificate to be raised to $12,000,000, all as more fully set forth in the petition to amend on file with the Commission and open to public inspection.

It is indicated that pursuant to the Commission's order of November 3, 1976, issued in the instant docket the Commission authorized Petitioner to construct, during the twelve-month period commencing November 3, 1976, and operate facilities to take into its pipeline system new supplies of natural gas. Petitioner states that the total cost of all facilities constructed under such authorization is limited to $10,000,000.

Petitioner further states that due to the rising construction and material costs and a currently high level of well connection activity, it requests that the total expenditure limitation contained in its presently effective budget-type certificate be raised from $10,000,000 to $12,000,000.

Any person desiring to be heard or to make any protest with reference to said

V 42 N 167 AUG 29 77 UMI

petition to amend should on or before September 12, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commisison's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

[Docket No. RI77-111]

PENNZOIL CO.

Application for Increase Gathering Allowance

AUGUST 19, 1977.

Take notice that on June 28, 1977, Pennzoil Co. (Applicant), 3100 Pennzoil Place, Houston, Tex. 77002, filed an application in Docket No. RI77-111, pursuant to Federal Power Commission Regulation § 2.56(g).

Applicant seeks authorization to charge 34.37 cents per Mcf for the gathering and collecting of gas from numerous wells and small producers scattered throughout West Virginia; the subject gas is then sold to Consolidated Gas Supply Corp. Applicant's present gathering and compression allowance is 5.42 cents per Mcf.

Any person desiring to be heard or to make any protest with reference to said petition should on or before September 12, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

[Docket No. ER77-554]

PUBLIC SERVICE CO. OF NEW MEXICO

Supplement to Interconnection Agreement

AUGUST 19, 1977.

Take notice that on July 29, 1977, Public Service Co. of New Mexico (PNM) tendered for filing a supplement to an Interconnection Agreement (designated PNM Rate Schedule FPC No. 31) with Plains Electric Generation and Transmission Cooperative, Inc. (Plains). PNM indicates that the supplement is in the form of a Service Schedule H providing reciprocal interruptible wheeling service for the delivery of both parties' electrical energy.

PNM states that no facilities will be installed or modified in order to perform the wheeling service described by Service Schedule H.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure. (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 7, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77 24876 Filed 8-26-77.8:45 am]

[Docket No. ER77-555]

PUBLIC SERVICE CO. OF NEW MEXICO

Agreement

AUGUST 19, 1977.

Take notice that Public Service Co. of New Mexico (PNM), on August 15, 1977, tendered for filing an Initial Rate Schedule and Agreement for Electric Service between PNM and the City of Farmington, N. Mex. (Farmington), providing for the sale of supplemental power and energy, and energy to meet the energy return requirement associated with U.S. Bureau of Reclamation peaking capacity, as well as for the interchange of emergency and economy energy. PNM indicates that the Agreement was executed on July 20, 1977, and PNM and Farmington desire that service commence on August 1, 1977, subject to FPC approval and PNM therefore requests that the Commission waive its notice requirements pursuant to Section 35.11 of the Commission's Rules of Practice and Procedure (18 CFR 35.11).

PNM states that the proposed rates have been agreed upon by the parties and are identical to those in PNM's filing in Docket ER77-464. PNM indicates, however, that in the event the Commission approves rates lower than those in Docket No. ER77-464, Farmington will be entitled to a refund under the terms of a Letter Agreement between the parties dated July 11, 1977.

According to PNM copies of this filing have been mailed to Farmington, to PNM's jurisdictional customers receiving similar service under a time-of-day tariff, and to the New Mexico Public Service Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 9, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77-471]

PUGET SOUND POWER & LIGHT CO.

Filing

AUGUST 19, 1977.

Take notice that on August 12, 1977, Puget Sound Power & Light Company ("Puget") tendered for filing as a Rate Schedule change an Exchange Agreement between Puget and the Bonneville Power Administration ("BPA").

Puget indicates that in changing said Exchange Agreement, the parties wish to (1) modify the exchange account and settlement provisions to reflect the presently effective BPA rates as filed with the Federal Power Commission, (2) allow for settlement on a monthly basis, rather than an annual basis and, (3) make certain other non-rate-related changes.

Puget states that the Exchange Agreement sets forth the terms and conditions under which the parties will exchange non-firm energy and provide emergency and breakdown relief for one another.

Puget indicates that although recently executed, the Exchange Agreement was made effective as of December 31, 1974, and Puget therefore, respectfully requests that this filing become effective on that date, and that the notice requirements set forth in the Commission's regulations be waived pursuant to 18 CFR § 35.-11. According to Puget a copy of the filing has been sent to BPA.

Any person wishing to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE, Washington, DC 20426, in accordance with Sections 1.8 and 1.10 of the Commission's rules of Practice and Procedures (18 CFR 1.8, 1.10). All such petitions should be filed on or before September 2, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants

parties to the proceeding. Any person wishing to become a party must file a petition to intervene, Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

SOUTHERN CALIFORNIA EDISON CO.

Application for the Sale of Transmission Facilities

AUGUST 22, 1977.

Take notice that on August 10, 1977, Southern California Edison Company (Edison) and Pacific Gas and Electric Company (PG&E) have filed applications seeking authority pursuant to Section 203 of the Federal Power Act for Edison to sell and PG&E to acquire certain electric transmission facilities, known as the Kern-Magunden 220-KV transmission line, and associated rights-of-way located in the State of California.

Edison is incorporated under the laws of the State of California with its principal business office at Los Angeles, California, and is engaged in the electric utility business in 15 counties in southern California.

PG&E is incorporated under the laws of the State of California with its principal business office at San Francisco, California, and is engaged in the electric utility business in 48 counties in California.

The transmission line and related facilities which are the subject of the sale extend between PG&E's tower number 0/4 (0.42 miles north of PG&E's Kern Power Plant 230-KV bus) and Edison's tower number MO-T1 (approximately 208 feet north of Edison's Magunden Substation 220-KV bus). Said transmission line is no longer useful to Edison, and lies totally within PG&E's service territory.

The Kern-Magunden Transmission Line Sale Agreement between Edison and PG&E dated July 14, 1977 provides that Edison will be paid $750,000 for its transmission line and related facilities.

Any person desiring to be heard or to make any protests with reference to said applications should, on or before September 9, 1977, file with the Federal Power Commission, Washington, D.C. 20426, petitions or protests in accordance with the Commission's Rules of Practice and Procedure, 18 CFR 1.8, 1.10 (1976). The application is on file and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24899 Filed 8-26-77;8:45 am]

[Docket No. CP70-7]

SOUTHERN NATURAL GAS. CO.

Petition To Amend

AUGUST 19, 1977.

Take notice that on August 1, 1977, Southern Natural Gas Company (Petitioner), P.O. Box 2563, Birmingham, Alabama 35202, filed in Docket No. CP70-7 a petition to amend pursuant to Section 7 of the Natural Gas Act the Commission's order of October 29, 1969, issued in the instant docket, which authorized Petitioner to sell and deliver to the town of Fayette and to the town of Roxie, Mississippi contract demands of 1,800 Mcf and 875 Mcf of natural gas per day, respectively. Petitioner requests that said order be amended by authorizing a change in the applicable Rate Schedule from OCD-1 to G-1 for these two customers. Petitioner proposals are more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

It is indicated that Petitioner is currently rendering service to Roxie under its Rate Schedule OCD-1 pursuant to Second Revised Exhibit A to its Service Agreement and that it is rendering service to Fayette under its Rate Schedule OCD-1 pursuant to First Revised Exhibit A to its Service Agreement with Fayette.

At the request of Roxie and Fayette, Petitioner has agreed to execute and submit to the Commission for approval the Third Revised Exhibit A to the Service Agreement with the town of Roxie and the Second Revised Exhibit A to the Service Agreement with the town of Fayette to implement this change which will reduce the customers' purchased gas cost, it is said. It is stated further that these Revised Exhibit A's were executed by Petitioner on July 27, 1977 and are to become effective upon the date authorized by the Commission.

Petitioner states that the certificate modifications requested would not change the maximum amount of gas that Petitioner would be obligated to deliver to either Roxie or Fayette.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before September 8, 1977 file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24901 Filed 8-26-77;8:45 am]

[Docket Nos. RP77-31 and RP73-64 (PGA77-2)]

SOUTHERN NATURAL GAS CO.

Order Accepting Revised Rates for Filing Subject to Adjustment and Denying Request for Deferred Accounting

AUGUST 18, 1977.

On June 29, 1977, as amended on July 18, 1977, Southern Natural Gas Company (Southern) filed in the above dockets certain revised rates proposed to be effective on July 1, July 2, and August 1, 1977. For the reasons set forth below the revised rate shall be accepted for filing and permitted to become effective on the dates requested, subject to the terms of this order.

In Docket No. RP77-31, Southern filed revised rates[1] in substitution for rates suspended until August 1, 1977, excluding costs associated with uncompleted construction and incorporating a PGA rate adjustment filed during the suspension period.

In Docket No. RP73-64, Southern filed revised rates in compliance with the Commisisons' order of June 30, 1977, excluding certain claimed costs disallowed by the Commission in its June 30 order, to be effective July 2, 1977, subject to refund.[2] In addition Southern filed rates to be effective on July 1, 1977, excluding, in addition to the amounts disallowed, all amounts associated with emergency purchases at rates in excess of those established in Opinion No. 770-A.[3] In support of its proposed July 1 rates, Southern states as follows:

[1] Substitute Twenty-Sixth Revised Sheet No. 4A to Sixth Revised Tariff Volume No. 1 and Third Revised Sheet No. 242 to Original Tariff Volume No. 2.

[2] Second Substitute Twenty Fifth Revised Sheet No. 4A.

[3] Substitute Twenty-Fifth Revised Sheet No. 4A.

The Commission's order further suspended for one day until July 2, 1977 Twenty-Fifth Revised Sheet No. 4A and prescribed the filing of evidence by Southern within 30 days relating to four emergency purchases which were at rates in excess of those established by Opinion No. 770-A. Therefore, Southern is filing substitute Twenty-Fifth Revised Sheet No. 4A, proposed to be effective July 1, 1977, which contains rates reflecting the exclusion of gas purchase costs above the Opinion No. 770-A rates. This adjustment makes $638,030 of emergency gas purchase costs subject to refund and results in reducing the effective July 1, 1977 Surcharge Rate by an additional .279 cents per Mcf. The Commission order does not provide for the filing of

V 42 167 AUG 29 77 UMI

a July 1, 1977 tariff sheet excluding these costs. Southern is doing so in reliance on past Commission precedent wherein such filings have been permitted in order to establish the amount of revenues subject to refund.

A review of Southern's filings reveals that the proposed rates have not been adjusted downward to reflect the lower PGA rates filed by two of its suppliers, United Gas Pipe Line Company (United) and Sea Robin Pipeline Company (Sea Robin) in Docket Nos. RP72-133 and RP73-89 respectively. On July 21, 1977, Southern submitted a letter requesting that it not be required to amend its proposed rates for the reductions of its suppliers but that it be permitted instead to account for the reductions by means of a credit to its unrecovered purchase gas cost account No. 191.

The Commission finds that good cause has not been shown to warrant Southern's request. The Commission finds, in view of the relatively large amount of rate reductions involved, which are estimated to be approximately $6 million in total, that Southern should be required to give immediate effect to such reductions. Use of the unrecovered purchase gas cost account would result in the deferral of actual reductions in Southern's rates until the time of its next PGA filing.

Except for Southern's failure to reflect the rate reductions associated with its purchases from United and Sea Robin, the proposed rates are in accordance with the Commission's prior orders in Docket Nos. RP77-31, and RP73-64. Southern's revised rates shall accordingly be accepted for filing, provided, however, that Southern shall be required to modify such rates to reflect the lower rates of United and Sea Robin. Southern's request to file firm rates to be effective on July 1, 1977, appears reasonable and is approved.

On July 15, 1977, Carolina Pipeline Company filed an untimely petition to intervene in Docket No. RP73-64. The Commission finds that the petitioner has demonstrated an interest in the subject proceeding and that the petition to intervene should be granted.

The Commission orders: (A) The proposals filed by Southern to be effective on July 1, July 2 and August 1, 1977, are accepted for filing subject to modification of the rates as required under paragraph (B) below.

(B) Southern shall within 15 days of the date of this order file revised rates to be effective July 1, July 2, and August 1, 1977, respectively, reflecting the reduced rates of United and Sea Robin.

(C) Carolina Pipeline Company is permitted to intervene in the proceeding in Docket No. RP73-64, subject to the Commission's rules and regulations.

(D) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24877 Filed 8-26-77;8:45 am]

[Docket No. RP77-120]

STINGRAY PIPELINE CO.

Proposed Changes

AUGUST 23, 1977.

Take notice that on August 15, 1977, Stingray Pipeline Company (Stingray) tendered for filing a notice of rate change (Tenth Revised Sheet No. 4) to increase its jurisdictional transportation revenues by approximately $7.2 million annually pursuant to its F.P.C. Gas Tariff, Original Volume No. 1. Stingray proposes that the rate increase be permitted to become effective on September 15, 1977. Stingray also requests that if the proposed rate increase is suspended by the Commission, the suspension period be shortened to coincide with the dates certain major offshore pipeline facilities are expected to be placed in service which date Stingray estimates to be December 1, 1977.

Stingray states that its rate filing is required by the Commission's November 8, 1974 order in Docket No. CP73-27, et al. Those proceedings authorize Stringray's initial construction and operation. As a result of Stringray's issuance of $145,000,000 of long-term debt representing the permanent financing of its initial and Phase II facilities authorized in the above docket, Stingray is required to file a rate change pursuant to Section 4 of the Natural Gas Act. The principal reason for Stingray's proposed rate increase, however, is Stingray's substantial investment in new facilities related to its transportation operations including increased operating costs, return and taxes.

Copies of this filing were served on Stingray's jurisdictional customers.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. in accordance with Sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protest should be filed on or before September 8, 1977. Protest will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. This application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24977 Filed 8-26-77;8:45 am]

[Docket No. RI77-116]

SUN OIL CO. (DELAWARE)

Petition for Special Relief

AUGUST 19, 1977.

Take notice that on July 18, 1977, Sun Oil Company (Delaware) (Petitioner), P.O. Box 20, Dallas, Texas 75221, in Docket No. RI77-116 filed a petition for special relief pursuant to Section 2.76 of the Commission's General Policy and Interpretations (18 C.F.R. 2.76). Petitioner requests an increase of 12.5 cents per Mcf above the current rate of 31.577 cents per Mcf at 14.65 psia for natural gas sales to Panhandle Eastern Pipe Line Company from the Harrison Gas Unit, West Lorena Area, Texas County, Oklahoma. Petitioner states that the rate increase is necessary to recover the cost of installing a compressor in order that production and delivery of gas might be continued.

Any person desiring to be heard or to make any protest with reference to said petition should on or before September 12, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24889 Filed 8-26-77;8:45 am]

[Docket No. CP77-541]

TENNESSEE GAS PIPELINE CO.

Application

AUGUST 19, 1977.

Take notice that on August 3, 1977, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Applicant), P.O. Box 2511, Houston, Texas 77001 filed in Docket No. CP77-541 an application pursuant to Section 7 of the Natural Gas Act and Section 2.79 of the Commission's General Policy and Interpretations (18 CFR 2.79) for a certificate of public convenience and necessity authorizing the transportation of natural gas pursuant to a transportation contract with Fruehauf Corporation (Fruehauf) whereby Applicant would receive for the account of Fruehauf daily volumes of natural gas up to the maximum daily quantity of 1,000 Mcf per day during the first year and 1,500 Mcf per day during the second year of deliveries hereunder and transport and deliver to Alabama-Tennessee Natural Gas Company (Alabama-Tennessee) for the account of Fruehauf equivalent daily volumes of natural gas up to the said maximum daily quantity, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant indicates that Fruehauf is an indirect customer of Alabama-Tennessee served by Alabama-Tennessee's resale customer, Decatur Gas Department (Decatur) and that Fruehauf has requested Columbia Gas Transmission Corporation (Columbia), Applicants, and Tennessee to render transportation services in order to enable Fruehauf to take delivery of volumes of natural gas which is produced from wells

wholly-owned by FrueKel, Inc. (FrueKel), the wholly-owned energy subsidiary of Fruehauf.

It is said that Fruehauf would arrange to have such daily volumes made available to Applicant by Columbia at the existing interconnection of the facilities of Applicant and Columbia at Tennessee's Main Line Valve No. 209-1 plus 9.9 miles, located in Guernsey County, Ohio. From such point Applicant would transport and deliver such volumes to Alabama-Tennessee for the account of Fruehauf at Applicant's existing Barton Sales Delivery Point to Alabama-Tennessee located in Colbert County, Ala. at Applicant's Main Line Valve No. 552-1 plus 6.11 miles, it is said.

It is asserted that Fruehauf would pay Tennessee each month for transportation service a demand charge to be determined by multiplying $1.38 by the maximum daily quantity, less any demand charge credit provided therein, if applicable and a volume charge equal to $17.55 per Mcf multiplied by the total of the scheduled daily volumes during such month or the number of days in said month multiplied by 66⅔ percent of the maximum daily quantity, whichever is greater, less any applicable annual minimum bill credit.

Applicant states that it has been advised by Fruehauf that the gas transported and delivered by Applicant would be used by Fruehauf for Priority 2 purposes to replace volumes actually being curtailed by Decatur. Applicant proposes to transport the gas only to the extent its operating conditions permit.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 9, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24879 Filed 8-26-77;8:45 am]

[Docket No. CP77-559]

TENNESSEE GAS PIPELINE CO.

Pipeline Application

AUGUST 19, 1977.

Take notice that on August 9, 1977, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee) filed an application pursuant to Section 7(c) of the Natural Gas Act, for a certificate of public convenience and necessity authorizing the transportation of natural gas for Continental Oil Company (Continental) from Eugene Island Block 257 (Block 257), Offshore Louisiana, all as more fully set forth in the application on file with the Commission and open to public inspection. Pursuant to a Gas Transportation Agreement (Agreement) dated November 3, 1972, as amended, Tennessee has agreed to transport for Continental, through existing facilities, natural gas produced from one-half of Continental's interest in Block 257, which portion was not dedicated to Tennessee under the terms of a Gas Purchase and Sales Agreement between Tennessee and Continental dated November 3, 1972. Tennessee will receive such transportation volumes from Continental's production platforms in Blocks 257 and 258, and will redeliver to Continental, at the Redelivery Points provided in the Gas Transportation Agreement, as amended, volumes equivalent to the volumes so received by Tennessee, less Tennessee's system fuel and use volumes required for said transportation service. Such Redelivery points will be located at (1) a valve on the inlet side of Continental's measuring facilities to be installed at a point adjacent to Tennessee's Sabine-Kinder thirty-inch (30") pipeline located approximately twenty-six miles west of Tennessee's compression station at Kinder, Calcasieu Parish, La. (Calcasieu Parish Redelivery Point No. 1), (2) the point of intersection of Continental's pipeline and Tennessee's Sabine-Kinder pipeline located in the Southeast Quarter of Section 20, Township 8 South, Range 10 West, Calcasieu Parish, La., approximately thirty-three miles west of Tennessee's Kinder compression station (Calcasieu Parish Redelivery Point No. 2), (3) the tailgate of Continental's Egan Plant located at Range 2 West, Township 9 South, Acadia Parish, La. (Acadia Parish Redelivery Point), and (4) such other points of redelivery as may be mutually agreed upon by Tennessee and Continental.

The Gas Transportation Agreement provides that the monthly charges to be paid to Tennessee by Continental for such transportation service for each of the aforementioned Redelivery Points will be as follows:

(1) A charge equal to 9.77¢ per each Mcf transported by Tennessee from Block 257 to the Calcasieu Parish Redelivery Point No. 1.

(2) A charge equal to 10.07¢ per each Mcf transported by Tennessee from Block 257 to the Calcasieu Parish Redelivery Point No. 2.

(3) A charge equal to 7.83¢ per each Mcf transported by Tennessee from Block 257 to the Acadia Parish Redelivery Point.

(4) In the event Tennessee and Continental desire to implement redeliveries at any other point, Tennessee will file an application for authorization therefor.

Any person desiring to be heard or to make any protest with reference to said application, on or before September 12, 1977, should file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24906 Filed 8-26-77;8:45 am]

[Docket No. CP77-566]

TRANSCONTINENTAL GAS PIPE LINE CORP. AND MICHIGAN WISCONSIN PIPE LINE CO.

Application

AUGUST 23, 1977.

Take notice that on August 12, 1977, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Tex. 77001, and Michigan Wisconsin Pipe Line Company (Mich Wisc), One Woodward Avenue, Detroit, Mich.

V42167A AUG 29 77 UMI

48226 (Applicants), filed in Docket No. CP77-566 a joint application pursuant to Section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing the exchange of natural gas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicants request authorization to exchange natural gas pursuant to the provisions of an exchange agreement dated July 11, 1977 between the two parties. It is stated that Transco would deliver or cause to be delivered up to 4,000 Mcf of gas per day to Mich Wisc at Vermilion Parish (Live Oak Field), La. and up to 2,000 Mcf of gas per day at Acadia Parish (West Mermentau Area), La., and Mich Wisc would deliver up to 1,000 Mcf per day to Transco at Vermilion Parish (Southeast Gueydan Field), La. Applicant states that any imbalance of exchange gas deliveries incurred at the above exchange points would be eliminated by appropriate adjustment of gas deliveries at the tailgate of Mobil Oil Corporation's Cameron Meadows Processing Plant, Cameron Parish, La. or at such other points of interconnection of Applicant's pipeline systems as mutually agreed upon. The term of the subject agreement would be for ten years from the date of first delivery and would continue thereafter until terminated by either party, it is said. Applicants indicate that the exchange of gas would be on an Mcf basis, and that no charge would be made by Transco or Mich Wisc for this exchange service.

It is stated that Applicants have agreed to the proposed exchange in order (i) to assist Transco in taking into its system natural gas which it would purchase in the Live Oak Field, Vermilion Parish, La. and gas which it would purchase in and transport from the West Mermentau Area, Acadia Parish, La, and (ii) to assist Mich Wisc in taking into its system certain of its natural gas in the Southeast Gueydan Field, Vermilion Parish, La. The proposed exchange would alleviate the necessity for the construction of unnecessary facilities by both Transco and Mich Wisc, it is said.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 15, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24976 Filed 8-26-77;8:45 am]

[Docket No. CP77-542]

TRANSCONTINENTAL GAS PIPELINE CORP.

Application

AUGUST 19, 1977.

Take notice that on August 3, 1977, Transcontinental Gas Pipeline Corporation (Applicant), P.O. Box 1396, Houston, Tex. 77001, filed in Docket No. CP77-542 an application pursuant to Section 7 of the Natural Gas Act and Section 2.79 of the Commission's General Policy and Interpretations (18 CFR 2.79) for a certificate of public convenience and necessity authorizing the transportation of up to 2,005 Mcf per day (at 14.65 psia) of natural gas on an interruptible basis for Adventure Knits, Inc.; Dynatex, Inc.; Facet Enterprises, Inc.; General Products Division; Galvan Industries, Inc.; Goodmark Foods, Inc.; Kings Mountain Mica Company, Inc.; Knitronic, Inc.; Minette Mills, Inc.; Sanford Finishing Corporation; Stonecutter Mills Corporation; Superba Print Works, Inc.; Uniglass Industries Division of United Merchants & Manufacturers, Incorporated; Wales Manufacturing Company, Inc.; and Wix Corporation (Buyers), all of which are existing industrial customers of Public Service Company of North Carolina, Inc. (PSNC), one of Applicant's resale customers served under Rate Schedule CD-2, pursuant to a transportation agreement dated July 5, 1977 among Applicant, Buyers (acting severally and not jointly by and through UGC Energy Corporation (UGC) as duly authorized agent), and PSNC which agreement shall continue in effect for a period of two years from the date of initial delivery, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is said that Buyers have purchased from Mitchell Energy Corporation (Mitchell) up to 2,005 Mcf per day (at 14.65 psia) of gas at a price of $2.00 per Mcf for the first contract year and $2.10 per Mcf thereafter, to be produced from the La Sal Vieja Field, Wallacy County, Tex. and that Buyers would arrange to have such quantities delivered to a mutually agreable point on Applicant's system in Willacy County, Texas, and Applicant would redeliver the transportation quantities to existing points of delivery to PSNC for the accounts of Buyers. It is stated that PSNC has agreed to transport such quantities of said gas delivered to it by Applicant for the accounts of Buyers to Buyers' respective plants.

It is asserted that the daily quantity to be transported to PSNC for Buyers shall not exceed PSNC's authorized daily entitlement under its Rate Schedule CD. It is further asserted that Applicant would charge Buyers, initially, 29.8 cents per Dekatherm (dt) equivalent for all quantities of gas delivered to PSNC for Buyers' account which rate would be subject to refund depending upon the resolution of the issues in Docket Nos. RP76-136 and RP77-26 concerning the appropriate method for determining the rates for interruptible transportation services on its system. Applicant states that it would retain, initially, 3.8 percent of the quantities received for transportation as make-up for compressor and fuel loss.

No additional facilities are required in order to render the proposed services, it is said.

It is indicated that the end use for each customer is process use with no technically feasible alternative fuel. This use is in Priority 3 as contained in 18 CFR Section 2.78 only for the reason that it was purchased on an interruptible basis and would otherwise qualify as Priority 2 use, it is said.

The volumes transported and the average total monthly end use for each customer is set forth below:

Customer	Volumes transported			Average total monthly end use (1,000 ft³)
	Peak day (1,000 ft³)	Average day (1,000 ft³)	Annual basis (1,000 ft³)	
Adventure Knits, Inc.	60	48	17,520	1,460
Dynatex, Inc.	55	37	13,505	1,125
Facet Enterprises, Inc., General Products Division	300	175	63,875	5,323
Galvan Industries, Inc.	75	60	21,900	1,825
Goodmark Foods, Inc.	50	40	14,600	1,217
Kings Mountain Mica Co., Inc.	110	85	31,025	2,585
Knitronic, Inc.	72	48	17,520	1,460
Minette Mills, Inc.	90	60	21,900	1,800
Sanford Finishing Corp.	250	164	60,000	5,000
Stonecutter Mills Corp.	60	40	14,000	1,217
Superba Print Works, Inc.	250	150	54,750	4,563
United Merchants and Manufacturing, Inc.	250	250	19,250	48,000
Wales Manufacturing Co., Inc.	58	40	14,600	1,278
Wix Corp.	325	167	60,955	5,080

Any person desiring to be heard or to make any protest with reference to said application should on or before September 9, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP77-554]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Application

AUGUST 22, 1977.

Take notice that on August 8, 1977, Transcontinental Gas Pipe Line Corp. (Applicant), P.O. Box 1396, Houston, Tex. 77001, filed in Docket No. CP77-554 an application pursuant to Section 7 of the Natural Gas Act and Section 2.79 of the Commission's General Policy and Interpretations (18 CFR 2.79) for a certificate of public convenience and necessity authorizing the transportation of up to 1,500 Mcf of natural gas per day at 15.025 psia on an interruptible basis for Burlington Industries, Inc. (Burlington), and existing industrial customer of Piedmont Natural Gas Co., Inc. (Piedmont), Public Service Co. of North Carolina, Inc. (PSNC), North Carolina Natural Gas Corp. (NCNG), Virginia Pipe Line Co. (Virginia), Carolina Pipeline Co. (Carolina) and Public Service Electric and Gas Co. (PSEG), Applicant's CD customers, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant requests authorization to transport up to 1,500 Mcf of natural gas per day (at 15.025 psia) on an interruptible basis for Burlington pursuant to a transportation agreement dated July 8, 1977 among Applicant, Burlington, and Applicant's CD customers.

Applicant states that the gas which it proposes to transport for Burlington is gas that represents Burlington's working interest in gas to be produced from the Jefferson Island Prospect field, Iberia Parish, La. by an oil and gas exploration and development joint venture, in which Burlington is a participant and which is operated by C&K Petroleum Co. Applicant further states that Burlington would deliver or cause the gas to be delivered to Tennessee Gas Pipeline Co., a Division of Tenneco Inc. (Tennessee), and Tennessee would deliver the gas to Applicant at an existing authorized interconnection between Tennessee and Applicant near Crowley, La., or at such other existing authorized points of interconnection or exchange as may be mutually agreed to by Applicant and Tennessee from time to time. Applicant indicates that it would redeliver equivalent quantities (less quantities retained for compressor fuel and line loss make-up) at existing delivery points on its system to Applicant's CD customers which would deliver the gas to Burlington at the following facilities:

Greensboro Finishing (including Greensboro, N.C. Meadowview)
Formed Fabrics, Greensboro, N.C.
Burlington House Fabrics Finishing, Burlington, N.C.
Wake Plant, Wake Forest, N.C.
Durham Plant, Durham, N.C.
Kernersville Finishing, Kernersville, N.C.
Mayfair Plant, Burlington, N.C.
Mooresville Finishing, Mooresville, N.C.
William G. Lord Plant, Cramerton, N.C.
Erwin Plant, Erwin, N.C.
Sheffield Plant, Rocky Mount, N.C.
Rocky Mount Plant, Rocky Mount, N.C.
K. M. Altavista, Hurt, Va.
Altavista Glass, Altavista, Va.
Brookneal Plant, Brookneal, Va.
Society Hill Plant, Society Hill, S.C.
James Fabric, Cheraw, S.C.
Westwood Industries, Paterson, N.J.

Applicant states that it would charge Burlington, initially, 29.8 cents per Dekatherm (dt) for all quantities delivered hereunder to PSNC, NCNG, Virginia and Carolina and 31.5 cents per dt for all quantities delivered hereunder to PSE&G. Additionally, Applicant states that it would also retain, initially, 4.4 percent of quantities received by it for transportation to PSE&G and 3.8 percent of volumes received by it for redelivery to Piedmont, PSNC, NCNG, Virginia and Carolina as make-up for compressor fuel and line loss. These percentages are based on Applicant's "company use" factor for pipeline throughout to and within its Rate Zones 2 and 3 in which the transportation deliveries proposed herein would be made, it is said.

Applicant indicates that no additional facilities are required to render the proposed service, which would be for a primary term of one year from the date of initial delivery hereunder and from year to year thereafter.

It is indicated that Burlington Industries, Inc., is the largest and most broadly diversified textile company in the United States, and that the company produces a wide assortment of apparel and home furnishing fabrics and industrial textile products, including, but not limited to, fabrics for men's women's and children's clothing, hosiery, uniform fabrics, ready-made draperies, towels, sheets, pillowcases, bedspreads, and carpeting. In addition, the company produces furniture, lamps and lighting fixtures, it is said. It is indicated that in general, unfinished fabrics are produced in what are referred to as greige mills, and are transported to other plants for dyeing and finishing. It is stated that the finishing plants are natural gas for open-flame processing, and essential Priority 2 uses, and that the principal open-flame processes requiring natural gas are singeing, drying, heat setting, thermosol dyeing and curing. It is further stated that these processes are essential to the finishing operations and any reduction in adequate fuel for such processes would soon seriously impact all other operation in the total production process.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 12, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24896 Filed 8-26-77;8:45 am]

V42167 AUG 29 77 UMI

TRANSCONTINENTAL GAS PIPE LINE CORP.

Notice of Application

AUGUST 19, 1977.

Take notice that on August 3, 1977, Transcontinental Gas Pipe Line Corp. (Applicant), P.O. Box 1396, Houston, Tex. 77001, filed in Docket No. CP77-543 an application pursuant to Section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of up to 420 Mcf per day (at 14.73 psia) of natural gas on an interruptible basis for Libbey-Owens-Ford Co. (LOF), whose wholly owned subsidiary LOF Glass Inc. (Glass) is an existing industrial customer of North Carolina Natural Gas Corp. (NCNG), an existing resale customer of Applicant, pursuant to a transportation agreement dated June 22, 1977, between Applicant, LOF and NCNG, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that LOF would deliver or cause the gas to be delivered to Panhandle Eastern Pipe Line Co. (Panhandle) which would cause its wholly owned subsidiary, Trunkline Gas Co. (Trunkline), to deliver the gas to Applicant at Cow Island, La. or other mutually agreeable existing authorized exchange points between Trunkline's and Applicant's pipeline systems. Applicant would redeliver equivalent quantities (less quantities retained for compressor fuel and line loss make-up) at existing delivery points on its system to NCNG which would deliver the gas to Glass at Glass' Laurinburg, North Carolina plant.

It is said that the proposed interruptible transportation service is directly related to the curtailments in sales and deliveries which Applicant is now required to make due to a deficiency in flowing gas supply on its system, and is intended to make available to Glass from LOF's sources, up to those volumes of gas which it would otherwise not receive due to such curtailments.

Applicant asserts that it would charge LOF, initially, 29.8 cents per Dekatherm (dt) for all quantities delivered but that such rate is subject to refund depending upon the resolution of the issues in Docket Nos. RP76-136 and RP77-26 concerning the appropriate method for determining the rates for interruptible transportation services on its system. Applicant further asserts that it would retain, initially, 3.8 percent of quantities received by it for transportation as makeup for compressor fuel and line loss.

No additional facilities are required to render the proposed service, which would be for a term of eight years from the date of initial delivery subject to approval by the Commission, it is said.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 9, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24903 Filed 8-26-77;8:45 am]

[Docket No. CP77-495]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Petition for Declaratory Order

AUGUST 19, 1977.

Take notice that on August 8, 1977, Brooklyn Union Gas Company (Petitioner), a resale customer of Transcontinental Gas Pipe Line Corporation (Transco), 195 Montague Street, Brooklyn, New York 11201, filed in Docket No. CP77-495 a petition pursuant to Section 1.7(c) of the Commission's Rules of Practice and Procedures (18 CFR 1.7(c)) for a declaratory order declaring whether the Commission has jurisdiction over Petitioner, Petitioner's proposed activities in connection with the transaction proposed herein, and Petitioner's facilities to be used in connection with the transaction, all as more fully set forth in the petition on file with the Commission and open to public inspection.

Petitioner indicates that by an agreement dated June 8, 1977, it and Delmarva Power & Light Company (Delmarva), a Delaware distribution company and another resale customer of Transco, have entered into a contract for the sale by Petitioner and purchase by Delmarva of 500 billion Btu's of synthetic gas annually for a period of 3 years. Delmarva represents that the quantities of synthetic gas it has contracted to purchase are required for resale to its firm high priority customers, it is said. It is stated that the synthetic gas is to be sold by Petitioner at a price based upon a utility type cost of service.

Petitioner states that under the agreement between it and Delmarva, all synthetic gas is to be sold to Delmarva by Petitioner, unmixed with natural gas, at the tailgate or outlet of Petitioner's SG plant within its Brooklyn, New York service area, where ownership of the gas is to pass to Delmarva. Petitioner states that arrangements for the transportation of the gas from the delivery point to Delmarva's service area are to be the sole responsibility of Delmarva, except that Petitioner has agreed to assist in such arrangements, at no charge to Delmarva, by releasing quantities of gas thermally equivalent to those purchased by Delmarva, at appropriate New York delivery points of Transco.

It is stated that by a letter agreement dated May 24, 1977, in this proceeding, Delmarva and Transco have entered into a contract, agreed to by Petitioner, under which the synthetic gas sold by Petitioner would be transported and delivered by Transco for Delmarva's account by displacement, through reductions in Transco's deliveries to Petitioner and increases in Transco's deliveries to Delmarva, of quantities of gas thermally equivalent to the quantities of synthetic gas sold by Petitioner to Delmarva.

Petitioner indicates that it supports the issuance of the permanent authorization requested by Transco in this proceeding, and that Petitioner urges the issuance of such authorization on or before September 1, 1977 for the following reasons: (1) the synthetic gas sale and purchase Agreement between Petitioner and Delmarva is subject ot cancellation by either party if a certificate for transportation of the gas has not been issued by September 1, 1977; (2) because of the critical levels of curtailment in pipeline gas supplies, and the lead time necessary for the acquisition of alternative supplies (when alternative supplies can be acquired), Delmarva has advised it requires early assurance of the availability of the subject synthetic gas supply in order to plan its operations for the coming winter; and (3) Petitioner requires early certainty as to its supply obligations for the coming winter in order to schedule the annual start-up of its SG plant and operations and receipt of naphtha deliveries on the most efficient and economical basis, for the benefit of Petitioner's own customers and the customers of Delmarva.

Petitioner states that it believes that its proposed activities in connection with the transaction would not constitute either the transportation of natural gas in interstate commerce nor the sale in interstate commerce of natural gas for resale, and therefore do not require direct authorization by the Commission.

Therefore, Petitioner requests that the Commission issue a declaratory order disclaiming jurisdiction over Petitioner, Petitioner's proposed activities in connection with the transaction, and Petitioner's facilities to be used in that connection.

Any person desiring to be heard or to make any protest with reference to said petition should on or before September 12, 1977 file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.7(c)). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24905 Filed 8-2-77;8:45 am]

[Docket No. CP77-558]

UNITED GAS PIPE LINE CO.

Pipeline Application

AUGUST 19, 1977.

Taken notice that on August 9, 1977, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77001, filed an application for certificate of public convenience and necessity in Docket No. CP77-558, pursuant to Section 7(c) of the Natural Gas Act, requesting authorization to acquire, through assignment of lease, all rights and interests in a 1,000 Horsepower compressor facility and related equipment at Block 587, West Cameron Area, Offshore Louisiana. Furthermore, Sea Robin requests permission to reimburse the Operator of the subject block, Pennzoil Company, for all expenses incurred in the transportation, installation, operation, maintenance and rental of such compressor and equipment.

United states that it purchases gas from Pennzoil Offshore Gas Operators, Inc., Pinto, Inc., Cities Service Oil Corporation and Mobil Oil Corporation at Block 587, West Cameron Area. United further states that in order to increase production and to recover additional reserves it will be necessary to install compression at the Block 587 location. Both the subsequent accelerated production and enhanced recovery of volumes to be realized by such compression are vital to United's continued efforts to not only take all available steps toward assuring the continued availability of its current gas supply but also strive toward expediting the flow of gas volumes, whenever possible, all as more fully described in the application which is on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said application, on or before September 12, 1977, should file with the Federal Power Commission, Washington, D.C., 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24907 Filed 8-26-77;8:45 am]

[Project No. 2075]

WASHINGTON WATER POWER CO.

Application for Change in Land Rights

AUGUST 23, 1977.

Public notice is hereby given that an application was filed on February 8, 1977 under the Federal Power Act, 16 U.S.C. §§ 791a-825r, by The Washington Water Power Company (Applicant) (Correspondence to: Mr. L. O. Falk, Assistant Secretary, The Washington Water Power Company, P.O. Box 3727, Spokane, Washington 99220) for a change in land rights at its constructed Project No. 2075 known as the Noxon Rapids Project. Project No. 2075 is located on the Clark Fork River in Sanders County, Montana.

Applicant proposed to grant an easement to the Bonneville Power Administration (BPA) for a 100-foot square parcel of land within the project boundary and the right to use a project road for access to the site. BPA intends to construct, operate and maintain a microwave relay station consisting of a tower, a small building, a fuel tank, and two beam paths consisting of 30-foot-wide strips of land 436 feet and 525 feet long extending towards the northwest and east, respectively, from the center of the tower. The construction and operation of the beam paths would include clearing the paths of all obstructions above elevation 2,270 feet, the approximate ground elevation at the tower site. Applicant states that BPA would use the proposed microwave communication system to help solve area stability problems.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 10, 1977, file with the Federal Power Commission, 825 N. Capitol Street NE., Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 C.F.R. § 1.8 or § 1.10 (1977). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24975 Filed 8-26-77;8:45 am]

[Docket No. CP77-565]

WESTERN GAS INTERSTATE CO.

Application

AUGUST 23, 1977.

Take notice that on August 12, 1977, Western Gas Interstate Company (Applicant), 1800 First International Building, Dallas, Texas 75270, filed in Docket No. CP77-565 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the exchange of natural gas with Cities Service Gas Company (Cities), the continued use and operation of certain facilities to be used in connection with said exchange, and the sale of such gas to Southern Union Gas Company (Southern Union), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is stated that Applicant and Cities Service were parties to a gas purchase contract dated November 14, 1949, as modified by an exchange agreement dated July 11, 1951. Applicant indicates that pursuant to the terms of said contract Cities Service was selling to and exchanging with Applicant certain volumes of natural gas in the Oklahoma Panhandle, and that a substantial deficit exchange balance due by Cities Service to Applicant arose under the July 11, 1951, exchange arrangement (approximately 131,000 Mcf as of January 1, 1977), although the exchange imbalance was reduced somewhat by an emergency exchange between Applicant and Cities Service for the period January 9, 1977 to March 9, 1977.

Applicant indicates that it and Cities Service entered into a new exchange agreement dated June 8, 1977, terminating the prior sale and exchange agreements between the two parties, although the deficit balance owed by Cities Service to Applicant under the prior arrangement is now owed by Cities Service to Applicant under the new exchange agreement. Pursuant to the terms of the new agreement, Applicant would deliver

V 42 N 167 A UG 29 77 UMI

at the wellhead to Cities Service for Applicant's account, the gas Applicant purchases from the Fanning No. 1 Well located in Texas County, Oklahoma, and Applicant would also deliver to Cities Service for Applicant's account volumes of gas at an existing point of interconnection of Applicant's and Cities Service's facilities near the northeast corner of Section 36, Township 4N., Range 14 E.C.M., Texas County, Oklahoma, it is indicated.

It is stated that Cities Service would deliver to Applicant for Cities Service's account volumes of gas at the following three points of interconnection of Cities Service's and Applicant's pipelines: (1) the interconnection located in the Northwest Quarter of Section 30, Township 5N., Range 19 E.C.M., Texas County, Oklahoma (the "Adams Delivery Point"); (2) the interconnection located in the Northeast Quarter of Section 4, Township 2N., Range 14 E.C.M., Texas County, Oklahoma (the "West Guymon Delivery Point"); and (3) the interconnection located on the center of the east line of Section 3, Township 1N., Range 12 E.C.M., Texas County, Oklahoma (the "Jones A and B Delivery Point"). Applicant indicates that the gas to be delivered at the Jones A and B Delivery Point is that gas purchased by Cities Service from the Jones A No. 1 and B No. 1 wells located in Sections 13 and 14, Township 1N., Range 12 E.C.M., Texas County, Oklahoma.

It is stated that in order to reduce the volumes of gas owed to Applicant by Cities Service, the new agreement also provides for volumes of gas to be delivered by Cities Service to Applicant in excess of the volumes delivered by Applicant to Cities Service, although under no circumstances would the total daily deliveries by Cities Service under the agreement exceed 1,500 Mcf.

Applicant states that all gas received by it from Cities Service under the foregoing arrangements would be sold by Applicant to Southern Union pursuant to existing certificates at various points of delivery along Applicant's transmission line in Beaver and Texas Counties, Oklahoma, and in Sherman County, Texas. Applicant further states that all such gas would be distributed and resold by Southern Union through existing distribution facilities to present and future customers of Southern Union. Such sales by Western to Southern Union would be made in accordance with Applicant's Rate Schedule G-N.

Applicant indicates that it requests authorization to continue to use the Adams' Tap and associated facilities, but that it does not propose to construct any new facilities in this instant docket.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 15, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24978 Filed 8-26-77;8:45 am]

[Docket No. CP77-531]

WESTERN GAS INTERSTATE CO.

Application

AUGUST 22, 1977.

Take notice that on July 27, 1977, Western Gas Interstate Company (Applicant), 1800 First International Building, Dallas, Tex. 75201 filed in Docket No. CP77-531 an application pursuant to Section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction of up to $500,000 of gas transmission facilities during the period ending March 31, 1978, and the operation of such facilities for the transportation of gas for Southern Union Supply Company (Susco) pursuant to the Gas Transportation Agreement dated July 31, 1977 between Applicant and Susco, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is stated that the authorization requested is necessary to provide the means by which Applicant can transport to the interstate pipeline systems of El Paso Natural Gas Company (El Paso) gas produced from certain wells in which Susco has an interest. Susco desires to make such production available primarily to Southern Union Gas Company and Gas Company of New Mexico, both of which are distribution divisions of Susco's parent, Southern Union, it is said. The project is part of an expansion of Susco's first supplemental supply project which was approved by the Commission on April 20, 1977, it is stated.

Applicant indicates that the order of April 20, 1977 in Docket No. RI76-138, et al., approved the sale of gas produced from three wells in Lea County, N. Mex. to Southern Union, El Paso, and Applicant under separate purchase agreements. Applicant states that in order to allow the addition of new production sources to this supplemental supply project and to minimize the filing burden and delays that result if separate certificate applications are required for each new pipeline, it is hereby requesting authority to construct up to $500,000 of such gas transportation facilities as may be required and transport such gas pursuant to said Gas Transportation Agreement.

It is indicated that the Gas Transportation Agreement provides that Applicant would construct and operate the facilities necessary to deliver Susco's production to El Paso and other pipelines, if appropriate, for (a) further transportation by El Paso and such others and eventual sale by Susco to Southern Union and (b) sale to the transporting pipeline. It is said that the rate for such transportation would be calculated on a cost-of-service basis, that, after the initial rate period, the rate would be determined and filed every six months as part of Applicant's FPC Gas Tariff Original Volume No. 2, and that this cost-of-service approach would allow recovery of the actual costs of rendering the transportation service including a reasonable rate of return on investment and allowances for depreciation and income taxes. It is further stated that since the cost-of-service rates are to be based on actual data for six-month cost-determination period, and in the absence of actual data at the start-up of operations, the initial rate is to be 31.26 cents per Mcf, based on estimated data.

Applicant indicates that the first arrangement under the blanket certificate requested involves the production from two wells, (the Chaco No. 1 and No. 2 Wells) located in San Juan County, New Mexico, requiring approximately one mile of 2-inch pipeline, with appurtenances, commencing at the wellhead of each of the two wells and terminating at a point of interconnection with the El Paso line in the NE/4, Section 18, T-26-N, R-12-W, San Juan County, N. Mex. It is said that the total estimated cost of the Chaco Pipeline is $23,200 to be financed from internally generated funds.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 8, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24900 Filed 8-26-77;8:45 am]

[Docket No. RI77-118]

W. R. YINGER (OPERATOR), ET AL.

Petition for Special Relief

AUGUST 19, 1977.

Take notice that on July 20, 1977, W. R. Yinger (Operator), et al. (Petitioner), 1000 City Center Building, Main and Broadway, Oklahoma City, Okla. 73102, filed in Docket No. RI77-118 a petition for special relief pursuant to Section 2.76 of the Commission's General Policy and Interpretations (18 C.F.R. § 2.76). Petitioner seeks to collect a rate of $1.32 per Mcf for the sale of natural gas to Cities Service Gas Company (Cities) from the Carlson 2-25 Well located in the Lookout Field, Woods County, Okla. Petitioner states that the subject well was previously connected to Signal Oil and Gas Company's (predecessor-in-interest to Aminoil USA, Inc.) gathering system. Petitioner further states that the gathering system was abandoned, and the subject well has been shut-in since October 1972. Petitioner proposes to construct a gathering line of 1¾ miles in length to Cities' pipeline and to install a compressor station.

Any person desiring to be heard or to make any protest with reference to said petition should on or before September 12, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 C.F.R. 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

FEDERAL RESERVE SYSTEM

FIRST NATIONAL BOSTON CORP.

Acquisition of Bank

First National Boston Corporation, Boston, Massachusetts, has applied for the Board's approval under § 3(a)(3) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(3)) to acquire 100 per cent of the voting shares of the successor by merger to Blackstone Valley National Bank, Northbridge, Massachusetts. The factors that are considered in acting on the application are set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Boston. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than September 20, 1977.

Board of Governors of the Federal Reserve System, August 23, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77-29948 Filed 8-26-77;8:45 am]

POLICY ON UNIONIZATION AND COLLECTIVE BARGAINING

The Board of Governors of the Federal Reserve System has adopted a policy on unionization and collective bargaining, effective August 22, 1977. The policy is set forth below.

SECTION 1. *Definition of a labor organization.* When used in this part, the term "labor organization" means any lawful organization of any kind, or any employee representation group, which exists for the purpose, in whole or in part, of dealings with the Board of Governors of the Federal Reserve System (hereinafter referred to as the "Board") concerning grievances, personnel policies and practices, or other matters affecting the working conditions of its employees, but the term shall not include any organization, (a) which asserts the right to strike or to take a job action against the Government of the United States, or any legal entity thereof regardless of form, or to assist or participate in any such strike or job action, or which imposes a duty or obligation to conduct, assist or participate in any such strike, or (b) which fails to agree to refrain from seeking or accepting support from any organization which employs coercive tactics, or (c) which advocates the overthrow of the constitutional form of the Government in the United States, or (d) which discriminates with regard to the terms or conditions of membership because of race, color, sex, creed, age or national origin.

SEC. 2. *Membership in a labor organization.* (a) Any employee of the Board is free to join and assist any existing labor organization or to participate in the formation of a new labor organization, or to refrain from any such activities, except however, Board staff who are executives, officials, and supervisory personnel, secretaries to officials and executives including Governors, administrative or confidential assistants to executives, and employees engaged in personnel work shall not be represented by any labor organization.

(b) The rights of employees described in paragraph (a) of this section do not extend to participation in the management of a labor organization, or acting as a representative of any such organization, where such participation or activity would be incompatible with law or the official duties of an employee.

(c) Notwithstanding anything stated in paragraph (a) of this section, professional employees of the Board shall not be represented by a labor organization which represents other employees unless a majority of the professional employees eligible to vote specifically elect to be represented by such labor organization. However, the professional employees of the Board may, if they so choose, be represented by a separate labor organization of their own, or by no labor organization at all.

SEC. 3. *Recognition of a labor organization.* (a) Any labor organization shall be recognized as the exclusive bargaining representative of the employees in an appropriate unit of the Board when that organization has been selected by the employees in said unit pursuant to the procedure set forth in Section 5. A unit shall be established only on the basis of a clear and identifiable community of interest among the employees concerned, and which unit will allow effective dealings and promote the efficiency of the Board's operations, but no unit shall be established solely on the basis of the extent to which employees in the proposed unit may have organized.

(b) When a labor organization has been recognized as the exclusive representative of employees in an appropriate unit, it will be entitled to act for and to negotiate agreements covering all employees in the unit and it shall be responsible for representing the interests of all such employees without discrimination and without regard to whether they are members of that labor organization or not. Such labor organization will have the opportunity to be represented at discussions between management and employees or employee representatives concerning grievances, personnel policies and practices, but not as to other matters effecting employees in the unit as defined herein or in Section 7(a)(2). The Board, through its Division of Personnel and such other authorized officials, will have the obligation to meet at reasonable times with representatives of a recognized labor organization to negotiate with respect to personnel policies and

V42167AUG297 7 UMI

practices and matters affecting general working conditions, but not with respect to such areas of discretion and policy as the purposes and functions of the Board, the compensation of and hours worked by employees, the budget, retirement system or any insurance plans, benefit plans or thrift plans, the determination as to the organization and assignment of personnel to particular work or position, or the manner of performing work or the internal security of the Board.

(c) Any labor organization seeking recognition shall, upon request, submit to the Board's Division of Personnel a roster of its officers and representatives, a copy of its constitution and bylaws, and a statement of its objectives.

(d) The exclusive recognition of a labor organization shall not preclude any employees, regardless of labor organization membership, from bringing matters of personal concern to the attention of appropriate officials in accordance with applicable law, rule, regulation, or established Board policy, or from choosing his or her own representative in a grievance or appellate action under applicable statutory authority.

SEC. 4. *Determination of appropriate bargaining unit.* The Board will be responsible for initially determining, in accordance with the guidelines previously set forth in Section 3, whether a unit is considered appropriate for purposes of recognition. However, if a labor organization claims that it holds cards requesting a representation election signed by at least 30 percent of the employees in a unit which that organization considers to be an appropriate bargaining unit, the labor organization and the Board shall each designate a representative who together shall request the American Arbitration Association (hereinafter referred to as the "Association") to submit to them from its National Panel of Professional Labor Arbitrators a list of seven impartial qualified professional Arbitrators. The two designated representatives shall meet promptly and by alternately striking names from the list, arrive at the remaining person who together with the two representatives shall constitute a Special Tribunal in connection with the particular union request to investigate the facts, hold hearings if necessary, and issue a decision as to the appropriateness of the unit for purposes of conducting a representation election for exclusive recognition and as to other related issues submitted for consideration. The impartial Arbitrator shall always act as the Chairman of any Special Tribunal duly constituted under this section. The expenses for this proceeding, including the fees of the Association and of the impartial Arbitrator, shall be borne equally by the labor organization and the Board. If either the Board or the labor organization should disagree with the Special Tribunal's decision, the party in disagreement may appeal to the Federal Reserve Board's Labor Relations Panel, as designated under Section 10, and the decision of the Labor Relations Panel shall be final and binding on the parties.

SEC. 5. *Elections.* (a) Once there has been a final determination of an appropriate bargaining unit under the procedure in Section 4 and a showing by a labor organization that it has cards signed by at least 30 percent of the employees in such unit requesting a representation election, an election shall be ordered by the Special Tribunal. A labor organization shall be recognized as the exclusive bargaining representative of the unit if the labor organization is selected by a majority of all the employees in the unit whether voting or not.

(b) If there is any dispute as to whether a labor organization holds cards signed by at least 30 percent of the employees in the unit designated as appropriate, the dispute shall be resolved by the Special Tribunal as previously constituted. The expenses of such procedure, including the impartial Arbitrator's fee, shall be borne equally by the labor organization and the Board. The decision of the Special Tribunal shall be final and binding and shall not be subject to appeal to the Federal Reserve Board's Labor Relations Panel.

(c) The election shall be held under the auspices of the Association, subject to its election rules and regulations. However, if there should be any conflict between such rules and regulations, and the provisions of this policy, the terms and conditions herein outlined shall be prevailing. The fees charged by the Association for this service shall be shared equally by the labor organization and the Board.

(d) An election to determine whether a labor organization should continue as the exclusive bargaining representative of a particular unit shall be held when requested by a petition or other bona fide showing by at least 30 percent of the employees of that unit. Any dispute as to whether at least 30 percent of the employees requested such an election shall be resolved by the same procedure as that set forth in paragraph (b) of this section. The election shall be held under the auspices of the Association in the same manner described in paragraph (c) of this section. The recognition of a labor organization as the exclusive bargaining representative of a unit shall be revoked if a majority of all the employees in the unit whether voting or not signify approval of such revocation.

(e) Only one election may be held in any unit in a twelve (12) month period to determine whether a labor organization should become, or continue to be recognized as, the exclusive representative of the employees in that unit.

(f)(1) Upon receipt of a request for an election from a labor organization supported by a prima facie showing of a 30 percent interest in the unit claimed appropriate by such labor organization, it shall be incumbent on the Board, labor organizations, and all others to refrain from any conduct, action, or policy that interferes with or restrains employees from making a fair and free choice in selecting or rejecting a bargaining representative consistent with the right of the Board, labor organizations, or employees to exercise privileges of free speech in expression of any views, argument or opinion, or the dissemination thereof, whether in written, printed, graphic or visual form.

(f)(2) The Special Tribunal shall consider and issue a decision relative to the allegations of any party that a violation of sub-section (f)(1) has affected the outcome of the election.

(f)(3) In the event of a proven violation of this section by the Board, labor organization, or by other individuals or organizations which are found sufficient to have prejudicially affected the outcome of an election, appropriate remedial action, such as the setting aside of the results of an election and the ordering of a new election, may be ordered by the Special Tribunal, subject to appeal to the Federal Reserve Board's Labor Relations Panel: *Provided, however,* That the Board cannot be required or directed to recognize a labor organization without an election.

(f)(4) The Federal Reserve Board Labor Relations Panel will have the authority, subject to approval by the Board of Governors, to draft a Code of Pre-Election Conduct for promulgation by the Board of Governors for the guidance of Special Tribunals in administering the provisions of this section.

SEC. 6. *Unfair labor practices.* (a) It shall be an unfair labor practice for the Board: (1) To interfere with, restrain, or coerce employees in the exercise of the rights guaranteed in Section 2(a); (2) to dominate or interfere with the formation or administration of any labor organization, or to contribute financial or other support to it; (3) to encourage or discourage membership in any labor organization by discrimination in regard to hire or tenure of employment or any term or condition of employment; (4) to refuse to bargain collectively with the representatives of its employees subject to the provisions of Section 3(b).

(b) It shall be an unfair labor practice for a labor organization, its agents or representatives: (1) To restrain or coerce employees in the exercise of the rights guaranteed in Section 2(a); (2) to cause or attempt to cause the Board to discriminate against an employee in violation of paragraph (a)(3) of this section; (3) to refuse to bargain collectively with the Board, provided the labor organization is the representative of its employees.

(c) Notwithstanding anything previously stated in this section, the expression of any view, argument, or opinion, or the dissemination thereof, whether in written, printed, graphic, or visual form, shall not constitute or be evidence of an unfair labor practice, if such expression contains no threat of reprisal or force, or promise of benefit.

(d) The Federal Reserve Board Labor Relations Panel will have the authority, subject to approval by the Board of Governors, to promulgate rules and regulations, including appropriate penalties, to remedy or prevent the unfair labor practices listed herein.

SEC. 7. *Approval of agreement and required contents.* (a) Any agreement entered into with a labor organization as the exclusive representative of employees in a unit must be approved by the Board of Governors. All agreements with labor organizations shall also be subject to the following requirements which shall be expressly stated in the agreement and shall be applicable to all supplemental, implementing, subsidiary or informal agreements between the Board and the labor organization:

(1) The administration of all matters covered by the agreement shall be governed by the provisions of applicable laws and the Federal Reserve Act of 1913, as amended, and all regulations, and the agreement shall at all times be applied subject to such laws and regulations.

(2) The management of the Board shall retain the right in accordance with applicable laws and regulations: To direct employees of the Board; to hire, promote, transfer, assign, and retain employees; to relieve employees from duties because of lack of work or for other legitimate reasons; to maintain the efficiency of the System and the operations entrusted to the Board by law; to determine the methods, means and personnel by which such operations are to be conducted; and to take whatever actions may be necessary to carry out the functions of the Board in situations of emergency.

SEC. 8. *Grievance Procedures.* (a) An agreement entered into with a labor organization as the exclusive representative of employees in a unit may contain grievance procedures applicable only to employees in such unit. However, these procedures may not in any manner diminish or impair any rights which would otherwise be available to any employee in the absence of an agreement providing for such procedures under applicable statute or regulation.

(b) Grievance procedures established by an agreement may include provisions for arbitration. However, such arbitration (1) shall be advisory in nature, with any decisions or recommendations subject to the approval of the Board of Governors; (2) shall extend only to the interpretation and application of existing provisions of such agreements and not to changes in or proposed changes in such agreements; (3) shall be invoked by a labor organization only with the express written approval of the individual employee or employees concerned.

SEC. 9. *Time for internal labor organization business, consultations and negotiations.* Solicitation of memberships, dues or other internal employee organization business shall be conducted during the non-duty hours of the employees concerned. Officially requested or approved consultation between management executives and representatives of labor organizations shall, whenever practicable, be conducted on official time, but the Director of the Division of Personnel, or his duly authorized representative, may require that negotiations with a labor organization be conducted during the non-duty hours of the Board.

SEC. 10. *Federal Reserve Board Labor Relations Panel.* There shall be established a Federal Reserve Board Labor Relations Panel which shall consist of three members: One member of the Board of Governors of the Federal Reserve System, who shall be Chairman of the Panel, and two public members, all of whom shall be selected by the Board of Governors: *Provided, however,* The public members shall not be connected with the Federal Reserve System in any way. The Panel shall be responsible for the duties assigned to it as set forth in this policy.

SECTION 11. *Amendment.* This policy may be amended upon appropriate legal notice to all labor organizations recognized, or seeking recognition, under this policy who shall promptly be informed of each change. In no instance shall an amendment be applied retroactively.

Board of Governors of the Federal Reserve System, August 24, 1977.

THEODORE E. ALLISON,
Secretary of the Board.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing Federal Housing Commissioner

[Docket No. D-77-491]

CAMDEN, NEW JERSEY AREA OFFICE

Withdrawal of Certain Low-Income Housing Project Authority

AGENCY: Department of Housing and Urban Development.

ACTION: General Notice of Withdrawal Authority.

SUMMARY: This Notice withdraws certain Low-Income Housing Program Authority from the Camden, New Jersey Area Office with the result that the Newark Area Office will exercise the Authority for this Program previously exercised by the Camden Office.

EFFECTIVE DATE: August 29, 1977 through and including December 27, 1977.

SUPPLEMENTAL INFORMATION: The Secretary is withdrawing from the Camden, New Jersey Area Office Authority delegated (35 FR 16105, October 14, 1970 as amended 40 FR 39921, August 29, 1975) with respect to the Section 8 Housing Assistance Payments Program insofar as it relates to the New Jersey Housing Finance Agency, and is assigning responsibility for the Program throughout the State of New Jersey to the Newark Area Office. The objective is to achieve more consistency in administering the Program and to relieve imbalance between workload and staffing within these two offices. This transfer of responsibilities, however, is being adopted on a trial basis for 120 days.

Accordingly, there is withdrawn from the Director and Deputy Director of the Camden Area Office authority for housing assisted under the Section 8 Housing Assistance Payments Program insofar as it relates to the New Jersey Housing Finance Agency. Authority for this Program derives from the United States Housing Act of 1937, 42 U.S.C. 1437, including the power and authority under Sections 1(1) and 1(2) of Executive Order 11196 with certain exceptions.

(Sec. 7(d), Department of Housing and Urban Development Act, (42 U.S.C. 3535 (d)).)

Issued at Washington, D.C., August 23, 1977.

MORTON BARUCH,
General Deputy Assistant Secretary for Housing.

Office of the Secretary

[Docket No. N-77-506]

PRIVACY ACT OF 1974

Adoption of New Notice of Systems of Records and Alteration of Existing Notice of System of Records

AGENCY: Office of the Secretary, HUD.

ACTION: Adoption of New Notice of Systems of Records and Alteration of Existing Notice of System of Records.

V 42 167 AUG 29 77 7 UMI

SUMMARY: As required by law (5 U.S.C. 552a), the Secretary is publishing two new systems of records and an altered system of records that will be maintained by the Department. The new records systems are "Privacy Act Requesters" and "Solar Energy Demonstration Survey Files". The change is necessary to convert the "Equal Opportunity Housing Complaints" records system from a manual to an automated system.

EFFECTIVE DATE: August 29, 1977.

ADDRESS: Rules Docket Clerk, Office of the Secretary, Room 5218, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, D.C. 20410.

FOR FURTHER INFORMATION CONTACT:

Mr. Harold Rosenthal, Departmental Privacy Act Officer, (202) 755-5192.

SUPPLEMENTARY INFORMATION: The new system of records entitled "Privacy Act Requesters" will result from processing requests made under the provisions of the Private Act. The "Solar Energy Demonstration Survey Files" system will consist of demographic, socio-economic, and housing characteristics of purchasers and renters of solar-heated residential dwellings and of occupants of non-solar-heated dwellings in the same development. The conversion from manual to automated processing of the "Equal Opportunity Housing Complaints" will improve complaint tracking and compliance review.

A notice proposing the two new systems of records and the alteration of the existing system of records was published in the FEDERAL REGISTER on May 16, 1977 at 42 FR 24771. No comments were received.

A Finding of Inapplicability respecting the National Environmental Policy Act of 1969 has been made in accordance with HUD Handbook 1390.1. A copy of this Finding of Inapplicability will be available for public inspection during regular business hours at the address set forth above.

For the convenience of the public, the Department is reprinting the systems of records in their entirety.

HUD/DEPT-52

System name:

Privacy Act Requesters

System location:

Headquarters, Regional, Area, and Insuring Offices maintain files of this type. See Appendix A for a complete listing of these offices.

Categories of individuals covered by the system:

Individuals inquiring about existence of records about them, and requesting access to and correction of such records under provisions of the Privacy Act.

Categories of records in the system:

Personal identification of requester, nature of request, and disposition of the request by the Department.

Routine uses of records maintained in the system, including categories of users and purposes of such uses:

See Routine Uses paragraph in the prefatory statement. Other routine uses: none.

Policies and practices for storing, retrieving, accessing, retaining and disposing of records in the system:

Storage:

In file folders.

Retrievability:

Filed by case number and name of individual.

Safeguards:

Records maintained in locked and lockable file cabinets with access limited to authorized personnel.

Retention and disposal:

Records are primarily active. Inactive files are normally disposed of after a one-year period.

System manager and address:

Director
Office of Organization and Management Information
Department of Housing and Urban Development
451 Seventh Street, S.W.
Washington, D.C. 20410

Notification procedure:

For information, assistance, or inquiry about existence of records, contact the Privacy Act Officer at the appropriate location, in accordance with 24 CFR Part 16. A list of all locations is given in Appendix A.

Record access procedures:

The Department's rules for providing access to records to the individual concerned appear in 24 CFR Part 16. If additional information or assistance is required, contact the Privacy Act Officer at the appropriate location. A list of all locations is given in Appendix A.

Contesting record procedures:

The Department's rules for contesting the contents of records and appealing initial denials, by the individual concerned, appear in 24 CFR Part 16. If additional information or assistance is needed, it may be obtained by contacting: (i) In relation to contesting contents of records, the Privacy Act Officer at the appropriate location. A list of all locations is given in Appendix A; (ii) in relation to appeals of initial denials, the HUD Departmental Privacy Appeals Officer, Office of General Counsel, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C. 20410.

Record source categories:

Subject individuals.

HUD/PD&R-2

System name:

Solar Energy Demonstration Survey Files

System location:

Headquarters

Categories of individuals covered by the system:

Purchasers and renters of solar heated or cooled housing under the demonstration program; comparative purchasers of conventional heated and cooled housing; prospective purchasers of housing marketed under the demonstration program.

Categories of records in the system:

Housing characteristics, reason for moving, utility expenditures, neighborhood characteristics, perception of housing and subdivision, housing costs and financing characteristics, marketing attitudes toward solar energy, operating experience with heating and cooling systems, socio-economic information.

Routine uses of records maintained in the system, including categories of users and purposes of such uses:

See Routine Uses paragraph in the prefatory statement. Other routine uses: Real Estate Research Corporation (Chicago, Ill.) for analysis and evaluation of solar energy use and its acceptance by the public.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

In file folders and on magnetic tape/disc/drum.

Retrievability:

Name; address; code number; and index.

Safeguards:

Computer facilities are secured and accessible only to authorized personnel. The name-address index file will be kept in the Department in lockable file cabinets, with access limited to key authorized personnel.

Retention and disposal:

Records will be maintained until follow-up interviews have been completed. Records of survey participants will be destroyed as each cycle ends or the participants leave the program. Hard copy questionnaires will be destroyed at the conclusion of the study, scheduled to end in approximately five years.

System manager and address:

Director
Office of Organization and Management Information
Department of Housing and Urban Development
451 Seventh Street, S.W.
Washington, D.C. 20410

Notification procedure:

For information, assistance, or inquiry about existence of records, contact the Privacy Act Officer at the Headquarters location, in accordance with 24 CFR Part 16. This location is given in Appendix A.

Record access procedures:

The Department's Rules for providing access to records to the individual concerned appear in 24 CFR Part 16. If additional information or assistance is required, contact the Privacy Act Officer at Headquarters location. This location is given in Appendix A.

Contesting record procedures:

The Department's Rules for contesting the contents of records and appealing initials denials by the individual concerned, appear in 24 CFR Part 16. If additional information or assistance is needed, it may be obtained by contacting: (i) In relation to contesting contents of records, the Privacy Act Officer at the Headquarters location. This location is given in Appendix A; (ii) in relation to appeals of initial denials, the HUD Departmental Privacy Appeals Officer, Office of General Counsel, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, D.C. 20410.

Record source categories:

Subject individuals.

HUD/DEPT-15

System name:

Equal Opportunity Housing Complaints.

System location:

Housing Discrimination files are located at the office where originated and may also be transferred to associated Area and/or Regional Offices, or the Department's Headquarters. For a complete listing of these with addresses, see Appendix A.

Categories of individuals covered by the system:

Individuals filing housing discrimination complaints; individuals, officials, and organizations complained about; managers; grant or project applicants; builders; developers; contractors; appraisers; property owners; mortgagors; candidates for positions; witnesses; attorneys; individuals in disaster and EO files; Titles VI, VIII and IX complainants. Does not include files on HUD employee complaints regarding their employment. Notices regarding these inquiries under the Privacy Act are published by the U.S. Civil Service Commission.

Categories of records in the system:

Allegations of housing discrimination; names of complainant and persons or organizations complained about; investigation information; details of discrimination cases; compliance reviews; marketing activity; complaints under Titles VI, VIII and IX; conciliation files; correspondence; affidavits; complaint status reports.

Routine uses of records maintained in the system, including categories of users and purposes of such uses:

See Routine Uses paragraph in prefatory statement.

Other routine uses: to non-federal EO-concerned agencies, the U.S. Department of Justice (including the Federal Bureau of Investigation), the U.S. Department of Labor (including the Office of Federal Contract Compliance), U.S. Courts, the Veterans Administration, the Farmers' Home Administration, complainants, respondents, and attorneys-for investigation, preparing litigation, and monitoring compliance.

Policies and practices for storing, retrieving, accessing, retaining and disposing of records in the system:

Storage:

Records kept in lockable desks and file cabinets and magnetic tape/disc/drum.

Retrievability:

Uusually retrievable by name of complainant and, in some instances, by case file number.

Safeguards:

Manual records are stored in lockable file cabinets; computer facilities are secured and accessible only by authorized personnel, and all files are stored in a secured area. Technical restraints are employed with regard to accessing the computer and data files.

Retention and disposal:

HUD handbooks establish procedures for retention and disposition of records. Generally retained for two years, then transferred to Federal Records Centers for an aditional five years.

System manager and address:

Director
Office of Organization and Management Information
Department of Housing and Urban Development
451 Seventh Street, SW.
Washington, D.C. 20410

Notification procedure:

For information, assistance, or inquiry about existence of records, contact the Privacy Act Officer at the appropriate location, in accordance with 24 CFR Part 16. A list of all locations is given in Appendix A.

Record access procedures:

The Department's rules for providing access to records to the individual concerned appear in 24 CFR Part 16. If additional information or assistance is required, contact the Privacy Act Officer at the appropriate location. A list of all locations is given in Appendix A.

Contesting record procedures:

The Department's rules for contesting the contents of records and appealing initial denials by the individual concerned appear in 24 CFR Part 16. If additional information or assistance is needed, it may be obtained by contacting: (i) In relation to contesting contents of records, the Privacy Act Officer at the appropriate location. A list of all locations is given in Appendix A; (ii) in relation to appeals of initial denials, the HUD Departmental Privacy Appeals Officer, Office of General Counsel, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, D.C. 20410.

Record source categories:

Subject and other individuals; Federal and non-federal government agencies; law enforcement agencies; credit bureaus, financial institutions, current and previous employers; corporations or firms; EO counselors and witnesses.

System exempted from certain provisions of the Act:

Pursuant to 5 U.S.C. 552a(k)(2), all investigatory material, including conciliation files; in records contained in this System which meet the criteria of these subsections is exempted from the notice, access, and contest requirements (under 5 U.S.C. 552a(c)(3), (d), (e)(1), (e)(4), (G), (H), and (I), and (f)) of the agency regulations in order for the Department's Fair Housing and Equal Opportunity and legal staffs to perform their functions properly. (5 U.S.C. 552a, 88 Stat. 1896; sec. 7(d) Department of HUD Act (42 U.S.C. 3535(d)).)

NOTE.—It is hereby certified that the economic and inflationary impacts of this Notice have been carefully evaluated in accordance with OMB Circular A-107.

Issued at Washingon, D.C., August 16, 1977.

PATRICIA ROBERTS HARRIS,
Secretary of Housing and Urban Development.

[FR Doc.77-25081 Filed 8-26-77;8:45 am]

DEPARTMENT OF THE INTERIOR

National Park Service

HEADQUARTERS AREA, CANYON DE CHELLY NATIONAL MONUMENT, ARIZONA

Proposed Development Concept Plan Availability of Assessment of Alternatives

An assessment of the alternatives for directing orderly improvements, replacements, and further expansion of visitor and employee facilities at the headquarters area in Canyon de Chelly National Monument near Chinle, Apache County, Arizona, has been prepared by the National Park Service.

Specific issues addressed in the assessment include alternatives for limiting, improving and expanding concession facilities and road circulation. Also discussed are additions to the visitors center, improved monument and concessioner maintenance and storage and employee housing, development of a picnic area, an additional comfort station in the

V42167A AUG 29 77 UMI

campground, and a solid waste disposal system.

The assessment of alternatives is available at the following locations: Southwest Regional Office, National Park Service, 1100 Old Santa Fe Trail, Post Office Box 728, Santa Fe, New Mexico 87501; Navajo Lands Group Office, 111 North Behrend Avenue, Post Office Box 539, Farmington, New Mexico 87401; and from the Superintendent, Canyon de Chelly National Monument, Post Office Box 588, Chinle, Arizona 86503.

Comments on the assessment of alternatives should be sent to the Superintendent at the Chinle, Arizona address above by October 10, 1977. Following review of all public comments received, an alternative or combinations thereof will be selected and a decision will be made as to whether or not the proposals selected will sigificantly affect the environment.

Dated: August 9, 1977.

JOHN E. COOK,
Regional Director, Southwest Region, National Park Service.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 76-53]

JAPAN ENGINEERING DEVELOPMENT CO.

Intent To Grant Foreign Exclusive Patent License

In accordance with the NASA Foreign Licensing Regulations, 14 C.F.R. 1245.405 (e), the National Aeronautics and Space Administration announces its intention to grant to the Japan Engineering Development Company, Tokyo, Japan, an exclusive patent license in Japan for the two NASA owned inventions covered by the Japanese counterparts of: (1) U.S Application for Patent Serial No. 463.837 for "Method of Improving Impact Resistance of Ceramic Bodies and Improved Bodies", filed by NASA on April 24, 1974 and (2) U.S. Patent No. 3.856.534 for "Anti-Fog Composition", issued to NASA on December 24, 1974. Copies of the above U.S. Patent Application can be purchased from the National Technical Information Service, Springfield, Virginia, 22161 at a cost of $3.75 a copy. Copies of the above identified U.S. Patent can be purchased from the U S. Patent and Trademark Office, Department of Commerce, Washington, D.C., 20231 for $.50 a copy. Interested parties should submit written inquiries or comments within 60 days to the Assistant General Counsel for Patent Matters, Code GP, National Aeronautics and Space Administration, Washington, D.C., 20546.

Dated: August 23, 1977.

S. NEIL HOSENBALL,
General Counsel.

NATIONAL COMMISSION ON ELECTRONIC FUND TRANSFERS

MEETINGS

The National Commission on Electronic Fund Transfers will meet on September 6, 7, and 8, and, as previously scheduled (41 FR 12356) September 9, 1977, at Chatham Bars Inn, Route 28 and Seaview Street, Cape Cod, Massachusetts, beginning at 1:00 p.m., Tuesday, September 6, 1977.

The purpose of the meetings is to consider the recommendations in the Commision's final report.

The meetings will be open to the public on a first-call basis to the extent space permits. Any person interested in attending the meetings should first contact Ms. Janet Miller at (202) 254-7400, to check on the availability of space.

Dated: August 24, 1977.

JAMES O. HOWARD, Jr.,
General Counsel.

NATIONAL SCIENCE FOUNDATION

TASK GROUP 3 OF THE NSF ADVISORY COUNCIL

Amendment To Notice of Meeting

Task Group No. 3 of the NSF Advisory Council will be meeting in Washington, D.C. on September 9, 1977.

Please change the room number from 421 to 536, 1800 G Street, N.W. The notice for this meeting originally appeared in the FEDERAL REGISTER on August 25, 1977.

M. REBECCA WINKLER,
Acting Committee Management Officer.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-341]

DETROIT EDISON CO. (ENRICO FERMI ATOMIC POWER PLANT, UNIT NO. 2

Order Extending Construction Completion Date

The Detroit Edison Company is the holder of Construction Permit No. CPPR-87 issued by the Atomic Energy Commission [1] on September 26, 1972, for construction of the Enrico Fermi Atomic Power Plant, Unit No. 2 presently under construction at the Company's site in Monroe County, Michigan.

On July 8, 1976, the Company filed a request for an extension of the completion dates because construction has been delayed due to (1) labor problems, (2) delivery problems, and (3) inadequate funds. This action involves no significant hazards consideration; good cause has been shown for the delay; and the requested extension is for a reasonable period, the bases for which are set forth in a staff evaluation, dated

Copies of the above documents and other related material are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555 and at the Monroe County Library System, Reference Department, 3700 South Custer Road, Monroe, Michigan 48161.

It is hereby ordered that the latest completion date for CPPR-87 is extended from September 30, 1976 to January 1, 1982.

For the Nuclear Regulatory Commission.

Date of Issurance: August 18, 1977.

D. B. VASSALLO,
Assistant Director for Light Water Reactors, Division of Project Managment

[FR Doc.77-24958 Filed 8-26-77;8:45 am]

[1] Effective January 20, 1975, the Atomic Energy Commission became the Nuclear Regulatory Commission and Permits in effect on that day were continued under the authority of the Nuclear Regulatory Commission.

DUKE POWER CO. (CHEROKEE NUCLEAR STATION, UNITS 1, 2 AND 3)

Assignment of Atomic Safety and Licensing Appeal Board

Notice is hereby given that, in accordance with the authority in 10 CFR § 2.787(a), the Chairman of the Atomic Safety and Licensing Appeal Panel has assigned the following panel members to serve as the Atomic Safety and Licensing Appeal Board for this construction permit proceeding:

Alan S. Rosenthal, Chairman
Dr. John H. Buck
Richard S. Salzman

Dated: August 22, 1977.

ROMAYNE M. SKRUTSKI,
Secretary to the Appeal Board.

[FR Doc.77-24959 Filed 8-26-77;8:45 am]

[Docket No. 50-341]

ENRICO FERMI ATOMIC POWER PLANT, UNIT NO. 2

Negative Declaration Supporting: Extension of Construction Permit No. CPPR-87

The U.S. Nuclear Regulatory Commission (the Commission) has reviewed the Detroit Edison Company's (permittee) request to extend the expiration date of the construction permit for the Enrico Fermi Atomic Power Plant, Unit No. 2 (CPPR-87) which is located in Monroe County, Michigan. The permittee requested a six year extension to the permit through September 30, 1982 to allow for completion of construction of the Fermi plant.

The Commission's Division of Site Safety and Environmental Analysis (staff) has prepared an environmental impact appraisal relative to this change to CPPR-87. Based upon this appraisal, the staff has concluded that an environmental impact statement for this particular action is not warranted because pursuant to the Commission's regulations in 10 CFR Part 51 and the Council of Environmental Quality's Guidelines, 40 CFR 1500.6, the Commission has determined that this change to the construction permit is not a major federal action significantly affecting the quality of the human environment.

The environmental impact appraisal is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555; and at the Reference Department of the Monroe County Library System, 3700 South Custer Road, Monroe, Michigan 48161.

Dated at Bethesda, Maryland, this 18th day of August, 1977.

For the Nuclear Regulatory Commission.

GEORGE W. KNIGHTON,
Chief, Environmental Projects Branch 1, Division of Site Safety and Environmental Analysis.

[Docket No. 50-587]

GENERAL ELECTRIC CO. AND GENERAL ELECTRIC TECHNICAL SERVICES CO., INC.

Application for Consideration of Issuance of Facility Export License

Please take notice that General Electric Company and General Electric Technical Services Company, Incorporated (GETSCO), San Jose, California, have submitted to the Nuclear Regulatory Commission an application for a license to authorize the export of a boiling water reactor with a thermal power level of 2,894 megawatts to Switzerland and that the issuance of this license is under consideration by the Nuclear Regulatory Commission.

No license authorizing the proposed reactor export will be issued until the Nuclear Regulatory Commission determines that the export is within the scope of and consistent with the terms of an applicable agreement for cooperation arranged pursuant to Section 123 of the Atomic Energy Act of 1954, as amended (Act), nor until the Nuclear Regulatory Commission has found that:

(a) The application complies with the requirements of the Act and the Commission's regulations set forth in 10 CFR, Chapter 1, and

(b) The reactor proposed to be exported is a utilization facility as defined in the Act and the Commission's regulations.

Unless before September 28, 1977, a request for a hearing is filed with the Nuclear Regulatory Commission by the applicant, or a petition for leave to intervene is filed by any person whose interest may be affected by the proceeding, the Director of the Office of International Programs may, upon the determinations and findings noted above, cause to be issued to General Electric Company and GETSCO a facility export license and may cause to be published in the FEDERAL REGISTER a notice of issuance of the license. If a request for a hearing or a petition for leave to intervene is filed within the time prescribed in this notice, the Nuclear Regulatory Commission will issue a notice of hearing or an appropriate order.

A copy of the application is on file in the Nuclear Regulatory Commission's Public Document Room located at 1717 H Street, N.W., Washington, D.C.

Dated at Bethesda, Maryland this 22nd day of August, 1977.

For the Nuclear Regulatory Commission.

MICHAEL A. GUHIN,
Assistant Director, Export/Import and International Safeguards, Office of International Programs.

[FR Doc.77-24962 Filed 8-26-77;8:45 am]

[Docket No. 50-281]

VIRGINIA ELECTRIC AND POWER CO., SURRY POWER STATION, UNIT NO. 2

Order for Modification of License

I

Virginia Electric and Power Company (the Licensee), is the holder of Facility Operating License No. DPR-37 which authorizes the operation of the nuclear power reactor known as Surry Power Station, Unit No. 2 (the facility) at steady state reactor power levels not in excess of 2441 thermal megawatts (rated power). The reactor is a pressurized water reactor (PWR) located at the Licensee's site in Surry County, Virginia.

II

On April 1, 1977, the staff issued an Order for Modification of License No. DPR-37 which addressed operation of Surry Power Station Unit No. 2 under conditions in which steam generator tubes have been plugged as a result of tube denting caused by corrosion of the tube support plate in the annular spaces between tube and the tube support plate. In order to perform an inspection of the steam generators, the April 1, 1977 Order limited operation to 4 equivalent months. The licensee's fuel cycle for Surry 2 will end on September 15, 1977, and the resulting shutdown will include performance of the required inspection. The NRC staff has evaluated the results of the previous inspection program and has assessed continued safe operation of the facility. This evaluation is set forth in the staff's concurrently issued Safety Evaluation relating to steam generator tube integrity.

With respect to the effect of increased stress in the tube support plate as a result of tube support plate growth, the staff, in their April 1, 1977, Safety Evaluation (SE), concluded that neither buckling of the tube support plate nor damage to the steam generator shell through the wrapper and channel spacer would develop.

Continued growth of the tube support plate continues to impose stresses on the tubes and may result in the development of stress corrosion cracks in denting locations. The staff has considered the effect of the development of stress corrosion cracking during the course of operation of this facility, and has assessed the effect of such cracks in conjunction with steam line break and loss of coolant accident events. The staff has concluded that under the limitations on tube leakage set forth in this Order, the effect of continued denting on the consequences of the steam line break event would be a fraction of Part 100, and the effect on continued denting on LOCA events, as stated in the April 1, 1977 SE, would not be significant. These events are of extremely low probability, and would be especially so for the limited period of approximately 29 days covered by this Order. The limitations set forth in this Order will provide reasonable assurance that the public health and safety will not be endangered.

After discussion with the staff the licensee has proposed in his July 29, 1977, submittal to continue the limitations applicable to this facility in the manner set forth in the April 1, 1977 Order. The NRC staff believes that the licensee's actions, under the circumstances are appropriate and should be confirmed by NRC order.

Copies of the following documents are available for public inspection in the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., 20555 and at the Swem Library, College of William and Mary, Willamsburg, Virginia, (1) Licensee's submittals of July 29, 1977 and August 9, 1977, (2) Order for Modification of License dated April 1, 1977, (3) this Order for Modification of License, In the Matter of Virginia Electric and Power Company, Surry Power Station, Unit No. 2, Docket No. 50-281, and (4) the Commission's concurrently issued Safety Evaluation supporting this Order.[1]

III

Accordingly, pursuant to the Atomic Energy Act of 1954, as amended, and the Commission's Rules and Regulations in 10 CFR Parts 2 and 50, it is ordered that Facility Operating License No. DPR-37 is hereby amended by replacing in its entirety existing paragraph 3.E. of the license with the following:

E. *Steam Generator Inspection.*—(1) Unit No. 2 shall be brought to the cold shutdown condition by midnight, September 15, 1977 in order to perform an inspection of the steam generators. Nuclear Regulatory Commission approval shall be obtained before resuming power operation following this inspection.

(2) Primary coolant leakage from the primary system to the secondary system through the steam generator tubes shall be limited to 1.0 gpm for all three steam gen-

[1] A copy of items (2), (3), and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

AUG 29 1977 UMI

erators and shall be limited to 0.3 gpm per steam generator, as described in the NRC Safety Evaluation of April 1, 1977. With any steam generator tube leakage greater than either limit the reactor shall be brought to the cold shutdown condition within 24 hours. Nuclear Regulatory Commission approval shall be obtained before resuming reactor operation.

(3) Reactor operation will be terminated if primary to secondary leakage which is attributable to 2 or more tubes occurs during a 20 day period. Nuclear Regulatory Commission approval shall be obtained before resuming reactor operation.

(4) The concentration of radioiodine in the primary coolant shall be limited to 1 μCi/gram during normal operation and to 10 μCi/gram during power transients as defined in Appendix A–1 to the Technical Specifications of the license. Appendix A–1 was issued with the April 1, 1977 Order and shall remain in effect through midnight September 15, 1977.

Dated in Bethesda, Maryland this 17th day of August 1977.

For the Nuclear Regulatory Commission.

EDSON G. CASE,
Acting Director,
Office of Nuclear Reactor Regulation.

[FR Doc.77-24960 Filed 8-26-77;8:45 am]

[Docket No. 50-285]

OMAHA PUBLIC POWER DISTRICT

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 28 to Facility Operating License No. 40 issued to Omaha Public Power District which revised Technical Specifications for operation of the Fort Calhoun Station, Unit No. 1, located in Washington County, Neb. The amendment is effective as of its date of issuance.

The amendment consists of changes to the Technical Specifications to allow alternate methods of monitoring and controlling doses to personnel authorized to enter high radiation areas and modifications to the reactor coolant sampling requirements.

The applications for the amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the applications for amendment dated March 14, 1977 and August 13, 1976 (as revised by letter dated May 31, 1977), (2) Amendment No. 28 to License No. DPR–40, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Blair Public Library, 1665 Lincoln Street, Blair, Nebr. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md. this 19th day of August 1977.

For the Nuclear Regulatory Commission.

GEORGE LEAR,
Chief, Operating Reactors Branch No. 3, Division of Operating Reactors.

[Docket Nos. STN 50-546 and STN 50-547]

PUBLIC SERVICE CO. OF INDIANA, INC. (MARBLE HILL NUCLEAR GENERATING STATION) UNITS 1 AND 2

Reconstitution of Board

Dr. Marvin M. Mann was a member of the Atomic Safety and Licensing Board for the above proceeding. Dr. Mann is unable to continue his service on this Board.

Accordingly, Gustave A. Linenberger, whose address is Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, is appointed a member of this Board. Reconstitution of the Board in this manner is in accordance with Section 2.721 of the Commission's Rules of Practice, as amended.

Dated at Bethesda, Maryland this 23rd day of August 1977.

JAMES R. YORE,
Chairman, Atomic Safety and Licensing Board Panel.

[FR Doc 77 24964 Filed 8-26-77;8:45 am]

[Docket Nos. 50-259, 50-260 and 50-296]

TENNESSEE VALLEY AUTHORITY

Issuance of Amendments to Facility Operating Licenses and Negative Declaration

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 31 to Facility Operating License No. DPR–33, Amendment No. 28 to Facility Operating License No. DPR–52, and Amendment No. 6 to Facility Operating License No. DPR–68 issued to Tennessee Valley Authority (the licensee), which revised Technical Specifications for operation of the Browns Ferry Nuclear Plant, Unit Nos. 1, 2 & 3 (the facility), located in Limestone County, Ala. The amendments were effective as of July 15, 1977, because of the circumstances involved in plant operation as a consequence of cooling tower operation. Formal issuance of the license amendments occurred on August 18, 1977.

These amendments revise the Environmental Technical Specification 2.1 contained in Appendix B to licenses. The change would temporarily increase the maximum temperature measured at the 5 foot depth of the downstream control point from 86° to 90°F.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has prepared an Environmental Impact Appraisal for the revised Technical Specifications and has concluded that an environmental impact statement for this particular action is not warranted because there will be no significant environmental impact attributable to the action.

For further details with respect to this action, see (1) the application for amendments dated July 15, 1977, (2) Amendment No. 31 to License No. DRP–33, Amendment No. 28 to License No. DPR–52, and Amendment No. 6 to License No. DPR–68, and (3) the Commission's Environmental Impact Appraisal. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Athens Public Library, South and Forrest, Athens, Ala. 35611. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 18th day of August 1977.

For the Nuclear Regulatory Commission.

THOMAS V. WAMBACH,
Acting Chief, Operating Reactors Branch No. 1, Division of Operating Reactors.

[FR Doc.77-24965 Filed 8-26-77;8:45 am]

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS WORKING GROUP NO. 1 OF THE SUBCOMMITTEE ON REACTOR SAFETY RESEARCH

Meeting

In accordance with the purposes of Sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b.), Working Group No. 1 of the ACRS Subcommittee on Reactor Safety Research will hold a meeting on September 14–15, 1977 at the American Museum of Atomic Energy, South Tulane Avenue, Oak Ridge, TN 37830. The purpose of this meeting is to review various water reactor safety research programs relating to systems engineering and analytical development.

The agenda for subject meeting shall be as follows:

WEDNESDAY, SEPTEMBER 14, 1977

11:15 A.M. UNTIL CONCLUSION OF BUSINESS

The Working Group may meet in open Executive Session, with any of its consultants who may be present, to explore their preliminary opinions regarding matters which should be considered in order to formulate a report and recommendations to the full Committee.

At the conclusion of the Executive Session, the Working Group will meet in open session to hear presentations by and to hold discussions with representatives of the NRC Staff, their consultants, and with representatives of other organizations participating in safety research on the PWR Blowdown Heat Transfer Program at Oak Ridge, TN.

THURSDAY, SEPTEMBER 15, 1977

9:00 A.M UNTIL THE CONCLUSION OF BUSINESS

The Working Group may meet in open Executive Session, with any of its consultants who may be present, to explore their preliminary opinions regarding matters which should be considered in order to formulate a report and recommendations to the full Committee.

At the conclusion of the Executive Session, the Working Group may meet in open session to hear presentations by and to hold discussions with representatives of the NRC Staff, their consultants, and with representatives of other organizations participating in safety research on PWR Reflood Heat Transfer Programs carried out under the FLECHT Program.

At the conclusion of these sessions, the Working Group may caucus in an open session to determine whether the matters identified in the initial session have been adequately covered and whether the project is ready for review by the full Committee.

In addition, it may be necessary for the Working Group to hold one or more closed sessions for the purpose of exploring matters involving proprietary information. I have determined, in accordance with Subsection 10(d) of Pub. L. 92–463, that, should such sessions be required, it is necessary to close these sessions to protect proprietary information (5 U.S.C. 552b(c)(4)).

Practical considerations may dictate alterations in the above agenda or schedule. The Chairman of the Working Group is empowered to conduct the meeting in a manner that, in his judgment, will facilitate the orderly conduct of business, including provisions to carry over an incompleted open session from one day to the next.

The Advisory Committee on Reactor Safeguards is an independent group established by Congress to review and report on each application for a construction permit and on each application for an operating license for a reactor facility and on certain other nuclear safety matters. The Committee's reports become a part of the public record. Although ACRS meetings are ordinarily open to the public and provide for oral or written statements to be considered as a part of the Committee's information gathering procedure concerning the health and safety of the public, they are not adjudicatory type hearings such as are conducted by the Nuclear Regulatory Commission's Atomic Safety & Licensing Board as part of the Commission's licensing process. ACRS meetings do not normally treat matters pertaining to environmental impacts outside the radiological safety area.

With respect to public participation in the open portion of the meeting, the following requirements shall apply:

(a) Persons wishing to submit written statements regarding the agenda may do so by providing 15 readily reproducible copies to the Working Group at the beginning of the meeting. Comments should be limited to safety related areas within the Committee's purview.

Persons desiring to mail written comments may do so by sending a readily reproducible copy thereof in time for consideration at this meeting. Comments postmarked no later than September 6, 1977 to Dr. Andrew L. Bates, ACRS, NRC, Washington, D.C. 20555, will normally be received in time to be considered at this meeting.

(b) Persons desiring to make an oral statement at the meeting should make a request to do so prior to the beginning of the meeting, identifying the topics and desired presentation time so that appropriate arrangements can be made. The Working Group will receive oral statements on topics relevant to its purview at an appropriate time chosen by the Chairman.

(c) Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call on September 13, 1977 to the Office of the Executive Director of the Committee (telephone 202/634–1919, Attn: Dr. Andrew L. Bates) between 8:15 a.m. and 5 p.m., EDT.

(d) Questions may be asked only by members of the Working Group, its consultants, and the Staff.

(e) The use of still, motion picture, and television cameras, the physical installation and presence of which will not interfere with the conduct of the meeting, will be permitted both before and after the meeting and during any recess. The use of such equipment will be allowed while the meeting is in session at the discretion of the Chairman to a degree that is not disruptive to the meeting. When use of such equipment is permitted, appropriate measures will be taken to protect proprietary or privileged information which may be in documents, folders, etc. being used during the meeting. Recordings will be permitted only during those sessions of the meeting when a transcript is being kept.

(f) Persons with agreements or orders permitting access to proprietary information may attend portions of ACRS meetings where this material is being discussed upon confirmation that such agreements are effective and relate to the material being discussed.

The Executive Director of the ACRS should be informed of such an agreement at least three working days prior to the meeting so that the agreement can be confirmed and a determination can be made regarding the applicability of the agreement to the material that will be discussed during the meeting. Minimum information provided should include information regarding the date of the agreement, the scope of material included in the agreement, the project or projects involved, and the names and titles of the persons signing the agreement. Additional information may be requested to identify the specific agreement involved. A copy of the executed agreement should be provided to Dr. Andrew L. Bates, of the ACRS Office, prior to the beginning of the meeting.

(g) A copy of the transcript of the open portion(s) of the meeting where factual information is presented and a copy of the minutes of the meeting will be available for inspection on or after September 22 and December 15, 1977, respectively, at the NRC Public Document Room, 1717 H Street NW., Washington, DC 20555.

Copies may be obtained upon payment of appropriate charges.

Dated: August 25, 1977.

SAMUEL J. CHILK,
Secretary of the Commission.

[FR Doc.77-25051 Filed 8-26-77;8:45 am]

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS SUBCOMMITTEE ON THE GREENE COUNTY NUCLEAR POWER PLANT

Meeting

In accordance with the purposes of Sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232 b.), the ACRS Subcommittee on the Greene County Nuclear Power Plant, will hold a meeting on September 21–22, 1977 at the Friar Tuck Inn, Highway 32, Catskill, NY 12424. The purpose of this meeting is to review the application of the Power Authority of the State of New York for a permit to construct the Greene County Nuclear Power Plant.

The agenda for subject meeting shall be as follows:

V 42 167 AUG 29 77 UMI

WEDNESDAY, SEPTEMBER 21 AND THURSDAY, SEPTEMBER 22, 1977

8:30 A.M. UNTIL CONCLUSION OF BUSINESS EACH DAY

The Subcommittee may meet in open Executive Session, with any of its consultants who may be present, to explore and exchange their preliminary opinions regarding matters which should be considered during the meeting and to formulate a report and recommendations to the full Committee.

At the conclusion of the Executive Session, the Subcommittee will meet in an open session to hear presentations by and hold discussions with representatives of the NRC Staff, the Power Authority of the State of New York, and their consultants, pertinent to this review.

At the conclusion of these sessions, each day, the Subcommittee may caucus in an open session to determine whether the matters identified in the Executive Sessions have been adequately covered and whether the project is ready for review by the full Committee.

In addition, it may be necessary for the Subcommittee to hold one or more closed sessions for the purpose of exploring matters involving proprietary information. I have determined, in accordance with Subsection 10(d) of Pub. L. 92-463, that, should such sessions be required, it is necessary to close these sessions to protect proprietary information (5 U.S.C. 552b(c)(4)).

Practical considerations may dictate alterations in the above agenda or schedule. The Chairman of the Subcommittee is empowered to conduct the meeting in a manner that, in his judgment, will facilitate the orderly conduct of business, including provisions to carry over an incompleted session from one day to the next.

The Advisory Committee on Reactor Safeguards is an independent group established by Congress to review and report on each application for a construction permit and on each application for an operating license for a reactor facility and on certain other nuclear safety matters. The Committee's reports become a part of the public record. Although ACRS meetings are ordinarily open to the public and provide for oral or written statements to be considered as a part of the Committee's information gathering procedure concerning the health and safety of the public, they are not adjudicatory type hearings such as are conducted by the Nuclear Regulatory Commission's Atomic Safety & Licensing Board as part of the Commission's licensing process. ACRS meetings do not normally treat matters pertaining to environmental impacts outside the radiological safety area.

With respect to public participation in the open portion of the meeting, the following requirements shall apply:

(a) Persons wishing to submit written statements regarding the agenda may do so by providing 15 readily reproducible copies to the Subcommittee at the beginning of the meeting. Comments should be limited to safety related areas within the Committee's purview.

Persons desiring to mail written comments may do so by sending a readily reproducible copy thereof in time for consideration at this meeting. Comments postmarked no later than September 14, 1977, addressed to Mr. Robert L. Wright, Jr., ACRS, NRC, Washington, D.C. 20555, will normally be received in time to be considered at this meeting.

Background information concerning items to be considered at this meeting can be found in documents on file and available for public inspection at the NRC Public Document Room, 1717 H Street, NW., Washington, D.C. 20555, and at the Catskill Public Library, 1 Franklin Street, Catskill, N.Y. 12414.

(b) Persons desiring to make an oral statement at the meeting should make a request to do so prior to the meeting, identifying the topics and desired presentation time so that appropriate arrangements can be made. The Subcommittee will receive oral statements on topics relevant to its purview at an appropriate time chosen by the Chairman.

(c) Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call on September 20, 1977 to the Office of the Executive Director of the Committee (telephone 202/634-1919 Attn: Mr. Robert L. Wright, Jr.) between 8:15 a.m. and 5:00 p.m., EDT.

(d) Questions may be asked only by members of the Subcommittee, its consultants, and Staff.

(e) The use of still, motion picture, and television cameras, the physical installation and presence of which will not interfere with the conduct of the meeting, will be permitted both before and after the meeting and during any recess. The use of such equipment will be allowed while the meeting is in session at the discretion of the Chairman to a degree that is not disruptive to the meeting. When use of such equipment is permitted, appropriate measures will be taken to protect proprietary or privileged information which may be in documents, folders, etc. being used during the meeting. Recordings will be permitted only during those sessions of the meeting when a transcript is being kept.

(f) Persons with agreements or orders permitting access to proprietary information may attend portions of ACRS meetings where this material is being discussed upon confirmation that such agreements are effective and relate to the material being discussed.

The Executive Director of the ACRS should be informed of such an agreement at least three working days prior to the meeting so that the agreement can be confirmed and a determination can be made regarding the applicability of the agreement to the material that will be discussed during the meeting. Minimum information provided should include information regarding the date of the agreement, the scope of material included in the agreement, the project or projects involved, and the names and titles of the persons signing the agreement. Additional information may be requested to identify the specific agreement involved. A copy of the executed agreement should be provided to Mr. Robert L. Wright, Jr., of the ACRS office, prior to the beginning of the meeting.

(g) A copy of the transcript of the open portion(s) of the meeting where factual information is presented and a copy of the minutes of the meeting will be available for inspection on or after September 29 and December 29, 1977, respectively, at the NRC Public Document Room, 1717 H Street NW., Washington, DC 20555 and at the Catskill Public Library, 1 Franklin Street, Catskill, NY 12414.

Copies may be obtained upon payment of appropriate charges.

Dated: August 25, 1977.

SAMUEL J. CHILK,
Secretary of the Commission.

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS SUBCOMMITTEE ON THE ATLANTIC GENERATING STATION

Meeting; Change in Agenda

The agenda for the meeting of the ACRS Subcommittee on the Atlantic Generating Station scheduled to be held August 31, 1977 has been changed as follows:

At the conclusion of the Executive Session, the Subcommittee will meet to hear presentations by representatives of the NRC Staff, the Public Service Electric and Gas Company, and their consultants, and will hold discussions with these groups pertinent to the review.

Notice of this meeting was published in the FEDERAL REGISTER on August 15, 1977, 42 FR 41193. All other matters pertaining to the meeting remain the same.

Dated: August 25, 1977.

SAMUEL J. CHILK,
Secretary of the Commission.

[FR Doc.77-25054 Filed 8-26-77;8:45 am]

[Docket No. 50-571; License No. XR-118]

BABCOCK & WILCOX

Issuance of Facility Export License

On November 10, 1976 Babcock & Wilcox submitted an application to the Nuclear Regulatory Commission seeking a license to authorize the export of a pressurized water reactor with a thermal power level of 3,600 megawatts to the Federal Republic of Germany (FRG). Pursuant to 10 CFR 2.105, notice of the application was published in the FEDERAL REGISTER on December 16, 1976 (41 FR 55003).

On February 16, 1977, a timely petition was filed with the Commission on behalf of Burgeraktion Atomschutz Mittelrhein e.V. (Citizen Action Group for Nuclear Protection, Middle Rhine, Ltd.) for leave to intervene and for a hearing on the application for export of this utilization facility to the FRG.

On June 27, 1977 the Commission issued a memorandum and order in this matter which (1) found that

(a) The subject application meets all applicable licensing requirements of the Atomic Energy Act of 1954 and the Energy Reorganization Act of 1974;

(b) NEPA does not require the Commission to prepare an individual environmental statement assessing the site specific impacts of the particular proposed nuclear reactor export on territory within the sovereign jurisdiction of a foreign government;

(c) Insofar as the Commission must consider the impacts of the export on the United States and globally, the environmental impact statement on the effects of United States nuclear export activities previously prepared by the Energy Research and Development Administration (ERDA) satisfies all the Commission's NEPA obligations in the matter; and

(d) The Petitioner lacks standing to intervene in the licensing proceeding as a matter of right;

and (2) directed the Assistant Director for Export-Import and International Safeguards to issue the proposed license to Babcock & Wilcox.

On June 28, 1977, License Number XR-118, was issued to Babcock & Wilcox, Lynchburg, Virginia, authorizing the export of the power reactor to Rheinisch-Westfalisches Elektrizetatswerk, Essen, the Federal Republic of Germany.

The export of this reactor to the FRG is within the purview of the Agreement for Cooperation Between the Government of the United States of America and the Government of the Federal Republic of Germany.

Dated at Bethesda, Md., this 22nd day of August, 1977.

For the Nuclear Regulatory Commission.

MICHAEL A. GUHIN,
Assistant Director, Export/Import and International Safeguards, Office of International Programs.

[Docket No. STN 50-560]

FLUOR PIONEER INC.

BOPSSAR Balance-of-Plant Standard Design and Its Relationship to the RESAR-41 Standard Design; Issuance of a Safety Evaluation Report and Preliminary Design Approval

Notice is hereby given that the staff of the Nuclear Regulatory Commission (the NRC staff) has issued a Safety Evaluation Report (SER) dated August 1977 and a Preliminary Design Approval No. PDA-11 dated August 17, 1977 for the reference system design of a balance-of-plant portion of a pressurized water reactor nuclear power plant, utilizing the Westinghouse RESAR-41 nuclear steam supply system design, and as described in the application by Fluor Pioneer Inc. (BOPSSAR). The BOPSSAR balance-of-plant design was reviewed by the NRC staff pursuant to Appendix O to 10 CFR Part 50. Notice of receipt of the BOPSSAR Safety Analysis Report was published in the FEDERAL REGISTER on February 6, 1976 (41 FR 5460).

The BOPSSAR Safety Analysis Report contains preliminary design information for the balance-of-plan portion of a standard plant. This SER presents the NRC staff's evaluation of the BOPSSAR design and its relationship to the RESAR-41 standard nuclear steam supply system design, described in the Westinghouse Electric Corporation Standard Safety Analysis Report (RESAR-41), Docket No. STN 50-480. A Safety Evaluation Report (NUREG 75/103) and a Preliminary Design Approval No. PDA-3 were issued in December 1975 for RESAR-41.

The Safety Evaluation Report documents the results of the NRC staff's review and evaluation of the BOPSSAR design, and its relationship to the RESAR-41 NSSS design, including Amendments 1 through 14 thereto, and addresses the comments of the Advisory Committee on Reactor Safeguards as reflected in its report to the Commission dated July 20, 1977.

PDA-11 provides NRC staff approval of the preliminary balance-of-plant design described in BOPSSAR and its relationship to the RESAR-41 NSSS design. By the issuance of PDA-11, the NRC staff has determined that the information provided in BOPSSAR (and its relationship to the RESAR-41 NSSS design) is acceptable for referencing in utility applications for construction permits. The BOPSSAR balance-of-plant design and the RESAR-41 NSSS design shall be utilized by and relied upon by the NRC staff and the Advisory Committee on Reactor Safeguards in their review of facility license applications for construction permits incorporating by reference BOPSSAR preliminary standard design, unless there exists significant new information which substantially affects the determinations in PDA-11 or other good cause.

Issuance of PDA-11 and the staff's Safety Evaluation Report does not constitute a commitment to issue a permit or license, or in any way affect the authority of the Commission. Atomic Safety and Licensing Appeal Board, Atomic Safety and Licensing Boards, and other presiding officers in any proceeding under Subpart G of 10 CFR Part 2. This action only approves, subject to the conditions set forth in PDA-11, the design of a facility for use for reference purposes in applications for permits to construct a nuclear power plant. It does not authorize the construction or operation of any nuclear power plant or any other facility. The environmental impacts associated with any facility proposed to be construction utilizing the approved reference design will be considered in accordance with the Commission's regulations in 10 CFR Part 51.

PDA-11 is effective as of its date of issuance and shall expire December 31, 1978, unless earlier superseded by issuance of an appropriate Final Design Approval for the BOPSSAR standard design, or unless extended by the NRC staff. The expiration of PDA-11 on December 31, 1978, shall not affect use of PDA-11 for reference in any construction permit application docketed prior to such date.

A copy of the (1) Preliminary Design Approval No. PDA-11 dated August 17, 1977; (2) the report of the Advisory Committee on Reactor Safeguards dated July 20, 1977; (3) the NRC staff's Safety Evaluation Report, NUREG-0315 dated August 1977; (4) Fluor Pioneer Inc.'s Standard Safety Analysis Report (BOPSSAR), including Amendments 1 through 14 thereto; and (5) WASH-1341, the Commission's "Programmatic Information for the Licensing of Standardized Nuclear Power Plants," dated August 1974, which also includes the Standardization Policy issued on March 5, 1973, are available for public inspection at the Commission's Public Document Room at 1717 H Street NW., Washington, D.C. 20555. A copy of PDA-11 may be obtained upon request. The request should be addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Project Management. Copies of the Safety Evaluation Report, NUREG-0315, may be purchased at current rates from the National Technical Information Service, Springfield, Virginia 22161.

Dated at Bethesda, Md., this 17th day of August 1977.

For the Nuclear Regulatory Commission.

JOHN F. STOLZ,
Chief, Light Water Reactors Branch No. 1, Division of Project Management.

REGULATORY GUIDE

Issuance and Availability

The Nuclear Regulatory Commission has issued a guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

Regulatory Guide 1.108, Revision 1, "Periodic Testing of Diesel Generator Units Used As Onsite Electric Power Systems at Nuclear Power Plants," describes a method acceptable to the NRC staff for complying with the Commission's regulations with regard to periodic inspection and testing of diesel electric power units to ensure that the diesel electric power systems will meet their availability requirements. This guide was

V 42 167 AUG 29 77 UMI

revised to reflect public comment and additional staff review.

Comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time. Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

Regulatory guides are available for inspection at the Commissions Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of issued guides (which may be reproduced or for placement on an automatic distribution list for single copies of future guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Document Control. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

(5 U.S.C. 552(a))

Dated at Rockville, Md., this 22nd day of August 1977.

For the Nuclear Regulatory Commission.

RAY G. SMITH,
Acting Director,
Office of Standards Development.

[FR Doc.77-25056 Filed 8-26-77;8:45 am]

REGULATORY GUIDE

Issuance and Availability

The Nuclear Regulatory Commission has issued a revised guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

Regulatory Guide 1.59, Revision 2, "Design Basis Floods for Nuclear Power Plants," discusses the design basis floods that nuclear power plants should be designed to withstand without loss of capability for cold shutdown and maintenance thereof. The appendices to the guide provide methods for determining estimates for the probable maximum flood, seismically induced floods resulting from dam failures, and probable maximum surges on the Atlantic and Gulf coasts. A recently issued standard, ANSI N170-1976, "Standards for Determining Design Basis Flooding at Power Reactor Sites," contains methods previously included in Appendix A of this guide. The purpose of this revision is to replace the description of these methods with an endorsement of ANSI N170-1976.

Comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time. Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of issued guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Atttention: Director, Division of Document Control. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. 9902 (811-2493)]

CAPITAL LIQUIDITY, INC.

Filing of Application for an Order Declaring That the Company Has Ceased To Be an Investment Company

AUGUST 22,1977.

Notice is hereby given that Capital Liquidity, Inc., 4201 Wilshire Boulevard, Los Angeles, California 90010 ("Applicant"), registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified, management investment company, filed an application on August 1, 1977, pursuant to Section 8(f) of the Act, for an order of the Commission declaring that Applicant has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

The Applicant, a Maryland corporation, registered under the Act on June 25, 1974. The Applicant states that at a Special Meeting of the Shareholders held on March 4, 1977, 1,000 of the 1,094 outstanding voting shares of Applicant were voted in favor of a plan of liquidation and dissolution ("Plan"). Pursuant to the Plan the Applicant's assets were liquidated at their current market value, the expenses of the Applicant paid and the net assets distributed on a pro-rata basis to the shareholders on May 21, 1977. No shares were voted against the Plan. None of the costs and expenses of implementation of the Plan were borne by the Applicant.

Applicant also states that in accordance with the provisions of the Plan all of the net assets of the Applicant have been distributed to the Shareholders, and active operations of it have ceased. In addition, it is alleged that all liabilities of Applicant have been paid. Applicant filed its Articles of Dissolution with the Maryland State Department of Assessments and Taxation on May 16, 1977. This filing acted to dissolve Applicant in accordance with the requirements of Maryland law.

Section 8(f) of the Act provides, in pertinent part, that whenever the Commission on its own motion or upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and upon the effectiveness of such order, the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than September 19, 1977, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application accompanied by a statement as to the nature of his interest, the reason for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application herein will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons, who request a hearing or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.77-24940 Filed 8-26-77;8:45 am]

[Release No. 9903 (811-2206)]

TUDOR INDUSTRIES CORPORATION

Filing of Application for Order Declaring That Applicant Has Ceased To Be an Investment Company

AUGUST 22, 1977.

Notice is hereby given that Tudor Industries Corporation, 733 Summer Street, Stamford, Conn. 06901, ("Applicant"), a company registered under the Investment Company Act of 1940 (the "Act") as a non-diversified, closed-end, management investment company, filed an application on May 2, 1977, and amendments thereto on June 16, 1977 and August 5, 1977, pursuant to Section 8(f) of the Act, for an order of the Commission declaring that Applicant has ceased to be an investment company as defined by the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Section 3(a)(3) of the Act includes within the definition of "investment company" any issuer which is engaged or proposes to engage in the business of investing, reinvesting, owning, holding, or trading in securities, and owns or proposes to acquire investment securities having a value exceeding 40 percent of the value of such issuer's total assets (exclusive of Government securities and cash items) on an unconsolidated basis. For purposes of Section 3(a)(3), the term "investment securities" is defined to include all securities except Government securities, securities issued by employees' securities companies, and securities issued by majority owned subsidiaries of the owner which are not investment companies.

Applicant states that in September, 1971, it registered under the Act because it owned or proposed to acquire investment securities having a value in excess of 40 percent of its assets. It further states that, as of April 28, 1977, it did not own any investment securities and that its assets of $11,809, as of January 1, 1977, to the extent not expended, are held as cash and have not been otherwise invested. Applicant's financial statements, submitted as an exhibit to the application, indicate that it had a federal income tax loss carryforward of approximately $262,900, of which $220,000 expired on June 30, 1977.

According to the application, at a meeting of shareholders held on May 23, 1977, Applicant's shareholders approved, inter alia, the execution, delivery and performance of a reorganization agreement ("Reorganization Agreement") whereby Applicant would acquire all of the outstanding stock of GS International Corporation ("GSI") from the stockholders of GSI in exchange for an aggregate of 1,106,117 shares of Applicant's common stock, such stock to be issued after Applicant's shareholders shall have approved, and Applicant shall have effectuated, a reverse stock split of its outstanding common stock on the basis of one share for each twenty shares presently outstanding. Applicant states that: (1) it had 5,530,585 shares of common stock outstanding prior to such reverse stock split, and (2) upon the issuance of Applicant's stock to the stockholders of GSI, the GSI stockholders will own approximately 80 percent of Applicant's then outstanding shares. Although the proxy solicitation made in connection with the above-referenced meeting of Applicant's shareholders stated that the deregistration of Applicant was a condition to the consummation of the reorganization with GSI, according to the application, all of the provisions of the Reorganization Agreement have been effectuated with the exception of the exchange of Applicant's shares for all of the stock of GSI, which exchange will not take place unless an order deregistering Applicant is granted.

Applicant states that GSI is a Connecticut corporation which was incorporated on May 6, 1976, and that the business activity of GSI consists of (1) the importation of consumer products into the United States for distribution and sale, such products at present being electronic calculators, LED watches and smoke detectors, and (2) the sale of materials, such as integrated circuits, LED displays and other semi-conductor items to foreign assemblers outside the United States. With respect to the importing of consumer products, Applicant states that GSI has entered into a marketing agreement with Minerva Distributors, Ltd. of Thailand ("Minerva") under the terms of which GSI acts as the exclusive distributor for all consumer type electronic products manufactured or assembled by Minerva and that, in addition, GSI makes direct sales of products as principal. Applicant further states that (1) for the period ended February 28, 1977, transactions with Minerva accounted for approximately 59 percent of the total sales of GSI, (2) Minerva also purchases from GSI material used by Minerva in the assembly of consumer products, and (3) substantially all of GSI's sales of materials to foreign assemblers are to Minerva. According to the application, GSI has established a subsidiary corporation operating in Singapore which will be selling in local markets many of the same products being sold by GSI in the United States.

Applicant states that GSI has 25 full-time employees, including its president, Eric Tang, its vice-president, Robert C. Leng, and assembly and supervisory personnel. It states also that for the period June 3, 1976 through February 28, 1977, GSI had sales of $908,921, commissions earned of $25,000, and interest income of $673, which after expenses of the company amounted to net income before federal income tax of $103,836. Applicant states that as of February 28, 1977, GSI had (1) assets of $576,542.50, consisting primarily of $257,325 in inventory and $246,820.42 in accounts receivable, (2) current liabilities of $346,347.56, (3) long-term loan payable of $22,500, and (iv) stockholder's equity of $207,694.94.

Notwithstanding the provisions of Section 3(a)(3) of the Act, summarized above, Section 3(b)(1) of the Act excludes from the definition of investment company any issuer primarily engaged, directly or through a wholly-owned subsidiary or subsidiaries, in a business or businesses other than that of investing, reinvesting, owning, holding or trading in securities.

Applicant submits that it owns no investment securities and that upon the consummation of the exchange of Applicant's stock for GSI stock, GSI will become a wholly-owned subsidiary of Applicant. It further submits that GSI is actively engaged in the business of importing and distributing consumer products and the sale of electronic components to assemblers outside the United States, and that such facts indicate that, upon consummation of the proposed reorganization, Applicant, through its wholly-owned subsidiary GSI, will be actively engaged in such business. Applicant states that since January 31, 1977, it has not engaged in any business other than actions taken to carry out the Reorganization Agreement.

Section 8(f) of the Act provides, in part, that where the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order and that, upon the taking effect of such order, the registration under the Act of such company shall cease to be in effect. Section 8(f) further provides that, if necessary for the protection of investors, such an order may be made upon appropriate conditions.

Applicant has requested an order of the Commission pursuant to Section 8(f) of the Act declaring that it has ceased to be an investment company, and has agreed that such order may be conditioned upon: (1) an undertaking to retain Applicant's records for a period of five years from the date an order deregistering Applicant is issued, and (2) consummation of the reorganization with GSI.

Notice is further given that any interested person may, not later than September 16, 1977, at 5:30 P.M., submit to the Commission in writing a request for a hearing on this matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon the Applicant at the address stated above. Proof of such service (by affidavit or, in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the matter will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

DEPARTMENT OF STATE

Office of the Secretary

[Public Notice 563]

BUREAU OF OCEANS AND INTERNATIONAL ENVIRONMENTAL AND SCIENTIFIC AFFAIRS

Availability of Draft Environmental Impact Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of State has prepared a draft environmental impact statement for the draft Panama Canal treaty being negotiated between officials of the Governments of the United States of America and the Republic of Panama.

When ratified, the Panama Canal treaty and its supporting agreements will provide a new basis for cooperation between the United States and Panama in the operation and defense of the Panama Canal. It will replace the United States-Panama Treaty of 1903, which has governed canal operations since the waterway's construction, and subsequent amendments.

Copies of the draft environmental impact statement may be obtained by writing to the Office of Environmental Affairs, Department of State, Room 7822, Washington, D.C. 20520. Written comments on the proposed action should be submitted to William H. Mansfield III, Office of Environmental Affairs, Department of State, Room 7820, Washington, D.C., no later than September 28, 1977.

For the Secretary of State.

LINDSEY GRANT,
Deputy Assistant Secretary for Environmental and Population Affairs.

AUGUST 26, 1977.

AID MISSIONS AND OFFICES, LATIN AMERICA REGION—CLASS II

Redelegation of Authorities to the Field

SECTION I. DEFINITION

AID MISSIONS AND OFFICES

AID Missions and Offices subject to this redelegation of authorities shall be the AID Missions or Offices located in Barbados, Brazil, Ecuador, Guyana, and Uruguay.

SECTION II. AUTHORITIES

A. *Implementing Authorities* — Authority to negotiate, execute, and implement in accordance with applicable statutes and regulations, all loans, grants, guarantee agreements, and amendments thereto, to their respective countries, whether heretofore or hereafter authorized, including authority:

1. To sign project agreements, trust fund agreements, and grant agreements with foreign governments, foreign government agencies, and international organizations having a membership consisting primarily of such foreign governments;

2. To sign Project Implementation Orders (PIO's or PIPA's); and

3. To approve borrower/grantee contracts financed in whole or in part by an AID loan or grant provided that this approving authority shall be limited to contracts not to exceed $50,000.

B. *Excess Property*—In accordance with the provisions of Section 607 of the Foreign Assistance Act of 1961, as amended, ("the Act"), and of AID Handbook 16, and subsequent to my authorizing such assistance, authority:

1. To execute transfer or transfer/trust agreements with friendly countries or with international organizations having a membership primarily of foreign governments;

2. To make the determinations prescribed in subsection 607(b) of the Act.

C. *Special Development Activities*—Authority to use a total of $50,000 annually of Development Grant Funds for Special Development Activities undertaken pursuant to the provisions of AID Manual Order 1323.1.1 or such other amount as may be authorized by AID/W.

D. *Extension of Terminal Dates*—In accordance with AIDTO Circular A–268 dated July 15, 1977, and any amendments thereto, authority to extend:

1. The terminal date for signing a Project Agreement for a cumulative period not to exceed six months;

2. The terminal date for meeting initial conditions precedent for a cumulative period not to exceed six months;

3. The terminal date for requesting disbursement authorizations for a cumulative period not to exceed one year; and

4. The terminal date for completion of performing services and furnishing goods for a cumulative period not to exceed one year.

E. *Hiring of Third Country Nationals by Contractors*—Subject to the provisions of Section VII of AIDPR 7–6.5101, authority to approve waivers to permit employment by contractors under AID funded contracts of third country nationals on the basis of a written determination that the circumstances necessitated such employment.

SECTION III. REDELEGATION OF AUTHORITIES

Pursuant to the authorities delegated to me as Assistant Administrator for Latin America, I hereby delegate all of the authorities set forth in Section II hereof, retaining for myself concurrent authority to exercise any of the functions herein redelegated to the Director, AID Affairs Officer, or AID Representative, as appropriate, of Missions or Offices included in Section I.

SECTION IV. MISCELLANEOUS

A. The authorities redelegated pursuant to Section III hereof shall be exercised after consultation with a Regional Legal Advisor, or GC/LA, as appropriate, a Regional Contracting Officer or a Regional Engineer or SER/ENGR, as appropriate.

B. The authorities redelegated pursuant to Section III may be redelegated in the discretion of the principal AID Officer, to one additional officer or may be exercised by the person acting in the capacity of the respective Mission Director, AID Affairs Officer or AID Representative.

C. This redelegation of authorities shall become effective on the date of my execution of this document and shall supersede on that date all delegations of authority previously issued to the affected AID Missions or Offices or the United States Embassies by the Assistant Administrator for Latin America and the Deputy U.S. Coordinator of the Alliance for Progress; provided, however, that all actions taken under the delegations of authority which are hereby superseded shall remain valid and are hereby reaffirmed.

ABELARDO VALDEZ,
Assistant Administrator for Latin America.

HOUSING GUARANTY PROGRAM FOR THE REPUBLIC OF KOREA

Information for Investors

The Agency for International Development (A.I.D.) has advised the Korea National Housing Corp. (KNHC) that upon execution by an eligible U.S. investor acceptable to A.I.D. of an agreement to loan the KNHC an amount not to exceed $5,000,000 and subject to the satisfaction of certain further terms and conditions by the KNHC, A.I.D. will guaranty repayment to the investor of the principal and interest on such loan. The guaranty will be backed by the full faith and credit of the United States of America and will be issued, pursuant to authority, contained in Section 221 of the Foreign Assistance Act of 1961, as amended. Proceeds of the loan will be used to finance lower income housing projects and the rehabilitation of squatter areas in the Republic of Korea. This project is referred to as 489–HG–006.

Eligible investors interested in extending a guaranteed loan to KNHC should communicate promptly with counsel for KNHC:

Duncan Cameron, Esquire, Cameron, Hornbostel & Adelman, 1707 H Street, NW., Washington, D.C. 20006.

Investors eligible to receive a guaranty are those specified in Section 238 (c) of the Act. They are: (1) U.S. citizens; (2) domestic corporations, partnerships or associations substantially beneficially owned by U.S. citizens; (3) foreign corporations whose share capital is at least 95 percent owned by U.S. citizens; and, (4) foreign partnerships or associations wholly owned by U.S. citizens.

To be eligible for a guaranty, the loan must be repayable in full no later than the thirtieth anniversary of the first disbursement of the principal amount thereof and the interest rate may be no higher than the maximum rate to be established by A.I.D.

The KNHC projects a schedule of disbursements covering approximately 24 months from the date of the loan agreement and prospective investors should consider this in proposing a guaranteed loan to the KNHC. In addition, the investor must provide for the servicing of his loan, i.e., recordation and disposition of loan payments received from the KNHC.

Information as to eligibility of investors and other aspects of the A.I.D. housing guaranty program can be obtained from:

Director, Office of Housing, Agency for International Development, Room 625, SA–12, Washington, D.C. 20523.

This notice is not an offer by A.I.D. or by the KNHC. The KNHC and not A.I.D. will select an investor and negotiate the terms of the proposed loan.

Dated: August 11, 1977.

DONALD A. GARDNER,
Deputy Director, Office of Housing, Agency for International Development.

Agency for International Development

AID MISSIONS AND OFFICES

Redelegation of Authorities to Field Latin America Region—Class I

SEC. I. *Definition—AID Missions and Offices.* AID Missions subject to this redelegation of authorities shall be the AID Missions located in Bolivia, Chile, Colombia, Costa Rica, Dominican Republic, El Salvador, Guatemala, Haiti, Honduras, Jamaica, Nicaragua, Panama, Paraguay, Peru, and ROCAP.

SEC. II. *Authorities—A. Implementing Authorities.* Authority to negotiate, execute, and implement in accordance with applicable statutes and regulations, all loans, grants, guarantee agreements, and amendments thereto, to their respective countries, whether heretofore or hereafter authorized, including authority:

1. To sign project agreements, trust fund agreements, and grant agreements with foreign governments, foreign government agencies, and international organizations having a membership consisting primarily of such foreign governments;

2. To sign Project Implementation Orders (PIO's or PIPA's); and

3. To approve all borrower/grantee contracts financed in whole or in part by an AID loan or grant.

B. *Waiver Authorities.—Procurement of Commodities.* Authority to approve source waivers relating to procurement of commodities under AID loans and grants, subject to the provisions of Chapter 2 of AID Handbook 15, for:

1. Emergency procurement not in excess of $100,000 per transaction from countries included in AID Geographic Code 899;

2. Procurement not in excess of $25,000 per transaction from countries included in AID Geographic Code 899; and

3. Grant-financed procurement not in excess of $100,000 per transaction pursuant to subsection 2A8a.(1) of AID Handbook 15.

C. *Excess Property.* In accordance with the provisions of Section 607 of the Foreign Assistance Act of 1961, as amended, ("the Act"), and of AID Handbook 16, and subsequent to my authorizing such assistance, authority:

1. To execute transfer or transfer/trust agreements with friendly countries or with international organizations having a membership primarily of foreign governments;

2. To make the determination prescribed in subsection 607(b) of the Act.

D. *Special Development Activities.* Authority to use a total of $50,000 annually in Development Grant funds for Special Development activities undertaken pursuant to the provisions of AID Manual Order 1323.1.1 or such other amount as may be authorized by AID/W.

E. *Extension of Terminal Dates.* In accordance with AIDTO Circular A–268 dated July 15, 1977, and any amendments thereto, authority to extend:

1. The terminal date for signing a Project Agreement for a cumulative period not to exceed six months;

2. The terminal date for meeting initial conditions precedent for a cumulative period not to exceed six months;

3. The terminal date for requesting disbursement authorizations for a cumulative period not to exceed one year; and

4. The terminal date for completion of performing services and furnishing goods for a cumulative period not to exceed one year.

F. *Hiring of Third Country Nationals by Contractors.* Subject to the provisions of Section VII of AIDPR 7–6.5101, authority to approve waivers to permit employment by contractors under AID funded contracts of third country nationals on the basis of a written determination that the circumstances necessitate such employment.

SEC. III. *Redelegation of Authorities.* Pursuant to the authorities delegated to me as Assistant Administrator for Latin America, I hereby delegate all of the authorities set forth in Section II hereof, retaining for myself concurrent authority to exercise any of the functions herein redelegated, to the Director, AID Affairs Officer, or AID Representative, as appropriate, of Missions or Offices included in Section I.

SEC. IV. *Miscellaneous.* A. The authorities redelegated pursuant to Section III hereof shall be exercised after consultation with a Regional Legal Adviser or GC/LA, as appropriate, a Regional Contracting Officer, or a Regional Engineer or SER/ENGR, as appropriate.

B. The authorities redelegated pursuant to Section III hereof may, in the discretion of the principal AID officer, be further redelegated to one additional officer or may be exercised by the person acting in the capacity of the respective Mission Director, AID Affairs Officer or AID Representative while the latter is out of the country (with my prior approval).

C. This redelegation of authorities shall become effective on the date of my execution of this document and shall supersede on that date all delegations of authority previously issued to the affected AID Missions or Offices or to the United States Embassies by the Assistant Administrator for Latin America and/or the Deputy U.S. Coordinator of the Alliance for Progress; *Provided, however,* That all actions taken under the delegations of authority which are hereby superseded shall remain valid and are hereby reaffirmed.

Dated: July 27, 1977.

ABELARDO L. VALDEZ,
Assistant Administrator for Latin America.

OFFICE OF AID REPRESENTATIVE, THE LEBANON

Redelegations of Authority Regarding Contracting Functions No. 99.1.90

Pursuant to authority delegated to me as Director, Office of Contract Management, under Redelegation of Authority No. 99.1 (38 FR 12836) from the Assistant Administrator for Program and Management Services of the Agency for International Development, I hereby redelegate to the AID Representative, The Lebanon, the authority to sign U.S. Government contracts, grants, and amendments thereto provided that the aggregate amount of each individual contract or grant does not exceed $50,000 or local currency equivalent.

The authority herein delegated may be redelegated in writing, in whole or in part, by said AID Representative only to the person or persons designated by the AID Representative as Contracting Officer. Such redelegation shall remain in effect until such designated person ceases to hold the office of Contracting Officer for AID programs, or until the redelegation is revoked by the AID Representative, whichever shall first occur. The authority so redelegated by the AID Representative may not be further redelegated.

The authority delegated herein is to be exercised in accordance with AID regulations, procedures and policies in effect at the time this authority is exercised and is not in derogation of the authority of the Director, Office of Contract Management, to exercise any of the functions herein redelegated.

Redelegation of Authority 99.1.72 (40 FR 25077) dated June 3, 1975, is hereby revoked.

Any official actions taken prior to the effective date hereof by officers duly authorized pursuant to delegations revoked hereunder are hereby continued in effect, according to their terms, until modified, revoked, or superseded by action of the Representative to whom I have delegated relevant authority in this delegation.

The authority herein delegated to the AID Representative may be exercised by duly authorized persons who are performing the functions of the AID Representative in an acting capacity.

This redelegation of authority shall be effective on the date of signature.

Dated: August 12, 1977.

HUGH L. DWELLEY,
Director,
Office of Contract Management.

National Highway Traffic Safety Administration

TRUCK AND BUS SAFETY SUBCOMMITTEES

Public Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. I), notice is hereby given of a meeting of the Truck and Bus Safety Subcommittees of the National Highway Safety Advisory Committee and the National Motor Vehicle Safety Advisory Council. The Subcommittees will meet on September 19 and 20 at the Hyatt House, 300 Fifth Street, Winston-Salem, N.C.

The Truck and Bus Safety Subcommittees are planning to make site visits to certain trucking firms in the Winston-Salem area on Monday, September 19 in order to collect information on implementation of FMVSS 121 through direct discussions with driver, maintenance and management personnel. Following these visits, at 1:30 to 5:00 p.m. on Monday, September 19, and again at 8:30 a.m. to 5:00 p.m., on Tuesday, September 20, the Subcommittees will hold business meetings at the Hyatt House to discuss their earlier site visits, to receive a status report on NHTSA-sponsored 121-related evaluation studies, to discuss findings from the August 16 and 17 technical meetings held under the auspices of the Subcommittees, and old or new business.

Attendance at the business meetings is open to the interested public but limited to the space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Any member of the public may present a written statement to the Subcommittees at any time. This meeting is subject to the approval of the appropriate DOT officials.

Additional information may be obtained from the NHTSA Executive Secretary, room 5215, 400 Seventh Street SW., Washington, D.C. 20590, telephone 202-426-2872.

Issued in Washington, D.C. on August 24, 1977.

WM. H. MARSH,
Executive Secretary.

[Docket No. IP77-7; Notice 1]

HARBOROUGH CONSTRUCTION CO., LTD. ET AL.

Petition for Exemption From Notice and Remedy for Inconsequential Noncompliance

Harborough Construction Co., Ltd. and Crosby Valve and Engineering Co., Ltd. of Leicestershire, England, have petitioned to be exempted from the notification and remedy requirements of the National Traffic and and Motor Vehicle Safety Act (15 U.S.C. 1381 et seq.) for an apparent noncompliance with 49 CFR 571.205, Motor Vehicle Safety Standard No. 205, Glazing Materials, on the basis that it is inconsequential as it relates to motor vehicle safety.

Petitioners manufactured 30 electric trucks according to specifications of the United States Postal Service which have been in operation in Cupertina, Calif., since March 1974. Motor Vehicle Safety Standard No. 205 allows glazing used in the front side windows in trucks to meet the requirements specified for AS-2 glazing. The trucks in question incorporate glazing made of plastic materials which cannot meet the requirements specified for AS-2 glazing. The reason for the nonconformance is that Postal Service specifications required a window unit larger than the standard sliding window unit in which "the window itself could, after being disengaged, drop down completely within the solid portion of the door frame. Since the sliding doors in the vehicles were curved the bottom section of the glazing material also had to be curved. * * * Glass glazing material could not be secured to accomplish this result, and resort to the plastic material above described was required. * * *" The petitioners argue that the noncompliance is inconsequential as the vehicles have been in active service for over 3 years with no complaints from the Postal Service of a safety nature.

Interested persons are invited to submit written data, views and arguments on the petition of Harborough and Crosby described above. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5108, 400 Seventh Street SW., Washington, D.C. 20590. It is requested but not required that five copies be submitted.

All comments received before the close of business on the comment closing date indicated below will be considered. The application and supporting materials, and all comments received after the closing date will also be filed and will be considered to the extent possible. When the petition is granted or denied, notice will be published in the FEDERAL REGISTER pursuant to the authority indicated below.

Comment closing date: October 17, 1977.

(Sec. 102, Pub. L. 93-492, 88 Stat. 1470 (15 U.S.C. 1417); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8.)

Issued on August 23, 1977.

ROBERT L. CARTER,
Associate Administrator,
Motor Vehicle Programs.

DEPARTMENT OF THE TREASURY

Customs Service

[T.D. 77-213]

CERTAIN CONTAINERS USED FOR THE TRANSPORTATION OF CIGARETTE PAPER, CIGARETTE TUBES AND CIGARETTE FILTER TUBING

Designation as Instruments of International Traffic

AUGUST 23, 1977.

It has been established to the satisfaction of the Customs Service that the following containers are substantial, suitable for and capable of repeated use, and are used in significant numbers in international traffic:

1. Wood trays; length 22¼ inches, width 3 inches, height 16½ inches; serial number punched in tray; used to transport cigarette papers.

2. Metal magazines; length 28 inches, width 4¼ inches, height 15½ inches; serial number punched in magazine; used to transport cigarette tubes.

3. Angle iron trucks; length 38 inches, width 29½ inches, height 68 inches; serial number punched in truck; used to transport trays and magazines mentioned above.

4. Wood reels; diameter 46 inches, width 15 inches; serial numbers punched in reel; used to transport cigarette filter tubing.

Under the authority of section 10.41 (a)(1), Customs Regulations, (19 CFR 10.41(a)(1)), I hereby designate the above-described containers as "instruments of international traffic" within the meaning of section 322(a), Tariff Act of 1930, as amended (19 U.S.C. 1322(a)). These articles may be released under the procedures set forth in section 10.41a, Customs Regulations (19 CFR 10.41a). (102315) (BOR-7-07)

CERTAIN STYROFOAM TRAYS USED FOR TRANSPORTATION OF WORMS

Designation as Instruments of International Traffic

AUGUST 23, 1977.

It has been established to the satisfaction of the U.S. Customs Service that styrofoam trays measuring approximately 13 inches square by 4 inches in height, outside measurements, with no permanent markings and used for the transportation of worms, are substantial, suitable for and capable of repeated use, and are used in significant numbers in international traffic.

Under the authority of § 10.41a(a)(1), Customs Regulations, (19 CFR 10.41a (a)(1)), I hereby designate the above-described styrofoam trays as "instruments of international traffic" within the meaning of section 322(a), Tariff Act of 1930, as amended (19 U.S.C. 1322 (a)). These articles may be released under the provisions set forth in section 10.41a, Customs Regulations (19 CFR 10.41a). (102312) (BOR-7-07)

[Notice No. 215]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

The following publications include motor carrier, water carrier, broker, and freight forwarder transfer applications filed under Sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act.

Each application (except as otherwise specifically noted) contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application.

Protests against approval of the application, which may include a request for oral hearing, must be filed with the Commission within 30 days after the date of this publication. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest must be served upon applicants' representative(s), or applicants (if no such representative is named), and the protestant must certify that such service has been made.

Unless otherwise specified, the signed original and six copies of the protest shall be filed with the Commission. All protests must specify with particularity the factual basis, and the section of the Act, or the applicable rule governing the proposed transfer which protestant believes would preclude approval of the application. If the protest contains a request for oral hearing, the request shall be supported by an explanation as to

why the evidence sought to be presented cannot reasonably be submitted through the use of affidavits.

The operating rights set forth below are in synopses form, but are deemed sufficient to place interested persons on notice of the proposed transfer.

No. MC-FC-77077, filed August 5, 1977. Transferee: MIDEAST EXPRESS, INC., 504 First National Bank Bldg., Johnstown, Pa. 15901. Transferor: W. H. MILLS, Jr. (Richard W. Mills and Mary C. Mills, Co-Executors), RD No. 3, Johnstown, Pa. 15904. Applicant's representative: James W. Patterson, 1200 Western Savings Bank Bldg., Philadelphia, Pa. 19107. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Permit No. MC-88249, issued August 21, 1950, as follows: Such merchandise as is dealt in by wholesale, retail, and chain grocery and food business houses, and in connection therewith, equipment, materials, and supplies used in the conduct of such business, between points and places in the territory bounded by a line beginning at Lock Haven, Pa., and extending in a southeasterly direction through Middleburg, Pa., to Selinsgrove, Pa., thence in a southwesterly direction through Newport and McConnellsburg, Pa., to Hancock, Md., thence in a southerly direction to Winchester, Va., thence in a westerly direction through Davis, W. Va., to Clarksburg, W. Va., thence in a northerly direction to New Castle, Pa., thence in a northeasterly direction through Franklin, Pa., to Kane, Pa., and thence in a southeasterly direction through Renovo, Pa., to Lock Haven, including points and places on the above-specified boundary line. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC-FC-77174, filed June 13, 1977. Transferee: BARKLEY TRUCK LINES, INC., 604 Fourth St., P.O. Box 970, Watertown, S. Dak. 57201. Transferor: MARVIN M. BARKLEY, doing business as Barkley Truck Lines, 603 Fourth St., P.O. Box 970, Watertown, S. Dak. 57201. Applicant's representative: Val M. Higgins, Attorney at Law, 1000 First National Bank Building, Minneapolis, Minn. 55402. Authority sought for purchase by transferee of the operating rights of transferor set forth in Certificates Nos. MC-97397 (Sub-No. 3), MC-97397 (Sub-No. 11), and MC-97397 (Sub-No. 12), issued July 22, 1975, February 8, 1973, and June 23, 1977, respectively, authorizing transportation of general commodities, with exceptions, between points in South Dakota, and meat and meat products, from Sioux City, Iowa, to Fargo, N. Dak., and from Fargo, N. Dak., to Watertown, S. Dak., and those set forth in Permit No. MC-128530, issued June 26, 1975, authorizing the transportation of seeds, flour, and animal and poultry feed, from Watertown, S. Dak., to specified counties in North Dakota and Minnesota. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b) of the Act.

No. MC-FC-77237, filed July 29, 1977. Transferee: MASSAPEQUA MOVERS, INC., 132 Lexington Avenue, West Babylon, N.Y. 11702. Transferor: MURPHY MOVING & STORAGE, INC., doing business as Murphy's Moving and Storage Corporation, 200 Middle Neck Road, Great Neck, N.Y. 11021. Applicant's representative: Ronald I. Shapss, Attorney at Law, 450 Seventh Avenue, New York, N.Y. 10001. Authority sought for purchase by transferee of a portion of the operating rights of transferor, as set forth in Certificate No. MC-22208 issued April 30, 1959, as follows: Household goods, as defined by the Commission, between New York, N.Y. and points on Long Island, N.Y., on the one hand, and, on the other, points and places in Alabama, Kentucky, Michigan, Missouri, Tennessee, and Texas traversing Arkansas and Oklahoma for operating convenience only. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a (b).

No. MC-FC-77239 filed August 2, 1977. Transferee: WAEHLER TRUCKING SERVICE, INC., Route 1, Box 65, Lomira, Wis. 53048. Transferor: DONALD L. WAEHLER, doing business as Waehler Trucking Service, Route 1, Box 65, Lomira, Wis. 53048. Applicant's representative: Richard A. Westley, 4506 Regent Street, Suite 100, Madison, Wis. 53705. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Permit No. MC-124809 (Sub-No. 2), issued June 9, 1977, as follows: Contractors' and construction materials and supplies (except commodities in bulk), and new household appliances, from the facilities of The Kindt Corporation at or near Greenville, Beaver Dam, and Lomira Wis., to points in Illinois, Indiana, Iowa, the Upper Peninsula of Michigan, and Minnesota; Kitchen cabinets from points in the Upper Peninsula of Michigan (except L'Anse and Dollar Bay), to the facilities of The Kindt Corporation, at or near Greenville, Beaver Dam, and Lomira, Wis.; Shingles, roofing materials, and driveway sealer, (except commodities in bulk) from points in Illinois to the facilities of The Kindt Corporation at or near Greenville, Beaver Dam, Lomira, and Sheboygan, Wis. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC-FC-77248 filed July 31, 1977. Transferee: BOYD MESSER TRANSFER, INC., P.O. Box 19, Fulton, Kans. 66738. Transferor: BOYD MESSER, doing business as Boyd Messer Transfer, P.O. Box 19, Fulton, Kans. 66738. Applicant's representative: Clyde N. Christey, 514 Capitol Federal Bldg., Kansas Ave., Topeka, Kans. 66603. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC-59338 issued February 14, 1942, as follows: Agricultural implements and parts, building materials, feed, fencing materials, hardware and petroleum products in containers, from Kansas City, Mo., to Fulton, Kans., over specified regular routes; Petroleum products, in bulk, from Potwin, Kans., to Bronaugh, Mo.; Horses, from Yale, Iowa, and points and places within 15 miles of Yale, to Fort Scott, Kans.; Cotton seed feed, From Muskogee Okla., to Fulton, Kans., and points and places within 15 miles of Fulton; Hay, feed, and grain, from Fulton, Kans., and points and places within 15 miles of Fulton, to Nevada, Mo.; Livestock, between Fulton, Kans., and points and places within 15 miles of Fulton, on the one hand, and, on the other, Kansas City, Mo., and Muskogee, Okla.; and household goods and emigrant movables, between Fulton, Kans., and points and places within 15 miles of Fulton, on the one hand, and, on the other, points and places in Missouri, Iowa, and Kansas. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC-FC-77259, filed August 9, 1977. Transferee: TAGGART SERVICE LTD., 2 Wilson St. West, Perth, Ontario, Canada K7H 2M6. Transferor: L. R. MCDONALD & SONS, LTS. 2 Wilson St. West, Perth, Ontario, Canada K7H 2M6. Applicant's representative: Herbert M. Canter, Benjamin D. Levine, 305 Montgomery St., Syracuse, N.Y. 13202. Authority sought for purchase by transferee of the operating rights of transferor as set forth in Certificate No. MC-118993 and 18993 Sub-Nos. 2, 8, and 10, issued February 18, 1960, April 19, 1960, October 19, 1964, and February 23, 1972, respectively as follows: *Boats*, not exceeding 20 feet in length, and *their accessories*, from ports of entry on the United States-Canada Boundary line, located in New York and Vermont, to points in New York, New Hampshire, Vermont, Maine and Massachusetts, with no transportation for compensation on return except as otherwise authorized. Also *boats*, not exceeding 20 feet in length, and *moulds thereof*, from Little Falls, Minn., to ports of entry on the United States-Canada Boundary line, located in Michigan, with no transportation for compensation on return except as otherwise authorized. Also *fertilizer*, in containers, from all ports of entry in New York on the United States-Canada Boundary line, to points in New York within 150 miles of Rooseveltown, N.Y.; and also *damaged shipments of fertilizer* and *empty fertilizer containers*, from points in New York within 150 miles of Rooseveltown, N.Y., to all ports of entry in New York on the United States-Canada Boundary line. Also *paper*, as described in Appendix XI to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209, with restrictions, from Norfolk, N.Y., to the port of entry located on the United States-Canada Boundary line on the Cornwall-Massena International Bridge;

V 42 167 AUG 29 77 UMI

and also *waste paper*, and *commodities* used in the manufacture of paper, with restrictions, from port of entry located on the United States-Canada Boundary line on the Cornwall-Massena International Bridge, to Norfolk, N.Y. Also General commodities (with exceptions) between the port of entry on the United States-Canada Boundary line on the Cornwall-Massena International Bridge, on the one hand, and, on the other, points in Town of Massena, N.Y. Transferee is presently authorized to operate as a common carrier under Certificate No. MC-118993 and subs thereafter. Application has not been filed for temporary authority under Section 210a(b).

No. MC-FC-77266, filed August 17, 1977. Transferee: NELSON'S WRECKER SERVICE, INC., P.O. Box 323, 2400 N. 9th St. Rd., Lafayette, Ind. 47902. Transferor: GEORGE H. NELSON, doing business as Nelson Wrecker Service, P.O. Box 323, 2400 N. 9th St. Rd., Lafayette, Ind. 47902. Applicant's representative: Brent E. Clary, Attorney-at-Law, P.O. Box 1461, 68 Lafayette Bank and Trust Building, Lafayette, Ind. 47902. Authority sought for purchase by transferee of the operating rights of transferor set forth in Certificate No. MC-139924 (Sub-No. 1), issued June 20, 1975, as follows: Wrecked, disabled, repossessed, and stolen motor vehicles, and replacement vehicles for wrecked, disabled, or stolen motor vehicles, by the use of wrecker equipment only, between points in Minnesota, Iowa, Missouri, Tennessee, Ohio, West Virginia, Pennsylvania, and Illinois, on the one hand, and, on the other, points in Tippecanoe, Benton, White, Carroll, and Warren Counties, Ind.; replacement vehicles for wrecked or disabled motor vehicles, by the use of wrecker equipment only, from points in Tippecanoe, Benton, White, Carroll, and Warren Counties, Ind., to points in Kentucky, Michigan, and Wisconsin, and wrecked, disabled, repossessed, and stolen motor vehicles, by the use of wrecker equipment only, from points in Kentucky, Michigan, and Wisconsin, to points in Tippecanoe, Benton, White, Carroll, and Warren Counties, Ind. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a (b) of the Act.

No. MC-FC-77270, filed August 18, 1977. Transferee: LAWRENCE TILLERY doing business as Abbs Transfer, P.O. Box 209, South Highway 79, Rapid City, S. Dak. 57701. Transferor: MEL ABBS doing business as Abbs Transfer, South Highway 79, Rapid City, S. Dak. 57701. Applicant's representative: J. Maurice Andren, 1734 Sheridan Lake Road, Rapid City, S. Dak. 57701. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC-139237, issued October 22, 1974, as follows: Used household goods between points in that part of South Dakota west of the Missouri River. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

H. G. HOMME, JR.,
Acting Secretary.

ADDITION OF ITEMS TO THE AUGUST 25, 1977 MEETING AGENDA

AUGUST 23, 1977.

CIVIL AERONAUTICS BOARD.

TIME AND DATE: 10:00 a.m., August 25, 1977.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: 6a. Docket 29806, Notice of Proposed Rulemaking, EDR-304/SPDR-49; Amendment of minimum seat size for "split" charters (Memo No. 7338, OGC, BOR, BE, BIA).

6b. Docket 30221, Petition for discretionary review of the Initial Decision in the *DOD-Contract Eligible Certification Case* (Memo No. 7352, OGC)

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, The Secretary, 202-673-5068.

SUPPLEMENTARY INFORMATION: At the August 23, 1977 Board meeting, the time allotted for the meeting did not permit discussion of all items on the agenda. Accordingly, the following members voted that agency business required that the above items be deleted from the August 23, 1977 meeting agenda and be rescheduled for the August 25, 1977 meeting and that no earlier announcement of change was possible:

Chairman Alfred E. Kahn
Vice Chairman Richard J. O'Melia
Member G. Joseph Minetti
Member Elizabeth E. Bailey

[S-1189-77 Filed 8-24-77;3:28 pm]

2

COMMODITY FUTURES TRADING COMMISSION.

TIME AND DATE: 10:00 a.m., August 30, 1977.

PLACE: 2033 K Street NW., Washington, D.C., 5th Floor Hearing Room.

STATUS: Open.

MATTERS TO BE CONSIDERED: Proposed Revisions to the Commidity Option Rules.

CONTACT PERSON FOR MORE INFORMATION:

Jane Stuckey, 254-6314.

[S-1194-77 Filed 8-25-77;10:40 am]

3

COMMODITY FUTURES TRADING COMMISSION.

TIME AND DATE: 11:00 a.m., September 2, 1977.

PLACE: 2033 K Street NW., Washington, D.C., 8th Floor Hearing Room.

Status: Closed.

MATTERS TO BE CONSIDERED: Market Surveillance Meeting.

CONTACT PERSON FOR MORE INFORMATION:

Jane Stuckey, 254-6314.

[S-1196-77 Filed 8-25-77;10:40 am]

4

FEDERAL DEPOSIT INSURANCE CORPORATION.

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 9:30 a.m on Wednesday, August 31, 1977, the Federal Deposit Insurance Corporation's Board of Directors will meet, by telephone conference call, in closed session, by authority of section 552b (d) (4), (c) (4), (c) (8), (c) (9) (A) (ii), and (c) (10) of title 5, United States Code, to consider the application of the Anchor Savings Bank, New York (Brooklyn), New York, an insured mutual savings bank, for consent to merge under its charter and title with North New York Savings Bank, White Plains, New York, also an insured mutual savings bank, and to establish the five offices of North New York Savings Bank as branches of the resultant bank.

Dated: August 22, 1977.

FEDERAL DEPOSIT INSURANCE CORPORATION,
ALAN R. MILLER,
Executive Secretary.

[S-1186-77 Filed 8-24-77;1:23 pm]

5

AUGUST 24, 1977.

FEDERAL POWER COMMISSION.

TIME AND DATE: August 31, 1977, 10:00 a.m.

PLACE: 825 North Capitol Street.

STATUS: Open.

MATTERS TO BE CONSIDERED: (Agenda.)

*NOTE.—Items listed on the agenda may be deleted without further notice.

CONTACT PERSON FOR MORE INFORMATION:
Kenneth F. Plumb, Secretary, telephone 202-275-4166.

This is a list of matters to be considered by the Commission. It does not include a listing of all papers relevant to the items on the agenda. However, all public documents may be examined in the Office of Public Information, room 1000.

POWER AGENDA—7671ST MEETING—AUGUST 31, 1977, REGULAR MEETING—PART I

8

INTERNATIONAL TRADE COMMISSION.

TIME AND DATE: 9:30 a.m., Tuesday, August 30, 1977.

PLACE: Room 117, 701 E. Street NW., Washington, D.C. 20436.

STATUS: Parts of this meeting will be open to the public. The rest of the meeting will be closed to the public.

MATTERS TO BE CONSIDERED: Portions open to the public.

1. Reorganization.
2. Agenda.
3. Minutes.
4. Ratifications.
5. Petitions and complaints (if necessary).
6. Cattle and beef (Inv. TA-201-25)—vote on injury and approval of report.
7. Gas guzzler tax proposal (Inv. 332-88)—approval of report (if not approved in an action jacket).
8. "Factors affecting world petroleum prices to 1985"—see action jacket ID-77-58.
9. Any items left over from previous agenda.

Portions closed to the public:

1. Reorganization (portions regarding the selections of personnel).

CONTACT PERSON FOR MORE INFORMATION:

Secretary,
Kenneth R. Mason, Secretary, 202-523-0161.

[S-1192-77 Filed 8-25-77;9:50 am]

9

POSTAL RATE COMMISSION.

TIME AND DATE: 9:30 a.m., Wednesday, August 31, 1977.

PLACE: Conference room, Room 500, 2000 L Street NW., Washington, D.C.

STATUS: Item No. 1—Open; Item 2—Closed.

MATTERS TO BE CONSIDERED:

Item 1: FL78 Budget.

Item 2: Draft of Tentative Decision Concerning the Officer of the Commission's Proposal to Revise the Eligibility Requirements for Bulk Third-Class Regular-Rate Mail, Docket No. MC76-3.

By recorded vote the Commission has determined that notice cannot be given at least one week prior to the meeting since Commission business requires that the meeting be called at an earlier time.

CONTACT PERSON FOR MORE INFORMATION:

Ned Callan, Information Officer, Postal Rate Commission, Room 500, 2000 L Street NW., Washington, D.C. 20268, telephone 202-254-5614.

[S-1190-77 Filed 8-25-77;8:51 am]

10

POSTAL RATE COMMISSION.

FEDERAL REGISTER CITATION OF PREVIOUS ANNOUNCEMENT:

42 FR 41522, August 17, 1977.

CHANGE OF MEETING SUBJECT MATTER:

The following closed item is added to the Commission meeting of August 24, 1977:

2. Draft of Recommended Decision Concerning "Request of the United States Postal Service for a Recommended Decision on Deferring the Implementation Date of the Minimum Size Prohibitions", Docket No. MC77-2.

CONTACT PERSON FOR MORE INFORMATION:

Ned Callan, Information Officer, Postal Rate Commission, Room 500, 2000 L Street NW., Washington, D.C. 20268, telephone 202-254-5614.

[S-1195-77 Filed 8-25-77;10:40 am]

11

SECURITIES AND EXCHANGE COMMISSION.

FEDERAL REGISTER CITATION OF PREVIOUS ANNOUNCEMENT: 42 FR 41952, August 19, 1977.

PREVIOUS ANNOUNCED TIME AND DATE: Thursday, August 25, 1977, 10 a.m.

CHANGES IN THE MEETING:

Additional item to be considered.

At the open meeting scheduled for Thursday, August 25, 1977, at 10 a.m., the following item will be considered by the Commission in addition to the agenda previously published:

Consideration of the request of George Wasson for a postponement of the effective date of his 45-day suspension from association with any broker or dealer to October 25, 1977.

Chairman Williams, Commissioners Loomis, Evans, and Pollack voted to approve the above change and determined that no earlier notice thereof was possible.

AUGUST 24, 1977.

[S-1193-77 Filed 8-25-77;9:50 am]

12

NUCLEAR REGULATORY COMMISSION.

TIME AND DATE: Thursday, September 1, 1977.

PLACE: Commissioners' Conference Room, 1717 H St. NW., Washington, D.C.

STATUS: Open/Closed.

MATTERS TO BE CONSIDERED:

10 a.m.—1. Commission Budget Mark-up (continuation of August 26 meeting) (Closed—Exemption 9).
2. Discussion of Draft Administration Bill for Nuclear Plant Licensing Reform (continuation of August 26 meeting) (Closed—Exemption 9).
2 p.m.—Briefing on Physical Security Requirements (Tentative) (Open).

CONTACT PERSON FOR MORE INFORMATION:

Walter Magee, 202-634-1410.

Dated: August 25, 1977.

WALTER MAGEE,
Office of the Secretary.

PART 135 REGULATORY REVIEW PROGRAM

Air Taxi Operators and Commercial Operators

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Parts 121 and 135]

[Docket No. 16097; Notice No. 77-17]

PART 135 REGULATORY REVIEW PROGRAM

Air Taxi Operators and Commercial Operators

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes substantially revised requirements for operations by persons holding air taxi/commercial operator certificates issued by the FAA. The proposals would provide greater operational flexibility for the air taxi/commercial operator and a higher level of safety. The air taxi/commercial operator industry has grown substantially in recent years and this growth has been accompanied by use of larger and more complex aircraft. In addition, segments of that industry have advocated that they be permitted to operate larger aircraft under regulations developed to apply to those operations.

DATE: Comments must be received on or before November 28, 1977.

ADDRESS: Send written comments on the proposals in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-24), Docket No. 16097, 800 Independence Avenue, SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

Donald A. Schroeder, Safety Regulations Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591. Telephone 202-755-8715.

SUPPLEMENTARY INFORMATION:

Comments Invited

All interested persons are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments relating to the environmental, energy, or economic impact that might result from adoption of the proposals contained herein are invited and, to the fullest extent possible, should be supported by specific data. Communications should identify this regulatory docket and notice number (Docket No. 16097; Notice No. 77-17) and be submitted in duplicate to: Federal Aviation Administration, Office of the Chief Counsel Attention: Rules Docket, AGC-24, 800 Independence Avenue, SW., Washington, D.C. 20591. All communications received on or before November 28, 1977, will be considered by the Administrator before taking action on the proposed rules. The proposals contained in this notice may be changed in the light of the comments received. All comments received will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the public docket.

Availability of NPRMs

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue SW., Washington, D.C. 20591, or by calling 202-426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

Background

On September 13, 1976, the FAA issued Notice No. 76-18 (41 FR 38778) announcing the Part 135 Regulatory Review Program. The FAA and industry had, for several years, recognized the need to upgrade Part 135 because of the increasing volume and complexity of air taxi operations. The Regulatory Review Program to revise Part 135 involved the development and compilation of proposals and the holding of a Regulatory Review Conference, to be followed by issuance of an NPRM, analysis of comments received, and adoption of appropriate amendments.

This program followed an Operations Review Program initiated in 1975, which included a conference held in December 1975, to discuss proposals covering various regulations including Part 135. The Operations Review Conference produced a considerable number of proposals to amend air taxi rules, of which many were included in the compilation of proposals to be discussed at the Part 135 Regulatory Review Conference. In addition, in 1972 the National Transportation Safety Board conducted a study of the air taxi industry and, based on its findings, submitted a number of recommendations to FAA, many of which were included in the compilation of proposals.

The Part 135 Regulatory Review Conference held in Denver, Colo., was attended by more than 400 persons and 112 proposals were discussed. Following the conference, more than 100 written comments were received. In the compilation of proposals, there were 42 proposed amendments to present regulations and 70 proposed new rules. Following the Conference, the FAA determined that it was appropriate to revise the form of the present Part 135 regulation in order to present effectively a proposal consisting of numerous amendments and new rules.

Revision of Part 135

During the conference, certain industry commenters expresed concern about the application of the proposals that pertained to large aircraft, turbine-powered aircraft, and commuter air carrier operations. According to these commenters, separate rules for different kinds of operations and types of aircraft would present problems in applicability and in compliance, especially where a certificate holder conducts commuter air carrier and on-demand charter operations, and operates turbine and reciprocating engine powered aircraft.

The FAA concluded that regulatory distinctions based upon type of operation or type of powerplant were not necessary at this time; however, since the proposed rules cover a broad range of aircraft relative to passenger carrying capabilities, for certain proposals a distinction is established based on seating capacity rather than by aircraft type or maximum take off gross weight.

In revising Part 135 to incorporate the present rules, amendments, and new rules effectively, the number of subparts proposed is increased to eleven, one of which is reserved for possible future use. This better arranges the regulations into related functional areas, e.g., training, flight operations, maintenance, etc. For example, the substance of Subpart F, which was in the compilation of proposals discussed at the Part 135 Regulatory Review Conference, was included in other subparts of the proposed Part 135. Proposals in this subpart covered commuter operators, turbine powered aircraft, aircraft certificated to carry ten or more passengers and certain aircraft having a maximum certificated take off weight of more than 12,500 pounds.

Other proposals discussed at the Conference provided for various requirements which depended upon whether an aircraft was certificated to carry ten or more passengers, excluding crew. This concept of classification was retained in the proposed Part 135 for certain rules, i.e., Subpart C—Aircraft and Equipment and Subpart K—Maintenance, Preventive Maintenance, and Alterations.

Several proposals included in the Part 135 Review and in the Operations Review were withdrawn from consideration. They are listed in Appendix I and Appendix II following the proposed rule changes in the notice. Proposals removed from consideration during the Operations Review Program in 1975 that pertained to Part 135 rules are listed in Appendix III.

Proposals in Notice 76-28

Five proposed amendments to Part 135 that were developed as part of the Operations Review Program in 1975, were published in miscellaneous amendment Notice No. 76-28 in December 1976. This notice included proposed revisions to various regulations including those pertaining to Part 135. Following that publication date, it was decided to include in the revision to Part 135 all present rules and proposed changes to the part. Therefore, the five Part 135 proposals in Notice 76-28 will be included in this Part 135 notice. Comments on these sections are requested to supplement those already received. These proposals are identified as follows: (new section numbers) § 135.57, § 135.69, § 135.73(b)(h), § 135.127 and § 135.229(g).

Equipment Requirements — Turbojet Powered Airplanes—10 or More Passengers

Included in this notice are proposals to require certain turbojet-powered airplanes to be equipped with Ground Proximity Warning Systems, (GPWS), Cockpit Voice Recorders (CVR), and Flight Recorders (FDR) for operations under Part 135.

The National Transportation Safety Board has recommended that all commercial passenger carrying aircraft have this equipment installed. The NTSB states that the GPWS would reduce approach and landing accidents and that use of the CVR and FDR during accident investigations would enhance safety.

In December 1976, the FAA issued two Special Federal Aviation Regulations (SFAR 30-1 and SFAR 33) authorizing airplanes having a maximum seating capacity of 30 seats or less, a maximum payload capacity of 7,500 pounds or less, and a maximum zero fuel weight of 35,000 pounds or less, to be operated until June 30, 1978, without this equipment. These SFARs were issued to provide additional time to determine whether or not new standards should be developed for operations conducted with those airplanes.

After further study, the FAA believes that consideration should be given to requiring the installation of this equipment in turbojet-powered airplanes, having 10 or more passenger seats, because of the complexity and high performance characteristics of those airplanes.

All interested persons are requested to provide comments concerning whether or not this equipment should be required in operations under Part 135. Comments should include information regarding installation and maintenance costs. This information will provide FAA additional data for use in reaching a decision concerning this equipment.

Petition To Amend Part 135

Air Illinois, Inc., Golden West Airlines, Inc., and Swift Aire Lines, Inc., petitioned for rulemaking to amend Part 135 to permit operation of aircraft with a gross certificated take off weight in excess of 12,500 pounds if such aircraft have a seating capacity of 30 seats or less, and a maximum payload capacity of 7,500 pounds or less.

The proposed revisions of Part 135 would permit aircraft having a maximum passenger capacity of 30 seats or less and a maximum payload capacity of 7,500 pounds or less to be operated under the rules of Part 135, as it is proposed to be amended. If the proposals are adopted the FAA believes that the relief requested by the petitioners would be accomplished.

Economic Impact

The FAA has evaluated estimates of the economic impact which might result from the proposal and has compared the estimates with the anticipated safety benefits. Only four proposals involve major additional costs.

The first is that which would require airborne thunderstorm detection equipment for all multiengine aircraft certificated to carry ten passengers or more, exclusive of flight crew. The FAA estimates that this additional equipment would be required on 250 aircraft now in operation at a total cost of 3.5 million dollars. The FAA believes that the enhancement in safety which will result from use of this equipment justifies the additional cost.

The second proposal is that which would require use of a continuous maintenance program for all aircraft certificated to carry ten passengers or more, exclusive of flight crew. These aircraft are more complex than smaller capacity aircraft and a higher quality maintenance level should result from use of a properly managed continuous maintenance program. It is estimated that the additional cost will be 3.1 million dollars and it is the FAA's opinion that the increased level of safety which will result justifies the additional cost.

The third proposal would require all aircraft that carry ten or more passengers to be certified in the transport category by 1984. There will be an estimated 300 aircraft affected by this proposal. The FAA has taken into consideration that those aircraft will either have to be modified to meet transport category requirements or phased out of Part 135 operations. The FAA estimates that the cost to modify or replace existing aircraft would be 50 million dollars per year from the effective dates until June 30, 1984. This is a final step to upgrade the airworthiness standards of this type of aircraft used in air taxi operations. The FAA believes that the cost to upgrade airworthiness standards will increase the level of safety in air taxi operations and is justified and is in the public interest.

The fourth proposal would require all turbojet aircraft having a passenger carrying capicity, excluding any pilot seat, of 10 or more passengers, to have installed a cockpit voice recorder, a flight data recorder, and a ground proximity warning system. The FAA estimates that this additional equipment would be required on 65 aircraft that are now in operation with a total cost of 1.8 million dollars.

Evaluation of other proposed requirements, including crew training and testing, flight and duty time limitations, weather operation standards, management structure, aircraft equipment, and additional personnel, indicated that their cost impact would not be major.

Regulatory Evaluation

In developing this notice of proposed rulemaking the FAA gave careful consideration to all comments which resulted from the Part 135 Regulatory Review Conference. As might be expected, some proposals discussed at the conference received favorable comments and others drew unfavorable comments.

The proposals in this notice reflect the FAA's effort to be responsive to the needs of Part 135 certificate holders by developing regulations which recognize the dynamic growth of the industry and which provide additional flexibility to that industry. At the same time, the principal goal of the proposals is to provide an overall higher level of safety for Part 135 operations. As a consequence, it may be that, in some cases, the judgments made by the FAA in striking a balance between responsibilities to industry needs on the on hand, and the need for a higher level of safety on the other hand, will evoke controversy. Therefore, the FAA believes that the proposals should be considered potentially controversial.

Redesignation of Part 135 Sections

In revising Part 135 to include proposed amendments to present rules and proposed new rules, it was necessary to redesignate the sections. For reference purposes, a table is included in this part of the preamble. It contains the new Part 135 section numbers, paragraphs within a section containing proposed amendments, the superseded section numbers and, in addition, proposal numbers used to develop the rule.

The proposal references show both Part 135 Regulatory Review and Operations Review proposal numbers. Proposal Numbers 1 through 110 indicate that the proposed revision came from the Part 135 Regulatory Review. Proposal numbers above 110 indicate that the proposed revision came from the Operations Review. It should be noted that some proposed rules list both Part 135 Regulatory Review and Operations Review proposal reference numbers. In these cases, informaton was extracted from both sources to develop the proposal. Several proposed changes do not have a proposal reference number. They were not developed in either the Part 135 Regulatory Review or Operations Review and were included because the FAA believes the proposed amendment is warranted. These are identified by the letters N/A (not applicable).

All Part 135 regulations as proposed to be redesignated are included in the rules portion of this notice. However, many are not amended except for a change in the section number designation. Since those are included in the notice to provide a complete rule for easy reference by persons reviewing the document, only comments on the new sections and the amended paragraphs of the present sections will be considered. In the reference table, only those paragraphs of present Part 135 section which contain proposed new or amended provisions are listed. For example, when all paragraphs in a section have been changed, the notation "all" will be shown in the column indicating all paragraphs are subject to comment, as would be the case if the proposed rule is new. The notation "none" in the amended section column notes that the rule was redesignated only and no amendment is proposed. Comments should not be submitted on the rules that have not been changed.

Also included in this notice is a proposed amendment to § 121.9. It is located at the front of the explanation and rules portions of the notice.

AMENDMENT EXPLANATIONS

Each proposed amendment has an explanation containing a justification or reason for the action taken. They are listed sequentially by title and regulation number. Each is followed by the pertinent proposal number(s) used in the amendment development. The following are the explanations for proposed amendments:

PART 121

§ 121.9 Operations of small aircraft and certain large aircraft

Section 121.9 governs the operation of small airplanes under Part 121. The title of § 121.9 is changed to refer to small aircraft and certain large aircraft and the first sentence of paragraph (a) would be revised to require aircraft having a maximum passenger capacity of 30 seats or less and a maximum payload capacity of 7,500 pounds or less to be operated under the rules of Part 135, excepting specified sections of Part 135. Those sections presently listed in § 121.9 would be changed, where necessary, to reflect the proposed redesignation of those sections in Part 135.

Ref Proposal No. 42, Part 135 Review.

PART 135

SUBPART A—GENERAL

§ 135.1 Applicability

The current Part 135 applies to air taxi operators and commercial operators using small aircraft. The proposed changes to this part include a number of proposals relating to the operation of aircraft with a maximum passenger capacity of 30 seats or less and maximum payload capacity of 7,500 pounds or less.

For many years § 1.1 of the Federal Aviation Regulations has defined a large aircraft as one of more than 12,500 pounds maximum certificated takeoff weight and a small aircraft as one of 12,500 pounds or less maximum certificated takeoff weight. Among other things the distinction between large and small aircraft determines the operating rules which apply to the operation of a particular aircraft. For example, § 135.2 (a) requires air taxi operators to comply with the operations requirements of Part 121 applicable to supplemental air carriers for operations conducted with any aircraft having a maximum certificated takeoff weight of more than 12,500 pounds. Conversely, § 121.9 requires air carrier operations conducted in small airplanes to be conducted in accordance with the rules of Part 135 applicable to air taxi operations.

Effective September 17, 1972, the Civil Aeronautics Board amended Part 298 of the Board's economic regulations to provide that for the Board's economic regulation purposes, a large aircraft was defined, with certain exceptions, as having a maximum passenger capacity of more than 30 seats or a maximum payload capacity of more than 7,500 pounds. This served to focus attention on the distinction between large and small aircraft in § 1.1 of the Federal Aviation Regulations. Moreover, continuation of this distinction was questioned from time to time by various persons and groups. The FAA has intensively studied the distinction between large and small aircraft and has considered the views expressed in the Part 135 Regulatory Review.

The FAA now proposes to increase the Part 135 aircraft size limitations to aircraft which have a maximum passenger capacity of 30 seats or less and a maximum payload capacity of 7,500 pounds or less, and to require Part 121 and § 135.2 operators to operate such aircraft under the rules of Part 135, upgraded as explained below.

The FAA believes that the level of safety in Part 135 should be upgraded to accommodate the larger aircraft which are proposed for operation under the rules of Part 135. In recent years there has been a substantial change in the type of operations conducted by air taxi operators and commercial operators under Part 135. In addition to providing service to off-line points for the convenience of individual passengers or providing emergency air service, an increasing number of air taxi operators are conducting operations as "Commuter Air Carriers."[1] Moreover, there has been a substantial increase in the number of air taxi and commercial operators conducting operations in small airplanes certificated to carry 10 or more passengers and in small complex multiengine turbine powered airplanes. Thus, while some operations under Part 135 are still conducted on an occasional, nonscheduled basis with small, low density airplanes, other operations are conducted with such frequency and regularity or utilize airplanes of such capacity and complexity that increased surveillance and standardization are necessary to maintain the required level of safety. Accordingly, one of the major goals of these proposals is to upgrade the overall level of safety under Part 135.

The applicability provision in § 135.1 (a) (3) would be revised to make Part 135 applicable to operations conducted in aircraft having a maximum passenger capacity of 30 seats or less and a maximum payload capacity of 7,500 pounds or less.

After consideration of factors relating to the scope of rescue operations conducted under the list of excepted operations contained in § 135.1, the FAA has concluded that safety warrants the inclusion of such operations among those operations governed by the rules of Part 135. Accordingly, rescue operations as contained in paragraph (b) (4) (v) would be deleted and the sub-items of this paragraph renumbered as necessary.

In addition, the contents for former paragraphs (b) (5), (6), and (7) would be deleted because the provisions contained in these paragraphs are no longer needed. Pursuant to revised paragraph (b) (5), sightseeing flights conducted in hot air balloons would be expected from compliance with Part 135 since, in light of present technology, hot air balloon flight operators cannot meet the requirements of Part 135. Similar to the exclusion in § 135.1(b) for nonstop sightseeing flights, revised paragraph (b) (6) would provide that nonstop flights, within a 25 statute mile radius of the airport of takeoff, carry persons for parachute jumping would no longer be covered under Part 135. However, sightseeing flights in hot air balloons and the parachute jumping flights would remain subject to the rules of Part 91. Pursuant to revised paragraph (b) (7), infrequent helicopter airlift operations conducted within a 25 statute mile radius of the airport of takeoff would not be covered under Part 135, provided that the restrictions and procedures prescribed in paragraph (b) (7) are followed. In addition, such operations would be subject to the rules of Part 91.

Ref. Proposal Nos. 1 and 2, Part 135 Review; Proposal No. 713, Ops. Review.

§ 135.2 Air taxi operations with large aircraft

Paragraph (a) of the proposed rule would be amended to refer to a new subparagraph (d) which would be added to § 135.2 to require air taxi operations in aircraft having a maximum passenger capacity of 30 seats or less and a maximum payload capacity of 7,500 pounds or less to be conducted in accordance with the rules of Part 135. Paragraph (d) would also provide that an operator required to operate under paragraph (d) may operate or continue to operate under the provisions of § 135.2(a) (1) and (2) if he applies for and is issued operations specifications for such operations under § 135.19.

Similarly, paragraph (b) of § 135.2 would be changed to provide that an air taxi operator who is required to comply with Subpart L of Part 121 pursuant to paragraph (a) may perform and approve maintenance, preventive maintenance, and alterations on aircraft having a maximum passenger capacity of 30 seats or less and a maximum payload capacity of 7,500 pounds or less as provided in Subpart L.

Editorial changes to § 135.2(c) are proposed to reflect the provisions in the proposed revised Part 135 which are the counterparts of the provisions in paragraph (c). The requirements of current paragraph (e) for a lockable door in certain turbojet-powered airplanes would be deleted from this section and reinserted in § 135.125 to apply to turbojet-powered airplanes having a passenger seating capacity, excluding any pilot seat, of 10 seats or more, operating under the rules of Part 135. A forward observer's seat would be included among certain other related requirements of § 135.63 and either it or an approved forward passenger seat, for use by the Administrator while conducting enroute inspections, would be required on all aircraft.

Paragraph (e) of the proposed rule would define certain terms pertinent to the operation of "large" aircraft under Part 135.

Ref. Proposal No. 3, Part 135 Review. Proposal Nos. 716 and 717, Ops. Review.

§ 135.3 Rules applicable to operations subject to this part

This section is currently § 135.3, redesignation is not necessary in the revised Part 135.

Present paragraph (b), which requires operations conducted under Part 135 outside the United States to comply, among other things, with Annex 2, Rules of the Air, to the Convention on International Civil Aviation, would not be changed. A new paragraph (c) would be added to provide for incorporation by reference of Annex 2 to the Convention on International Civil Aviation, Sixth Edition—September 1970, with amendments through Amendment 20 effective August 1976.

§ 135.5 Gyroplane operations

It is proposed to delete this provision. The rule is not needed because there are currently no gyroplanes presently certificated which are believed to be capable of being used in operations under Part 135.

§ 135.7 Certification and operations specifications required

This section, curently § 135.9 has been redesignated as § 135.7 and contains proposed amendments which would prohibit operations in large aircraft having a maximum passenger capacity of more than 30 seats or a maximum payload capacity of more than 7,500 pounds, without, or in violation of, operations specifications issued under Part 121. This change is necessary in order to implement the concept which would require aircraft having a maximum passenger capacity of 30 seats or less and a maximum payload capacity of 7,500 pounds or less to be operated under the rules of Part 135.

Ref. Proposal No. 5, Part 135 Review.

§ 135.9 Applicability of rules to unauthorized operators

Part 135 currently applies only to persons holding ATCO certificates. This proposal would make it a violation of each operating rule of Part 135 to conduct operations requiring an ATCO certificate and operations specifications without holding that certificate and operations specifications.

Ref. Proposal No. 6, Part 135 Review.

§135.11 Duration of certificate

There is no time specified in the current rule in which to return a suspended or revoked certificate to the Administrator.

This proposal would require a suspended or revoked ATCO certificate to be returned to the Administrator within 10 days after receipt of notice of suspension or revocation.

Ref. Proposal No. 7, Part 135 Review.

§ 135.13 Application and issue of certificate and operations specifications

This proposal would amend paragraph (b) (2) to provide clarification concerning the scope of operations authorized including the type of aircraft authorized in addition to category and class. In addition, the registration numbers of aircraft subject to a continuous airworthiness maintenance program and certain other maintenance related information would be included. These factors are considered relevant by the FAA and are spelled out in sufficient detail to clearly define the scope of the certificate holder's authority.

Ref. Proposal No. 8, Part 135 Review.

§ 135.15 Eligibility for certificate and operation specifications

The flush paragraph in § 135.15(a) (3) would be amended to change the reference to "large aircraft" to "large aircraft having a maximum passenger capacity of more than 30 seats or a maximum payload capacity of more than 7,500 pounds." This change is consistent with the proposal to increase the size of aircraft to be operated under the rules of Part 135. In addition, a new paragraph (b) would be added specifying the basis upon which the FAA may deny an applicant an ATCO certificate.

Operating experience has shown that the compliance disposition of an operator and persons serving in key positions is a reliable indication of future performance.

Ref. Proposal No. 9, Part 135 Review.

§ 135.17 Amendment of certificate

This section is currently § 135.17; Redesignation is not necessary in the revised Part 135.

§ 135.19 Amendment of operations specifications

This section is currently § 135.19; Redesignation is not necessary in the revised Part 135.

§ 135.21 Emergency operations

This section, formerly § 135.7, would be redesignated as § 135.21. The word "inflight" has been deleted, thus expanding the application of this section to ground as well as air emergencies, as in the case of pilot incapacitation requiring the use of a person not qualified under Sections 135.33, 135.52, or 135.53 for assistance with flight crewmember duties. In addition, minor editorial changes would be made to make this section consistent with Section 91.3 of Part 91 of this chapter.

Ref. Proposal No. 718, OPS Review.

§ 135.23 Manual requirements

This section, currently § 135.27, would be redesignated as § 135.23. In addition, this section would be revised by amending paragraph (a) to require each certificate holder who is required to have a manual to prepare a manual acceptable to the Administrator. Further, each flight, ground, and maintenance employee of the certificate holder would be required to use the manual in the conduct of the certificate holder's flight operations.

Paragraph (b) would be amended to require that each manual must be kept in a form acceptable to the Administrator. Paragraph (b) (1) would provide that in addition to the identity of each person in a management capacity who is authorized to act for the certificate holder, that person's duties, responsibilities and authority must also be outlined. Paragraph (b) (2) would be amended by changing the word "airplanes" to read "aircraft."

Paragraph (b) (6) would be amended to require reporting and recording mechanical irregularities that come to the attention of the pilot in command before, during, and after completion of a flight.

Present paragraphs (b) (9) through (b) (15) would be renumbered as paragraphs (b) (10) through (b) (16) respectively to allow the insertion of a new paragraph (b) (9) referring to procedures in accordance with § 135.149 for the release for, or continuation of flight if any item of equipment amenable to placement on an approved minimum equipment list becomes inoperative or unserviceable en route. This change is made necessary by the incorporation of a new § 135.149 which would provide regulatory authority for the use of a Minimum Equipment List in operations under Part 135 in multiengine aircraft.

[1] As defined in Part 298 of CAB Regulations, a "Commuter air carrier" is an air taxi operator which: (1) Performs at least five round trips per week, between two or more points and publishes flight schedules which specify the times, days of the week, and places between which such flights are performed, or (2) transports mail by air pursuant to contract with the United States Postal Service.

V 42 167 AUG 29 77 UMI

Renumbered subparagraph (b)(13) would be revised to require inclusion in the manual of a list of the functions assigned each category of required crewmembers in connection with emergency and emergency evacuation duties under § 135.113.

With respect to renumbered paragraph (b)(16), there have been instances in which ATCO certificate holders have inadvertantly accepted hazardous material on board an aircraft because the operator's employees did not recognize the material as hazardous. The amendment to this paragraph is, therefore, designed to ensure that ATCO certificate holders provide their employees sufficient guidance in the recognition and proper handling of hazardous material so that such materials can be selectively identified and accepted or refused for shipment without derogation of safety. In addition, an out-dated regulatory reference has been deleted and the current regulatory reference inserted in place thereof.

A new paragraph (c) would be added to provide that each certificate holder shall maintain at least one copy of its manual at its principal base of operations.

Ref. Proposal No. 11, Part 135 Review; Proposal Nos. 381, 721, and 724, OPS Review.

§ 135.25 Aircraft requirements

This section, currently § 135.31, would be revised and redesignated as § 135.25. In addition, present paragraphs (a) and (b) would be redesignated as paragraphs (b) and (c) respectively to permit the incorporation of a new paragraph (a) into this section to provide that an aircraft used in operations under this Part must be registered as a civil aircraft of the United States and carry an appropriate and current airworthiness certificate, and must be in an airworthy condition and meet the applicable airworthiness requirements, including those relating to identification and equipment. This provision is needed in Part 135 as questions have been raised concerning the use of foreign registered aircraft in operations under this Part. The final sentence of redesignated paragraph (b) would make it clear that a Part 135 certificate holder is not prohibited from using or authorizing the use of an aircraft for other than air taxi or commercial operations and is not required to have exclusive use of each aircraft that he uses.

Ref. Proposal No. 12, Part 135 Review.

§ 135.27—Business office and operations base

This section, currently § 135.41 would be redesignated as § 135.27 with no other changes.

§ 135.29 Use of business names

This section, currently § 135.47, would be redesignated § 135.29 with no other changes.

§ 135.31 Advertising

This section, currently § 135.45, would be redesignated § 135.31 with no other changes.

§ 135.33 Area limitations on operations

This section, currently § 135.69, would be redesignated § 135.33 with no other changes.

§ 135.35 Termination of operations

This section, currently § 135.51 would be redesignated § 135.33 with no other changes.

§ 135.37 Periodic financial status review

This proposal is a modified version of Proposal No. 44 which was presented in the Compilation of Proposals under the Part 135 Regulatory Review Conference held in Denver, Colo., November 8–11, 1976. While the original proposal would have required each certificate holder to submit certain financial data annually, this proposal would require each certificate holder to permit the Administrator to review its financial status annually. Data to be furnished by the certificate holder for review would include specified items needed to determine a company's financial condition and whether it has sufficient economic resources to support a safe operation. The information which must be furnished to the Administrator consists of the minimum financial data the FAA believes necessary to fulfill its safety responsibilities. It has long been the opinion of the FAA that financial capability is an essential ingredient of air safety. Operating experience has established the fact that the financial status of some ATCO certificate holders had a direct bearing on the willingness of those certificate holders to compromise safety in an effort to reduce operating costs. Such actions expose the public to needless safety hazards and not in the public interest. This factor has also been recognized by both the Civil Aeronautics Board and the National Transportation Safety Board. As a result, the FAA believes that the review of financial data of air taxi certificate holders is necessary to provide the FAA a more effective means of ensuring passenger safety in air taxi operations.

Ref. Proposal No. 44, Part 135 Review.

§ 135.39 Management personnel requirements.

This new proposal would require an ATCO certificate holder to have qualified management personnel in the positions of director of operations, chief pilot, and director of maintenance, and would provide for a modification of the above named positions if deemed appropriate by the Administrator. In addition, information concerning management personnel would be included in the certificate holder's manual. These changes are necessary to upgrade the level of safety in Part 135.

Ref. Proposal No. 45, Part 135 Review.

§ 135.41 Management personnel qualifications.

This proposal would prescribe certain qualifications which must be met before a person may serve as a director of operations, chief pilot, or director of maintenance for an ATCO certificate holder. The FAA wishes to ensure that persons selected to fill these positions have sufficient aeronautical and managerial experience to fulfill the purpose of the regulations. However, the Administrator may grant a deviation from the proposed requirements upon a finding that a person possesses aeronautical experience judged equivalent to the specified qualifications.

Ref. Proposal No. 46, Part 135 Review.

§ 135.43 Carriage of narcotic drugs, marihuana, and depressant or stimulant drugs or substances.

This section currently § 135.12, would be redesignated § 135.43 with no other changes.

§ 135.45 Crewmember certificate: international operations: application and issue

This proposal would provide for the application for, and issuance of, crewmember certificates to persons employed as flight crewmembers or crewmembers on U.S.-registered aircraft engaged in international air commerce to facilitate entry and clearance into ICAO contracting states. Upon termination of the assignment in international air commerce, the certificate would be surrendered to the nearest FAA District Office. There are currently no such provisions in Part 135.

§ 135.47 General

This section, formerly § 135.61, would be redesignated § 135.47 with no other changes.

SUBPART B

§ 135.49 Recordkeeping requirements

This section, currently § 135.43, would be redesignated as § 135.49. With the exception of the redesignation of this section, the proposed changes result from experience which has shown that the current recordkeeping requirements for ATCO certificate holders are no longer adequate and need broadening. The recordkeeping requirements of current § 135.43 are not of sufficient scope to permit ready ascertainment of compliance with provisions of this Part. Paragraph (a) would be changed to permit the certificate holder to maintain the records required by this section at other than his principal business office, if approved by the Administrator. In addition, paragraph (a)(4)(vii) would be changed to require both flight and duty time records in sufficient detail to determine compliance with the flight and duty time limtiations of this Part. Paragraph (b) would be changed to require the retention of records for 12 months instead of 6 months. Paragraph (c) would be changed to apply to all multiengine aircraft operations. Paragraph (c)(5) would provide relief from compilation of the actual center of gravity if the aircraft is loaded according to a loading schedule or other approved method that assures that the center of gravity of the loaded aircraft is within approved limits. Additionally, paragraph (c) would be changed to require that a load manifest must be prepared for multiengine aircraft before each takeoff, and to incorporate the addition of proposed new subparagraphs (6), (7), and (8), to require a record of the registration or flight number of the aircraft used, the origin or destination, and the identification of crewmembers and their particular assignments.

Ref. Proposal No. 15, Part 135 Review; Proposal No. 735, Ops. Review.

§ 135.51 Flight in formation: facilities and services

This proposal would be designated as § 135.51. This proposed amendment would require each pilot in command to obtain specific kinds of information in preparation for a flight under this Part and to obtain during flight certain information that may be critical to the safety of that flight. This proposal embodies the FAA's view that all reasonable precautions must be taken to ensure the safety of flight. It is needed to emphasize the need for thorough preflight preparation and the inflight update of information essential to the safety of flight in operations under Part 135.

Ref. Proposal No. 74, Part 135 Review.

§ 135.53 Reporting of mechanical irregularities

This section, currently § 135.119, would be redesignated as § 135.53 and it would be amended to improve the maintenance records requirements. The necessity for improvement is based upon the FAA's review of procedures used by Part 135 certificate holders to determine airworthiness.

Each certificate holder would be required to provide an aircraft maintenance log for use of flight and maintenance personnel and each person taking action concerning a reported or observed failure or malfuction would be required to record that action in the aircraft maintenance log. The certificate holder would be required to establish and include in its manual a procedure for keeping adequate copies of the log in the aircraft. Before takeoff, the pilot in command would be required to ascertain the status of, and required corrective action concerning, each irregularity entered in the log at the end of the preceding landing. In addition, after each landing, the pilot in command would be required to enter in the log each defect or mechanical irregularity which came to his attention during the flight.

Ref. Proposal 32, Part 135 Review.

§ 135.55 Reporting potentially hazardous meteorological conditions and irregularities of communications or navigation facilities

There is currently no provision in Part 135 for the reporting by pilots of important safety information encountered during flight. This proposal would require the reporting to an appropriate ground radio station of information which may be critical to the safety of any other flight.

Ref. Proposal 70, Part 135 Review.

§ 135.57 Restriction or suspension of operations: continuation of flight in an emergency

As proposed, paragraph (a) would place the responsibility for restricting or suspending operations under conditions of known hazards on both the certificate holder and the pilot in command. Paragraph (d) is similar to § 121.551. Paragraph (b) would prohibit the pilot in command from continuing to an airport of intended landing under paragraph (a) unless in the opinion of the pilot in command there is no safer procedure available as an alternative to the continuation of flight in unsafe conditions.

Ref. Proposal No. 69, Part 135 Review; Proposal No. 751, OPS Review.

§ 135.59 Airworthiness check

This section, currently § 135.67, remains the same except for an editorial change of the reference "§ 135.60 to § 135.341."

§ 135.61 Inspections and tests

This section, currently § 135.49, would be redesignated § 135.61 with no other changes.

§ 135.63 Inspectors credentials: admission to pilot's compartment and forward observer's seat

This proposal would provide an inspector of the Federal Aviation Administration conducting an inspection with unrestricted access to the pilot compartment of an aircraft upon the presentation of an Aviation Safety Inspector credential, FAA Form 110A, to the pilot in command. Additionally, it would ensure that suitable seating arrangements are provided to permit the inspector to properly monitor the flight during an en route inspection.

Ref. Proposal No. 16, Part 135 Review.

§ 135.65 Responsibility for operational control

This proposal would place the responsibility for operational control (as defined in Part 1) on the certificate holder, and require the certificate holder to list in the required manual each person authorized to exercise operational control on its behalf.

Ref. Proposal No. 4, Part 135 Review.

§ 135.67 Flight locating requirements

This section, currently § 135.29 would be redesignated as § 135.69. The section is unchanged except for the deletion of the words "Establish a procedure" in paragraph (a)(2) and insertion of the word "Provide" in lieu thereof for clarification purposes.

§ 135.69 Informing personnel of operational information and appropriate changes

This section, currently § 135.39, would be redesignated as § 135.69. It would be amended by renumbering paragraphs (a), (b), (c) and (d) and amending renumbered paragraph (a)(4) to permit a Part 135 certificate holder conducting foreign operations to use a commercial publication containing the same information as to the International Flight Information Manual. A new paragraph (b) would be included to require each certificate holder to keep its operations personnel informed of changes associated with the use of navigation aids, air traffic control procedures and regulations, and other areas essential to the safety of flight operations.

Ref. Proposal No. 67, Part 135 Review; Proposal No. 731, Ops. Review.

§ 135.71 Operating information required

This section is currently § 135.71. Redesignation is not necessary. The section reference number in § 135.71(a)(5) was amended to § 135.151.

§ 135.73 Carriage of persons without compliance with the passenger-carrying provisions of this Part

This section, currently § 135.63, would be redesignated as § 135.73. In addition, it would be amended by revising paragraphs (b) and (d) and adding a new paragraph (h) to broaden the list of persons who may be carried without compliance with the passenger-carrying provisions of Part 135. Paragraph (d) also would be revised to include the current citation of the regulation where the definition of "hazardous materials" is found.

Ref. Proposal Nos. 745 and 746, OPS Review.

§ 135.75 Carriage of cargo including carry-on baggage

This section, currently § 135.117, would be redesignated as § 135.75. It would be amended to explicitly state that it applies to carriage of cargo on aircraft, as well as in aircraft. The word "occupants" would be substituted for the word "passengers" whever it appears in the present provisions in order to require protection for all persons in the aircraft. A new paragraph (c)(7) would be added to make paragraph (c)(4) not applicable to cargo only operations when certain emergency exit standards are met. In addition, a new paragraph (c)(6) would be added to require that cargo must be properly stowed for takeoff and landing. A new paragraph (d) would be added which would require each passenger seat under which baggage is stowed to be fitted with means of restraint meeting specified standards. This is intended to ensure that luggage will not impede emergency evacuation. A new paragraph (e) would be added to require cargo carried in cargo compartments to be loaded in such a manner as to permit entry of a crewmember to extinguish a fire.

Ref. Proposal Nos. 31 and 73, Part 135 Review; Proposal No. 783, OPS Review.

§ 135.77 Requirements for the use of oxygen

This section, currently § 135.83, would be redesignated as § 135.77. Since the present rule imposes the same requirements for both unpressurized and pressurized aircraft, and the use of supplemental oxygen relates primarily to cabin

V 42 167 AUG 29 77 UMI

pressure altitudes, it is believed no longer necessary to differentiate between pressurized and unpressurized aircraft at the altitudes referred to in paragraph (a). A pressurized aircraft, when it becomes depressurized or is being operated as an unpressurized aircraft, is for all practical purposes an unpressurized aircraft. Accordingly, paragraph (a) would be revised to apply to both pressurized and unpressurized aircraft.

Accumulated operating experience in turbojet-powered aircraft having pressurized cabins has shown the occurrence of sudden decompression to be very infrequent and if proper emergency procedures are followed, of no serious consequence up to the maximum altitudes now utilized as flight altitudes. Oxygen equipment has advanced in design to the point where it can and does meet the standards prescribed for the quick emergency use concept. Accordingly, paragraph (b) would be revised to reflect a level of safety equivalent to that of the present rule and in conformity with the supplement oxygen requirements of Part 121. Paragraph (b) would, however, remain specifically applicable to pressurized cabin aircraft.

§ 135.79 Oxygen for medical use by passengers

This section, currently § 135.114, would be redesignated as § 135.79 and would be amended to permit equipment for the storage, generation or dispensing of medical oxygen (other than in the form of a liquid), if of an approved type or in conformity with specific requirements of Title 49 CFR Parts 171, 172, and 173, except that there must be compliance with § 173.24(a)(1), governing the packaging, marking, labeling, and maintenance of oxygen, to be furnished by a person other than the certificate holder.

Concerning the use of liquid oxygen, the FAA believes that damage to dispensing equipment due to mishandling or during storage or servicing of liquid oxygen containers could result in malfunction of this equipment and could cause injury to persons on board the aircraft. Accordingly, the amendment as proposed would require that any liquid oxygen storage unit carried on board an aircraft under this section must have been maintained in accordance with an FAA approved maintenance program since its purchase new or since its last purging.

FAA has determined that a level of safety equivalent to that provided by the carriage of equipment furnished by the certificate holder and maintained in accordance with the certificate holder's approved maintenance program would be provided if a person trained in the use of medical oxygen is on board the aircraft to administer it during flight. Further, the FAA now believes that the requirement for a passenger to furnish a statement of need signed by a licensed physician may impose undue hardship on operators of flights carrying persons with a medical need for oxygen without contributing significantly to safety, particularly in connection with such flights conducted from remote areas. Accordingly, the requirement for a physician's statement would be deleted.

A new provision would be included to allow oxygen equipment furnished by a professional or emergency medical service to be carried on board an aircraft by a passenger requiring the use of oxygen in a medical emergency when accompanied by a person trained in the use of medical oxygen equipment. The FAA believes that portable oxygen equipment suitable for carriage on board an aircraft as used by professional or emergency medical services is given reasonable care and maintenance and may be safely carried and used on board an aircraft if a person trained in the use of medical oxygen is on board to administer it during flight. Accordingly, paragraph (d) as proposed would provide authority for deviation from specific provisions of paragraph (a)(1)(i) to permit the carriage and use of such oxygen equipment in a medical emergency when no other practical means of transportation is reasonably available and the person carried is accompanied by a person trained in the use of medical oxygen. Additionally, a new paragraph (e) would require each certificate holder who, under the authority of paragraph (d) deviates from the provisions of paragraph (a)(1)(i), to send a complete report of the deviation and the reasons for it to the certificate holding FAA Flight Standards District Office within 10 days. This should ensure that the emergency use of the deviation authority is not abused.

The FAA is aware of the objections of some persons in the past to the permissible carriage or use of oxygen equipment due to the difficulty in determining if the equipment has been properly serviced, altered, or repaired, or whether cleanliness has been observed in its servicing and whether it has been subjected to abuse and possible damage. However, there have been numerous instances under the present rule in which operators called upon to transport persons requiring such transportation, located in sparsely populated or remote areas, have been unduly burdened by the requirement that oxygen equipment used must be furnished by the certificate holder. In many such cases, the frequency of need for such transportation is not sufficient to justify the operator's expenditure to provide oxygen equipment for the limited use it would receive. The FAA is of the opinion that, except for liquid oxygen, the passenger should be permitted to provide the oxygen needed for an air ambulance flight under the conditions specified in this proposal.

The FAA believes that these proposed amendments would provide a measure of flexibility in the rule governing the carriage of oxygen for medical purposes, while providing a satisfactory level of safety. The standard of care in the operation of oxygen storage and dispensing equipment required by the provisions of this proposal in conjunction with the operating procedures specified in the certificate holder's manual would serve to ensure safety.

Ref. Proposal No. 30, Part 135 Review.

§ 135.81 Autopilot: minimum altitudes for use

This section, currently § 135.79, would be redesignated as § 135.81. The contents of the present section would be deleted and the contents of § 121.579 inserted in lieu thereof. The FAA believes that in upgrading the rules for air taxi certificate holders, regulations are needed to govern the approval of modern flight control guidance systems with automatic capability to touchdown. This proposal contains the safeguards the FAA deems necessary in view of the more complex aircraft which would be authorized under the terms of this proposal to operate under Part 135. However, since helicopters have historically been excepted from the minimum safe altitudes specified in the regulations for airplanes without adversely affecting safety, and autopilot or flight stabilization systems used in helicopters are more compatible with near surface operations than are many flight control guidance systems in airplanes, it is considered appropriate to except helicopters from the requirements of this section.

§ 135.83 Airmen: limitations on use of services

This section, currently § 135.33, would be redesignated as § 135.83. It would be revised to prohibit a certificate holder from using the services of any person as an airman unless that airman is qualified for the operation for which he is to be used and has the required appropriate and valid airman and medical certificate in his possession while engaged in operations under this Part.

Ref. Proposal No. 13, Part 135 Review.

§ 135.85 Aircraft and facilities for recent flight experience

This section, currently § 135.37, would be redesignated as § 135.85 and would be amended by deleting the words "those operations" and inserting the words "all operations for which the pilot is authorized" in place thereof. The purpose of the proposal is to ensure that each pilot employed by the certificate holder would be provided aircraft and facilities necessary to maintain and demonstrate his ability to conduct all operations for which the pilot is authorized.

Ref. Proposal No. 14, Part 135 Review.

§ 135.87 Composition of flight crew

This section, currently § 135.52, would be redesignated as § 135.87. It would be amended by deleting the word "airplane" in paragraph (b) and inserting the word "aircraft" in place thereof.

§ 135.89 Second in command required for IFR conditions

This section, currently § 135.73 would be redesignated at § 135.89. The references "135.75 and 135.77" would be changed to read "135.91 and 135.93" respectively.

§ 135.91 Exception to second-in-command requirements: limited IFR conditions

This section, currently § 135.75 would be redesignated as § 135.91.

It would be amended by deleting the words "airplane" in both the lead-in paragraph and paragraph (a) and inserting the word "aircraft" in place thereof to make this section applicable to all aircraft. In addition, the reference "Section 91.116(f)," in paragraph (b)(2)(ii) would be changed to read "Part 91."

Ref. Proposal No. 21, Part 135 Review.

§ 135.93 Exception to second-in-command requirement: approval for use of autopilot systems

This section, currently § 135.77, would be redesignated as § 135.93 and would be amended by changing the word "airplane" wherever found to read "aircraft" to make the section applicable to all aircraft. Autopilots installed in airplanes have long been recognized as a means of reducing the workload on crewmembers, thereby enhancing safety. Recently, autopilot systems which afford similar capability and reliability have been developed for rotorcraft and provisions for their use would be included in this proposal.

Ref. Proposal No. 22, Part 135.

§ 135.95 Flight attendant crewmember requirement

This section, currently § 135.54 would be redesignated § 135.95 with no other changes.

§ 135.97 Pilot-in-command or second-in-command: designation required

This section, formerly § 135.35, would be redesignated § 135.97, with no other changes.

§ 135.99 Second-in-command required in Category II operations

This section currently § 135.72, would be redesignated § 135.99, with no other changes.

§ 135.101 Passenger occupancy of pilot seat

This section, currently § 135.53, would be redesignated § 135.101, with no other changes.

§ 135.103 Manipulation of controls

This proposed new section would ensure that the level of safety under Part 135 is not derogated by the manipulation of the controls of an aircraft while in flight by unauthorized persons.

Ref. Proposal No. 68, Part 135 Review.

§ 135.105 Briefing of passengers before flight

This section, currently § 135.81, would be redesignated as § 135.105. Paragraph (a) would be revised to require a pretakeoff briefing of passengers by the pilot in command on specified safety matters. A new paragraph (b) would be added to paragraph (a) to require the briefing to include the location and operation of fire extinguishers carried on board the aircraft. Additionally, a new paragraph (c) would be added which would permit use of a printed card to supplement the oral briefing.

Ref. Proposal No. 68, Part 135 Review; Proposal No. 760, OPS Review.

§ 135.107 Prohibition against carriage of weapons

This section, currently § 135.115, would be redesignated § 135.107 with no other changes.

§ 135.109 Alcoholic beverages

This section, currently § 135.115, would be redesignated § 135.109 with no other changes.

§ 135.111 Helicopter operations: emergency landing areas

This section, formerly § 135.89, would be revoked and the assigned section number would be reserved. The FAA was considering issuing an NPRM to propose an amendment of Part 135 to revoke this section in response to a petition for rulemaking submitted by the Helicopter Association of America (HAA). HAA stated that present § 135.89, which prescribes emergency landing areas only for helicopters engaged in air taxi operations within congested areas, discriminates against helicopters. The minimum safe altitude requirements prescribed in § 91.79 of the chapter apply to all aircraft including helicopters. The FAA has carefully reviewed the justification of § 135.89 and now believes that it is no longer necessary and that the minimum safe altitude provisions of § 91.79 provide an acceptable level of safety.

§ 135.113 Emergency and emergency evacuation duties

This new section would require each certificate holder to assign to each category of required crewmember appropriate functions to be performed in an emergency and during emergency evacuation. This would make clear to individual crewmembers the action expected of them in an emergency. Prior assignment of duties would tend to minimize the confusion which sometimes results from unexpected situations occurring during an emergency. The assigned functions would be described in the manual required by § 135.23.

Ref. Proposal No. 49, Part 135 Review.

SUBPART C—AIRCRAFT AND EQUIPMENT

§ 135.115 Applicability

This section, currently § 135.141 would be redesignated § 135.115 with no other changes.

§ 1351.17 General requirements

This section, currently § 135.143 would be redesignated as § 135.117. Paragraph (b) would be amended by applying the requirement that instruments and equipment be in operable condition only to single-engine aircraft. This is a conforming change resulting from the proposal in § 135.149 for a minimum equipment list for multiengine aircraft. Paragraph (c) would be revised by deleting obsolete date references.

§ 135.119 [Reserved]

§135.121 Aircraft proving tests

This section, currently § 135.32 would be redesignated § 135.121 with no other changes.

§ 135.123 Dual controls required

This section, currently § 135.149 would be redesignated § 135.123 with no other changes.

§ 135.125 Equipment requirements: general

This section, currently § 135.151, would be redesignated as § 135.125. In addition, it would be revised by deleting the substance of present paragraph (c) and the addition of new paragraphs (d) and (e) to allow the incorporation of new requirements appropriate to the more complex and high performance airplanes which would be authorized to operate under Part 135.

In this respect, the operational history of turbojet airplanes has shown that a third attitude instrument, powered from a source independent of the airplane's electrical generating system, is desired for maintaining control of the airplane and would provide a margin of safety not otherwise available in the event of total failure of the electrical generating system. Accordingly, the substance of current paragraph (c) would be deleted and pursuant to revised paragraph (c), requirements for a third attitude instrument would be inserted in place thereof to be applicable to all turbojet-powered airplanes.

Similarly, the lockable cockpit door requirement is believed appropriate for airplanes having a seating capacity of 10 passengers or more to ensure the security of the flight crew. It would also provide a more professional atmosphere by separating the flight crew from the passenger compartment.

The requirement for cockpit voice recorder (CVR), flight data recorder (FDR) and ground proximity warning systems (GPWS), in airplanes being operated under the rules of Part 135 has been under consideration for some time. The National Transportation Safety Board (NTSB) has recommended that GPWS, CVR, and FDR equipment be installed on all aircraft being used in commercial passenger service. The NTSB stated the GPWS would reduce the approach and landing accidents and the usefulness of the CVR and FDR during accident investigation would enhance safety.

In December 1976, the FAA issued two Special Federal Aviation Regulations (SFAR 30-1 and SFAR 33) allowing certain large airplanes with a maximum passenger capacity of 30 seats or less, a maximum payload of 7,500 pounds or less, and a maximum zero fuel weight of 35,000 pounds to be operated under Part 135 and 121 rules without a GPWS, CVR,

V 42 167 AUG 29 77 UMI

and FDR until June 30, 1978. This extension of time was necessary to provide both FAA and industry additional time to study the matter of these requirements and determine if requirements for this equipment should be included in the upgrade of Part 135. Although it is evident that certain benefits would be realized by the use of this equipment, the FAA does not believe, at this time, that the installation of this equipment in all commercial passenger carrying aircraft is warranted. The FAA, however, believes that consideration should be given to requiring the GPWS, CVR, and FDR equipment on turbojet-powered airplanes with 10 or more passenger seats, because of the complexity and high performance characteristics of those airplanes.

This proposal includes the CVR, FDR, and GPWS equipment requirements to give interested parties an opportunity to provide input as to whether or not this additional equipment should be required in Part 135 operations. Information regarding installation and maintenance costs are requested together with other pertinent comments. This information will provide FAA additional data for use in reaching a decision on the matter.

The FAA is of the opinion that the regulations must be responsive to improvements in technology. Accordingly, for this purpose and to achieve consistency within the regulations, a public address system and a crewmember interphone system is deemed necessary for aircraft having a passenger seating capacity of more than 19 utilized under Part 135.

Therefore, new paragraph (e) would contain requirements for an aircraft passenger seating capacity of more than 19 persons to have installed a public address system and a crewmember interphone system approved in accordance with § 21.305 and which meets the requirements of §§ 121.318 and 121.319, respectively.

§ 135.127 Fire extinguishers: passenger-carrying aircraft

This section, currently § 135.161, would be redesignated as § 135.127. It would be revised to provide that the type and quantity of extinguishing agent must be suitable for the kind of fires likely to occur. In addition, it would require that at least one hand fire extinguisher be located on the flight deck for use by the flight crew and that at least one hand fire extinguisher be located in the passenger compartment of aircraft seating between 6 and 30 passengers, inclusive.

Ref. Proposal No. 815, OPS Review.

§ 135.129 Oxygen equipment requirements

This section, currently § 135.165, would be redesignated as § 135.129, and revised to require a pressure demand oxygen breathing system for flight operations at altitudes in excess of flight level 410, capable of supplying flight crewmembers a specified minimum mass flow of oxygen. Current operating experience with turbojet airplanes having pressurized cabins has shown the frequency of occurrence of sudden decompression to be very insignificant and of no serious consequence to the maximum altitudes now authorized. However, in view of the expanded use of turbojet aircraft in general aviation operations and their certification for operation at altitudes for which there is no operating experience, the FAA believes additional requirements concerning pressure demand oxygen breathing equipment is necessary to ensure an acceptable level of safety in Part 135. The need for oxygen in such operations far outweighs any economic burden that may be involved in the installation and maintenance of the oxygen dispensing equipment.

The requirement for a minimum of 83.8 mm. HG. of inspired oxygen partial pressure has been verified by human experimentation under ideal conditions. The practical application of this minimum, however, depends on human tolerance which diminishes rapidly as altitude increases. Above flight level 410, both the time element of useful consciousness and human tolerance become extremely critical and are deserving of the utmost consideration.

Because the requirements for the use of oxygen relate primarily to cabin pressure altitudes in both unpressurized and pressurized aircraft, as is the case under proposed § 135.77, it is considered appropriate to consolidate the requirements of the current rule and make these requirements applicable to both classifications of aircraft. Provisions also would be included requiring enough oxygen dispensers and oxygen to supply the oxygen required by § 135.77. Additionally, certain equipment standards would be required including a means to allow the flightcrew to readily determine, in flight, the amount of oxygen available and whether the oxygen is being delivered to the dispensing units, and to allow the flightcrew to use undiluted oxygen at their discretion.

§ 135.131 Equipment requirements: carrying passengers at night or under VFR over-the-top conditions

This section, currently § 135.153, would be redesignated as § 135.131. It would be amended by deleting the word "airplane" in paragraph (a) and inserting the word "aircraft" in place thereof. At the time § 135.153 was promulgated in 1964, the airplane was the only aircraft category for which full IFR certification was available. This situation no longer exists in view of the fact that several models of helicopters have now been certificated for full IFR operation. Therefore, since the substance of paragraph (b) is no longer appropriate, this paragraph would be deleted.

In line with the overall amendment of Part 135 and the FAA's desire to increase the level of safety in the broad scope of operations under this rule, it is considered appropriate to delete the exception currently provided in paragraph (c) of § 135.153. Therefore, paragraph (a) would be amended by deleting the words "Except as provided in paragraph (e) of this section," and paragraph (c) would be deleted. The section would then be relettered as shown.

§ 135.133 Radio and navigational equipment: carrying passengers under VFR at night, or over-the-top

This section, currently § 135.157, would be redesignated as § 135.133. Pursuant to revised paragraphs (a) and (b), it would specify radio communications and navigation equipment requirements for the carriage of passengers under VFR at night or over the top. The title would be revised accordingly. The word "airplane" in paragraph (a) would be deleted and the word "aircraft" inserted in place thereof to broaden the applicability of the proposed revision. All other provisions of the current rule would be deleted in their entirety. In the opinion of the FAA, the deleted portions of this rule have been difficult to enforce and are of questionable value from a safety standpoint.

§ 135.135 Equipment requirements: aircraft carrying passenger under IFR

This section, currently § 135.155, would be redesignated as § 135.135. In addition, this section would be amended by deleting the word "airplane" wherever it appears and inserting the word "aircraft" in place thereof, and by deleting the words "After March 6, 1965," in paragraph (e). The proposed amendment would broaden the scope of this section by making it applicable to all aircraft and delete a date reference no longer pertinent.

§ 135.137 Radio and navigational equipment: extended overwater or IFR operations

This section, currently § 135.159, would be redesignated as § 135.137. In addition, this section would be revised to set forth additional radio and navigational equipment requirements for the carriage of passengers in turbojet airplanes, airplanes capable of carrying 10 passengers or more, and multiengine airplanes being operated in commuter air service. Without a revision to this section, complex operations, such as those listed above, would be permitted to operate under IFR with but a single transmitter and two independent receivers for communications and navigation, since under the current rule two transmitters are required only for extended overwater operations. Under the present rule, the two independent navigation receivers need not be VOR receivers. The FAA believes that it is essential to have installed two transmitters and two navigational receivers capable of using the VOR as a means of navigation under IFR or in extended overwater operations. Therefore, paragraph (a), as revised, would be made applicable to turbojet airplanes, airplanes having a passenger seating capacity, excluding any pilot seat, of 10 seats or more, and multiengine airplanes carrying passengers being operated by a "commuter air carrier" as defined in Part 298 of the Board's regulations and would require at least two transmitters and two independent VOR receivers for navigation. Under the proposed revision, current paragraph (a)(7) and the flush paragraph immediately following it in the current rule would be deleted.

A new paragraph (b) would apply to all other aircraft. A new paragraph consisting of current paragraph (b) and the flush paragraph deleted above would be designated as paragraph (c) and amended as necessary to reference both paragraphs (a) and (b), as revised.

§ 135.139 Emergency equipment: extended overwater operations

This section, currently § 135.163, would be redesignated as § 135.139. This section would be rearranged as necessary to include proposed changes. It would be amended by revising paragraph (a) to prohibit the operation of an aircraft in extended overwater operations unless it carries a life preserver equipped with an approved survivor locator light, or another approved means of flotation, for each occupant of the aircraft. As proposed, the aircraft would be required to have installed enough life rafts of sufficient buoyancy to carry all occupants of the aircraft. These life rafts must contain at least the equipment currently listed in paragraphs (a)(2)(i) through (a)(2)(xix) clearly marked for easy identification.

Numbered paragraphs (a)(1) through (a)(19) would be redesignated as necessary for the rearrangement of this section. Pursuant to redesignated paragraph (a)(2)(xiv), a flashlight having at least two size "D" cells or equivalent would be required to ensure that an adequate source of light would be provided in an emergency situation. The date deference presently contained in paragraph (b) along with a portion of this paragraph, no longer appropriate, would be deleted.

These proposed changes would incorporate into Part 135 new and revised standards concerning emergency equipment requirements in extended overwater operations. These requirements are believed essential to the safety of persons carried on board an aircraft during extended overwater operations.

§ 135.141 Additional airworthiness requirements: certain large airplanes and ten or more passenger small airplanes

The section, currently § 135.144, would be redesignated as § 135.141. In addition, it would be amended to require large airplanes to meet certain additional special airworthiness requirements of Part 121 and require that after June 30, 1984, all reciprocating-engine and turbo-propeller powered small airplanes configured for ten or more passenger seats intended for use in operation under Part 135 be type certificated in the transport category. Specific phase-out dates would be established as set forth in the proposal. This is the final step of the regulatory program begun in July 1970 to upgrade the level of airworthiness for airplanes in Part 135 operations.

The FAA has determined that the present requirements which were established to upgrade the airworthiness standards of aircraft used in Part 135 operations, have served their purpose. This amendment sets forth a procedure for an orderly deletion of the three step regulatory program initiated in July 1970.

This program was designed to accomplish the phaseout of aircraft used in passenger-carrying service not certificated in the transport category. New paragraphs (c), (d), and (e) of this proposal would regulate the phaseout of the aircraft affected from operations under Part 135. The FAA has become aware of the increased utilization of a number of aircraft in operations under Part 135 by conversion to high-density seating which do not meet the certification requirements for transport category. Further, it is widely recognized that the modification of such aircraft to increase the passenger-carrying capacity decreases the performance to a marked degree. Therefore, the FAA is proposing a phaseout of any aircraft not certificated under transport category from operations under Part 135. The FAA believes that passenger safety far outweighs any mitigating factor which may otherwise be considered.

Proposed paragraph (c) would prohibit the introduction into Part 135 operation of small airplanes that—

(1) Have not been type certificated to Part 25,

(2) Have been type certificated with a seating configuration of 10 or more passengers, and

(3) Have never been operated under Part 135.

Proposed paragraph (d) would limit the passenger seating configuration of aircraft presently approved for Part 135 operations and having a seating capacity of 10 or more to the maximum seating capacity approved prior to August 19, 1977, for Part 135 operations. The FAA believes this proposal is necessary in order to upgrade the level of safety in Part 135 operations.

§ 135.143 Shoulder harness installation at flight crewmember stations

This new section would require that all turbojet aircraft or aircraft having a passenger seating capacity, excluding any pilot seat, of 10 seats or more be equipped with shoulder harnesses at the pilot-in-command and second-in-command pilot stations and that the shoulder harness must be worn by those flight crewmembers during takeoffs and landings unless the crewmember cannot perform his required duties with the shoulder harness fastened. The FAA is aware of the difficulty in installing shoulder harnesses in many of the present aircraft now in service.

However the FAA has determined, based on an evaluation of the expected benefits, that a significant improvement in the safety of occupants of aircraft covered by this proposal would be gained by the installation of shoulder harnesses at the pilot-in-command and second-in-command stations. The FAA is convinced that crewmembers restrained and protected by shoulder harnesses would be less likely to suffer injury in the event of an incident or accident occurring during takeoffs or landings and therefore would be more able to provide assistance to passengers in an emergency. The exception regarding inability to perform duties would take into consideration differences in the human anatomy and allow discretionary compliance by the crewmember when such human considerations would preclude the use of shoulder harnesses.

§ 135.145 Airborne thunderstorm detection equipment requirements

This new section would be incorporated into Part 135 to require that airborne thunderstorm detection equipment (such as radar) be installed and operative in multiengine aircraft having a passenger seating configuration excluding any pilot seat, of 10 seats or more when used in passenger carrying operations. The operational history of accidents involving serious injury or death to passengers of aircraft traversing severe weather areas is such that the requirement for equipment to detect thunderstorms is necessary.

The FAA is of the opinion that this equipment requirement will contribute to greater safety in operations since it will facilitate the early detection and location by the pilot of severe weather and enable him to avoid these areas or take other action necessary in the interest of safety. The geographical exclusions proposed are identical to the exclusions contained in § 121.357 of this chapter.

Ref. Proposal No. 75, Part 135 Review.

§ 135.147 Emergency equipment: more than 19 passenger airplanes

This new section would be incorporated into Part 135 to require certain emergency equipment aboard aircraft having a passenger seating capacity of more than 19 when used under this part and to provide for the inspection of that equipment. This equipment is considered the minimum necessary in order to provide adequately for the emergency needs of passengers when more than 19 passengers are carried in an aircraft.

Ref. Proposal No. 48A, Part 135 Review.

§ 135.149 Inoperable instruments and equipment for multiengine aircraft

§ 135.143, in part, currently prohibits operations unless all required instruments and equipment are in an operable condition. Part 135 does not, however, currently provide for the use of a Minimum Equipment List (MEL), as does Part 121, to allow operations under certain conditions with inoperable equipment and instruments. Because of this, Part 135 operators have been subjected to a significant burden since they are required to make expedited repairs

V 42 167 AUG 29 77 UMI

to provide scheduled service. In addition, passengers have been subjected to traveling delays because of the requirement to repair inoperable equipment that was not needed for the particular flight.

Based on information received as a part of this review program and on satisfactory experience with the use of MELs under Part 121, the FAA believes that Part 135 can be revised to provide for the use of MELs for multiengine airplanes operated under Part 135 without adversely affecting safety so long as certain conditions and limitations are met. Accordingly, it is proposed that a new § 135.149 be adopted to provide for the use of MELs under Part 135. Proposed §135.149(a) specifies certain kinds of equipment and instruments that are not amenable to placement on an MEL; and therefore those items must always be in an operable condition. Paragraph (b) of proposed § 135.149 specifies procedures to be followed in obtaining and using the MEL. It should be noted that, under this paragraph, the operator using the MEL would also hold a supplemental type certificate (STC) covering the MEL and, therefore, would be subject to the requirements of FAR Part 21 applicable to STC holders including those related to reporting of defects in § 21.3 and required design changes under § 21.99.

In connection with this proposal, reference should be made to Airworthiness Review Notice No. 4 (40 FR 22112; May 20, 1975) regarding present § 135.143. That proposal is still under consideration.

§ 135.151 Performance requirements: aircraft operated over the top or in IFR conditions

This section, currently § 135.145, would be redesignated as § 135.151. In addition, the word "airplane" would be deleted wherever it appears and the word "aircraft" inserted in place thereof in order to make the section applicable to the increasing number of rotocraft certificated for IFR flight.

Paragraph (b)(1) would be amended by the insertion of the words "or any combination thereof" between the words "forecasts" and "indicate" to provide for the use of more weather related information to determine the probability of flight under VFR. In addition, this paragraph would be amended by inserting the word "reporting" between the words "every" and "point" to clarify the intent of the requirement and provide a more realistic basis on which to base operating decisions.

§ 135.153 Performance requirement: land aircraft operated overwater

This section, currently § 135.147, would be redesignated § 135.153 with no other changes.

§ 135.155 Small airplane performance operating limitations

This section, currently § 135.148, would be redesignated as § 135.155. In addition, the references to sections of Part 121 would be changed to Part 135 references, as appropriate, in view of incorporation in Part 135 of operating limitations derived from Subpart I of Part 121. It should be noted that the applicability of this rule to small airplanes as defined in Part I remains unchanged from its applicability in former § 135.148.

§ 135.157 Empty weight and center of gravity: currenty requirements

This section, currently § 135.167 would be redesignated as § 135.157. The words "3 years" would be deleted where used and the words "36 calendar months" inserted in place thereof to avoid confusion by operators, to provide flexibility in the requirement, and to be consistent with other time requirements within this chapter.

Ref. Proposal No. 41, Part 135 Review; Proposal No. 819, OPS Review.

SUBPART "D"—VFR/IFR OPERATING LIMITATIONS AND WEATHER REQUIREMENTS

§ 135.159 Applicability

This section states the applicability of Subpart D, VFR/IFR flight operations and associated weather requirements for operations under Part 135.

§ 135.161 VFR: minimum altitudes

This section, currently § 135.91, would be redesignated § 135.161 without other changes.

§ 135.163 VFR: visibility requirements

This section, currently § 135.93, would be redesignated § 135.163 without other changes.

§ Part 135.165 VFR: helicopter surface reference requirements

This section, currently § 135.95, would be redesignated as § 135.165. Since helicopters are frequently operated over water as well as land, the word "ground" would be deleted wherever it appears and the word "surface" inserted in place thereof.

§ 135.167 VFR: fuel supply

This section, currently § 135.97, would be redesignated as § 135.167. In addition, paragraph (a)(2) would be amended by deleting "1 hour" and inserting "45 minutes" in place thereof. It would reduce the fuel requirement for VFR night operations to sufficient fuel to fly to the first point of intended landing, considering normal fuel consumption, and to fly thereafter for at least 45 minutes. The FAA believes that because of the increased cruise speed factor present in light airplanes and the availability of airports, this requirement would provide an acceptable fuel reserve under night VFR conditions.

Ref. Proposal Nos. 769 and 770, OPS Review.

§ 135.169 VFR: over-the-top carrying passengers: Operating limitations

This section, currently § 135.99, would be redesignated as § 135.169. The reference to § 135.145 would be deleted and § 135.151 would be inserted in place thereof. In addition, it would be amended to permit the use of either weather reports or forecasts or any combination thereof in determining the weather conditions expected en route.

§ 135.171 Weather reports and forecasts

This section, currently § 135.65, would be redesignated as § 135.171. In addition, this section would be revised to authorize the use of weather sources approved by the U.S. National Weather Service or approved by the Administrator and to make it clear that weather observations made and furnished to a pilot who is or will be conducting IFR operations at an airport must actually be taken at that airport rather than at some point near that airport. However, under paragraph (b), operations specifications may be issued permitting weather observations to be taken at a location other than on the airport if the Administrator finds that safety so permits. This would provide relief in cases where there is more than one airport with an approved instrument approach procedure in a control zone and only one such airport has a weather reporting station. The issuance of such operations specifications would be contingent upon historical experience establishing that the weather conditions at the airport having a weather reporting facility do not differ significantly from the weather conditions at the airport not having a weather reporting facility.

Current § 135.65 uses the term "accredited observer." Since that term is not defined in this chapter, it is deleted.

Ref. Proposal No. 20, Part 135 Review; Proposal No. 750, OPS Review.

§ 135.173 [Reserved]

§ 135.175 IFR: operating limitations

This section, currently § 135.101, would be redesignated as § 135.175. In addition, this section would be amended to permit a Part 135 certificate holder authorized to operate, under IFR, outside of controlled airspace to utilize approved instrument approach procedures at airports which are located in controlled airspace and to depart airports that do not have approved instrument procedures when the Administrator determines that such operations can be conducted safely. This procedure would be applicable only where the overlying airway structure, adjacent navigational facilities, and terrain considerations would permit such operations to be conducted safely.

Ref. Proposal No. 25, Part 135 Review.

§ 135.177 IFR: takeoff minimum

This section, currently § 135.103, would be redesignated § 135.177 without any change.

§ 135.179 IFR: destination airport weather minimums

This section, currently § 135.105, would be redesignated as § 135.179. It would be amended to include a prohibition against commencing an over-the-top operation in flight unless the weather conditions at the next airport of intended landing will be at or above IFR minimums at time of arrival.

Ref. Proposal No. 27, Part 135 Review, Proposal No. 773, Operations Review.

§ 135.181 IFR: alternate airport weather minimums

This section, currently § 135.109, would be redesignated as § 135.181. Additionally, it would be revised to permit the use of "weather reports and forecasts or any combination thereof", and to base the designation of an alternate airport, when necessary in operations under Part 135, on weather conditions expected at that airport at the estimated time of arrival. This proposed change is consistent with other related changes concerning the use of aviation weather services for operations under Part 135 and will provide a degree of flexibility without derogating from safety.

§ 135.183 IFR: alternate airport requirements

This section, currently § 135.107, would be redesignated as § 135.183. In addition, this section would be amended by revising the IFR alternate airport requirements to require that a specified amount of fuel be carried and to allow the use of a combination of weather reports and forecasts to provide greater latitude in the selection of an alternate airport. Paragraph (b) would provide that fuel to fly to the alternate airport would not be required if there is a Part 97 SIAP for the first airport of intended landing and certain ceiling and visibility minimums will exist from at least one hour before until one hour after the estimated time of arrival. Safety will not be adversely affected by these proposed changes because the alternate airport weather should always be equal to or better than basic VFR weather minimums of a ceiling of 1,000 feet and visibility of 3 miles.

Ref. Proposal Nos. 609 and 775, Ops. Review.

§ 135.185 IFR: take off approach, and landing minimums

This section, currently § 135.111, would be redesignated as § 135.185 and would be substantially amended. Under paragraph (a), no pilot may begin an instrument approach unless the airport has designated weather reporting facilities and the latest weather report indicates the weather is at or above IFR minimums. The weather reporting facility must be operated by the U.S. National Weather Service, a source approved by it, or a source approved by the Administrator. Paragraph (b) would be revised to prohibit a pilot from beginning the final approach segment of an instrument approach procedure at an airport unless the U.S. National Weather Service, a source approved by the U.S. National Weather Service, or a source approved by the Administrator, issues a weather report for that airport and unless the latest such weather report indicates that weather conditions are at or above the authorized IFR landing minimums for the airport where the approach is being conducted. A new paragraph (c) would be incorporatd in this section to outline the specific conditions under which a pilot may continue an instrument approach procedure, once initiated. Current paragraphs (c) and (d) would be redesignated as paragraphs (d) and (e) respectively. New paragraphs (f), (g) and (h) would be added to provide Part 135 certificate holders authority for lower than standard takeoff minimums by operations specifications when approved by the Administrator. Part 135 takeoff minimums are now published in the National Ocean Survey (NOS) and certain other instrument approach procedure charts/publications.

Ref. Proposal No. 29, Part 135 Review; Proposal Nos. 778 and 779, OPS Review.

§ 135.187 Icing conditions: operating limitations

This section, currently § 138.85, would be redesignated as § 135.187 and revised to make paragraphs (b) and (c) applicable to aircraft rather than airplanes, to delete the intensity conditions "light," "moderate," and "severe" as currently applied in the section, and to define the degree of ice protection required for flight under both VFR and IFR.

As proposed, pargaraph (a)(1) would be amended by the deletion of the words "rotorblade" and "propeller" from the list of aircraft components on which the adherance of frost, snow, or ice would prohibit takeoff. Paragraph (a)(3) would be revised to read as follows: "Any frost adhering to the wings, or stabilizing or control surfaces, or rotors or propellers of the aircraft, unless the wings, or stabilizing or control surfaces, or rotors or propellers have been smoothed to prevent the disruption by the frost of airflow over such surfaces." The revised paragraph would be more closely aligned with the intent of this section concerning the action necessary to treat frost adhering to the surface of an aircraft to permit a takeoff.

Paragraph (b) would be amended to prohibit takeoff for flight under VFR, or the continuation of flight under VFR, into known or forecast icing conditions unless the aircraft has installed functioning deicing or anti-icing equipment protecting each rotor blade, propeller, windshield, wing, stabilizing or control surface, and each airspeed, altimeter rate of climb, or flight altitude instrument system. The FAA believes it unnecessary to specify limiting icing conditions such as "light" or "moderate" for VFR flight operations if functioning deicing or anti-icing equipment is installed to protect the components of the aircraft on which ice accretion or formation would adversely affect its safety. Normally, there is ample opportunity to terminate VFR operations if icing of an intensity that would pose a hazard to the aircraft is reported, forecast, or encountered in flight.

Paragraph (c), as revised, would prohibit takeoff for flight under IFR, or the continuation of flight under IFR, into known or forecast icing conditions without regard to the intensity of the icing conditions unless the aircraft has installed functioning de-icing or anti-icing equipment which meets the certification requirements of Section 34 of SFAR No. 23, or Part 23 effective November 19, 1973, or the certification standards for transport category aircraft concerning ice protection. Under these certification requirements, it must be shown, among other things, that the aircraft is able to safely operate in maximum continuous and intermittent maxinum icing conditions determined as specified in the appropriate airworthiness certification regulations. The FAA believes these standards have proven adequate operational use under Part 121 and should be made applicable to Part 135. Current paragraph (d) would be retained as written to allow for changing weather conditions that obsolete a forecast before the next forecast is issued.

§ 135.189 Airport requirements and emergency lighting

This section, currently § 135.87, would be redesignated as § 135.189. Under the proposed change, the current rule would be deleted in its entirety and a new rule consisting of paragraphs (a) through (c) would be inserted in lieu thereof. Pursuant to paragraph (a) of the proposed revision, the certificate holder would be prohibited from using any airport unless it is properly equipped and adequate for the proposed operation, considering such items as size, surface, obstructions, facilities, public protection, and lighting. This provision is similar to the airport requirements of § 121.117 with the exception that navigational, and communications, and ATC items are not included to avoid preventing the use of a considerable number of general aviation airports where there are currently no navigation, communications, or ATC aids. In considering the requirements for a takeoff and landing site in operations under this part, the FAA believes the items listed are the minimum items needed to ensure an acceptable level of safety.

Pursuant to paragraph (b) of the proposed revision, except in case of an emergency, no person would be permitted to take off or land at night using flare pots or lanterns to mark or illuminate the take off or land at night using flare pots needed to preclude the routine use of flare pots or lanterns without imposing an undue burden on operations in remote areas where no other suitable means of airport lighting is available. Paragraph (c) as proposed would provide specific light spacing requirements for the emergency use of flare pots or lanterns to ensure that the takeoff or landing area is sufficiently illuminated when such lighting is used.

Pursuant to paragraph (d) of the proposed revision, except in case of an emergency, night takeoffs and landings in a large or turbojet-powered airplane would not be permitted when flare pots or lanterns have been substituted for more than 25 percent of the runway edge lights for the runway to be used. The FAA believes that more rigid requirements are necessary for the large and more complex airplanes which may be operated under the rules of this Part. On the other hand, it is believed unnecessary to apply the same requirements to large or turbine-powered helicopters because of the

V42167AUG2977 UMI

limited takeoff and landing area needed for such aircraft. Consequently, the rule as proposed would apply only to large or turbojet-powered airplanes.

Paragraph (e) as proposed would, except in case of an emergency, limit the lighting which may be used to illuminate a takeoff and landing area to flare pots and lanterns, and such other lighting as approved by the Administrator. This provision would preclude the use of lights from an automobile and other similar types of lighting which the FAA believes would be detrimental to safety.

SUBPART E—FLIGHT CREWMEMBER REQUIREMENTS

§ 135.191 Applicability

This proposed new section would prescribe the flight crewmember requirements for operations under this Part.

Pilot-in-command and second in command crewmember qualifications are currently prescribed in Subpart D, §§ 135.121, 135.123, 135.125, and 135.127, respectively, among others. However, the FAA believes that these qualifications as prescribed, should be revised to relate more specifically to VFR IFR operating conditions without regard to night or VFR over-the-top operating conditions as currently prescribed.

Accordingly, the above sections would be deleted and new qualifications prescribed by consolidating certain of these requirements into the new qualification requirements of Subpart E as proposed herein.

§ 135.193 Pilot in command qualifications

This proposed new section would prescribe pilot-in-command qualifications for both VFR and IFR operations under Part 135. As proposed, pertinent requirements of current §§ 135.121, 135.123, and 135.125 would be combined into one new section. The remaining and redundant requirements of the current sections would be deleted.

The FAA believes that it would be justified in requiring pilots of certain classifications of aircraft to possess an airline transport pilot certificate in order to serve as pilot in command under Part 135. This requirement, based in part on operational complexity and the number of persons carried, would provide a level of safety more comparable to that provided by Part 121. Accordingly, pursuant to paragraph (a) as proposed, in passenger-carrying operations, pilots in command of turbojet-powered airplanes, pilots in command of airplanes capable of carrying ten persons or more, and pilots in command of multiengine airplanes being operated in commuter air carrier service, must hold an airline transport pilot certificate with appropriate category and class ratings and, if required, an appropriate type rating for that aircraft.

Pursuant to paragraph (b) with respect to all other aircraft, a person serving as pilot in command under VFR would be required to hold a commercial pilot certificate with appropriate category and class ratings and, if required, an appropriate type rating for the aircraft flown. Additionally, the pilot must have at least 500 hours of flight time as a pilot, including at least 100 hours of cross-country flight time, at least 25 hours of which were at night, and, in the case of an airplane, he must hold an instrument rating or an airline transport pilot certificate with an airplane category; or, in the case of helicopter operations conducted VFR over-the-top, the pilot in command must hold a helicopter instrument rating or an airline transport pilot certificate with a category and class rating for helicopters not limited to VFR.

Pursuant to paragraph (c), with respect to all other aircraft, a person serving as pilot in command under IFR would be required to hold a type rating, if appropriate. This would also be the case for all turbojet and large airplanes since a type rating is required in such aircraft under § 61.31(a) of Part 61. The flight hour requirements of current § 135.125 would be retained and, in the case of an airplane, an instrument rating or an airline transport pilot certificate with an airplane category rating would be required. The requirement for 10 night takeoffs and landings would be deleted. In the case of a helicopter, a helicopter instrument rating or an airline transport pilot certificate with a category and class rating not limited to VFR would be required.

The FAA believes these qualification requirements are appropriate for the operations listed and will provide the degree of safety required in operations conducted under Part 135.

§ 135.195 [Reserved]

§ 135.197 Second in command qualifications

This proposed new section would prescribe second in command qualifications for flight operations under the rules of Part 135. This proposal is substantially the same as current § 135.127, except that the words "when a second in command is required by this chapter" have been deleted and, accordingly, any person who acts as second in command of an aircraft would be required to hold an appropriate category and class rating.

Ref. Proposal No. 786, Part 135.

§ 135.199 Pilot qualifications: recent experience

Part 135 does not currently prescribe pilot flight crewmember recent experience requirements, nor do the recent experience requirements of § 61.57 apply to operations conducted under Part 135 since such operations are specifically excepted by § 61.55(c). Therefore, this proposal, patterned after § 61.57, would prescribe recent experience requirements of three takeoffs and three landings in category, class, and type, as appropriate, within the preceding 90 days, before a person may serve as a pilot flight crewmember in operations under Part 135.

Ref. Proposal No. 707, OPS Review

SUBPART F—FLIGHT CREWMEMBER FLIGHT AND DUTY TIME LIMITATIONS REST REQUIREMENTS

§§ 135.200 through .221 Flight and duty time limitations rest requirements

This section, currently § 135.135, would be redesignated as a new Subpart F. Additionally, this subpart would be amended to include definitions of some of the more commonly used terms in Subpart F. It is expected that specific definitions will be an aid in eliminating extensive interpretations. Moreover, the FAA has determined that its traditional interpretation of what constitutes a valid rest period is needed herein so that each crewmember is given an opportunity to obtain sufficient rest without interruption to ensure his fitness for duty aloft. Accordingly, it is proposed to amend the flight time limitations requirements to include the definition of a "rest period" to mean a continuous period of time required by this subpart during which a crewmember is not on duty and is not required or obligated to perform any work for the certificate holder. The rest period does not include time spent in dead head transportation.

Limitations are proposed on the amount of flight time which may be accumulated in certain specified periods. The FAA believes that the flight time limitations proposed herein affecting flight crew assignments are reasonable in view of its knowledge of human factors and flight schedule patterns for all classes of operators under Part 135.

Flight crewmembers would also be relieved from duty for at least 24 consecutive hours during any seven consecutive days.

In recognition of the fact that some Part 135 certificate holders may wish to utilize augmented flight crews, Subpart F would prescribe limitations on the use of relief pilots comprising augmented flight crews.

Additionally, a condition would be added to provide for a maximum of 2 hours of extended duty time if the excess is due to reasons beyond the control of the certificate holder. The FAA believes that a 2 hour time interval would provide for a reasonable period of unanticipated en route delay.

The FAA's basic concern in prescribing flight and duty time limitations for flight crewmembers under Part 135 is that these limitations be realistic in consideration of current industry state-of-the-art, that crewmember rest periods not be infringed upon by any other duty assigned by the certificate holder; and that the flight time as opposed to the duty time be clearly defined.

Ref. Proposal Nos. 37 and 76, Part 135 Review; Proposal Nos. 791, 793, and 799, OPS Review.

SUBPART G—CREWMEMBER TESTING REQUIREMENTS

§ 135.223 Applicability

This subpart prescribes requirements for the tests and checks which would be required to be administered to pilot and flight attendant crewmembers, and persons issued check pilot authorization in operations under this Part.

§ 135.225 Initial and recurrent pilot testing requirements

This section currently, § 135.138, would be redesignated as § 135.225. Paragraphs (1) through (8) of paragraph (a) are believed to be representative of the scope of the initial and recurrent training program as proposed under new Subpart H, in which this section is included. Therefore, paragraph (a) would remain unchanged. However, in keeping with the FAA's express intent to upgrade Part 135 more in line with Part 121, paragraph (b) would be amended by deleting all references to maneuvers as set forth in Part 61 and related advisory circulars for pilot certification in the class of aircraft the pilot is to operate and, in lieu thereof, would permit the extent of the flight check, amended to read "competency check" where used throughout, to be determined by the Administrator. With respect to the term "competency check," the FAA considers this term more in keeping with present industry standards. An explanation would be added to paragraph (b) as proposed, to provide that for the purposes of this paragraph, type as used with respect to an airplane herein, means any one of a group of airplanes determined by the Administrator to have a similar means of propulsion, the same manufacturer, and no significantly different handling or flight characteristics.

Operational history and other empirical data has confirmed field and industry comments that as long as stringent training and oral or written tests are required for each type of multiengine airplane to be flown, then flight checks need be required in only one of a group of representative types without a degradation in the level of safety. This would also provide economic relief to the industry and conserve valuable energy.

The reference to § 135.131 in paragraph (c) would be deleted and § 135.229 would be inserted in place thereof. The words "6-month instrument" as used in paragraph (c) would be deleted and the words "instrument proficiency" inserted in lieu thereof to coincide with a similar change in § 135.229. Paragraph (e) would remain unchanged. A new paragraph (f) would permit portions of a required flight check to be given in an aircraft simulator or other appropriate device if approved by the Administrator.

§ 135.227 Initial and recurrent flight attendant crewmember testing

This section, currently § 135.139, would be redesignated as § 135.227. Paragraph (i) was added to present § 135.139 by amendment 135-44, issued on April 7, 1977 (41 FR 56280).

§ 135.229 Pilot in command: instrument proficiency check requirements

This section, currently § 135.131, would be redesignated as § 135.229. In keeping with present industry standards and related changes in other sections of Subpart H, the word "proficiency" would be inserted between the words "instrument" and "check" where appropriate throughout this section. Paragraph (c) would be amended to allow a flight check under actual IFR conditions. By an editorial change, the reference to § "135.138" would become § 135.225. Paragraph (c) would be further amended by adding the specification that the instrument proficiency check must include the procedures and maneuvers set forth for an airline transport pilot certificate in the particular type of airplane, if appropriate, in the case of a pilot in command of an airplane under § 135.193(a) and the procedures and maneuvers set forth for a commercial pilot certificate and an instrument rating and, if required, for the appropriate type rating, for all other pilots.

Paragraphs (d) and (e) would be unchanged except for the addition of the word "proficiency" between the words "instrument" and "check", where used.

Paragraph (f) would be amended by the addition of the word "proficiency" between the words "instrument" and "check" and by adding a provision to provide that the Administrator may authorize the use of a simulator or other training device to conduct portions of a check required by this section. This recognizes the advances in simulator or training device technology.

Paragraph (g) would be amended by the addition of a new paragraph (3) to require a demonstration of proficiency in the use of an autopilot once each 12 calendar months instead of once each 6 calendar months, as now required. In this respect, operating experience has shown that pilots generally retain their proficiency in the use of autopilots.

Paragraph (h) would remain unchanged except for the addition of the word "proficiency" between the words "instrument" and "check."

Ref. Proposal No. 789, Ops. Review.

FAR 135.231 Pilot In Command: line checks: routes and airways

This section, currently § 135.122, would be redesignated as § 135.231. It would be revised to incorporate requirements for a line check for pilots in command who are assigned to conduct VFR operations only and a line check for pilots in command who are assigned to conduct IFR operations. These line checks would be required annually and must be conducted over a portion of a route or airway and include takeoffs and landings at representative airports the pilot in command would normally be expected to use. The line checks must be given by an approved check pilot who is qualified in the aircraft used or by the Administrator, who must determine whether the pilot being checked satisfactorily performs the duties and responsibilities of a pilot in command in operations under Part 135, and so certify in the pilot's training record.

In addition to the line check requirement for pilots in command as noted, the certificate holder required to have a manual by § 135.23 would be required to establish, in that manual, a procedure for each pilot who has not flown over a route and into an airport within the preceding 90 days to familiarize himself with all available information concerning the route or airport, as the case may be, before conducting flight operations over that route or into that airport. Additionally, each qualifying pilot would be required to show to the satisfaction of the Administrator that he has adequate knowledge concerning the specific areas in which preflight preparation is believed essential.

In brief, the requirements of this section are designed to provide the check pilot or the Administrator with an opportunity to judge adequately a routine flight operation in terms of compliance with safe operating practices during preflight, takeoff, en route, and approach and landing.

Ref. Proposal No. 65, Part 135 Review.

§ 135.233 Crewmember tests and checks; grace provision; training to accepted standards

This section, currently § 135.133, would be redesignated as § 135.233. In addition, this section would be amended to delete the present reference to recurrent training since a similar provision, applicable to such training would be included under proposed § 135.239 of Subpart H.

There are currently no provisions in Part 135 to permit a person giving a pilot check under this Part to give additional training to a pilot who fails any of the required maneuvers during the course of the check. However, since this procedure is currently followed under § 121.441 without a derogation of safety, the FAA believes it should be permitted under Part 135. This proposal would, therefore, add a new paragraph to permit a person giving a check under Part 135 to give additional training to a pilot who fails any of the required maneuvers on the check.

This new paragraph would also prohibit use in Part 135 operations of a pilot who is unable to demonstrate satisfactory performance until such time as he passes the check.

§ 135.235 Check pilot authorization: application and issue

This section, currently § 135.135, would be redesignated as § 135.235. In addition, the reference to "§ 135.138" would be deleted and the words "this part" inserted in place thereof. This would avoid the necessity of an editorial amendment in the event of a future change of the section number containing the list of checks.

Ref. Proposal No. 56, OPS Review.

SUBPART H—TRAINING

§ 135.237 Applicability and terms used

This new section would define the applicability of new subpart H and would list the aircraft groups used as a basis for determining training requirements with regard to content and contain defi-

V 42 16 7 A AUG 29 77 UMI

nitions of terms which apply throughout this subpart. Subpart H contains requirements applicable to each certificate holder for establishing and maintaining an approved training program for crewmembers, check airmen and instructors, and other operations personnel, and for the approval and use of aircraft simulators and other training devices in the conduct of that program. Since a major emphasis in the upgrading of Part 135 is on training, the training requirements currently in effect are no longer considered adequate for operations envisioned under the proposed Part 135. The new training requirements would closely parallel those in Subpart N of Part 121. These new training requirements are considered essential to ensure the continued qualification of crewmembers involved in operations under Part 135.

Ref. Proposal No. 50, Part 135 Review.

§ 135.239 Training program: general

This new section would prescribe the scope of the training program which would be required for a particular certicate holder conducting operations under this Part. It would specify the conditions and limitations which would would apply and further the objective of the FAA to provide for the present and future development of effective and practical training programs. It would also encourage the use of simulation equipment under Part 135 by providing authority for the use of aircraft simulators and other training devices in the certificate holder's training program when specifically approved by the Administrator. The training requirements specified are believed necessary to ensure that each crewmember receives adequate trainin gto enable him to perform his assigned duties with the highest degree of proficiency.

Ref. Proposal No. 51, Part 135 Review.

§ 135.241 Training program and Revision: initial and final approval

This new section would prescribe the procedures which must be followed in order to obtain the initial and final approval of a training program or the approval of a revision to an approved training program. The new provisions would provide for a more orderly review process, based on an initial approval, after which there would be an evaluation period, followed by the final approval. In addition, the substance of current § 135.55(e) is included, as amended, relating to the Administrator's authority to require a revision to a certificate holder's approved training program.

Ref Proposal No. 53, Part 135 Review.

§ 135.243 Training program: curriculum

This new section would prescribe the scope of the certificate holder's training program curriculum. This requirement is similar to that specified in § 121.403. Application of this requirement will greatly aid in standardization of the certificate holder's training program. In addition, it will provide both the FAA and the certificate holders a common basis for program evaluation.

Ref.Proposal No. 52, Part 135 Review.

§ 135.245 Crewmember training Requirements

This new section would prescribe the scope of crewmember initial, transition, upgrade and recurrent training requirements, in both the ground and flight phases. This section summarizes those training elements that the certificate holder must include in its approved training program. Appropriate references to sections in Part 135 are included which provide specific information regarding each of the above mentioned training requirements.

Ref. Proposal No. 58, Part 135 Review.

§ 135.247 Crewmember emergency training

This new section would prescribe the scope of emergency training that the certificate holder must provide its crewmembers. It is designed to provide an in depth emergency training phase for all crewmembers with respect to each aircraft type and configuration, and each kind of operation conducted. The various drills using appropriate equipment and procedures are designed to familiarize the crewmembers, first hand, with each anticipated emergency situation and operation prior to its actual need to be performed.

Ref. Proposal No. 59, Part 135 Review.

§ 135.249 Training requirements: handling and carriage of hazardous materials

This section, currently § 135.140, would be redesignated as § 135.249. In addition, it would be amended by deleting the words "dangerous articles and magnetized materials" wherever they appear and inserting the words "hazardous materials" in place thereof, and by adding a new paragraph (c) to require each certificate holder that elects not to accept hazardous mataerials to ensure that each crewmember is adequately trained to recognize those items classified as hazardous materials.

There have been instances in which operators have inadvertently accepted hazardous materials on board an aircraft because the certificate holder's employees did not recognize the material as hazardous. The mishandling of hazardous materials has been identified as a causal factor in some aircraft incidents. This amendment is designed to ensure that all Part 135 certificate holders provide their employees sufficient guidance on the recognition and proper handling of hazardous material so that such materials can be accepted, handled, and shipped safely, or refused.

A new paragraph (d) would permit Part 135 certificate holders to use available labor for loading, unloading, and handling hazardous materials in remote areas where employees of the certificate holder or contract personnel are not available, provided the persons used would be supervised by a crewmember who is qualified under this section.

A new paragraph (e) would provide flexibility with respect to date of completion of training requirements for the handling or carriage of hazardous materials.

Ref. Proposal No. 40, Part 135 Review; Proposal No. 804, OPS Review.

§ 135.251 Approval of airplane simulators and other training devices

This new section would provide for the approval of the use of aircraft simulators and other training devices in a Part 135 certificate holder's approved training program. The FAA believes that this amendment is needed to allow greater use of aircraft simulators and other training devices in consideration of the present state-of-the-art concerning aircraft simulators and related training devices.

Ref. Proposal No. 54, Part 135 Review.

§ 135.253 Training program: check airmen and instructor qualifications

This new section would prescribe specific qualification and training requirements for check airmen and instructors used in connection with a Part 135 certificate holder's flight operation. These requirements will ensure that the persons used as check airmen and instructors are sufficiently trained to adequately check or instruct on those aspects of training required in Part 135 operations This section also would prescribe minimum qualifications for simulator instructors.

Ref. Proposal No. 56, Part 135 Review.

§ 135.255 Check airmen and flight instructors: initial and transition training

This new section would prescribe the scope of the initial and transition ground training for pilot check airmen, the initial and transition ground training for pilot flight instructors, and the initial and transition flight training for pilot check airmen and pilot flight instructors engaged in a Part 135 certificate holder's operation. The functions of check airmen and instructors are such that their impact on the safety of operations is considerable; therefore, it is imperative that their training is of sufficient scope and depth to ensure their initial and continuing ability to adequately train and check other airmen.

Ref. Proposal No. 57, Part 135 Review.

§ 135.257 Pilot and flight attendant crewmember training programs

This section, currently § 135.55, would be redesignated as § 135.257. In addition, paragraph (a) would be amended to require each certificate holder, other than one who uses only himself as a pilot, to establish and maintain an "approved" training program for both pilots and flight attendants whom he uses. The program must be appropriate to the operations to which each pilot and flight attendant is assigned. Current § 135.55 does not require an approved training program. The sophisticated aircraft and the increased passenger carrying capacity and the environment in which operations are conducted require a training program designed to adequately prepare crewmembers to function with a high degree of safety. The certificate holder would be required to ensure that each pilot and flight attendant is adequately trained to meet the knowledge and practical testing requirements of Part 135. A provision would be included to permit the Administrator to authorize a deviation from the requirements of this section, if deemed appropriate. This provision allowing a deviation is for the benefit of the smaller operation when safety would not be derogated by failure to comply with all or a part of the requirements of this section.

Paragraph (b) would be amended to reflect the scope of ground and flight training curricula the certificate holder must have in order to comply with § 135.257(a).

Paragraphs (c) and (d) of present §135.55 would remain unchanged. The substance of paragraph (e) would be relocated in proposed new § 135.241.

Ref. Proposal No. 17, Part 135 Review; Proposal Nos. 738 and 739, Ops Rev.

§ 135.259 Crewmember: initial and recurrent training requirements

This action, currently § 135.137, would be redesignated as § 135.259. In addition, it would be amended by inserting the word "crewmember" before the word "initial" in the title; by deleting the words "a pilot or flight attendant" as used in the section; and by deleting the last sentence containing the words: "This section does not apply to a certificate holder who uses only himself as a pilot".

The above changes are needed to make this section more compatible with other proposed revisions to this Part.

Ref. Proposal No. 38, Part 135 Review.

§ 135.261 Pilots: initial, transition, and upgrade ground training

This new section would prescribe the initial, transition, and upgrade ground training requirements for pilots which must be included in the particular certificate holder's approved training program.

§ 135.261 requires each certificate holder to have a training program. Such training requirements are further elaborated on in § 135.257. Accordingly, this section specifically outlines ground training requirements in the initial, transition, and upgrade phases of training. Such specifics are considered essential in view of the fact that previous training programs have had a tendency to summarize the various ground training aspects of the above referenced phases.

Ref. Proposal No. 60, Part 135 Review.

§ 135.263 Pilots: initial, transition, upgrade and differences flight training

This new section would prescribe the initial, transition, upgrade, and differences training requirements for pilots which must be included in a certificate holder's approved training program. This section would incorporate the concept of "training to a level of proficiency" and provide for the greater use of simulators or training devices which have the approval of the Administrator. Current Part 135 does not specify the use of simulators or training devices. The state-of-the-art has progressed to the point where this equipment may be used advantageously in training to reduce inflight training. It will result in a more economical and efficient operation without a deterioration in safety.

Ref. Proposal No. 62, Part 135 Review.

§ 134.265 Flight/Attendants: initial and tranition ground training

This new section would prescribe the initial and transition ground training requirements for flight attendants which must be included in a certificate holder's approved training program. Few, if any, operators presently utilize aircraft having a passenger seating capacity of more than 19, which under the regulations require a flight attendant. The section provides for training of flight attendants required with the anticipated advent of larger passenger carrying capacity aircraft.

Ref. Proposal No. 61, Part 135 Review.

§ 135.267 Recurrent training

This new section would prescribe the recurrent training requirements for crewmembers which must be included in the particular certificate holder's approved training program. Paragraph (c) of this section would provide authority for excepting a pilot from the requirements of this section if he has satisfactorily completed the check required by § 135.225 of Subpart G within the preceding 12 calendar months. Such recurrent training requirements are considered to be an integral part of a certificate holder's overall program because they perpetuate initial training and aid in standardization procedures.

Ref. Proposal No. 63, Part 135 Review.

SUBPART I—AIRPLANE PERFORMANCE

§ 135.271 Applicability

This proposed new section prescribes the applicability of this subpart. Certain terms used in this proposed subpart are defined.

Ref. Proposal No. 79, Part 135 Review.

§§ 135.273 through 135.305 Airplane performance

This explanation applies to this proposed new subpart as a whole. These proposed rules governing airplane performance operating limitations have been extracted from Subpart I of Part 121 with such changes as considered appropriate and would apply to the operation of the certain large airplanes which would be authorized to operate under Part 135.

Airplanes certificated under rules for transport category airplanes must be operated in accordance with the performance rules outlined in this subpart. Certification standards are incorporated into operating rules as airplane performance operating limitations to ensure that these airplanes are operated in accordance with the certification criteria.

The certain large nontransport category airplanes referred to herein were, upon certification, required to meet less stringent performance criteria. The proposed rules are needed to ensure that these airplanes are operated within limits which ensure the level of safety intended for transport category flight operations.

There are, however, certain airplanes that may be operated either as a small airplane or as a large airplane (such as the Learjet Model 24) by virtue of provisions of their airworthiness certification. These airplanes, if operated as a large airplane e.g., 12,500 pounds or more, would be required to comply with the requirements of Subpart I or, if operated as a small airplane e.g., 12,499 pounds or less, would be required to comply with provisions of § 135.155 which incorporates by reference certain of the requirements of Subpart I but did not the complete subpart. Likewise, certain airplanes (such as the DeHavilland Heron) which, although certificated in the transport category, were certificated as small airplanes would thereby be excluded from compliance with the requirements of Subpart I. However, these airplanes must comply with the requirements of § 135.155 and certain of the requirements of Subpart I as referenced in that section.

Ref. Proposal Nos. 80 through 96, Part 135 Review.

SUBPART "K"—MAINTENANCE, PREVENTIVE MAINTENANCE, AND ALTERATIONS

§ 135.333 Applicability

This proposal contains additional airworthiness requirements for two categories of air taxi aircraft. The aircraft categories are related to the passenger-carrying capacity of aircraft rather than takeoff gross weight or aircraft types. The increasing complexities of aircraft and air taxi operations make it necessary to ensure that air taxi maintenance requirements are properly identified and managed, and that the responsibilities and privileges are clearly defined. The requirements that are outlined are consistent with present day maintenance standards and techniques to manage aircraft airworthiness. Aircraft that are certificated for nine passengers or less will be required to meet the same inspection requirements of the present Part 135, plus additional maintenance requirements for the engine, propeller, rotor, and emergency equipment. These additional requirements are necessary to establish required maintenance for these components. Aircraft that are certificated for

V 42 I 167 AUG 29 77 7 UMI

ten passengers or more will be required to establish a maintenance program that is presently being used by air taxi operators of large aircraft and by air carriers. This system for the management of maintenance programs has proved effective in ensuring safety in air taxi operations using large aircraft and air carrier operations. Since it is recognized that time is a factor in the development of maintenance programs, the FAA invites comments addressed specifically to the appropriate compliance period necessary to ensure that no undue burden will be placed on the certificate holders operating under this part.

Ref. Proposal No. 97, Part 135 Review.

§ 135.335 Responsibility for airworthiness

This proposal places the responsibility for the airworthiness of ATCO aircraft on the certificate holder. The FAA believes that the certificate holder should be responsible for providing airworthy equipment. The proposal further outlines that a certificate holder operating aircraft certificated for a passenger seating configuration of 10 or more, which performs its own maintenance or has it performed by someone else, is responsible for having that maintenance performed in accordance with its manual, and the Federal Aviation Regulations. The manual referred to in this proposal references the manual which would be required by proposed § 135.349. Certificate holders operating aircraft certificated for a passenger seating capacity of nine or less are permitted under the present rules to use persons authorized in Part 43 to perform maintenance, preventive maintenance, and alterations. Those persons who perform maintenance, preventive maintenance, and alterations are responsible for performing maintenance in accordance with the regulations of this chapter. The certificate holder is responsible for having the aircraft inspected and maintained between inspections as required by this Part and Part 91.

Ref. Proposal No. 98, Part 135 Review, Proposal No. 805 Operations Review.

§ 135.337 Mechanical reliability reports

This section, currently § 135.57, would be redesignated as § 135.337. Paragraphs (a) and (c) would be amended by deleting the word "multiengine" and inserting the word "an" in place thereof. The purpose of this proposal is to broaden the scope of available data by which aircraft airworthiness standards are established with the object of increasing the level of safety in air taxi operations. This would include all air taxi aircraft. In addition, paragraph (e) would be amended to provide that the reports required by this section be transmitted in a form and a manner prescribed by the Administrator. The deletion of a specified form allows flexibility to the certificate holder and the FAA on the form and manner in which the reports are submitted.

Paragraph (f) would be amended by deleting the number "430" and inserting the number "830" in place thereof, to reflect current reporting requirements of the National Transportation Safety Board.

Ref. Proposal No. 18, Part 135 Review; Proposal No. 741, Ops. Review.

§ 135.339 Mechanical interruption summary report

This section, currently § 135.59 would be redesignated as § 135.339. The word "multiengine" would be deleted from the lead-in paragraph to broaden the scope of coverage to all aircraft. This proposal would provide for the reporting of mechanical interruptions which are not presently reported under present § 135.-59. The FAA believes that the additional reporting requirements are necessary to broaden the scope of available data by which aircraft airworthiness standards are established, with the object of increasing the level of safety in air taxi operations.

Ref. Proposal No. 19, Part 135 Review.

§ 135.341 Approved aircraft inspection program

This section, currently § 135.60, would be redesignated § 135.341. By transferring this section into Subpart K, all maintenance rules would be covered in one subpart. This proposal also adds a requirement for the certificate holder to include instructions and procedures for the correction and deferral of discrepancies found as a result of inspection. The FAA believes that this procedure is necessary to ensure that the certificate holder and maintenance personnel are aware of the proper action that is necessary to record and correct discrepancies found during an inspection before an aircraft may be returned to service in air taxi operations.

Ref. Proposal No. 97, Part 135 Review; Proposal No. 744, Ops Review.

§ 135.343 Additional maintenance requirements, aircraft certificated to carry nine or less passengers

This section provides additional maintenance requirements for aircraft certificated to carry nine or less passengers. The FAA believes that the requirement for a maintenance program for the engine, propeller, rotor and each item of emergency equipment is necessary for the airworthiness of these components on aircraft in air taxi operation.

There is at present no requirement for these items to be covered under a controlled maintenance program. This proposal would allow the certificate holder to use an established program developed by the manufacturer, or submit a program based on the certificate holder's experience to the FAA for approval.

§ 135.345 Maintenance preventive maintenance and alterations organization

The purpose of this proposal is to require the certificate holder to have an adequate maintenance organization for the accomplishment of maintenance, preventive maintenance, and alterations on his aircraft. The proposal also provides for the certificate holder to arrange with another person (as defined in Part 1) to accomplish the work, provided that the certificate holder determines that the person has an organization adequate to perform the work. The FAA also believes it is necessary to separate required inspection functions from other functions as proposed in paragraph (c) to ensure that those items directly affecting the safety of flight are satisfactorily inspected before flight.

Ref. Proposal No. 99, Part 135 Review.

§ 135.347 Maintenance, preventive maintenance and alteration programs

This section would establish the requirement for a certificate holder to have an inspection program and a program covering other maintenance, preventive maintenance, and alterations. This proposal also provides for accomplishment of maintenance, preventive maintenance and alterations by other persons in accordance with the certificate holder's manual. The FAA believes that a certificate holder who is required to have a maintenance program under this part should be responsible for having an adequate program and for ensuring that the program is properly accomplished regardless of the person or facility where maintenance is performed.

Ref Proposal No. 100, Part 135 Review.

§ 135.349 Manual requirements

This section would require the certificate holder to include in his manual a description of the organization required by proposed § 135.345 and a list of persons with whom he has arranged for the performance of any required inspections, other maintenance, preventive maintenance, or alterations. This manual must contain the programs required by proposed § 135.347, including the methods of performing required inspections, other maintenance, preventive maintenance, and alterations. This proposal would make it necessary for a certificate holder to provide a maintenance program in manual form to be used in his organization in performance of maintenance, preventive maintenance, and alteration programs. This manual is necessary to ensure that the certificate holder has provided an adequate maintenance program for the airworthiness of his aircraft and to inform his personnel, or other persons who perform maintenance, of their responsibilities regarding the performance of maintenance on his aircraft. In this proposal, the term "buy back procedures" refers to the system used for the disposition of required inspection items to ensure they are inspected after work has been performed on them.

Ref. Proposal No. 101, Part 135 Review.

§ 135.351 Required inspection personnel

This section proposes certain requirements for inspection personnel. It provides for specific qualifications and supervision of an inspection unit. This section also would require the listing of persons who have been trained, qualified, and authorized to conduct required inspections. The persons would be identified by name, occupational title, and the inspections that they are authorized to perform.

This proposal is necessary in order to provide competent and properly trained inspection personnel to perform the required inspections of this Part.

Ref. Proposal No. 102, Part 135 Review.

§ 135.353 Continuing analysis and surveillance

This section provides for the establishment by the certificate holder of a system to continually analyze the performance and effectiveness of the programs covering maintenance, preventive maintenance, and alterations. This section also provides for the correction of any deficiencies in those programs. Also included in this section is a provision whereby the Administrator may require the certificate holder to make changes in either or both of its programs described in paragraph (a) if those programs do not contain adequate procedures and standards to meet the requirements of this Part. This proposal is necessary to provide the certificate holder feedback on the performance and effectiveness of the certificate holder's programs covering maintenance, preventive maintenance, and alterations, so that deficiencies are corrected. The proposal for a procedure providing for changes required by the Administrator is similar to procedures included in other parts of the Federal Aviation Regulations and would ensure that deficient programs would be corrected promptly.

§ 135.355 Maintenance and preventive maintenance training programs

This proposal would require training programs which ensure that persons performing maintenance or preventive maintenance functions (including inspection personnel) would be fully informed about procedures, techniques, and new equipment in use and that those personnel are competent to perform their required duties.

§ 135.357 Certificate requirements

This section would establish the requirement that each person, other than a repair station certificated under the provisions of Subpart C of Part 145, who is directly in charge of maintenance, preventive maintenance, or alterations, and each person performing required inspections, hold an appropriate airman certificate. The FAA believes this is necessary to ensure the certificate holder is using maintenance personnel who have adequate knowledge of the regulations and hold an appropriate airman certificate.

Ref. Proposal No. 106, Part 135 Review.

§ 135.359 Authority to perform and approve maintenance, preventive maintenance and alterations

This section allows the Part 135 certificate holder to have maintenance performed by other persons. It also permits a certificate holder to perform maintenance for other certificate holders. This proposal allows the Part 135 certificate holder some flexibility for maintenance being performed by other persons when the certificate holder does not have the personnel or facilities to perform maintenance. It also requires that all major repairs and alterations must have been accomplished with data approved by the Administrator. The FAA believes the requirement for FAA approved data is necessary to ensure the airworthiness of aircraft operated by Part 135 certificate holders.

Ref. Proposal No. 107, Part 135 Review.

§ 135.361 Maintenance recording requirements

The proposed rule provides for the preparation, maintenance, and retention of certain records using the system specified in the certificate holder's manual. This proposal also specifies the length of time that the records must be retained and requires that the records be transferred with the aircraft at the time it is sold. It also would require the certificate holder to keep records of the total time on the engine and propeller, as well as the airframe. The FAA believes that the additional recordkeeping requirements, beyond those specified in § 91.173, are necessary in order to establish the continuous airworthiness history of the aircraft and its components.

Ref. Proposal No. 108, Part 135 Review.

§ 135.363 Transfer of maintenance records

The proposed rule would require the certificate holder to transfer certain maintenance records to the purchaser, at the time of the sale in either plain language form or in coded form. The coded form must provide for the preservation and retrieval of information in a manner acceptable to the Administrator. The purchaser may permit the seller to keep physical custody of the records; however, custody by the seller does not relieve the purchaser of the responsibility under § 135.361(e) to make the records available for inspection by a representative of the Administrator or authorized representatives of the National Transportation Safety Board.

This proposal is intended to ensure that a new owner receives all the records that are to be maintained by an operator as required in § 135.361.

Ref. Proposal No. 109, Part 135 Review.

§ 135.365 Airworthiness release or aircraft log entry

This proposed rule would require the certificate holder to prepare or cause to be prepared either an airworthiness release or an appropriate entry in the aircraft log after maintenance, preventive maintenance, or alterations. The airworthiness release or log entry must be prepared in accordance with the procedures set forth in the certificate holder's manual.

The FAA believes that this proposal is necessary to provide a system for employees of the certificate holder to determine the airworthiness status of an aircraft after maintenance has been performed. The person providing an airworthiness release or aircraft log entry would be required to determine that all the requirements for inspection and airworthiness are satisfied. This proposal also would aid the flight crew in determining the airworthiness of the aircraft prior to flight.

Ref. Proposal No. 110, Part 135 Review.

DRAFTING INFORMATION

The principal authors of this document are David W. Kress, Flight Standards Service and Richard C. Beitel, Office of the Chief Counsel.

PROPOSED AMENDMENTS

Accordingly, it is proposed to amend Parts 121 and 135 of the Federal Aviation Regulations as follows:

PART 121—CERTIFICATION AND OPERATIONS: DOMESTIC, FLAG, AND SUPPLEMENTAL AIR CARRIERS AND COMMERCIAL OPERATORS OF LARGE AIRCRAFT

1. By amending § 121.9 by amending the title and revising paragraph (a), to read as follows:

§ 121.9 Operations of small aircraft and certain large aircraft.

(a) No person may conduct operations with aircraft having a maximum passenger capacity of 30 seats or less and a maximum payload capacity of 7,500 pounds or less, unless he conducts those operations in accordance with the rules of Part 135 of this chapter except §§ 135.7, 135.19, 135.27, 135.29, 135.31, and 135.35 of Subpart A, and appropriate operations specifications, in lieu of Subparts E through V, of this Part 121. However, the holder of an air carrie operating certificate issued under this Part may maintain its aircraft operated under Part 135 of this chapter in accordance with a continuous airworthiness maintenance program that meets the requirements in Subpart L of this Part and operations specifications issued to it under this Part. Operations specifications issued under this section contain such operating limitations and requirements as the Administrator finds necessary.

* * * * *

2. Special Federal Aviation Regulation 23, which is published in full text under Part 135, would be republished without change.

3. By revising Part 135 to read as set forth below.

4. By amending § 1 of Appendix A to Part 135 by deleting the reference "§ 135.144(d)" and substituting for it the reference "§ 135.141(b)(4)".

V 42 I 167 A UG 29 77 UMI

PART 135—AIR TAXI OPERATORS AND COMMERCIAL OPERATORS

Subpart A—General

Sec.
135.1 Applicability.
135.2 Air taxi operations with large aircraft.
153.3 Rules applicable to operations subject to this part.
135.5 [Reserved].
135.7 Certification and operations specifications required.
135.9 Applicability of rules to unauthorized operators.
135.11 Duration of certificate.
135.13 Application and issue of certificate and operations specifications.
135.15 Eligibility for certificate and operations specifications.
135.17 Amendment of certificate.
135.19 Amendment of operations specifications.
135.21 Emergency operations.
135.23 Manual requirements.
135.25 Aircraft requirements.
135.27 Business office and operations base.
135.29 Use of business names.
135.31 Advertising.
135.33 Area limitations on operations.
135.35 Termination of operations.
135.37 Periodic financial status review.
135.39 Management personnel required.
135.41 Management personnel qualifications.
135.43 Carriage of narcotic drugs, marihuana, and depressant or stimulant drugs or substances.
135.45 Crewmember certificate: International operations; application and issue.

Subpart B—Flight Operations

135.47 General.
135.49 Recordkeeping requirements.
135.51 Flight information: Facilities and services.
135.53 Reporting of mechanical irregularities.
135.55 Reporting potentially hazardous meteorological conditions and irregularities of communications or navigation facilities.
135.57 Restriction or suspension of operations: Continuation of flight in an emergency.
135.59 Airworthiness check.
135.61 Inspections and tests.
135.63 Inspectors credentials: Admission to pilots comparment: Forward observer's seat.
135.65 Responsibility for operational control.
135.67 Flight locating requirements.
135.69 Informing personnel of operational information and appropriate changes.
135.71 Operating information required.
135.73 Carriage of persons without compliance with the passenger-carrying provisions of this part.
135.75 Carriage of cargo including carry-on baggage.
135.77 Requirements for use of oxygen.
135.79 Oxygen for medical use by passengers.
135.81 Autopilot: Minimum altitudes for use.
135.83 Airmen: Limitations on use of services.
135.85 Aircraft and facilities for recent flight experience.
135.87 Composition of flight crew.
135.89 Second in command required in IFR conditions.
135.91 Exception to second in command requirement: limited IFR conditions.
135.93 Exception to second in command requirement: approval for use of autopilot system.
135.95 Flight attendant crewmember requirement.
135.97 Pilot in command or second in command: designation required.
135.99 Second in command required in category II operations.
135.101 Passenger occupancy of pilot seat.
135.103 Manipulation of controls.
135.105 Briefing of passengers before flight.
135.107 Prohibition against carriage of weapons.
135.109 Alcoholic beverages.
135.111 [Reserved].
135.113 Emergency and emergency evacuation duties.

Subpart C—Aircraft and Equipment

135.115 Applicability.
135.117 General requirements.
135.119 [Reserved]
135.121 Aircraft proving tests.
135.123 Dual controls required.
135.125 Equipment requirements: General.
135.127 Fire extinguishers: Passenger-carrying aircraft.
135.129 Oxygen Equipment Requirements.
135.131 Equipment requirements: Carrying passengers under VFR at night or under VFR over-the-top conditions.
135.133 Radio and navigational equipment: Carrying passengers under VFR at night or under VFR over-the-top.
135.135 Equipment requirements: Aircraft carrying passengers under IFR.
135.137 Radio and navigational equipment: Under extended overwater or IFR operations.
135.139 Emergency equipment: Extended overwater operations.
135.141 Additional airworthiness requirements.
135.143 Shoulder harness installation at flight crewmember stations.
135.145 Airborne thunderstorm detection equipment requirements.
135.147 Emergency equipment requirements for aircraft having a passenger seating capacity of more than 19 passengers.
135.149 Inoperable instruments and equipment for multiengine aircraft.
135.151 Performance requirements: Aircraft operated over-the-top or in IFR conditions.
135.153 Performance requirements: Land aircraft operated over water.
135.155 Small airplane performance operating limitations.
135.157 Empty weight and center of gravity: Currency requirement.

Subpart D—VFR/IFR Operating Limitations and Weather Requirements

135.159 Applicability.
135.161 VFR: Minimum altitudes.
135.163 VFR: Visibility requirements.
135.165 VFR: Helicopter surface reference requirements.
135.167 VFR: Fuel supply.
135.169 VFR: Over-the-top carrying passengers: Operating limitations.
135.171 Weather reports and forecasts.
135.173 [Reserved].
135.175 IFR: Operating limitations.
135.177 IFR: Takeoff limitations.
135.179 IFR: Destination airport weather minimums.
135.181 IFR: Alternate airport weather minimums.
135.183 IFR: Alternate airport requirements.
135.185 IFR: Takeoff, approach, and landing minimums.
135.187 Icing conditions: Operating limitations.
135.189 Airport requirements and emergency lighting.

Subpart E—Flight Crewmember Requirements

135.191 Applicability.
135.193 Pilot in command qualifications.
135.195 [Reserved].
135.197 Second in command qualifications.
135.199 Pilot qualifications: Recent experience.

Subpart F—Flight Crewmember Flight and Duty Time Limitations and Rest Requirements

135.200 Applicability.
135.201 Definition of terms.
135.203 Flight and duty time limitations: all flight crewmembers.
135.205 Deadhead transportation.
135.207 Determination of applicable flight and duty time limitations.
135.209 Rest requirements.
135.211 Flight crew consisting of: One pilot.
135.213 Flight crew consisting of: Pilot in command and second in command.
135.215 Augmented flight crews.
135.217 Flight crew consisting of: Pilot in command, second in command, and relief officer.
135.219 [Reserved].

Subpart G—Crewmember Testing Requirements

135.223 Applicability.
135.225 Initial and recurrent pilot testing requirements.
135.227 Initial and recurrent flight attendant crewmember testing requirements.
135.229 Pilot in command: Instrument proficiency check requirements.
135.231 Pilot in Command qualifications: Line checks: Routes and airways.
135.233 Crewmember tests and checks: Grace provisions: Training to accepted standards.
135.235 Check pilot authorization: Application and issue.

Subpart H—Training

135.237 Applicability and terms used.
135.239 Training program: General.
135.241 Training program and revision: Initial and final approval.
135.243 Training program: Curriculum.
135.245 Crewmember training requirements.
135.247 Crewmember emergency training.
135.249 Training reqirements: Handling and carriage of hazardous materials.
135.251 Approval of airplane simulators and other training devices.
135.253 Training program: Check airmen and instructor qualifications.
135.255 Check airmen and flight instructors: Initial and transition training.
135.257 Pilot and flight attendant crewmember training programs.
135.259 Crewmember initial and recurrent training requirements.
135.261 Pilots: Initial, transition, and upgrade ground training.
135.263 Pilots: Initial, transition, upgrade and differences flight training.
134.265 Flight attendants: Initial and transition ground training.
135.267 Recurrent training.

Subpart I—Airplane Performance

135.271 Applicability.
135.273 General.
135.275 Large transport category airplanes: Reciprocating engine powered: Weight limitations.
135.277 Large transport category airplanes: Reciprocating engine powered: Takeoff limitations.

Sec.
135.279 Large transport category airplanes: Reciprocating engine powered: En route limitations: All engines operating.
135.281 Large transport category airplanes: Reciprocating engine powered: En route limitations: One engine inoperative.
135.283 Part 25 transport category airplanes with four or more engines: Reciprocating engine powered: En route limitations: Two engines inoperative.
135.285 Large transport category airplanes: Reciprocating engine powered: Landing limitations: Destination airport.
135.287 Large transport category airplanes: Reciprocating engine powered: Landing minimums: Alternate airport.
135.289 Large transport category airplanes: Turbine engine powered: Takeoff limitations.
135.291 Large transport category airplanes: Turbine engine powered: En route limitations: One engine inoperative.
135.293 Large transport category airplanes: Turbine engine powered: En route limitations: two engines inoperative.
135.295 Large transport category airplanes: turbine engine powered: Landing limitations: Destination airports.
135.297 Large transport category airplanes: Turbine engine powered: Landing limitations: Alternate airports.
135.299 Large nontransport category airplanes: Takeoff limitations.
135.301 Large nontransport category airplanes: En route limitations: One engine inoperative.
135.303 Large nontransport category airplanes: Landing limitations: Destination airport.
135.305 Large nontransport category airplanes: Landing limitation. Alternate airport.

Subpart J—[Reserved]

Subpart K—Maintenance, Preventive Maintenance, and Alterations

135.333 Applicability.
135.335 Responsibility for airworthiness.
135.337 Mechanical reliability reports.
135.339 Mechanical interruption summary reports.
135.341 Approved aircraft inspection program.
135.343 Additional maintenance requirements, aircraft certificated to carry nine or less passengers.
135.345 Maintenance, preventive maintenance and alteration organization.
135.347 Maintenance, preventive maintenance and alteration programs.
135.349 Manual requirements.
135.351 Required inspection personnel.
135.353 Continuing analysis and surveillance.
135.355 Maintenance and preventive maintenance training program.
135.357 Certificate requirements.
135.359 Authority to perform and approve maintenance, preventive maintenance and alterations.
135.361 Maintenance recording requirements.
135.363 Transfer of maintenance records.
135.365 Airworthiness release or aircraft log entry.

Subpart A—General

§ 135.1 Applicability.

(a) Except as provided in paragraph (b) of this section, this part prescribes rules governing—

(1) Air taxi operations conducted under the exemption authority of Part 298 of this title;

(2) The transportation of mail by aircraft conducted under a postal service contract awarded pursuant to Chapter 54 Section 5402c Title 39, United States Code;

(3) The carrying in air commerce by any person, other than an air carrier, of persons or property for compensation or hire (commercial operations) in aircraft having a maximum passenger capacity of 30 seats or less and a maximum payload capacity of 7,500 pounds or less; and

(4) Each person who is on board an aircraft being operated under this part.

(b) This part does not apply to—

(1) Student instruction;

(2) Nonstop sightseeing flights that begin and end at the same airport, and are conducted within a 25 statute mile radius of that airport;

(3) Ferry or training flights;

(4) Aerial work operations, including—

(i) Crop dusting, seeding, spraying, and bird chasing;

(ii) Banner towing;

(iii) Aerial photography or survey;

(iv) Fire fighting;

(v) Helicopter operations in construction or repair work (but not including transportation to and from the site of operations); and

(vi) Powerline or pipeline patrol;

(5) Sightseeing flights conducted in hot air balloons;

(6) Nonstop flight conducted within a 25 statute mile radius of the airport of takeoff carrying persons for the purpose of intentional parachute jumps;

(7) Helicopter flights conducted with a 25 statute mile radius of the airport of takeoff, if—

(i) Not more than two passengers are carried in the helicopter in addition to the required flightcrew;

(ii) Each flight is made only under VFR during the day;

(iii) The helicopter used is certificated in the standard category and complies with the 100-hour inspection requirements of Part 91 of this chapter;

(iv) The operator notifies the FAA District Office having jurisdiction over the area concerned, at least 72 hours before each flight and furnishes any essential information that the office requests;

(v) The number of flights does not exceed a total of six in any calendar year;

(vi) Each specific flight has been approved by the Administrator; and

(vii) Cargo is not carried in or on the helicopter.

(8) Operations conducted under the authority of Part 133 or 375 of this title; or

(9) Emergency mail service conducted under Section 405(b) of the Federal Aviation Act of 1958.

§ 135.2 Air taxi operations with large aircraft.

(a) Except as provided in paragraph (d) of this section, no person may conduct air taxi operations in large aircraft under an individual exemption and authorization issued by the Civil Aeronautics Board or under the exemption authority of Part 298 of this title, unless that person—

(1) Has complied with the certification requirements for supplemental air carriers as set forth in Part 121 of this chapter, except that he need not obtain, nor is he eligible for, a certificate under Part 121 of this chapter; and

(2) Conducts those operations in accordance with the rules of Part 121 of this chapter that are applicable to supplemental air carriers.

However, the Administrator may issue operations specifications which require an operator to comply with the rule applicable to domestic or flag air carriers, as appropriate, in lieu of the supplemental air carrier rules required by paragraph (a)(2) if he determines compliance with those rules necessary to provide an appropriate level of safety for the operation.

(b) The holder of an air taxi/commercial operator (ATCO) operating certificate who is required to comply with Subpart L of Part 121 of this chapter, "Maintenance, Preventive Maintenance, and Alterations" under paragraph (a) of this section, may perform and approve maintenance, preventive maintenance and alterations on aircraft having a maximum passenger capacity of 30 seats or less and a maximum payload of 7,500 pounds or less as provided in Subpart L of Part 121 of this chapter. These aircraft so maintained shall be identified by registration number in the operations specifications of the air taxi operator using the aircraft.

(c) Operations that are subject to paragraph (a) of this section are not subject to §§ 135.23 through 135.45 of Subpart A and Subparts B through K of this part. Seaplanes used in operations subject to paragraph (a) of this section are not subject to § 121.291(a) of this chapter.

(d) Air taxi operations conducted within aircraft having a maximum passenger capacity of 30 seats or less, and a maximum payload capacity of 7,500 pounds or less shall be conducted in accordance with the rules of this Part.

However, an operator who is currently conducting ATCO operations in aircraft described in paragraph (d) of this section may operate under the provisions of paragraph (a)(1) and (2) of this section if he applies for and is issued

V 42 167 AUG 29 77 UMI

amended operations specifications for such operations under § 135.19.

(e) For the purposes of this part—

(1) "Maximum payload capacity" means—

(i) In the case of an aircraft for which a maximum zero fuel weight is prescribed in FAA technical specifications, the maximum zero fuel weight, less empty weight, less all justifiable aircraft equipment, and less the operating load (consisting of minimum flight crew, foods and beverages and supplies and equipment related to foods and beverages, but not including disposable fuel or oil);

(ii) For all other aircraft, the maximum certificated takeoff weight of an aircraft, less the empty weight, less all justifiable aircraft equipment, and less the operating load (consisting of minimum fuel load, oil, and flight crew). The allowance for the weight of the crew, oil, and fuel is as follows:

(A) Crew—200 pounds per crewmember required under the Federal Aviation Regulations.

(B) Oil—350 pounds.

(C) Fuel—the minimum weight of fuel required by the Federal Aviation Regulations for a flight between domestic points 174 nautical miles apart under VFR weather conditions and not involving extended overwater operations.

(2) "Empty weight" means the weight of the airframe, engines, propellers, rotors, and fixed equipment. Empty weight excludes the weight of the crew and payload, but includes the weight of all fixed ballast, unusable fuel supply, undrainable oil, total quantity of engine coolant, and total quantity of hydraulic fluid; and

(3) "Maximum zero fuel weight" means the maximum permissible weight of an aircraft with no disposable fuel or oil. The zero fuel weight figure may be found in either the aircraft type certificate data sheet or the approved aircraft flight manual, or both.

(4) For the purposes of pargaraphs (e)(1)(i) and (ii), justifiable aircraft equipment means any equipment necessary for the operation of the aircraft. It does not include equipment or ballast specifically installed, permanently or otherwise, for the purpose of altering the empty weight of an aircraft to meet the maximum payload capacity specified in paragraph (d) of this section.

§ 135.3 Rules applicable to operations subject to this part.

Each person operating an aircraft in operations to which this Part applies shall—

(a) While operating inside the United States, comply with the applicable rules of this chapter; and

(b) While operating outside the United States, comply with Annex 2, Rules of the Air, to the Convention on International Civil Aviation or the regulations of any foreign country, whichever applies, and any rules of Parts 61 and 91 of this chapter and this Part that are more restrictive than the Annex or those regulations and can be complied with without violating that Annex or those regulations.

(c) Annex 2 to the Convention on International Civil Aviation, Sixth Edition—September 1970, with amendments through 20 effective August 1976, to which reference is made in this part is incorporated into this part and made a part hereof as provided in 5 U.S.C. 552 and pursuant to 1 CFR Part 51. Annex 2 (including a complete historic file of changes thereto) is available for public inspection at the Rules Docket, AGC-24, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591. In addition, Annex 2 may be purchased from the International Civil Aviation Organization (Attention: Distribution Officer), P.O. Box 400, Succursale; Place de L'Aviation Internationale, 1000 Sherbrooke Street West, Montreal, Quebec, Canada H3A 2R2.

§ 135.5 [Reserved]

§ 135.7 Certificate and operations specifications required.

No person may operate an aircraft in operations to which this part applies without, or in violation of, an ATCO operating certificate and appropriate operations specifications issued under this part, or, in the case of operations with large aircraft having a maximum passenger capacity of more than 30 seats, or a maximum payload capacity of more than 7,500 pounds, without, or in violation of, operations specifications issued under Part 121 of this chapter.

§ 135.9 Applicability of rules to unauthorized operators.

The rules in this part which refer to a person certificated under § 135.7 apply also to any person who engages in any operation governed by this Part without the appropriate certificate and operations specifications required by § 135.7.

§ 135.11 Duration of certificate.

An ATCO certificate is effective until surrendered, suspended or revoked. The holder of an ATCO certificate shall return it to the Administrator within 10 days after receipt of notice of suspension or revocation.

§ 135.13 Application and issue of certificate and operations specifications.

(a) An application for an ATCO certificate and appropriate operations specifications is made on a form and in a manner prescribed by the Administrator and filed with the FAA District Office that has jurisdiction over the area in which the applicant's principal business office is located.

(b) An applicant who meets the requirements of this Part is entitled to—

(e) An ATCO certificate containing all business names under which he may conduct operations and the address of each business office used by the holder; and

(2) Separate operations specifications containing the type of operations authorized, the area of operation authorized, the type, category, and class of aircraft that he may us in those operations, registration numbers of aircraft that are inspected in accordance with an approved aircraft inspection program, registration numbers of the aircraft that are subject to a continuous airworthiness maintenance program, and maintenance items that are required by the Administrator under this Part, including time limitations or standards for determining overhaul or reference thereto, inspections and checks for airframes, aircraft engines, propellers, rotors, appliances, and emergency equipment, any authorized deviation from this part, and such other items as the Administrator may require or allow to meet any particular situation.

§ 135.15 Eligibility for certificate and operations specifications.

(a) To be eligible for an ATCO certificate and appropriate operations specifications, a person must—

(1) Be a citizen of the United States, a partnership of which each member is a citizen of the United States, or a corporation or association created or organized under the laws of the United States or any state, territory or possession of the United States, of which the president and two-thirds or more of the board of directors and other managing officers thereof are citizens of the United States and in which at least 75 percent of the voting interest is owned or controlled by citizens of the United States or one of its possessions; and

(2) Show, to the satisfaction of the Administrator, that he is able to conduct each kind of operation for which he seeks authorization in compliance with applicable regulations, and

(3) Hold such economic authority as may be required by the Civil Aeronautics Board.

However, no person holding a commercial operator operating certificate issued under Part 121 of this chapter is eligible for an ATCO certificate unless he shows to the satisfaction of the Administrator that his contract carriage business in large aircraft, having a maximum passenger capacity of more than 30 seats or a maximum payload capacity of more than 7,500 pounds, will not result directly or indirectly from his air taxi business.

(b) The Administrator may deny any applicant a certificate under this part if he finds—

(1) That an air carrier or commercial operator certificate under Part 121 or an ATCO certificate previously issued to the applicant was revoked; or

(2) That a person who was employed in a position similar to general manager, director of operations, director of maintenance, chief pilot, or chief inspector, or who has exercised control with respect to any ATCO certificate holder, air carrier, or commercial operator whose operating certificate has been revoked, will be employed in any of those positions or a similar position, or will be in control of or have a substantial ownership interest in the applicant, and that the person's employment or control contributed materially to the reasons for revoking that certificate.

§ 135.17 Amendment of certificate.

(a) The Administrator may amend an ATCO certificate—

(1) On his own initiative, under section 609 of the Federal Aviation Act of 1958 (49 U.S.C. 1429) and Part 13 of this chapter; or

(2) Upon application by the holder of that certificate.

(b) An application to amend an ATCO certificate is submitted on a form and in a manner prescribed by the Administrator. The applicant must file the application with the FAA District Office having jurisdiction over the area in which the applicant's principal business office is located at least 15 days before the date that he proposes for the amendment to become effective, unless a shorter filing period is approved by that office.

The Administrator grants a request to amend an ATCO certificate if he determines that safety in air commerce and the public interest so allow.

(d) Within 30 days after receiving a refusal to amend, the holder may petition the Administrator to reconsider the refusal.

§ 135.19 Amendment of operations specifications.

(a) The Administrator may amend any operations specifications issued under this part if:

(1) He determines that safety in air commerce requires that amendment; or

(2) Upon an application by the holder, the Administrator determines that safety in air commerce allows that amendment.

(b) An application to amend operations specifications is submitted on a form and in a manner prescribed by the Administrator. The applicant must file the application with the FAA District Office having jurisdiction over the area in which the applicant's principal business office is located at least 15 days before the date that he proposes for the amendment to become effective, unless a shorter filing period is approved by that office.

(c) Within 30 days after a notice of refusal to approve a holder's application for amendment, the holder may petition the Administrator to reconsider the refusal to amend.

(d) When the Administrator amends operations specifications, he gives notice in writing to the holder of a proposed amendment to the operations specifications, fixing a period of not less than 7 days within which the holder may submit written information, views, and arguments concerning the proposed amendment. After consideration of all relevant matter presented, the Administrator notifies the holder of any amendment adopted, or a rescission of the notice.

The amendment becomes effective not less than 30 days after the holder receives notice of the adoption of the amendment, unless the holder petitions the Administrator for reconsideration of the amendment. In such a case, the effective date of the amendment is stayed pending a decision by the Administrator. If the Administrator finds that there is an emergency requiring immediate action with respect to safety in air commerce that makes the provisions prescribed by this paragraph impracticable, or contrary to the public interest, he notifies the holder of an amendment to the operations specifications without giving the 7 days notice, and the amendment becomes effective when the holder receives it.

§ 135.21 Emergency operations.

(a) In an emergency involving the safety of persons or property, the holder of an ATCO operating certificate may deviate, to the extent required to meet that emergency, from the rules of this part relating to aircraft and equipment and weather minimums.

(b) In an emergency involving the safety of persons or property, the pilot in command may deviate from any rule of this part to the extent required to meet that emergency.

(c) Each person who, under the authority of this section, deviates from a rule of this part shall, within 10 days after the deviation, send to the FAA District Office having jurisdiction over the area in which the certificate holder's principal business office is located, a complete report of the aircraft operation involved, including a description of the deviation and reasons for it.

§ 135.23 Manual requirements.

(a) Each certificate holder, other than one who uses only himself as a pilot, shall prepare and keep current a manual setting forth the certificate holder's procedures and policies acceptable to the Administrator. This manual must be used by the certificate holder's flight, ground, and maintenance personnel in conducting its operations. However, the Administrator may authorize a deviation from this paragraph if he finds that because of the limited size of the operation, all or part of the manual is not necessary for guidnace of flight, ground, or maintenance personnel.

(b) Each manual shall be kept in a form that is acceptable to the Administrator and easy to revise and shall have the date of the last revision on each revised page. The manual must include:

(1) The identity of each person in a management capacity who is authorized to act for the certificate holder in his assigned area of responsibility and his duties, responsibilities and authority;

(2) Procedures for ensuring compliance with aircraft weight and balance limitations and, in the case of multiengine aircraft, for assertaining compliance with the requirements of § 135.157;

(3) Copies of the certificate holder's operations specifications or appropriate extracted information, including area of operations authorized, category and class of aircraft authorized, crew complements, and types of operations authorized (such as VFR, IFR, day, night, passenger cargo);

(4) Procedures for complying with accident notification requirements;

(5) Procedures for ensuring that the pilot in command knows that required airworthiness inspections have been made and that the aircraft has been approved for return to service in compliance with applicable maintenance requirements.

(6) Procedures for reporting and recording mechanical irregularities that come to the attention of the pilot in command before, during, and after completion of a flight.

(7) Procedures to be followed by the pilot in command for ascertaining that mechanical irregularities or defects reported for previous flights have been corrected or that correction has been deferred;

(8) Procedures to be followed by the pilot in command to obtain maintenance, preventive maintenance, and servicing of the aircraft at a place where prior arrangements have not been made by the operator, when the pilot is authorized to so act for the operator;

(9) Procedures in accordance with § 135.149 for the release for, or continuation of, flight if any item of equipment required for the particular type of operation becomes inoperative or unserviceable en route.

(10) Procedures for refueling aircraft, eliminating fuel contamination, protection from fire (including electrostatic protection), and supervising and protecting passengers during refueling;

(11) Procedures to be followed by the pilot in command in the briefing required by § 135.105 of this part;

(12) Flight locating procedures, when applicable;

(13) Procedures for ensuring compliance with emergency procedures, including a list of the functions assigned each category of required crewmembers in connection with emergency and emergency evacuation duties under § 135.113 of this Part.

(14) En route qualification procedures for pilots, when applicable;

(15) The approved aircraft inspection program, when applicable;

(16) Procedures and instructions to enable personnel to recognize hazardous materials, as defined in Title 49 CFR, Subchapter C, and if these materials are to be carried, stored, or handled, procedures and instructions for including:

(i) Accepting shipment of hazardous material as required by Title 49 CFR, Subchapter C, to assure proper packaging, marking, labeling, shipping documents, compatibility of articles, and instructions on the loading, storage, and handling thereof.

(ii) Notification and reporting hazardous material incidents as required by Title 49 CFR § 175.45.

(iii) Notification of the pilot in command when there are hazardous materials aboard, as required by Title 49 CFR § 175.33.

(17) Procedures for the evacuation of persons who may need the assistance of another person to move expeditiously to an exit in the event of an emergency; and

(18) Other procedures and policy instructions pertinent to the certificate holder's operations, that are issued by the certificate holder.

V 42 167 AUG 29 77 UMI

(c) Each certificate holder shall maintain at least one copy of the manual at its principal operations base.

(d) The manual must not be contrary to any applicable Federal regulation, foreign regulation applicable to the certificate holder's operations in foreign countries, or the certificate holder's operations specifications, or operating certificate.

(e) A copy of the manual, or appropriate portions of the manual (and changes and additions thereto) shall be made available to maintenance personnel by the certificate holder and furnished to:

(1) Its ground operations personnel;

(2) Its crewmembers; and

(3) Representatives of the Administrator assigned to the certificate holder.

(f) Each person to whom a manual or appropriate portions of it are furnished under paragraphs (1) and (2) of paragraph (e) of this section shall keep it up to date with the changes and additions furnished to him.

(g) Except as provided in paragraph (h) of this section, each certificate holder shall carry appropriate parts of the manual on each aircraft when away from the principal base. The appropriate parts must be available for use of ground or flight personnel.

(h) If a certificate holder conducts inspections at specified stations where it keeps the approved inspection program manual, it is not required to carry the manual aboard the aircraft en route to those stations.

§ 135.25 Aircraft requirements.

(a) No certificate holder may operate an aircraft in operations to which this part applies unless that aircraft—

(1) Is registered as a civil aircraft of the United States and carries an appropriate and current airworthiness certificate issued under this chapter; and

(2) Is in an airworthy condition and meets the applicable airworthiness requirements of this chapter, including those relating to identification and equipment.

(b) Each certificate holder must have the exclusive use of at least one aircraft that meets the requirements for at least one kind of operation authorized in his operations specifications. In addition, for each kind of operation for which he does not have the exclusive use of an aircraft, he must have available for use under a written agreement (including arrangements for performing required maintenance) at least one aircraft that meets the requirements for that kind of operation. However, this paragraph does not prohibit the operator from using or authorizing the use of the aircraft for other than air taxi or commercial operations, nor require the certificate holder to have exclusive use of all aircraft that he uses.

(c) For the purposes of paragraph (b) of this section, a person has exclusive use of an aircraft if he has the sole possession, control, and use of it for flight, as owner, or has a written agreement (including arrangements for the performance or required maintenance), in effect when the aircraft is operated, giving him that possession, control, and use for at least 6 consecutive months.

§ 135.27 Business office and operations base.

(a) Each certificate holder shall maintain a principal business office.

(b) Each certificate holder shall, before establishing, or changing the location of any business office or operations base, except a temporary operations base, notify in writing the FAA District Office having jurisdiction over the area in which the certificate holder's principle business office is located.

(c) No certificate holder who establishes or changes the location of any business office or operations base, except a temporary operations base, may operate an aircraft in operations subject to this part unless he has complied with paragraph (b) of this section.

§ 135.29 Use of business names.

No certificate holder may operate an aircraft in operations subject to this part under a business name that is not on his ATCO certificate.

§ 135.31 Advertising.

No certificate holder may advertise or otherwise offer to perform operations subject to this part that are not authorized by his ATCO certificate and operations specifications.

§ 135.33 Area limitations on operations.

(a) No person may operate an aircraft in a geographical area that is not specifically authorized by appropriate operations specifications issued under this part.

(b) No person may operate an aircraft in a foreign country unless he is authorized to do so by that country.

§ 135.35 Termination of operations.

Within 30 days after a certificate holder ceases operations under this part, he shall surrender his operating certificate and operations specifications to the FAA District Office last having jurisdiction over these operations.

§ 135.37 Periodic financial status review.

(a) Each ATCO certificate holder shall permit the Administrator to review its financial status annually. Data made available to the Administrator for review must include:

(1) The latest fiscal reports that accurately reflect assets, liabilities, and net worth of the certificate holder;

(2) An itemization of liabilities more than 90 days past due on the applicable fiscal report, if any, showing each creditor's name and address, a description of the liability, and the amount and due date of the liability;

(3) A schedule of aviation insurance coverage in effect during the period covered by the fiscal report showing insurance companies, policy numbers, types, amounts, and periods of coverage, and special conditions, exclusions, and limitations;

(4) An itemization of claims in litigation or otherwise outstanding against the applicant, if any, on the date the financial information is submitted, and

(5) Profit and loss statement reflecting total operations for both the current and preceding reporting period.

§ 135.39 Management personnel required.

(a) Each certificate holder must have enough qualified management personnel in the following or equivalent positions to ensure safety in its operations:

(1) Director of operations.

(2) Chief pilot.

(3) Director of maintenance.

(b) Upon application by the certificate holder, the Administrator may approve different positions or numbers of positions than those listed in paragraph (a) of this section for a particular operation if the certificate holder shows that it can perform its operations safely under the direction of fewer or different categories of management personnel.

(c) Each certificate holder shall:

(1) Set forth the duties, responsibilities, and authority of the personnel required by this section in the manual required by § 135.23;

(2) List in the manual required by § 135.23 the name and address of the person or persons assigned to those positions; and

(3) Within 10 working days, notify the FAA District Office charged with the overall inspection of the certificate holder of any change made in the assignment of persons to the listed positions.

§ 135.41 Management personnel qualifications.

(a) No person may serve as director of operations unless he knows the contents of the manual required by § 135.23, the operations specifications, and the provisions of this Part and other pertinent regulations necessary to the proper performance of his duties and:

(1) Holds at least an airline transport pilot certificate, and has had at least three years of experience as pilot in command of aircraft operated under this Part, Part 121, or Part 127 of this chapter and;

(2) Has had at least three years of experience as director of operations with an ATCO certificate holder or air carrier or commercial operator operating under Part 121 or 127 of this chapter, or a position determined by the Administrator to be of comparable responsibility. However, the Administrator may grant a deviation from his requirement if he finds that the person has had equivalent aeronautical experience.

(b) No person may serve as chief pilot unless he:

(1) Knows the contents of the manual required by § 135.23, the operations specifications, and the provisions of this part necessary to the proper performance of his duties.

(2) Holds at least a current airline transport pilot certificate with appropriate ratings for at least one of the types of aircraft used; and

(3) Has had at least three years of experience as pilot in command of aircraft in operations under this Part, Part 121

or 127 of this chapter. However, the Administrator may grant a deviation from the requirement of this requirement if he finds that the person has had equivalent aeronautical experience.

(c) No person may serve as a Director of Maintenance unless he:

(1) Is familiar with the maintenance sections of the certificate holder's manual, operations specifications, and the Federal Aviation Regulations applicable to the specific operation.

(2) Has held a current mechanic certificate with both airframe and powerplant ratings for at least three years; and

(3) Has had at least three years of maintenance experience as a certificated mechanic on aircraft, including one year of current experience on the type of aircraft used in the certificate holder's operation, or at least three years of experience with a certificated airframe repair station, including one year in the capacity of approving aircraft for return to service; however, the Administrator may grant a deviation from the requirements of this subparagraph if he finds that the person has had equivalent aeronautical experience.

§ 135.43 Carriage of narcotic drugs, marihuana, and depresant or stimulant drugs or substances.

If the holder of a certificate issued under this part permits any aircraft owned or leased by that holder to be engaged in any operation that the certificate holder knows to be in violation of § 91.12(a) of this chapter, that operation is a basis for suspending or revoking the certificate.

§ 135.45 Crewmember certificate; international operations; application and issue.

(a) This section provides for the issuance of a crewmember certificate to United States citizens who are employed by ATCO certificate holders as flight crewmembers or crewmembers on United States registered aircraft engaged in international air commerce. The purpose of the certificate is to facilitate the entry and clearance of those crewmembers into ICAO contracting states. They are issued under Annex 9, as amended, to the Convention on International Civil Aviation.

(b) An application for a crewmember certificate is made on FAA Form 2116, "Application for Crewmember Certificate," to the FAA District Office having certificate responsibility for the ATCO certificate holder, by whom the applicant is employed. The certificate is issued on FAA Form 2116.1 "Crewmember Certificate."

(c) The holder of a certificate issued under this section, or the ATCO certificate holder by whom he is employed, shall surrender the certificate for cancellation at the nearest FAA District Office at the end of the holder's assignment in international air commerce with that carrier or operator.

Subpart B—Flight Operations

§ 135.47 General.

This subpart prescribes rules, in addition to those in Part 91 of this chapter, that apply to operations under this part.

§ 135.49 Recordkeeping requirements.

(a) Each certificate holder shall keep at his principal business office or at such other places as may be approved by the Administrator, and make available for inspection by the Administrator the following:

(1) His ATCO certificate;

(2) His operations specifications;

(3) A current list of the aircraft used or available for use by him in operations subject to this part and the operations for which each is equipped; and

(4) An individual record of each pilot used by him in operations subject to this part, including the following information:

(i) The full name of the pilot.

(ii) The pilot certificate (by type and number) and ratings that the pilot holds.

(iii) The pilot's aeronautical experience in sufficient detail to determine his qualifications to pilot aircraft in operations subject to this part.

(iv) The pilot's current duties and the date of his assignment to those duties.

(v) The effective date and class of the medical certificate that the pilot holds.

(vi) The date and result of each of the initial and recurrent proficiency tests and instrument and route checks required by this Part and the type of aircraft flown during that test or check.

(vii) The pilot's flight and duty time in sufficient detail to determine compliance with the flight and duty time limitations of this Part.

(viii) The pilot's check pilot authorization, if any.

(ix) Any action taken concerning the pilot's release from employment for physical or professional disqualification.

(x) The date of the completion of the initial phase and each recurrent phase of the training required by this part.

(b) Each certificate holder shall keep each record required by paragraph (a) (3) and (4) of this section for at least 12 months after it is made.

(c) For multiengine aircraft, each certificate holder is responsible for the preparation and accuracy of a load manifest in duplicate containing information concerning the loading of the aircraft. The manifest must be prepared before each takeoff and must include:

(1) The number of passengers;

(2) The total weight of the loaded aircraft;

(3) The maximum allowable takeoff weight for that flight;

(4) The center of gravity limits;

(5) The center of gravity of the loaded aircraft except, that the actual center of gravity need not be computed if the aircraft is loaded according to a loading schedule or other approved method that ensures that the center of gravity of the loaded aircraft is within approved limits. In such cases, an entry shall be made on the manifest indicating that the center of gravity is within limits in accordance with an identified loading schedule.

(6) Registration number of the aircraft or flight number;

(7) The origin and destination; and

(8) Identification of crew members and their crew position assignments.

(d) The pilot in command of an aircraft for which a load manifest is required to be prepared shall carry a copy of the completed load manifest in the aircraft to its destination and arrange at the takeoff airport for a copy to be mailed to the certificate holder or retained in a suitable place at the airport of takeoff until the flight is completed. The certificate holder shall keep copies of completed load manifests for at least 30 days at its principal operations base, or at another location used by it and approved by the Administrator.

§ 135.51 Flight Information: facilities and services.

(a) Before beginning a flight, each pilot in command shall obtain all available current reports or information on airport conditions and irregularities of navigation facilities that may affect the safety of the flight.

(b) During the flight, the pilot in command shall obtain any additional available information on meterological conditions and irregularities or facilities and services that may affect the safety of the flight.

§ 135.53 Reporting of mechanical irregularities.

(a) Each certificate holder shall provide a maintenance log for the use of flight and maintenance personnel in recording and correcting mechanical irregularities.

(b) Each person who takes action in the case of a reported or observed failure or malfunction of an airframe, powerplant, propeller, rotor, or appliance, shall record that action in the aircraft maintenance log.

(c) Before each takeoff, the pilot in command shall ascertain the status of each irregularity entered in the maintenance log at the end of the preceding landing and that corrective action has been taken, if required.

(d) After each landing, the pilot in command shall enter or have entered in the maintenance log of the aircraft each defect or mechanical irregularity that comes to his attention during flight time as that term is defined in Part 1 of this chapter.

(e) Each certificate holder shall have a procedure for keeping adequate copies of the record required in paragraphs (a), (b), (c) and (d) of this section in the aircraft for access by flight and maintenance personnel and shall include that procedure in the manual required by § 135.23.

V 42 167 AUG 29 77 UMI

§ 135.55 Reporting potentially hazardous meteorological conditions and irregularities of communications or navigation facilities.

Whenever a pilot encounters a potentially hazardous meteorological condition or an irregularity in a ground communications or navigational facility in flight, the knowledge of which he considers essential to the safety of other flights, he shall notify an appropriate ground radio station as soon as practicable and request that the information be disseminated.

§ 135.57 Restriction or suspension of operations: continuation of flight in an emergency.

(a) During operations under this part, if a certificate holder or pilot in command knows of conditions, including airport and runway conditions, that are a hazard to safe operations, the certificate holder or pilot in command, as the case may be, shall restrict or suspend operations as necessary until those conditions are corrected.

(b) No pilot in command may allow a flight to continue toward any airport of intended landing under the conditions set forth in paragraph (a) of this section, unless, in the opinion of the pilot in command, there is no safer procedure. In that event, the continuation toward that airport is an emergency situation as set forth in § 135.21.

§ 135.59 Airworthiness check.

The pilot in command may not begin a flight unless he determines that the airworthiness inspections required by § 91.169 of this chapter, or § 135.341, whichever is applicable, have been made.

§ 135.61 Inspections and tests.

Each certificate holder and each person employed by the certificate holder shall allow the Administrator, at any time or place, to make inspections or tests (including en route inspections) to determine the holder's compliance with the Federal Aviation Act of 1958, applicable regulations, his ATCO certificate, and his operations specifications.

§ 135.63 Inspectors credentials: admission to pilots' compartment: forward observer's seat.

(a) Whenever, in performing his duties of conducting an inspection, an inspector of the Federal Aviation Administration presents an Aviation Safety Inspector credential, FAA Form 110A, to the pilot in command of an aircraft operated by the ATCO certificate holder he must be given free and uninterrupted access to the pilot compartment of that aircraft.

(b) A forward observer's seat on the flight deck, or forward passenger seat with appropriate communications equipment nearby, must be provided for use by the Administrator while conducting en route inspections. The location of the seat and communications equipment, with respect to its suitability for use in conducting en route inspections, is determined by the Administrator.

§ 135.65 Responsibility for operational control.

Each certificate holder is responsible for operational control (the exercise of authority over initiating, conducting, or terminating a flight operation) and shall list, in the manual required by § 135.23, each person authorized by it to exercise operational control.

§ 135.67 Flight locating requirements.

(a) Each certificate holder must have procedures established for locating each flight, for which an FAA flight plan is not filed, that:

(1) Provide the certificate holder with at least the information required to be included in a VFR flight plan;

(2) Provide for timely notification of an FAA facility or search and rescue facility, if an aircraft is overdue or missing; and

(3) Provide the certificate holder with the location, date, and estimated time for reestablishing radio or telephone communications, if the flight will operate in an area where radio communications cannot be maintained.

(b) Flight locating information shall be retained at the certificate holder's principal place of business, or at such other places as may be designated by the certificate holder in the flight locating procedures, until the completion of the flight.

(c) Each certificate holder shall furnish the representative of the Administrator assigned to it with a copy of its flight locating procedures and any changes or additions thereto, unless those procedures are included in a manual required to be maintained under this part.

§ 135.69 Informing personnel of operational information and appropriate changes.

(a) Each certificate holder shall inform each person in his employment of the operations specifications that apply to his duties and responsibilities and shall make available to each of the pilots the following materials in current form:

(1) Airman's Information Manual (Airman's Guide in Alaskan and Pacific Regions) or a commercial publication that contains the same information.

(2) This part and Part 91 of this chapter.

(3) Aircraft Equipment Manuals, and Aircraft Owner's Manual, or Owner's or Flight Handbook.

(4) For foreign operations, the International Flight Information Manual or a commercial publication that contains the same information concerning the pertinent operational and entry requirements of the foreign country or countries involved.

(b) Each certificate holder shall keep its operations personnel informed of each change in equipment and operating procedures, including each known change in the use of navigation aids, airports, air traffic control procedures and regulations, local airport traffic control rules, and known hazards to flight, including icing and other potentially hazardous meteorological conditions and irregularities in ground and navigation facilities.

§ 135.71 Operating information required.

(a) The operator of an aircraft must provide the following materials, in current and appropriate form, accessible to the pilot at the pilot station, and the pilot shall use them:

(1) A cockpit checklist.

(2) In the case of multiengine aircraft or aircraft with retractable landing gear, an emergency cockpit checklist containing the procedures required by paragraph (c) of this section, as appropriate.

(3) Pertinent aeronautical charts.

(4) For IFR operations, each pertinent navigational en route, terminal area, and approach and letdown chart.

(5) In case of multiengine aircraft, one-engine-inoperative climb performance data and if the aircraft is approved for use in IFR or over the top operations, that data must be sufficient to enable the pilot to determine compliance with § 135.151(a)(2).

(b) Each cockpit checklist required by paragraph (a)(1) of this section must contain the following procedures: (1) Before starting engines; (2) Before takeoff; (3) Cruise; (4) Before landing; (5) After landing; (6) Stopping engines.

(c) Each emergency cockpit checklist required by paragraph (a)(2) of this section must contain the following procedures, as appropriate:

(1) Emergency operation of fuel, hydraulic, electrical, and mechanical systems.

(2) Emergency operation of instruments and controls.

(3) Engine inoperative procedures.

(4) Any other emergency procedures necessary for safety.

§ 135.73 Carriage of persons without compliance with the passenger-carrying provisions of this part.

The following persons may be carried aboard an aircraft without complying with the passenger-carrying requirements of this part:

(a) A crewmember.

(b) A person traveling to or from a crewmember or maintenance assignment, when the operator of the aircraft finds that other means of transportation are not practicable.

(c) A person necessary for the safe handling of animals on the aircraft.

(d) A person necessary for the safe handling of hazardous materials (as defined in Subchapter C of Title 49 CFR).

(e) A person performing duty as a security or honor guard accompanying a shipment made by or under the authority of the U.S. Government.

(f) A military courier or a military route supervisor carried by a military cargo contract air carrier or commercial operator in operations under a military cargo contract, if that carriage is specifically authorized by the appropriate military service.

(g) An authorized representative of the Administrator conducting an en route inspection.

(h) A person, authorized by the Administrator, who is performing a duty connected with a cargo operation of the certificate holder.

§ 135.75 Carriage of cargo including carry-on baggage.

No person may carry cargo in or on any aircraft unless—

(a) It is carried in an approved cargo rack, bin, or compartment installed in or on the aircraft;

(b) It is secured by means approved by the Administrator; or

(c) It is carried in accordance with each of the following:

(1) It is properly secured by a safety belt or other tie-down having enough strength to eliminate the possibility of shifting under all normally anticipated flight and ground conditions.

(2) It is packaged or covered to avoid possible injury to occupants.

(3) It does not impose any load on seats or on the floor structure that exceeds the load limitation for those components.

(4) It is not located in a position that obstructs the access to, or use of, any required emergency or regular exit, or the use of the aisle between the crew and the passenger compartment, or located in a position that obscures any passenger's view of the "seat belt" sign "no smoking" sign, or any required exit sign, unless an auxiliary sign or other approved means for proper notification of the passengers is provided.

(5) It is not carried directly above seated occupants.

(6) It is stowed in accordance with the provisions of this section for takeoff and landing.

(7) In the case of cargo only operations, paragraph (c)(4) of this section does not apply if the cargo is loaded in such a manner that at least one emergency or regular exit is available to provide all occupants of the aircraft a means of unobstructed exit from the aircraft in the event of an emergency.

(d) Each passenger seat under which baggage is permitted to be stowed shall be fitted with a means to prevent articles of baggage stowed under it from sliding forward under crash impacts severe enough to induce the ultimate inertia forces specified in the emergency landing condition regulations under which the aircraft was type certificated.

(e) When cargo is carried in cargo compartments that are designed to require the physical entry of a crewmember to extinguish any fire that may occur during flight, the cargo must be loaded in such a manner as to allow a crewmember to effectively reach all parts of the compartment with the contents of a hand fire extinguisher.

§ 135.77 Requirements for use of oxygen.

(a) No person may operate any aircraft—

(1) At cabin pressure altitudes between 10,000 feet (MSL) and 12,000 feet (MSL) inclusive, unless the required minimum flight crew is provided with and uses supplemental oxygen for that part of the flight at those altitudes that is of more than 30 minutes duration;

(2) At cabin pressure altitudes above 12,000 feet (MSL), unless the required minimum flight crew is provided with and uses supplemental oxygen during the entire flight time at those altitudes; and

(3) At cabin pressure altitudes above 12,000 feet (MSL), unless each passenger of the aircraft is provided with supplemental oxygen.

(b) Pressurized cabin aircraft. No person may operate an aircraft with a pressurized cabin—

(1) At flight altitudes above flight level 250, unless at least a 10-minute supply of supplemental oxygen required to satisfy paragraph (a) of this section, is available for each occupant of the aircraft for use in the event that a descent is necessitated by loss of cabin pressurization; and

(2) Unless one pilot at the controls of the airplane is wearing and using an oxygen mask that is secured and sealed, and that either supplies oxygen at all times or automatically supplies oxygen whenever the cabin pressure altitude of the airplane exceeds 12,000 feet (MSL), except that neither pilot need wear and use an oxygen mask while at or below flight level 410 if there are two pilots at the controls and each pilot has a quick-donning type of oxygen mask that can be placed on the face with one hand from the ready position within five seconds, supplying oxygen and properly secured and sealed.

(3) Notwithstanding paragraphs (1) and (2) of this paragraph, if for any reason at any time it is necessary for one pilot to leave his station at the controls of the aircraft when operating at flight altitudes above flight level 250, the remaining pilot at the controls shall put on and use his oxygen mask until the other pilot has returned to his station.

§ 135.79 Oxygen for medical use by passengers.

(a) Except as provided in paragraphs (d) and (e) of this section, no certificate holder may permit the carriage or operation of equipment for the storage, generation or dispensing of medical oxygen unless the unit to be carried is constructed so that all valves, fittings and gauges are protected from damage during such carriage or operation and unless the following requirements are met:

(1) The equipment must be: (i) Of an approved type or in conformity with the manufacturing, packaging, marking, labeling, and maintenance requirements of Title 49 CFR Parts 171, 172, and 173, except § 173.24(a)(1);

(ii) When owned by the certificate holder, maintained in accordance with the certificate holder's approved maintenance program;

(iii) Free of flammable contaminants on all exterior surfaces; and

(iv) Appropriately secured.

(2) When the oxygen is stored in the form of a liquid, the equipment must have been under the certificate holder's approved maintenance program since its purchase new or since the storage container was last purged.

(3) When the oxygen is stored in the form of a compressed gas as defined in Title 49 CFR § 173.300(a)—

(i) When owned by the certificate holder, it must be maintained under his approved maintenance program; and

(ii) The pressure in any oxygen cylinder must not exceed the rated cylinder pressure.

(4) The pilot in command must be advised when the equipment is on board, and when it is intended to be used.

(5) The equipment must be stowed, and each person using the equipment must be seated, so as not to restrict access to or use of any required emergency or regular exit, or of the aisle in the passenger compartment.

(b) No person may smoke and no certificate holder may allow any person to smoke within 10 feet of oxygen storage and dispensing equipment carried in accordance with paragraph (a) of this section.

(c) No certificate holder may allow any person other than a person trained in the use of medical oxygen equipment to connect or disconnect oxygen bottles or any other ancillary component while any passenger is aboard the aircraft.

(d) The provisions of paragraph (a)(1)(i) of this section which prohibit the carriage or operation of equipment for the storage, generation or dispensing of medical oxygen unless that oxygen equipment is of an approved type or in conformity with the manufacturing, packaging, marking, labeling and maintenance requirements of Title 49 CFR Parts 171, 172, and 173, except § 173.24(a)(1), do not apply when that equipment is furnished by a professional or medical emergency service for use on board an aircraft in a medical emergency when no other practical means of transportation (including any other properly equipped certificate holder) is reasonably available and the person carried under the medical emergency is accompanied by a person trained in the use of medical oxygen.

(e) Each certificate holder who, under the authority of this section, deviates from the provisions of paragraph (a)(1)(i) under a medical emergency shall, within 10 days after the deviation, send to the certificate holding FAA Flight Standards District Office a complete report of the operation involved, including a description of the deviation and the reasons for it.

§ 135.81 Autopilot: minimum altitudes for use.

(a) En route operations. Except as provided in paragraphs (b) and (c) of this section, no person may use an automatic pilot en route, including climb and descent, at an altitude above the terrain that is less than twice the maximum altitude loss specified in the aircraft flight manual for a malfunction of the automatic pilot under cruise conditions, or less than 500 feet, whichever is higher.

(b) Approaches. When using an instrument approach facility, no person

V 42 167 AUG 29 77 UMI

may use an automatic pilot at an altitude above the terrain that is less than twice the maximum altitude loss specified in the flight manual for a malfunction of the automatic pilot under approach conditions, or less than 50 feet below the approved minimum descent altitude or decision height for the facility, whichever is higher, except—

(1) When reported weather conditions are less than the basic VFR weather conditions in § 91.105 of this chapter, no person may use an automatic pilot with an approach coupler for ILS approaches at an altitude above the terrain that is less than 50 feet higher than the maximum altitude loss specified in the flight manual for the malfunction of the automatic pilot with approach coupler under approach conditions; and

(2) When reported weather conditions are equal to or better than the basic VFR minimums in § 91.105 of this chapter, no person may use an automatic pilot with an approach coupler for ILS approaches at an altitude above the terrain that is less than the maximum altitude loss specified in the flight manual for the malfunction of the automatic pilot with approach coupler under approach conditions, or 50 feet, whichever is higher.

(c) Notwithstanding paragraphs (a) or (b) of this section, the Administrator may issue operations specifications to allow the use, to touchdown, of an approved flight control guidance system with automatic capability, in any case in which—

(1) The system does not contain any altitude loss (above zero) specified in the flight manual for malfunction of the automatic pilot with approach coupler; and

(2) He finds that the use of the system to touchdown will not otherwise affect the safety standards required by this section.

(d) This section does not apply to operations conducted in rotorcraft under the rules of this part.

§ 135.83 Airmen: limitations on use of services.

(a) No certificate holder may use the services of any person as an airman unless the person performing those services:

(1) Holds an appropriate and current airman certificate issued by the FAA;

(2) Has the required appropriate and valid airman and medical certificate in his possession while engaged in operations under this part; and

(3) Is qualified, under this chapter, for the operation for which he is to be used.

§ 135.85 Aircraft and facilities for recent flight experience.

Each certificate holder shall provide aircraft and facilities to enable each of its pilots to maintain and demonstrate his ability to conduct all operations for which the pilot is authorized.

§ 135.87 Composition of flightcrew.

(a) No certificate holder may operate an aircraft with less than the minimum flight crew specified in the aircraft operating limitations or the Aircraft Flight Manual for that aircraft and required by this part for the kind of operation being conducted.

(b) No certificate holder may operate an aircraft without a second in command if that airplane has a passenger seating configuration, excluding any pilot seat, of ten seats or more.

§ 135.89 Second in command required in IFR conditions.

Except as provided in §§ 135.91 and 135.93 no person may operate an aircraft carrying passengers in IFR conditions, unless there is a second in command in the aircraft.

§ 135.91 Exception to second in command requirement: limited IFR conditions.

Unless two pilots are required by this chapter for operations under VFR, the pilot in command of an aircraft carrying passengers may:

(a) If unforecast weather conditions that are marginal or below the VFR minimums of this part are encountered while en route on a flight which was started and intended to be conducted under the VFR or VFR over-the-top requirements of this part (except for limited IFR operation as permitted under paragraphs (b) (1) and (2) of this section), operate an aircraft in IFR conditions without a second in command if weather reports and forecasts indicate that he will be able to return to VFR or VFR over-the-top operation before reaching a point 15 miles from the destination airport; and

(b) If weather reports and forecasts indicate that the weather along the planned flight route allows flight under the VFR or VFR over-the-top requirements of this part beginning at a point no more than 15 miles from the departure airport and extending to a point within 15 miles of the destination airport, without a second in command:

(1) Take off from the departure airport in IFR conditions and fly in IFR conditions to a point no more than 15 miles from the departure airport; and

(2) Make an IFR approach and land at the destination airport in IFR conditions if:

(i) The weather conditions allow flight, and he flies, clear of the clouds until reaching the prescribed initial approach altitude over the final approach facility; or

(ii) The approach is made with the use of radar as provided in Part 91 of this chapter.

§ 135.93 Exception to second in command requirement: approval for use of autopilot system.

(a) Unless two pilots are required by this chapter for operations under VFR, a person may operate an aircraft without a second in command if it is equipped with an operative autopilot system and the use of that system is authorized by appropriate operations specifications.

(b) The certificate holder may apply for an amendment of his operations specifications to authorize the use of an autopilot system in place of a second in command. The application must contain the make, model, and registration number of each aircraft in which an autopilot is installed and the make and model of each autopilot installed.

(c) The Administrator issues an amendment to the operations specifications authorizing the use of an autopilot system, in place of a second in command, if:

(1) The autopilot is capable of operating the aircraft controls to maintain flight and maneuver it about the three axes; and

(2) The certificate holder shows, to the satisfaction of the Administrator, that operations using the autopilot system can be conducted safely and in compliance with this part.

The amendment contains any conditions or limitations on the use of the autopilot system that the Administrator determines are needed in the interest of safety.

§ 135.95 Flight attendant crewmember requirement.

No certificate holder may operate an aircraft that has a passenger seating capacity of more than 19 unless there is a flight attendant crewmember on board the aircraft.

§ 135.97 Pilot in command or second in command: designation required.

Each certificate holder shall designate a: (a) Pilot in command for each flight; and

(b) Second in command for each flight requiring two pilots.

§ 135.99 Second in command required in Category II operations.

No person may operate an aircraft in a Category II operation unless there is a second in command of the aircraft.

§ 135.101 Passenger occupancy of pilot seat.

No certificate holder may operate an aircraft type certificated after October 15, 1971, that has a passenger seating configuration, excluding any pilot seat, for more than eight passengers if any person other than the pilot in command, a second in command, a company check airman, or an authorized representative of the Administrator, the National Transportation Safety Board, or the Post Office Department occupies a pilot seat.

§ 135.103 Manipulation of controls.

No pilot in command may permit any person to manipulate the flight controls of an aircraft during flight conducted under this part, nor may any person manipulate the controls during such flight unless he is:

(a) A qualified pilot employed by the certificate holder operating that aircraft; or

(b) An authorized safety representative of the Administrator who has the permission of the pilot in command, is qualified in the aircraft, and is checking flight operations.

§ 135.105 Briefing of passengers before flight.

(a) Before each takeoff each pilot in command of an aircraft carrying passengers shall ensure that all passengers have been orally briefed on:

(1) Smoking;

(2) Use of seat belts;

(3) The placement of seat backs in an upright position before takeoff and landing;

(4) Location and means for opening the passenger entry door and emergency exits;

(5) Location of survival equipment;

(6) If the flight involves extended overwater operation, ditching procedures and the use of required flotation equipment; and

(7) If the flight involves operations above 10,000 feet MSL, the normal and emergency use of oxygen;

(8) Location and operation of fire extinguishers.

(b) Before each takeoff the pilot in command shall ensure that each person who may need the assistance of another person to move expeditiously to an exit in the event of an emergency and his attendant, if any, has received a briefing as to the procedures to be followed in the event of an evacuation. The requirements of this paragraph do not apply to a person who has been given a briefing before a previous leg of a flight in the same aircraft.

(c) The oral briefing required by paragraph (a) of this section shall be given by the pilot in command or a member of the crew. It may be supplemented by printed cards for the use of each passenger containing:

(1) A diagram of, and method of operating the emergency exists; and

(2) Other instructions necessary for the use of emergency equipment on board the aircraft.

Each card used under this paragraph must be carried in the aircraft in locations convenient for the use of each passenger and must contain information that is appropriate to the aircraft on which it is to be used.

§ 135.107 Prohibition against carriage of weapons.

No person may, while on board van aircraft being operated by a certificate holder, carry on or about his person a deadly or dangerous weapon, either concealed or unconcealed. This section does not apply to:

(a) Officials or employees of a municipality or a State, or of the United States, who are authorized to carry arms; or

(b) Crewmembers and other persons authorized by the certificate holder to carry arms.

§ 135.109 Alcoholic beverages.

(a) No person may drink any alcoholic beverage aboard an aircraft unless the certificate holder operating the aircraft has served that beverage to him.

(b) No certificate holder may serve any alcoholic beverage to any person aboard its aircraft if that person appears to be intoxicated.

(c) No certificate holder may allow any person to board any of its aircraft if that person appears to be intoxicated.

(d) Each certificate holder shall report to the Administrator, within 5 days after its occurrence, any incident involving the refusal of any person to comply with paragraph (a) of this section, or any disturbance cause by a person who appears to be intoxicated aboard any of its aircraft.

§ 135.111 [Reserved]

§ 135.113 Emergency and emergency evacuation duties.

(a) Each certificate holder shall assign to each required crewmember for each type of aircraft as appropriate, the necessary functions to be performed in an emergency or in a situation requiring emergency evacuation. The certificate holder shall show that those functions can be practicably accomplished, and will meet any reasonably anticipated emergency including incapacitation of individual crewmembers or their inability to reach the passenger cabin because of shifting cargo in combination cargo-passenger aircraft.

(b) The certificate holder shall describe in the manual required under § 135.23 the functions of each category of required crewmembers assigned under paragraph (a) of this section.

Subpart C—Aircraft and Equipment

§ 135.115 Applicability.

This subpart prescribes aircraft and equipment requirements for operations under this part. The requirements of this subpart are in addition to the applicable aircraft and equipment requirements of Part 91 of this chapter. However, this part does not require the duplication of any equipment required by another part.

§ 135.117 General requirements.

(a) No person may operate an aircraft in operations to which this part applies unless that aircraft and its equipment meet the requirements of applicable regulations of this chapter.

(b) No person may operate an aircraft in operations to which this part applies, unless the required instruments and equipment in it have been approved and, for single engine aircraft, are in an operable condition.

(c) ATC transponder equipment must meet the performance and environmental requirements of any Class of TSO–C74b, or Class 1A or Class 1B of TSO–74c, as appropriate, except that the Administrator may approve the use of TSO–C74 or TSO–C74a equipment if the applicant submits data showing that such equipment meets the minimum performance standards of Class 1A or Class 1B of TSO–C74c, and the environmental conditions of the TSO under which it was manufactured.

§ 135.119 [Reserved]

§ 135.121 Aircraft proving tests.

(a) No certificate holder may operate a turbojet-powered airplane, or an aircraft for which two pilots are required by this chapter for operations under VFR, if it has not previously proved that aircraft or an aircraft of the same make and similar design in any operation to which this part applies unless, in addition to the aircraft certification tests, at least 25 hours of proving tests acceptable to the Administrator have been flown by that certificate holder including:

(1) Five hours of night time, if night flights are to be authorized;

(2) Five instrument approach procedures under simulated or actual instrument weather conditions, if IFR flights are to be authorized; and

(3) Entry into a representative number of en route airports as determined by the Administrator.

(b) No certificate holder may carry passengers in an aircraft during proving tests, except those needed to make the tests and those designated by the Administrator to observe the tests. However, pilot flight training may be conducted during the proving tests.

(c) For the purposes of paragraph (a) of this section, an aircraft is considered to be materially altered in design if the alterations include:

(1) The installation of powerplants other than those of a type similar to those with which it is certificated; or

(2) Alterations to the aircraft or its components that materially affect flight characteristics.

(d) This section does not apply to an aircraft of the same make and similar design as an aircraft operated more than 25 hours under this Part by the certificate holder before the date on which this section becomes effective with respect to his operation.

(e) The Administrator may authorize deviation from this section if he finds that special circumstances make full compliance with this section unnecessary.

§ 135.123 Dual controls required.

No person may operate an aircraft in operations requiring two pilots unless that aircraft is equipped with functioning dual controls. However, if the aircraft type certification operating limitations do not require two pilots, a throw-over control wheel may be used in place of two control wheels.

§ 135.125 Equipment requirements: general.

No person may operate an aircraft unless it is equipped with:—(a) A sensitive altimeter that is adjustable for barometric pressure;

(b) Heating or deicing equipment for each carburetor or, in the case of a pressure carburetor, an alternate air source; and

(c) In the case of turbojet-powered airplanes, in addition to two gyroscopic bank-and-pitch indicators (artificial horizons) for use at the pilot stations, a third such instrument that:

(1) Is powered from a source independent of the electrical generating system;

(2) Continues reliable operation for a minimum of 30 minutes after total failure of the electrical generating system;

V 4216 7 A AUG 29 77 UMI

(3) Operates independently of any other attitude indicating system;

(4) Is operative without selection after total failure of the electrical generating system;

(5) Is located on the instrument panel in a position that will make it plainly visible to, and useable by, any pilot at his station; and

(6) Is appropriately lighted during all phases of operation.

(d) In the case of turbojet-powered airplanes having a passenger seating capacity, excluding any pilot seat, of 10 seats or more;

(1) A lockable door between the pilot and passenger compartment.

(2) An approved cockpit voice recorder that—

(i) Is installed in accordance with the requirements of Part 25 of this chapter.

(ii) Is installed and operated continuously from the use of the check list prior to flight to completion of the final check at the termination of the flight; and

(iii) Has erasure features that may be used so that any time during the operation of the recorder, information recorded more than 30 minutes earlier may be erased or otherwise obliterated.

(iv) In the event of an accident, or occurrence requiring immediate notification of the NTSB which results in termination of the flight, the certificate holder shall keep the recorded information for at least 60 days or, if requested, by the Administrator or the Board, for a longer period. Information obtained from the record may be used to assist in determining the cause of accidents or occurrences in the connection with investigations. The Administrator does not use the record in any civil penalty or certificate action.

(3) An approved Flight Data Recorder from which time, airspeed, vertical acceleration and heading may be determined within the ranges, accuracies, and recording intervals specified in § 37.150 of this chapter and for which the following requirements must be met:

(i) Whenever a flight recorder required by this section is installed, it must be operated continuously from the instant the airplane begins the takeoff roll until it has completed the landing roll at an airport.

(ii) Each certificate holder shall keep the record data prescribed in paragraph (e)(2)(iv) of this section until the airplane has been operated a total of 25 hours of the operating time specified in paragraph (d)(2)(ii). A total of one hour of recorded data may be erased for the purpose of testing the flight recorder system. Any erasure made in accordance with this paragraph must be of the oldest recorded data accumulated at the time of the testing. Except as provided in paragraph (e) of this section, no record need be kept more than 60 days.

(iii) In the event of an accident or occurrence that requires immediate notification of the NTSB under part 830 of its regulations, which result in termination of the flight, the certificate holder shall keep the recorded data required by paragraph (d)(2)(ii) of this section at least 60 days or, if requested by the Board or the Administrator, for a longer period.

(iv) Each flight recorder must be installed in accordance with Part 25 of this chapter

(v) Each flight recorder required by this Part must have an approved device to assist in locating that recorder under water; and

(vi) Each recorder required by this section must record data from which the time of each radio transmission either to or from ATC can be determined.

(4) A Ground Proximity Warning System that meets the performance and environmental standards of § 37.201 and for which the following requirements must be met:

(i) For the Ground Proximity Warning System required by this section, the Airplane Flight Manual shall contain appropriate procedures for:

(A) The use of the equipment, (B) proper flight crew action with respect to the equipment, (C) deactivation for planned abnormal and emergency condition, (E) an outline of all input sources that must be operating.

(ii) No person may deactivate a Ground Proximity Warning System required by this section, except in accordance with procedures contained in the Airplane Flight Manual; and

(iii) Whenever a Ground Proximity Warning System is deactivated, an entry shall be made in the airplane maintenance record that includes the date and time of deactivation.

(e) In the case of aircraft having a passenger seating capacity of more than 19, a public address system and a crewmember interphone system, approved in accordance with § 21.205 of this chapter, which meet the requirements of §§ 121.318 and 121.319 respectively, of this chapter.

(f) In the case of turbine powered aircraft, such other equipment as the Administrator may require.

§ 135.127 Fire extinguishers: passenger-carrying aircraft.

No person may operate an aircraft carrying passengers unless it is equipped with hand fire extinguishers of an approved type for use in crew and passenger compartments in accordance with the following:

(a) The type and quantity of extinguishing agent must be suitable for the kinds of fires likely to occur.

(b) At least one hand fire extinguisher must be provided and conveniently located on the flight deck for use by the flight crew

(c) At least one hand fire extinguisher must be conveniently located in the passenger compartment of each aircraft having a passenger seating capacity of at least 6 but less than 31 passengers.

§ 135.129 Oxygen equipment requirements.

(a) No person may operate an aircraft in operations to which this part applies unless it is equipped with—

(1) A pressure demand oxygen breathing system capable of supplying the flight crewmembers the minimum mass flow of oxygen required for each flight crewmember to maintain, during inspiration, a minimum of 83.8 mm, HG, oxygen partial pressure when breathing 20 liters per minute BTPS (Body temperature conditions 37°c, ambient pressure, saturated air) at cabin pressure altitudes in excess of flight level 410; and

(2) Enough oxygen dispensers and oxygen to supply the oxygen required by § 135.77 when flying—

(i) At cabin pressure altitudes above 10,000 feet (MSL), up to and including 12,000 feet (MSL), oxygen to at least one occupant of the aircraft other than the pilots, for that part of the flight at those altitudes that is of more than 30 minutes duration; and

(ii) At cabin pressure altitudes above 12,000 feet (MSL), oxygen to each occupant of the aircraft, for one hour unless, at all times during flight above that altitude, the aircraft can safely descend to 14,000 feet (MSL) within 4 minutes, in which case only a 30-minute supply is required.

(b) The equipment required by this section must have a means—

(1) To enable the flight crew to readily determine, in flight, the amount of oxygen available in each source of supply and whether the oxygen is being delivered to the dispensing units; or

(2) In the case of individual dispensing units, to enable each user to make those determinations with respect to his oxygen supply and delivery; and

(3) To allow the flightcrew to use undiluted oxygen at their discretion.

§ 135.131 Equipment requirements: carrying passengers under VFR at night or under VFR over-the-top conditions.

No person may operate an aircraft carrying passengers under VFR at night or under VFR over-the-top, unless it is equipped with:

(a) A gyroscopic rate-of-turn indicator combined with a slip-skid indicator;

(b) A gyroscopic bank-and-pitch indicator;

(c) A gyroscopic direction indicator;

(d) A generator or generators able to supply all probable combinations of continuous inflight electrical loads for required equipment and for recharging the battery; and

(e) In the case of night flights—

(1) An anticollision light system;

(2) Instrument lights to make all instruments, switches, and gauges easily readable, the direct rays of which are shielded from the pilot's eyes; and

(3) A flashlight having at least two size "D" cells or equivalent. For the purposes of paragraph (d) of this section, a continuous electrical load includes one that draws current continuously during flight, such as radio equipment, electrically driven instruments, and lights, but does not include occasional intermittent loads.

§ 135.133 Radio and navigational equipment: carrying passengers under VFR at night or under VFR over-the-top.

(a) No person may operate an aircraft carrying passengers under VFR at night, or under VFR over-the-top, unless that aircraft has two-way radio communications equipment able, at least in flight, to transmit to, and receive from, ground facilities 25 miles away.

(b) No person may operate an aircraft carrying passengers under VFR at night, or under VFR over-the-top, unless it has radio navigational equipment able to receive radio signals from the ground facilities to be used.

§ 135.135 Equipment requirements: aircraft carrying passengers under IFR.

No person may operate an aircraft under IFR, carrying passengers, unless it has—

(a) A vertical speed indicator;

(b) A free-air temperature indicator;

(c) A heated pitot tube for each airspeed indicator;

(d) A power failure warning device or vacuum indicator to show the power available for gyroscopic instruments from each power source:

(e) An alternate source of static pressure for the altimeter and the airspeed and vertical speed indicators;

(f) In the case of a single-engine aircraft a generator or generators able to supply all probable combinations of continuous inflight electrical loads for required equipment and for recharging the battery;

(g) In the case of multiengine aircraft at least two generators each of which is on a separate engine, of which any combination of one-half of the total number are rated sufficiently to supply the electrical loads of all required instruments and equipment necessary for safe emergency operation of the aircraft; and

(h) Two independent sources of energy (with means of selecting either), of which at least one is an engine-driven pump or generator, each of which is able to drive all gyroscopic instruments and installed so that failure of one instrument or source does not interfere with the energy supply to the remaining instruments or the other energy source, unless, in the case of a single-engine aircraft, the rate-of-turn indicator has a source of energy separate from the bank and pitch and direction indicators. For the purpose of paragraph (f) of this section, a continuous electrical load includes one that draws current continuously during flight, such as radio equipment, electrically driven instruments, and lights, but does not include occasional intermittent loads. For the purpose of paragraph (h) of this section, in the case of a multiengine aircraft, each engine-driven source of energy must be on a different engine.

§ 135.137 Radio and navigational equipment: under extended overwater or IFR operations.

(a) No person may operate a turbojet airplane having a passenger seating capacity, excluding any pilot seat, of 10 seats or more, or a mutilengine airplane carrying passengers as a "Commuter Air Carrier" as defined in Part 298 of this title, under IFR or in extended overwater operations unless it has at least the following radio communications and navigational equipment appropriate to the facilities to be used which are capable of transmitting to, and receiving from, at any place on the route to be flown, at least one ground facility:

(1) Two transmitters; (2) two microphones; (3) two headsets on one headset and one speaker, (4) a marker beacon receiver, (5) two independent VOR receivers for navigation, (6) two independent receivers for communications.

(b) No person may operate an aircraft other than that specified in paragraph (a) of this section, under IFR or in extended overwater operations unless it has at least the following radio communication and navigational equipment appropriate to the facilities to be used and which are capable of transmitting to, and receiving from, at any place on the route; at least one ground facility:

(1) A transmitter, (2) two microphones, (3) two headsets or one headset and one speaker, (4) a marker beacon receiver, (5) two independent receivers for navigation, (6) two independent receivers or communications, (7) for extended overwater operations only, an additional transmitter

(c) For the purpose of paragraphs (a)(5) and (6), and (b)(5) and (6) of this section, a receiver is independent if the function of any part of it does not depend on the functioning of any part of another receiver. However, a receiver that can receive both communications and navigational signals may be used in place of a separate communications receiver and a separate navigational signal receiver.

§ 135.139 Emergency equipment: extended overwater operations.

(a) No person may operate an aircraft in extended overwater operations unless it carries, installed in conspicuously marked locations easily accessible to the occupants in the event of a ditching, the following equipment:

(1) A life preserver equipped with an approved survivor locator light, for an approved flotation means, for each occupant of the aircraft. The life preserver or other flotation means must be easily accessible to each seated occupant. If a flotation means other than a life preserver is used, it must be readily removable from the aircraft.

(2) Enough life rafts (with proper buoyancy) to carry all occupants of the aircraft, and at least the following equipment for each raft clearly marked for easy identification—

(i) One canopy (for sail, sunshade, or for rain catcher),

(ii) One radar reflector (or similar device),

(iii) One life raft repair kit;

(iv) One bailing bucket;

(v) One signaling mirror;

(vi) One police whistle;

(vii) One raft knife;

(viii) One CO_2 bottle for emergency inflation;

(ix) One inflation pump;

(x) Two oars;

(xi) One 75-foot retaining line;

(xi) One magnetic compass;

(xiii) One dye marker;

(xiv) One flashlight having at least two size "D" cells or equivalent;

(xv) At least one approved pyrotechnic signaling device;

(xvi) A two-day supply of emergency food rations supplying at least 1,000 calories a day for each person;

(xvii) One sea water desalting kit for each two persons the raft is rated to carry, or two pints of water for each person the raft is rated to carry;

(xviii) One fishing kit; and

(xix) One book on survival appropriate for the area in which the aircraft is operated.

(b) No person may operate an aircraft in extended overwater operations unless there is attached to one of the life rafts required by paragraph (a) of this section, a survival type emergency locator transmitter that meets the applicable requirements of § 37.200 of this chapter. Batteries used in this transmitter must be replaced (or recharged, if the battery is rechargeable) when the transmitter has been in use for more than 1 cumulative hour, and also when 50 percent of their useful life (or for rechargeable batteries, 50 percent of their useful life of charge), as established by the transmitter manufacturer under § 37.200(g)(2) of this chapter, has expired. The new expiration date for the replacement (or recharged) battery must be legibly marked on the outside of the transmitter. The battery useful life (or useful life of charge) requirements of this paragraph do not apply to batteries (such as water-activated batteries) that are essentially unaffected during probable storage intervals.

§ 135.141 Additional airworthiness requirements.

(a) No person may operate a large airplane in operations to which this Part applies unless that airplane meets the additional airworthiness requirements of §§ 121.213 through 121.283 and 121.307 and 121.312 of this chapter.

(b) No person may operate a reciprocating engine or turbopropeller powered small airplane in operations to which this Part applies that has a passenger seating configuration, excluding any pilot seat, of 10 seats or more unless that airplane is type certificated—

(1) In the transport category;

(2) Before July 1, 1970, in the normal category and meets special conditions issued by the Administrator for airplanes intended for use in operations under this part.

(3) Before July 19, 1970, in the normal category and meets the additional airworthiness standards in SFAR No. 23; or

(4) In the normal category and meets the additional airworthiness standards prescribed in Appendix A of this Part.

(c) No person may operate a small airplane that is type certificated in ac-

V42167 AUG 29 77 UMI

cordance with other than Part 25 of this chapter with a passenger seating configuration, excluding any pilot seat, of 10 seats or more, unless the airplane was approved for operations to which this part applies prior to August 19, 1977.

(d) No person may operate a small airplane that is type certificated in accordance with other than Part 25 of this chapter with a passenger seating configuration, excluding any pilot seat, of 10 seats or more, with a seating configuration greater than the maximum seating configuration approved for operations to which this part applies prior to August 19, 1977.

(e) Notwithstanding the provisions of paragraph (b) of this section, after June 30, 1984, no person may operate a reciprocating engine or turbopropeller powered small airplane in operations to which this part applies that has a passenger seating configuration, excluding any pilot seat, of 10 seats or more, unless that airplane is type certificated in the transport category. This kind of an airplane, if not type certificated in the transport category, may be operated—

(1) Until June 30, 1980, if the airplane was type certificated in the normal category and meets special conditions issued by the Administrator;

(2) Until June 30, 1982, if the airplane was type certificated in the normal category and meets the additional airworthiness standards of SFAR 23; or

(3) Until June 30, 1984, if the airplane was type certificated in the normal category and meets additional airworthiness requirements prescribed in Appendix A of this part.

§ 135.143 Shoulder harness installation at flight crewmember stations.

(a) No person may operate a turbojet-powered aircraft or an aircraft having a passenger seating capacity, excluding any pilot seat, of 10 seats or more in operations to which this part applies unless that aircraft is equipped with an approved shoulder harness installed for each front seat.

(b) Each flight crewmember occupying a seat equipped with a shoulder harness must fasten the shoulder harness during takeoff and landing, except that the shoulder harness may be unfastened if the crewmember cannot perform the required duties with the shoulder harness fastened.

§ 135.145 Airborne thunderstorm detection equipment requirements.

(a) No person may operate a multiengine aircraft that has a passenger seating configuration, excluding any pilot seat, of 10 seats or more under the rules of this part in passenger-carrying operations unless approved thunderstorm detection equipment has been installed in the aircraft.

(b) No person may begin a flight under IFR or night VFR conditions when current weather reports indicate that thunderstorms, or other potentially hazardous weather conditions that can be detected with airborne thunderstorm detection equipment, may reasonably be expected along the route to be flown, unless the airborne thunderstorm detection equipment is in satisfactory operating condition.

(c) If the airborne thunderstorm detection equipment becomes inoperative en route, the aircraft must be operated in accordance with the instructions and procedures specified in the manual required by § 135.23 for such an event.

(d) This section does not apply to aircraft used solely within the State of Hawaii or within the State of Alaska or within and that part of Canada west of longitude 130 degrees W, between latitude 70 degrees N, and latitude 53 degrees N, or during any training, test, or ferry flight.

(e) Notwithstanding any other provision of this part, an alternate electrical power supply is not required for airborne thunderstorm detection equipment.

§ 135.147 Emergency equipment requirements for aircraft having a passenger seating capacity of more than 19 passengers.

(a) No certificate holder may operate an aircraft having a passenger seating capacity of more than 19 passengers unless it is equipped with the following emergency equipment.

(1) One approved first aid kit for treatment of injuries likely to occur in flight or in a minor accident, which meets the following specifications and requirements:

(i) Each first aid kit must be dust and moisture proof, and contain only materials that either meet Federal Specifications GGK–319a, as revised, or as approved by the Administrator

(ii) Required first aid kits must be readily accessible to the cabin flight attendants.

(iii) At time of takeoff, each first aid kit must contain at least the following or other contents approved by the Administrator.

Contents:

	Quantity
Adhesive bandage compressors, 1 in	16
Antiseptic swabs	20
Ammonia inhalents	10
Bandage Compressors, 4 in	8
Triangular bandage compressors, 40 in	5
Burn compound, ⅛ oz. or an equivalent of other burn remedy	6
Arm splint, noninflatable	1
Leg splint, noninflatable	1
Roller bandage, 4 in	4
Adhesive tape, 1-in standard roll	2
Bandage scissors	1

(2) A crash axe carried so as to be accessible to the crew but inaccessible to passengers during normal operations

(3) Signs that are visible to all occupants to notify them when smoking is prohibited and when safety belts should be fastened. The signs must be so constructed that they can be turned on and off by a crewmember. They must be turned on for each takeoff and each landing and when otherwise considered to be necessary by the pilot in command;

(4) In the case of airplanes, the additional emergency equipment specified in § 121.310 of this chapter; and

(5) Each item of equipment must be inspected regularly in accordance with inspection periods established in the operations specifications to ensure its condition for continued serviceability and immediate readiness to perform its intended emergency purposes.

§ 135.149 Inoperable instruments and equipment for multiengine aircraft.

(a) No person may take off any multiengine aircraft for an operations to which this part applies unless the following instructions and equipment are in an operable condition:

(1) Instruments and equipment specifically required by the airworthiness requirements under which the aircraft is type certificated and which are essential for safe operations under all operating conditions.

(2) Instruments and equipment required by an airworthiness directive to be in operable condition unless otherwise provided in the airworthiness directive.

(3) Instruments and equipment, other than those covered under paragraph (a) (1) of this section, whose proper operation is necessary for the aircraft to continue to comply with the airworthiness requirements under which the aircraft is type certificated, except those requirements applicable to—

(i) Non-required instruments and equipment; and

(ii) Instruments and equipment not essential to the safe operation of the aircraft.

(b) No person may take off any multiengine aircraft to which this part applies with inoperable instruments or equipment installed, other than those covered under paragraph (a) of this section, unless the following requirements are met:

(1) An Approved Minimum Equipment list exists for the aircraft type.

(2) The aircraft has within it a letter of authorization, issued by the Flight Standards District Office having certification responsibility for that ATCO certificate holder, authorizing operation of the aircraft in accordance with the Minimum Equipment List.

The letter of authorization may be obtained by written request of the certificate holder. The Minimum Equipment List and the letter of authorization together constitute a supplemental type certificate for the aircraft.

(3) The approved Minimum Equipment List provides for the operation of the aircraft with the inoperable instruments and equipment inoperable.

(4) The aircraft records available to the pilot include an entry describing the inoperable instruments and equipment.

(5) The aircraft is operated in accordance with all applicable conditions and limitations contained in the Minimum Equipment List and in the letter authorizing the use of the list.

(c) Notwithstanding the requirements of paragraphs (a) (1), (a) (3), and (c) of this section, an aircraft with inoperable instruments or equipment may be operated under a special flight permit in accordance with the requirements of §§ 21.197 and 21.199 of this chapter.

§ 135.151 Performance requirements: aircraft operated over-the-top or in IFR conditions.

(a) Except as provided in paragraphs (b) and (c) of this section, no person may—

(1) Operate a single-engine aircraft carrying passengers over-the-top or in IFR conditions; or

(2) Operate a multiengine aircraft carrying passengers over-the-top or in IFR conditions at a weight that will not allow it to climb, with the critical engine inoperative, at least 50 feet a minute when operating at the MEAs of the route to be flown or 5,000 feet MSL, whichever is higher.

(b) Without regard to paragraph (a) (1) or (2) of this section—

(1) If weather reports and forecasts, or any combination thereof, indicate that the weather along the planned route (including takeoff and landing) allow flight under VFR under the ceiling (if a ceiling exists) and that ceiling is forecast to remain so at every reporting point ahead on the route until at least 1 hour after the estimated time of arrival at the point, a person may operate an aircraft in IFR conditions, or "over-the-top"; and

(2) If weather reports and forecasts or any combination thereof indicate that the weather along the planned route allows flight under VFR conditions under the ceiling (if a ceiling exists), beginning at a point no more than 15 miles from the departure airport and extending to a point within 15 miles of the destination airport, a person may—

(i) Take off from the departure airport in IFR conditions and fly in IFR conditions to a point no more than 15 miles from the departure airport;

(ii) Operate an aircraft en route over-the-top;

(iii) If unforecast marginal VFR weather conditions are encountered while en route on a flight which was started and intended to be conducted under the VFR or VFR over-the-top requirements of this part (except for limited IFR operation as permitted under subdivisions (i) and (iv) of this paragraph), operate an aircraft in IFR conditions if weather reports and forecasts or any combination thereof indicate that he will be able to return to VFR or VFR over-the-top operation before reaching a point 15 miles from the destination airport; and (iv) Make an IFR approach and land at the destination airport in IFR conditions if the weather conditions allow flight, and he flies, clear of the clouds from a point en route at least 15 miles from the destination airport until reaching the prescribed initial approach altitude over the final approach facility or if the approach is made with the use of radar as provided in Part 91 of this chapter.

(c) Without regard to paragraphs (a) (1) and (2) of this section, a person may operate an aircraft over-the-top under conditions allowing—

(1) In the case of a multiengine aircraft, descent or continuance of the flight under VFR if its critical engine fails; or

(2) In the case of a single-engine aircraft, descent under VFR if its engine fails.

§ 135.153 Performance requirements: land aircraft operated over water.

No person may operate a land aircraft carrying passengers over water unless—

(a) It is operated at an altitude that allows it to reach land in the case of engine failure;

(b) It is necessary for takeoff or landing;

(c) It is a multiengine aircraft operated at a weight that will allow it to climb, with the critical engine inoperative, at least 50 feet a minute, at an altitude of 1,000 feet above the surface; or

(d) It is a helicopter equipped with helicopter flotation devices.

§ 135.155 Small airplane performance operating limitations.

(a) No person may operate a reciprocating engine powered small transport category airplane unless he complies with the weight limitations prescribed in § 135.275 of this chapter, the takeoff limitations prescribed in § 135.277 (except paragraph (a) (3)), and the landing limitations prescribed in § 135.285 and § 135.287.

(b) No person may operate a turbine engine powered small transport category airplane unless he complies with the takeoff limitations prescribed in § 135.289 of this chapter (except paragraphs (d) and (f)) and the landing limitations prescribed in § 135.295 and § 135.298.

(c) No person may operate a reciprocating engine or turbopropeller powered small airplane that is certificated in accordance with paragraphs (b) (2), (3), and (4) of § 135.141, unless he complies with the takeoff weight limitations prescribed in the Airplane Flight Manual for operations under this part, and if the airplane is certificated in accordance with paragraph (b) (4) of § 135.141 with the landing weight limitations prescribed in the Airplane Flight Manual for operations under this part.

§ 135.157 Empty weight and center of gravity: currency requirement.

(a) No person may operate a multiengine aircraft in operations to which this part applies unless the current empty weight and center of gravity are calculated from values established by actual weighing of the aircraft within the preceding 36 calendar months.

(b) Paragraph (a) of this section does not apply to—

(1) Aircraft issued an original airworthiness certificate within the preceding 36 calendar months; and

(2) Aircraft operated under a weight and balance system approved in the operations specifications of the certificate holder.

Subpart D—VFR/IFR Operating Limitations and Weather Requirements

§ 135.159 Applicability.

This subpart prescribes the operating limitations for VFR/IFR flight operations and associated weather requirements for operations under this part.

§ 135.161 VFR: minimum altitudes.

Except when necessary for takeoff and landing, no person may operate, under VFR—

(a) An airplane—

(1) During the day, below 500 feet above the surface or less than 500 feet horizontally from any obstacle; or

(2) At night, at an altitude less than 1,000 feet above the highest obstacle within a horizontal distance of 5 miles from the course intended to be flown or, in designated mountainous terrain, less than 2,000 feet above the highest obstacle within a horizontal distance of 5 miles from the course intended to be flown; or

(b) A helicopter over a congested area at an altitude less than 300 feet above the surface.

§ 135.163 VFR: visibility requirements.

(a) No person may operate an airplane under VFR, in uncontrolled airspace at night, or in uncontrolled airspace during the day when the ceiling is less than 1,000 feet, unless flight visibility is at least 2 miles.

(b) No person may operate a helicopter under VFR in uncontrolled airspace at an altitude of 1,200 feet or less above the surface or in control zones unless the visibility is at least—

(1) During the day—½ mile; or

(2) At night—1 mile.

§ 135.165 VFR: helicopter surface reference requirements.

No person may pilot a helicopter under VFR unless he has visual surface reference or, at night, visual surface light reference, sufficient to safely control the helicopter.

§ 135.167 VFR: fuel supply.

(a) No person may begin a flight operation in an airplane under VFR unless, considering wind and forecast weather conditions, it has enough fuel to fly to the first point of intended landing and, assuming normal cruising fuel consumption—

(1) During the day, to fly thereafter for at least 30 minutes; or

(2) At night, to fly thereafter for at least 45 minutes.

(b) No person may begin a flight operation in a helicopter under VFR unless, considering wind and forecast weather conditions, it has enough fuel to fly to the first point of intended landing and, assuming normal cruising fuel consumption, to fly thereafter for at least 20 minutes.

V 42 167 AUG 29 77 UMI

§ 135.169 VFR Over-the-top carrying passengers: operating limitations.

Subject to any additional limitations contained in § 135.151, no person may operate an aircraft VFR over-the-top carrying passengers, unless—

(a) Weather reports and forecasts, or any combination thereof, indicate that the weather at the intended point of termination of over-the-top flight—

(1) Allows descent to beneath the ceiling under VFR and is forecast to remain so until at least 1 hour after the estimated time of arrival at that point; or

(2) Allows an IFR approach and landing with flight clear of the clouds until reaching the prescribed initial approach altitude over the final approach facility, unless the approach is made with the use of radar as provided in § 91.116(f) of this chapter; or

(b) It is operated under conditions allowing—

(1) In the case of multiengine aircraft, descent or continuation of the flight under VFR if its critical engine fails; or

(2) In the case of single-engine aircraft, descent under VFR if its engine fails.

§ 135.171 Weather reports and forecasts.

(a) Whenever a person operating an aircraft in operations to which this part applies is required to use a weather report or forecast, he shall use that of the U.S National Weather Service, a source approved by the U.S. National Weather Service, or a source approved by the Administrator. However, in the case of operations under VFR, the pilot in command may, if such a report is not available, use weather information based on his own observations or on those of other persons competent to supply appropriate observations.

(b) For the purposes of paragrah (a), weather observations made and furnished to pilots to control IFR operations at an airport must be taken at the airport where those IFR operations are conducted, unless the Administrator issues operations specifications allowing the use of weather observations taken at a location other than on the airport where the IFR operations are conducted. The Administrator issues such operations specifications whenever, after investigation by the U.S. National Weather Service and the FAA Flight Standards District Office having jurisdiction over the area in which the airport is located, it is found that the standards of safety for such an operation would allow the deviation from the requirements of this paragraph for a particular operation for which an ATCO operating certificate has been issued.

§ 135.173 [Reserved]

§ 135.175 IFR: operating limitations.

(a) Except as provided in paragraphs (b), (c) and (d) of this section, no person may operate an aircraft, under IFR, outside of controlled airspace or at any airport that does not have an approved standard instrument approach procedure.

(b) The Administrator may issue operations specifications to the certificate holder to allow him to operate IFR over routes outside controlled airspace if—

(1) The certificate holder shows the Administrator that his flight crew is able to navigate, without visual reference to the ground, over an intended track without deviating more than 5 degrees or 5 miles, whichever is less, from that track; and

(2) The Administrator otherwise determines that the proposed operations can be conducted safely.

(c) A person may operate an aircraft under IFR outside of controlled airspace when it is necessary for the conduct of an instrument approach to an airport for which there is in use a current approved standard or special instrument approach procedure; or when it is necessary to climb into controlled airspace during an approved missed approach procedure; or when it is necessary to make an IFR departure from an airport having an approved instrument approach procedure; and the certificate holder has been approved for such operations.

(d) The Administrator may issue operations specifications to the certificate holder to allow him to depart at an airport that does not have an approved standard instrument approach procedure when the Administrator determines that it is necessary to make an IFR departure from that airport and that the proposed operations can be conducted safely; however, the approval to operate at that airport does not include approval to make an IFR approach to that airport.

§ 135.177 IFR: takeoff limitations.

No person may take off an aircraft under IFR from an airport where weather conditions are at or above take off minimums but are below authorized IFR landing minimums unless there is an alternate airport within 1 hour's flying time (at normal cruising speed, in still air) of the airport of departure.

§ 135.179 IFR: destination airport weather minimums.

No person may take off an aircraft under IFR or begin an IFR or over-the-top operation unless the latest weather reports and forecasts, or any combination thereof, indicate that weather conditions, at the estimated time of arrival at the next airport of intended landing will be at or above authorized IFR landing minimums.

§ 135.181 IFR: alternate airport weather minimums.

No person may designate an alternate airport unless the weather reports and forecasts, or any combination thereof, indicate that the weather conditions will be at or above authorized alternate airport landing minimums for that airport at the estimated time of arrival.

§ 135.183 IFR: alternate airport requirements.

(a) Except as provided in paragraph (b) of this section, no person may operate an aircraft in IFR conditions unless it carries enough fuel (considering weather reports and forecasts) to—

(1) Complete the flight to the first airport of intended landing;

(2) Fly from that airport to the alternate airport; and

(3) Fly thereafter for 45 minutes at normal cruising speed.

(b) Paragraph (a)(2) of this section does not apply if Part 97 of this chapter prescribes a standard instrument approach procedure for the first airport of intended landing and, for at least one hour before and after the estimated time of arrival, the appropriate weather reports and forecasts, or any combination thereof, indicate that:

(1) The ceiling will be at least 1,500 feet above the lowest circling MDA, or;

(2) If circling is not authorized for the airport, the ceiling will be at least 1,500 feet above the lowest published minimum or 2,000 feet above the airport elevation, whichever is higher; and

(3) Visability for that airport is forecast to be at least three miles, or two miles more than the lowest applicable visibility minimums, whichever is the greater, for the instrument approach procedure to be used at the destination airport.

§ 135.185 IFR: takeoff, approach and landing minimums.

(a) No pilot may begin an instrument approach procedure to an airport unless:

(1) That airport has a weather reporting facility operated by the U.S. National Weather Service, a source approved by U.S. National Weather Service, or a source approved by the Administrator; and

(2) The latest weather report issued by that weather reporting facility indicates that weather conditions are at or above the authorized IFR landing minimums for that airport.

(b) No pilot may begin the final approach segment of an instrument approach procedure to an airport unless the U.S. National Weather Service, a source approved by the U.S. National Weather Service, or a source approved by the Administrator, issues a weather report for that airport and unless the latest weather reported indicates that weather conditions are at or above the authorized IFR landing minimums for that airport.

(c) If a pilot has begun the final approach segment of an instrument approach to an airport in accordance with paragraph (b) of this section and a later weather report indicating below minimum conditions is received after the aircraft is:

(1) On an ILS final approach and has passed the outer marker;

(2) On an ASR or PAR final approach and has been turned over to the final approach controller or;

(3) On a final approach using a VOR, NDB, or comparable approach procedure and:

(i) has passed the appropriate facility or final approach fix; or

(ii) where a final approach fix is not specified, has completed the procedure turn and is established inbound toward the airport on the final approach course within the distance prescribed in the procedure;

The approach may be continued and a landing made if the pilot finds, upon reaching the authorized MDA or DH, that actual weather conditions are at least equal to the minimums prescribed for the procedure.

(d) The MDA or DH and visibility landing minimums prescribed in Part 97 of this chapter or in the operator's operations specifications are increased by 100 feet and ½ mile respectively, but not to exceed the ceiling and visibility minimums for that airport when used as an alternate airport, for each pilot in command of a turbine-powered airplane who has not served at least 100 hours as pilot in command in that type of airplane.

(e) Each pilot making an IFR takeoff or approach and landing at a military or foreign airport shall comply with applicable instrument approach procedure and weather minimums prescribed by the authority having jurisdiction over that airport. In addition, no pilot may, at such an airport:

(1) Take off under IFR when the visibility is less than 1 mile; or

(2) Make an instrument approach when the visibility is less than ½ mile.

(f) If takeoff minimums are specified in Part 97 of this chapter for the takeoff airport, no pilot may take off an aircraft under IFR when the weather conditions reported by the U.S. National Weather Service, a source approved by the U.S. National Weather Service, or a source approved by the Administrator, are less than the takeoff minimums specified for the takeoff airport in Part 97 or in the certificate holder's operations specifications.

(g) Except as provided in paragraph (h) of this section, if takeoff minimums are not prescribed in Part 97 of this chapter for the takeoff airport, no pilot may take off an aircraft under IFR when the weather conditions reported by the U.S. National Weather Service, a source approved by the U.S. National Weather Service, or a source approved by the Administrator, are less than that prescribed in Part 91 of this chapter or in the certificate holder's operations specifications.

(h) At airports where straight-in instrument approach procedures are authorized, a pilot may take off an aircraft under IFR when the weather conditions reported by the U.S. National Weather Service, a source approved by the U.S. National Weather Service, or a source approved by the Administrator, are equal to or better than the lowest straight-in landing minimums, unless otherwise restricted, provided that:

(1) The wind direction and velocity at the time of takeoff are such that a straight-in instrument approach can be made to the runway served by the instrument approach;

(2) The system and the associated ground facilities and related airborne equipment upon which the landing minimums are predicated are in normal operation;

(3) The certificate holder has been approved for such operations; and

(4) The pilot meets the proficiency required by § 135.229.

§ 135.187 Icing conditions: operating limitations.

(a) No pilot may take off an aircraft that has: (1) Frost, snow, or ice adhering to any windshield or powerplant installation; or to an airspeed, altimeter, rate of climb or flight attitude instrument system;

(2) Snow or ice adhering to the wings, or stabilizing or control surfaces, or rotor, or propellers of the aircraft; or

(3) Any frost adhering to the wings, or rotors, or propellers of the aircraft, unless the wings, or stabilizing or control surfaces, or rotors or propellers have been smoothed to prevent the disruption by the frost of airflow over such surfaces;

(b) No pilot may take off an aircraft, for flight under VFR, or continue to operate an aircraft in flight under VFR, into known or forecast icing conditions unless the aircraft has installed functioning de-icing or anti-icing equipment protecting each rotor blade, propeller, windshield, wing, stabilizing or control surface, and each airspeed, altimeter, rate of climb, or flight attitude instrument system.

(c) No pilot may take off an aircraft, for flight under IFR, or continue to operate an aircraft in flight under IFR, into known or forecast icing conditions unless the aircraft has installed functioning de-icing or anti-icing equipment which meets the certification requirements of Section 34 of Special Federal Aviation Regulation No. 23, or Part 23 effective November 19, 1973, or those for transport category aircraft type certification as applicable to that aircraft.

(d) If current weather reports and briefing information relied upon by the pilot in command indicate the forecast icing condition that would otherwise prohibit the flight will not be encountered during the flight because of changed weather conditions since the forecast, the restrictions in paragraphs (b) and (c) of this section based on forecast conditions do not apply.

§ 135.189 Airport requirements and emergency lighting.

(a) No certificate holder may use any airport unless it is properly equipped and adequate for the proposed operation, considering such items as size, surface, obstructions, facilities, public protection, and lighting.

(b) Except in the case of an emergency, no person may conduct night operations with the use of flare pots or lanterns to mark the limits of the area to be used for takeoff or landing.

(c) In the case of the emergency use of flare pots or lanterns, the lighting provided must be spaced at a uniform interval of not more than 200-feet along both edges of the usable runway.

(d) Except under the provisions of paragraphs (b) and (c) of this section, no person may conduct night takeoffs and landings in a large or turbojet-powered airplane when flare pots or lanterns have been substituted for more than 25 percent of the runway edge lights for the runway to be used.

(e) Except as provided in paragraphs (b) (c) and (d) of this section, no person may operate an aircraft in operations to which this part applies using any type of lighting to mark the limits of the area to be used for takeoff or landing unless that type of lighting has been specifically approved by the Administrator.

Subpart E—Flight Crewmember Requirements

§ 135.191 Applicability.

This subpart prescribes the flight crewmember requirements for operations under this part.

§ 135.193 Pilot in command qualifications.

(a) No pilot, in passenger-carrying operations, may act as pilot in command of a turbojet-powered airplane, or an airplane having a passenger seating capacity, excluding any pilot seat, of 10 seats or more, or a multiengine airplane being operated by a "commuter air carrier" as defined in Part 298 of this title, unless he holds an airline transport pilot certificate with appropriate category and class ratings and, if required, an appropriate type rating for that aircraft.

(b) Except as provided in paragraph (a) of this section, no pilot may act as pilot in command of an aircraft under VFR unless:

(i) He holds at least a commercial pilot certificate with appropriate category and class ratings and, if required, an appropriate type rating for that aircraft;

(ii) He has had at least 500 hours time as a pilot, including at least 100 hours of cross-country flight time, at least 25 hours of which were at night; and

(iii) In the case of an airplane, he holds an instrument rating or an airline transport pilot certificate with an airplane category rating; or

(iv) In the case of helicopter operations conducted VFR over-the-top, he holds a helicopter instrument rating, or an airline transport pilot certificate with a category and class rating for that aircraft, not limited to VFR.

(c) Except as provided in paragraph (a) of this section, no pilot may act as pilot in command of an aircraft under IFR unless:

(i) He holds at least a commercial pilot certificate with appropriate category and class ratings and, if required, an appropriate type rating for that aircraft; and

V 42167 A AUG 29 77 UMI

(ii) He has had at least 1,200 hours of flight time as a pilot, including 500 hours of cross country flight time, 100 hours of night flight time, and 75 hours of actual or simulated instrument time, at least 50 hours of which were in actual flight; and

(iii) In the case of an airplane, he holds an instrument rating or an airline transport pilot certificate with an airplane category rating; or

(iv) In the case of helicopters, he holds a helicopter instrument rating, or an airline transport pilot certificate with a category and class rating for that aircraft, not limited to VFR.

§ 135.195 [Reserved]

§ 135.197 Second in command qualifications.

No person may act as second in command of an aircraft unless he holds at least a commercial pilot certificate with appropriate category and class ratings and an instrument rating. In the case of flight under IFR he must have met the recent instrument experience requirements of Part 61 of this chapter.

§ 135.199 Pilot qualifications: recent experience.

(a) No certificate holder may use any person nor may any person serve as a pilot flight crewmember, unless, within the preceding 90 days, that person has made at least three takeoffs and three landings as the sole manipulator of the flight controls in an aircraft of the same category and class and, if type rating is required, of the same type in which he is to serve.

(b) For the purposes of paragraph (a) of this section, if the aircraft is a tailwheel airplane, the takeoffs and landings must have been made to a full stop in a tailwheel airplane.

Subpart F—Flight Crewmember Flight and Duty Time Limitations and Rest Requirements

§ 135.200 Applicability.

This subpart prescribes flight and duty time limitations and rest requirements for flight crewmembers utilibed by air taxi and commercial operators certificated under this part.

§ 135.201 Definition of terms.

For the purposes of this subpart:—

"Augmented flight crew" means a flight crew which includes one or more relief officers in addition to the basic flight crew.

"Basic flight crew" means the minimum flight crew required by the aircraft type certificate.

"Boarding point or location" means the place at which passengers, cargo or crewmembers are enplaned for the purpose of flight, or are deplaned after a flight.

"Deadhead transportation" means transportation, not local in character, that a certificate holder requires and provides to transport a crewmember to or from a duty station.

"Duty period" means the time between successive, required rest periods during which a crewmember accumulates duty time.

"Duty time" means the time during which a flight crewmember performs any required assignment for a certificate holder or accumulates flight time in other commercial or military operations. Duty time also includes time spent on the ground between flights in the same duty period.

"Flight time" means the time during which a flight crewmember serves as either a pilot in command, or second in command, in any operations for a certificate holder, or in other commercial or military operations. Flight time begins when the aircraft departs the boarding point for the purpose of flight and ends when the aircraft arrives at a boarding point or location after landing, except that, in the case of rotorcraft, flight time means a period of time which begins when the rotor starts turning under engine power for the purpose of flight and ends when the engine is shut down at the end of the flight.

"Relief officer" means a flight crewmember who is scheduled to serve with an augmented flight crew and to accumulate flight time in relief of one or more flight crewmembers.

"Rest period" means a continuous period of time required by this subpart during which a crewmember does not accumulate any duty time. A rest period does not include time spent in deadhead transportation.

§ 135.203 Flight and duty time limitations: all flight crewmembers.

(a) No certificate holder may schedule a flight crewmember, and except as provided in paragraph (c) of this section, no flight crewmember may accumulate flight time in excess of:

(1) Any flight or duty time limitation of this subpart.

(2) 40 hours in any 168 consecutive hours.

(3) 120 hours in any calendar month.

(4) 1,000 hours in any calendar year.

(b) In scheduling a flight crewmember for flight and duty time under this subpart, a certificate holder shall use the time normally necessary for the performance of the flight or duty involved.

(c) A flight crewmember may serve in excess of any flight or duty time limitation of this subpart only if the excess time is due to reasons beyond the control of the certificate holder; however, a flight crewmember may not depart the boarding gate for the purpose of flight of his actual elapsed flight time, plus the flight time scheduled for the next flight, will cause him to exceed the applicable flight or duty time limitation by more than two hours.

§ 135.205 Deadhead transportation:

Deadhead transportation shall be considered duty time unless the deadhead transportation is followed immediately by a rest period. If a rest period is provided, it must be at least eight hours and may be provided concurrently with any other rest period required by this subpart.

§ 135.207 Determination of applicable flight and duty time limitations.

A flight crewmember, who accumulates flight time with more than one flight crew during a duty period, shall be governed by the flight and duty time limitations for the smallest numerical crew complement with which he serves in line operations for the certificate holder.

§ 135.209 Rest requirements.

(a) A certificate holder shall provide each flight crewmember with a rest period of not less than 24 hours at least once during every 168 consecutive hours. This 24 hour rest period may be provided concurrently with any other rest period required by this subpart.

(b) That period of time during which a crewmember, who is otherwise in a rest period, is required by the certificate holder to be available to receive a schedule of duty time may be considered part of a rest period.

(c) The rest period required by §§ 135.211, 135.213, and 135.217 must be at least twice the number of hours of flight time accumulated since the last rest period, but not less than eight hours.

§ 135.211 Flight crew consisting of: one pilot.

(a) This section applies to flight crews consisting of one pilot.

(b) No certificate holder may schedule a flight crewmember, and no flight crewmember may serve, in excess of eight hours of flight time, or 12 hours of duty time, without a rest period.

§ 135.213 Flight crew consisting of: pilot in command and second in command.

(a) This section applies to flight crews consisting of a pilot in command and a second in command.

(b) No certificate holder may schedule a flight crewmember, and no flight crewmember may serve, in excess of 10 hours of flight time, or 12 hours of duty time, without a rest period.

§ 135.215 Augmented flight crews.

(a) The pilot in command, as designated by the certificate holder under § 135.97 of this part, shall remain the pilot in command at all times during that flight.

(b) During operations involving one or more relief officers, either the pilot in command or the second in command, as designated by the certificate holder, shall be at a pilot station at all times.

§ 135.217 Flight crews consisting of: pilot in command, second in command, and relief officers.

(a) This section applies to flight crews consisting of a pilot in command, a second in command, and a relief officer.

(b) No certificate holder may schedule a flight crewmember, and no flight crewmember may serve, in excess of 12 hours of flight time, or 16 hours of duty time, without a rest period.

§ 135.219 [Reserved]

Subpart G—Crewmember Testing Requirements

§ 135.223 Applicability.

This subpart prescribes requirements for the tests and checks required for pilot and flight attendant crewmembers and for the approval of check pilots in operations under this part.

§ 135.225 Initial and recurrent pilot testing requirements.

(a) No certificate holder may use the services of a pilot, nor may any person serve as a pilot, unless, since the beginning of the 12th calendar month before that service, he has passed a written or oral test, given to him by the Administrator or an authorized check pilot, on his knowledge in the following areas:

(1) The appropriate provisions of Parts 61, 91, and 135 of this chapter and the operations specifications and the manual of the certificate holder;

(2) For each type of aircraft to be flown by the pilot, the aircraft powerplant, major components and systems, major appliances, performance and operating limitations, standard and emergency operating procedures, and the contents of the approved aircraft flight manual or owner's handbook, as applicable;

(3) For each type of aircraft to be flown by the pilot, the method of determining compliance with weight and balance limitations for takeoff, landing and en route operations;

(4) Navigation and use of air navigation aids appropriate to the operation or pilot authorization, including, when applicable, instrument approach facilities and procedures;

(5) Air traffic control procedures, including IFR procedures when applicable;

(6) Meteorology in general, including the principles of frontal system, icing, fog, thunderstorms, and windshear, and, if appropriate for the operation of the certificate holder, high altitude weather;

(7) Procedures for avoiding operations in thunderstorms and hail, and for operating in turbulent air or in icing conditions; and

(8) New equipment, procedures, or techniques, as appropriate.

(b) No certificate holder may use the services of a pilot, nor may any person serve as a pilot, in any aircraft unless, since the beginning of the 12th calendar month before that service, he has passed a competency check given to him by the Administrator or an authorized check pilot in that class of aircraft, if single-engine airplane other than turbojet, or that type of aircraft, if helicopter, multiengine, or turbojet, to determine the pilot's competence in practical skills and techniques in that aircraft or class of aircraft. The extent of the competency check shall be determined by the Administrator or authorized check pilot conducting the competency check. The competency check may include any of the maneuvers and procedures currently required for the original issuance of the particular pilot certificate required for the operations authorized and appropriate to the category, class and type of aircraft involved. For the purposes of this paragraph, type as used with respect to an airplane herein, means any one of a group of airplanes determined by the Administrator to have a similar means of propulsion, the same manufacturer, and no significantly different handling or flight characteristics.

(c) The instrument proficiency check required by § 135.229 may be substituted for the competency check required by this section for the type of aircraft used in the check.

(d) For the purpose of this part, competent performance of a procedure or maneuver by a person to be used as a pilot requires that he be the obvious master of the aircraft, with the successful outcome of the maneuver never in doubt.

(e) The Administrator or authorized check pilot certifies the competency of each pilot who passes the knowledge or flight check in the certificate holder's pilot records.

(f) Portions of a required competency check may be given in an aircraft simulator or other appropriate training device, if approved by the Administrator.

§ 135.227 Initial and recurrent flight attendant crewmember testing requirements.

No certificate holder may use the services of a flight attendant crewmember, nor may any person serve as a flight attendant crewmember, unless, since the beginning of the 12th calendar month before that service, the certificate holder has determined by appropriate initial and recurrent testing that the person is knowledgeable and competent in the following areas as appropriate to assigned duties and responsibilities:

(a) Authority of the pilot in comand;

(b) Passenger handling, including procedures to be followed in the event of the presence of deranged persons or other persons whose conduct might jeopardize the safety of other passengers;

(c) Crewmember assignments, functions, and responsibilities during ditching and evacuation of persons who may need the assistance of another person to move expeditiously to an exit in the event of an emergency;

(d) Briefing of passengers;

(e) Location and operation of portable fire extinguishers;

(f) Proper use of cabin equipment and controls;

(g) Location and operation of passenger oxygen equipment;

(h) Location and operation of all normal and emergency exits, including evacuation chutes and escape ropes; and

(i) Seating of persons who may need assistance of another person to move rapidly to an exit in the event of an emergency as prescribed by the certificate holder's operations manual.

§ 135.229 Pilot in command: instrument proficiency check requirements.

(a) No certificate holder may use a pilot, nor may any person serve as a pilot in command of an aircraft under IFR unless, since the beginning of the sixth calendar month before that use, he has passed an instrument proficiency check and the Administrator or an authorized check pilot has so certified in a letter of competency.

(b) No pilot may use any type of instrument approach procedure under IFR unless, since the beginning of the sixth calendar month before that use he has successfully demonstrated that procedure and the Administrator or an authorized check pilot has so certified in a letter of competency.

(c) The instrument proficiency check required by paragraph (a) of this section consists of an oral or written equipment test and a flight check under simulated or actual IFR conditions. The equipment test includes questions on emergency procedures, engine operation, fuel and lubrication system, power settings, stall speeds, best engine-out speed, propeller and supercharger operations, and hydraulic, mechanical, and electrical systems, as appropriate. The instrument proficiency check includes navigation by instruments, recovery from simulated emergencies, and standard instrument approaches involving navigational facilities that he is to be authorized to use. Each person taking the instrument proficiency check must show that standard of competence required by paragraph (d) of § 135.225. The instrument proficiency check must include at least:

(1) The procedures and maneuvers set forth for an airline transport pilot certificate in the particular type of airplane, if appropriate, in the case of a pilot in command of an airplane under § 135.193(a), on the procedures and maneuvers set forth for a commercial pilot certificate and an instrument rating and, if required, for the appropriate type rating for all other pilots. In the case of an ATCO certificate holder whose operations specifications limit its operations to VFR only, the instrument portion of the proficiency check is not required.

(2) It must be given by an authorized check airman or by the Administrator.

(d) If the pilot in command is assigned to pilot only one type of aircraft, he must take the instrument proficiency check required by paragraph (a) of this section in that type of aircraft.

(e) If the pilot in command is assigned to pilot more than one type of aircraft, he must take the instrument proficiency check required by paragraph (a) of this section in each type of aircraft to which he is assigned, in rotation, but not more than one flight check during each period described in paragraph (a) of this section.

(f) If the pilot in command is assigned to pilot both single-engine and multiengine aircraft, he must take the instrument proficiency checks required by paragraph (a) of this section alternately in multiengine and single-engine aircraft, but not more than one flight check during each period described in paragraph (a) of this section. Portions of a required flight check may be given

V 42167 AUG 29 77 UMI

in an aircraft simulator or other appropriate training device, if approved by the Administrator.

(g) If the pilot in command is authorized to use an autopilot system in place of a second in command, he must show, during the required instrument check, that he is able, (without a second in command) both with and without using the autopilot to:

(1) Conduct instrument operations competently; and

(2) Properly conduct air-ground communications and comply with complex air traffic control instructions.

(3) Each person taking the autopilot check must show that, while using the autopilot, the airplane can be operated as proficiently as it would be if a second in command were present to handle air-ground communications and copy air traffic control instructions. The autopilot check need only be demonstrated once every 12 calendar months during the instrument check required under paragraph (a) of this section.

(h) The Administrator or authorized check pilot issues a letter of competency to each pilot who passes the instrument proficiency check. The letter of competency contains a list of the type of instrument approach procedures authorized and, if the pilot passes the autopilot check, an authorization to use an autopilot system in place of a second in command.

§ 135.231 Pilot in command: line checks: routes and airways.

(a) No certificate holder may use a pilot, nor may any person serve, as a pilot in command of a flight under VFR unless, since the beginning of the 12th calendar month before that service, he has passed a flight check in one of the types of aircraft that he is to fly, given by an approved check pilot who is qualified in the aircraft, or by the Administrator, consisting of at least one flight over one route segment and including takeoffs and landings at one or more representative airports.

(b) No certificate holder may use a pilot, nor may any person serve, as pilot in command of a flight under IFR unless, since the beginning of the 12th calendar month before that service he has passed a flight check in one of the types of airplanes that he is to fly, given by an approved check pilot who is qualified in the aircraft, or by the Administrator, consisting of at least one flight over a federal airway or approved off-airway route, or portion thereof, including takeoffs and landings at two or more representative airports.

(c) The person who conducts the check shall determine whether the pilot being checked satisfactorily performs the duties and responsibilities of a pilot in command in operations under this Part, and shall so certify in the pilot training record.

(d) Each certificate holder shall establish in the manual required by § 135.23 a procedure whereby each pilot who has not flown over a route and into an airport within the preceding 90 days will, before beginning the flight, familiarize himself with all available information concerning that flight. This information must include the subjects listed in paragraph (d) of this section in regard to the routes to be flown and airports into which he is to operate.

(e) Each qualifying pilot shall show that he has adequate knowledge of the following:

(1) Weather characteristics appropriate to the seasons.

(2) Navigation facilities.

(3) Communication procedures.

(4) Kinds of terrain and obstruction hazards.

(5) Minimum safe flight levels.

(6) Pertinent air traffic control procedures including terminal area, arrival, departure, holding, and instrument approach procedures.

(7) Congested areas, obstructions, and physical layout of each area in the terminal area in which the pilot will operate.

§ 135.233 Crewmember: tests and checks, grace provisions; training to accepted standards.

(a) If a crewmember who is required to take a test or a flight check under this part, completes the test or flight check in the calendar month before or after the calendar month in which it is required, he is considered to have completed the test or check in the calendar month in which it is required.

(b) If a pilot being checked under this part fails any of the required maneuvers, the person giving the check may give additional training to the pilot during the course of the check. In addition to repeating the maneuvers failed, the person giving the check may require the pilot being checked to repeat any other maneuvers he finds are necessary to determine the pilot's proficiency. If the pilot being checked is unable to demonstrate satisfactory performance to the person conducting the check, the certificate holder may not use him nor may he serve in operations under this part until he has satisfactorily completed the check.

§ 135.235 Check pilot authorization: application and issue.

Each certificate holder desiring FAA approval of a check pilot shall submit his request in writing to the FAA District Office having jurisdiction over the area in which the holder's principal business office is located. The Administrator may issue a letter of authority to each check pilot if he passes the appropriate oral and flight test. The letter of authority lists the tests and checks in this part that the check pilot is qualified to give, and the category, class and type aircraft, where appropriate, for which the check pilot is qualified.

Subpart H—Training

§ 135.237 Applicability and terms used.

(a) This subpart prescribes requirements applicable for establishing and maintaining an approved training program for crewmembers, check-airmen and instructors, and other operations personnel, and for the approval and use of aircraft simulators and other training devices in the conduct of that program.

(b) For the purpose of this subpart, aircraft groups are as follows:

(1) Group I. Propeller driven, including: (i) reciprocating powered; and

(ii) Turbopropeller powered.

(2) Group II. Turbojet powered.

(c) For the purposes of ths subpart, the following terms and definitions apply:

(1) Initial training. The training required for crewmembers who have not qualified and served in the same capacity on another aircraft of the same group.

(2) Transition training. The training required for crewmembers who have qualified and served in the same capacity on another aircraft of the same group.

(3) Upgrade training. The training required for crewmembers who have qualified and served as second in command on a particular aircraft type, before they serve as pilot in command on that aircraft.

(4) Differences Training. The training required for crewmembers who have qualified and served on a particular type aircraft, when the Administrator finds differences training is necessary before a crewmember serves in the same capacity on a particular variation of that aircraft.

(5) Recurrent training. The training required for crewmembers to remain adequately trained and currently proficient with respect to each aircraft, crewmember position, and type of operation in which he serves.

(6) Inflight. Refers to maneuvers, procedures, or functions that must be conducted in the aircraft.

§ 135.239 Training program: general.

(a) Each certificate holder required to have a training program under § 135.257 of this Part shall:

(1) Establish, obtain the appropriate initial and final approval of, and provide a training program that meets the requirements of this subpart and that ensures that each crewmember, flight instructor, check airman, and each person assigned duties for the carriage and handling of hazardous materials, (as defined in 49 CFR 171.8) is adequately trained to perform his assigned duties.

(2) Provide adequate ground and flight training facilities and properly qualified ground instructors for the training required by this subpart,

(3) Provide and keep current with respect to each aircraft type used and if applicable, the particular variations within the aircraft type, appropriate training material, examinations, forms, instructions, and procedures for use in conducting the training and checks required by this subpart; and

(4) Provide enough flight instructors, check airmen, and simulator instructors to conduct required flight training and flight checks, and simulator training courses permitted under this subpart.

(b) Whenever a crewmember who is required to take recurrent training completes the training in the calendar month before, or the calendar month after the month in which that training is required, he is considered to have completed it in the calendar month in which it was required.

(c) Each instructor, supervisor, or check airman who is responsible for a particular ground training subject, segment of flight training, course of training, flight check, or competence check under this part shall certify as to the proficiency and knowledge of the crewmember, flight instructor, or check airman concerned upon completion of that training or check. That certification shall be made a part of the crewmember's record.

(d) Training subjects that are applicable to more than one aircraft or crewmember position and that have been satisfactorily completed in connection with prior training while employed by the certificate holder for another aircraft or another crewmember position, need not be repeated during subsequent training other than recurrent training.

(e) Aircraft simulators and other training devices may be utilized in the certificate holder's training program if approved by the Administrator.

§ 135.241 Training program and revision: initial and final approval.

(a) To obtain initial and final approval of a training program, or a revision to an approved training program, each certificate holder must submit to the Administrator:

(1) An outline of the proposed or revised curriculum, that provides enough information for a preliminary evaluation of the proposed training program or revision; and

(2) Additional relevant information as may be requested by the Administrator.

(b) If the proposed training program or revision complies with this subpart, the Administrator grants initial approval in writing after which the certificate holder may conduct the training in accordance with that program. The Administrator then evaluates the effectiveness of the training program and advises the certificate holder of deficiencies, if any, that must be corrected.

(c) The Administrator grants final approval of the proposed training program or revision if the certificate holder shows that the training conducted under the initial approval set forth in paragraph (b) of this section ensures that each person who successfully completes the training is adequately trained to perform his assigned duties.

(d) Whenever the Administrator finds that revisions are necessary for the continued adequacy of a training program that has been granted final approval, the certificate holder shall, after notification by the Administrator, make any changes in the program that are found necessary by the Administrator. Within 30 days after the certificate holder receives such notice, it may file a petition to reconsider the notice with the FAA District Office charged with the overall inspection of the certificate holder's operations. The filing of a petition to reconsider stays the notice pending a decision by the Administrator. However, if the Administrator finds that there is an emergency that requires immediate action in the interest of safety he may, upon a statement of the reasons, require a change effective without stay.

§ 135.243 Training program: curriculum.

(a) Each certificate holder must prepare and keep current a written training program curriculum for each type of aircraft with respect to each crewmember required for that type aircraft. The curriculum must include ground and flight training required by this subpart.

(b) Each training program curriculum must include the following: (1) A list of principal ground training subjects, including emergency training subjects, that are provided.

(2) A list of all the training devices, mockups, systems trainers, procedures trainers, or other training aids that the certificate holder will use.

(3) Detailed descriptions or pictorial displays of the approved normal, abnormal, and emergency maneuvers, procedures and functions that will be performed during each flight training phase or flight check, indicating those maneuvers, procedures and functions that are to be performed during the inflight portions of flight training and flight checks.

§ 135.245 Crewmember training requirements.

(a) Each certificate holder must include in its training program the following initial and transition ground training as appropriate to the particular assignment of the crewmember: (1) Basic indoctrination ground training for newly hired crewmembers including instruction in at least the:

(i) Duties and responsibilities of crewmembers as applicable;

(ii) Appropriate provisions of the Federal Aviation Regulations;

(iii) Contents of the certificate holder's operating certificate and operations specifications (not required for flight attendants); and

(iv) Appropriate portions of the certificate holder's operating manual.

(2) The initial and transition ground training specified in §§ 135.261 and 135.265, as applicable.

(3) Emergency training as specified in § 135.247.

(b) Each training program must provide the initial and transition flight training specified in § 135.263, as applicable.

(c) Each training program must provide recurrent ground and flight training as provided in § 135.267.

(d) Upgrade training as specified in §§ 135.261 and 135.263 for a particular type aircraft may be included in the training program for crewmembers who have qualified and served as second in command on that aircraft.

(e) In addition to initial, transition, upgrade and recurrent training, each training program must also provide ground and flight training, instruction, and practice as necessary to ensure that each crewmember:

(1) Remains adequately trained and currently proficient with respect to each aircraft, crewmember position, and type of operation in which he serves; and

(2) Qualifies in new equipment, facilities, procedures, and techniques, including modifications to aircraft.

§ 135.247 Crewmember emergency training.

(a) Each training program must provide the emergency training set forth in this section with respect to each aircraft type, model, and configuration, each crewmember, and each kind of operation conducted, insofar as appropriate for each crewmember and the certificate holder.

(b) Emergency training must provide the following: (1) Instruction in emergency assignments and procedures, including coordination among crewmembers.

(2) Individual instruction in the location, function, and operation of emergency equipment including.

(i) Equipment used in ditching and evacuation;

(ii) First aid equipment and its proper use; and

(iii) Portable fire extinguishers, with emphasis on the type of extinguisher to be used on different classes of fires.

(3) Instruction in the handling of emergency situations including:

(i) Rapid decompression.

(ii) Fire in flight or on the surface and smoke control procedures with emphasis on electrical equipment and related circuit breakers found in cabin areas;

(iii) Ditching and evacuation;

(iv) Illness, injury, or other abnormal situations involving passengers or crewmembers; and

(v) Hijacking and other unusual situations.

(4) Review of previous aircraft accidents and incidents pertaining to actual emergency situations.

(c) Each crewmember must perform at least the following emergency drills, utilizing the proper emergency equipment and procedures, unless the Administrator finds that, with respect to a particular drill, the crewmember can be adequately trained by demonstration:

(1) Ditching, if applicable.

(2) Emergency evacuation.

(3) Fire extinguishing and smoke control.

(4) Operation and use of emergency exits, including deployment and use of evacuation chutes.

(5) Use of crew and passenger oxygen.

(6) Removal of life rafts from the aircraft, inflation of the life rafts, use of life lines, and boarding of passengers and crew.

(7) Donning and inflation of life vests and the use of other individual flotation devices.

V 42 167 AUG 29 77 UMI

(d) Crewmembers who serve in operations above 25,000 feet must receive instruction in the following:
(1) Respiration.
(2) Hypoxia.
(3) Duration of consciousness without supplemental oxygen at altitude.
(4) Gas expansion.
(5) Gas bubble formation.
(6) Physical phenomena and incidents of decompression.

§ 135.249 Training requirements: handling and carriage of hazardous materials.

(a) No certificate holder may use any person to perform, and no person may perform, any assigned duties and responsibilities for the handling or carriage of hazardous materials, (as defined in 49 CFR 171.8) unless within the preceding 12 calendar months that person has satisfactorily completed initial or recurrent training in an appropriate training program established by the certificate holder, which includes instruction regarding the proper shipper certification, packaging, marking, labeling, and documentation for hazardous materials, and includes instruction regarding their compatibility, loading, storage, and handling characteristics.

(b) Each certificate holder shall maintain a record of the satisfactory completion of the initial and recurrent training given to crewmembers and ground personnel who perform assigned duties and responsibilities for the handling and carriage of hazardous materials.

(c) Each certificate holder that elects not to accept hazardous materials shall ensure that each crewmember is adequately trained to recognize those items classified as hazardous materials.

(d) Notwithstanding the provisions of paragraph (a) of this section, when operating into or out of airports at which employees or contract personnel are not available, a certificate holder may use persons not meeting the requirements of paragraph (a) and (b) of this section to load, offload, or otherwise handle hazardous materials provided these persons are supervised by a crewmember who is qualified under paragraphs (a) and (b) of this section.

(e) Whenever any person subject to the recurrent training requirements of paragraph (a) of this section completes the training in the calendar month before or the calendar month after the month in which that training is required, he is considered to have completed it in the calendar month in which it was required.

§ 135.251 Approval of aircraft simulators and other training devices.

(a) Training courses using aircraft simulators and other training devices may be included in the certificate holder's training program if approved by the Administrator.

(b) Each aircraft simulator and other training device that is used in a training course or in checks required under this subpart must meet the following requirements: (1) It must be specifically approved for:
(i) The certificate holder;
(ii) The type aircraft and, if applicable the particular variation within type, for which the training or check is being conducted; and
(iii) The particular maneuver, procedure, or crewmember function involved.
(2) It must maintain the performance, functional, and other characteristics that are required for approval.
(3) It must be modified to conform with any modification to the aircraft being simulated that results in changes in performance, functional, or other characteristics required for approval.

§ 135.253 Training program: check airmen and instructor qualifications.

(a) No certificate holder may use a person nor may any person serve as a flight instructor or check airman in a training program established under this subpart unless, with respect to the particular aircraft type involved, that person:
(1) Holds the airman certificate ratings that must be held in order to serve as a pilot in command in operations under this subpart;
(2) Has satisfactorily completed the appropriate training phases for the aircraft, including recurrent training, that are required in order to serve as a pilot in command in operations under this subpart;
(3) Has satisfactorily completed the appropriate proficiency or competency checks that are required in order to serve as a pilot in command in operations under this subpart;
(4) Has satisfactorily completed the applicable training requirements of § 135.255;
(5) Holds a Class I or Class II medical certificate as required in order to serve as a pilot in command in operations under this subpart; and
(6) In the case of a check airman, has been approved by the Administrator for the airman duties involved.

(b) No certificate holder may use a person nor may any person serve as a simulator instructor for a course of training given in an aircraft simulator as provided by this subpart unless that person:
(1) Holds at least a commercial pilot certificate; and
(2) Has satisfactorily completed for a check airman:
(i) Appropriate initial pilot ground training and ground training for a flight instructor as provided in this subpart; and
(ii) A simulator flight training course in the type simulator in which that person instructs as provided by this subpart.

§ 135.255 Check airmen and flight instructors: initial and transition training.

(a) The initial and transition ground training for pilot check airmen must include the following:
(1) Pilot check airman duties, functions, and responsibilities.
(2) The applicable Federal Aviation Regulations and certificate holder's policies and procedures.
(3) The appropriate methods, procedures, and techniques for conducting the required checks.
(4) Proper evaluation of pilot performance including the detection of:
(i) Improper and insufficient training; and
(ii) Personal characteristics that could adversely affect safety.
(5) The appropriate corrective action in the case of unsatisfactory checks.
(6) The approved methods, procedures, and limitations for performing the required normal, abnormal, and emergency procedures in the aircraft.

(b) The initial and transition ground training for pilot flight instructors, except for the holder of a valid flight instructor certificate, must include the following:
(1) The fundamental principles of the teaching-learning process.
(2) Teaching methods and procedures.
(3) The instructor-student relationship.

(c) The initial and transition flight training for pilot check airmen and pilot flight instructors must include the following:
(1) Enough inflight training and practice in conducting flight checks from the left and right pilot seats in the required normal, abnormal, and emergency maneuvers to ensure his competence to conduct the pilot flight checks and flight training required by this Part.
(2) The appropriate safety measures to be taken from either pilot seat for emergency situations that are likely to develop in training.
(3) The potential results of improper or untimely safety measures during training.

The requirements of paragraphs (2) and (3) may be accomplished inflight or in an approved simulator.

§ 135.257 Pilot and flight attendant crewmember training programs.

(a) Each certificate holder, other than one who uses only himself as a pilot, shall establish and maintain an approved pilot training program, and each certificate holder who uses a flight attendant crewmember shall establish and maintain an approved flight attendant training program, that is appropriate to the operations to which each pilot and flight attendant is to be assigned, and will ensure that he is adequately trained to meet the applicable knowledge and practical testing requirements of this Part in accordance with §§ 135.225 through 135.233. However, the Administrator may authorize a deviation from the requirements of this section if he finds that, because of the limited size and scope of the operation, safety will allow a deviation from these requirements.

(b) Each certificate holder required to have a training program by paragraph (a) of this section shall include in that program ground and flight training curriculums for—(1) Initial training; (2) Transition training; (3) Upgrade training; (4) Differences training; and (5) Recurrent training every 12 calendar months.

(c) Each certificate holder required to have a training program by paragraph (a) of this section shall provide current and appropriate study materials for use by each required pilot and flight attendant.

(d) The certificate holder shall furnish copies of the pilot and flight attendant crew-member training program, and all changes and additions thereto, to the representative of the Administrator assigned to it. If the certificate holder uses training facilities of other persons, a copy of those training programs or appropriate portions used for those facilities shall also be furnished. Curricula that follow FAA published curricula may be cited by reference in the copy of the training program furnished to the representative of the Administrator and need not be furnished with the program.

§ 135.259 Crewmember initial and recurrent training requirements.

No certificate holder may use the services of, nor may any person serve as a crewmember in operations under this part unless that crewmember has completed the appropriate initial or recurrent training phase of the training program appropriate to the type of operation in which he is to serve since the beginning of the 12th calendar month before that service

§ 135.261 Pilots: initial, transition, and upgrade ground training.

(a) Initial, transition, and upgrade ground training for pilots must include instruction in at least the following, as applicable to their duties:
(1) General subjects—(i) The certificate holder's flight locating procedures;
(ii) Principles and methods for determining weight and balance, and runway limitations for takeoff and landing;
(iii) Enough meterology to ensure a practical knowledge of weather phenomena, including the principles of frontal systems, icing, fog, thunderstorms, windshear and, if appropriate, high altitude weather situations;
(iv) Air traffic control systems, procedures, and phraseology;
(v) Navigation and the use of navigation aids, including instrument approach procedures;
(vi) Normal and emergency communication procedures;
(vii) Visual cues prior to and during descent below DH or MDA; and
(viii) Other instructions as necessary to ensure his competence.
(2) For each aircraft type—(i) A general description;
(ii) Performance characteristics;
(iii) Engines and propellers;
(iv) Major components;
(v) Major aircraft systems (i.e., flight controls, electrical, and hydraulic); other systems, as appropriate; principles of normal, abnormal, and emergency operations; appropriate procedures and limitations;
(vi) Procedures for avoiding severe weather situations and for operating in or near thunderstorms (including best penetrating altitudes), turbulent air (including clear air turbulence and low altitude wind shear), icing, hail, and other potentially hazardous meterological conditions;
(vii) Operating limitations;
(viii) Fuel consumption and cruise control;
(ix) Flight planning;
(x) Each normal and emergency procedure; and
(xi) The approved Aircraft Flight Manual.

§ 135.263 Pilots: initial, transition, upgrade, and differences flight training.

(a) Initial, transition, upgrade, and differences training for pilots must include flight and practice in each of the maneuvers and procedures set forth in the approved training program curriculum.

(b) The maneuvers and procedures required by paragraph (a) of this section must be performed inflight, except to the extent that certain maneuvers and procedures may be performed in an airplane simulator, an appropriate training device, or a static aircraft as permitted by this subpart.

(c) If the certificate holder's approved training program includes a course of training utilizing an aircraft simulator or other training device, each pilot must successfully complete—
(1) Training and practice in the simulator or training device in at least the maneuvers and procedures set forth in this subpart that are capable of being performed in the aircraft simulator or training device; and
(2) A flight check in the aircraft or the simulator or training device to the level of proficiency of a pilot in command or second in command, as applicable, in at least the maneuvers and procedures that are capable of being performed in an aircraft simulator or training device.

§ 135.265 Flight attendants: initial and transition ground training.

(a) Initial and transition ground training for flight attendants must include instruction in at least the following:
(1) General subjects—(i) The authority of the pilot in command; and
(ii) Passenger handling, including the procedures to be followed in the case of deranged persons or other persons whose conduct might jeopardize safety.
(2) For each aircraft type—(i) A general description of the aircraft emphasizing physical characteristics that may have a bearing on ditching, evacuation, and inflight emergency procedures and on other related duties;
(ii) The use of both the public address system and the means of communicating with other flight crewmembers, including emergency means in the case of attempted hijacking or other unusual situations; and
(iii) Proper use of electrical galley equipment and the controls for cabin heat and ventilation.

(b) Initial and transition ground training for flight attendants must include a competence check to determine ability to perform assigned duties and responsibilities.

§ 135.267 Recurrent training.

(a) Each certificate holder must ensure that each crewmember receives recurrent training and is adequately trained and currently proficient with respect to the type aircraft and crewmember position involved.

(b) Recurrent ground training for crewmembers must include at least the following:
(1) A quiz or other review to determine the crewmember's knowledge with respect to the aircraft and crewmember position involved.
(2) Instruction as necessary in the subjects required for initial ground training by this subpart, as appropriate, including emergency training.
(3) For flight attendants, a competence check as required by § 135.265(b).

(c) Recurrent flight training for pilots must include, at least, flight training in the maneuvers or procedures set forth in this subpart, except that satisfactory completion of the check required by § 135.225 within the preceding 12 calendar months may be substituted for recurrent flight training.

Subpart I—Airplane Performance

§ 135.271 Applicability.

(a) This subpart prescribes airplane performance operating limitations applicable to the operation of the categories of airplanes listed in § 135.273 when operated in accordance with the rules of this part.

(b) For the purpose of this Part, "effective length of the runway," for takeoff means the distance from the end of the runway at which the takeoff is started to the point at which the obstruction clearance plane associated with the other end of the runway intersects the runway centerline. For landing, it means the distance from the point at which the obstruction clearance plane associated with the approach end of the runway intersects the centerline of the runway to the far end thereof.

(c) For the purpose of this subpart, "obstruction clearance plane" means a plane sloping upward from the runway at a slope of 1:20 to the horizontal, and tangent to or clearing all obstructions within a specified area surrounding the runway as shown in a profile view of that area. In the plan view, the centerline of the specified area coincides with the centerline of the runway, beginning at the point where the obstruction clearance plane intersects the centerline of the runway and proceeding to a point at least 1,500 feet from the beginning point. Thereafter the centerline coincides with the takeoff path over the ground for the runway (in the case of takeoffs) or with the instrument approach counterpart (for landings), or, where the applicable

V 42 167 AUG 29 77 A UMI

one of these paths has not been established, it proceeds consistent with turns of at least 4,000-foot radius until a point is reached beyond which the obstruction clearance plane clears all obstructions. This area extends laterally 200 feet on each side of the centerline at the point where the obstruction clearance plane intersects the runway and continues at this width to the end of the runway; then it increases uniformly to 500 feet on each side of the centerline at a point 1,500 feet from the intersection of the obstruction clearance plane with the runway; thereafter it extends laterally 500 feet on each side of the centerline.

§ 135.273 General.

(a) Each certificate holder operating a reciprocating engine powered large transport category airplane shall comply with §§ 135.275 through 135.287.

(b) Each certificate holder operating a turbine engine powered large transport category airplane shall comply with applicable provisions of § 135.289 through 135.297, except that when it operates a turbopropeller powered large transport category airplane certificated after August 29, 1959, but previously type certificated with the same number of reciprocating engines, it may comply with §§ 135.275 through 135.287.

(c) Each certificate holder operating a large nontransport category airplane shall comply with §§ 135.299 through 135.305 and any determination of compliance must be based only on approved performance data.

(d) The performance data in the Airplane Flight Manual applies in determining compliance with §§ 135.275 through 135.297. Where conditions are different from those on which the performance data is based, compliance is determined by interpolation or by computing the effects of change in the specific variables, if the results of the interpolation or computations are substantially as accurate as the results of direct tests.

(e) No person may take off a reciprocating engine powered large transport category airplane at a weight that is more than the allowable weight for the runway being used (determined under the runway takeoff limitations of the transport category operating rules of this part) after taking into account the temperature operating correction factors in Section 4a. 749a–T or 4b. 117 of the Civil Air Regulations as in effect on January 31, 1965, and set forth in the applicable Airplane Flight Manual.

(f) The Administrator may authorize in the operations specifications deviations from the requirements in this subpart if special circumstances make a literal observance of a requirement unnecessary for safety.

(g) The ten-mile width specified in §§ 135.279 through 135.283 may be reduced to five miles, for not more than 20 miles, when operating VFR or where navigation facilities furnish reliable and accurate identification of high ground and obstructions located outside of five miles, but within ten miles, on each side of the intended track.

§ 135.275 Large transport category airplanes: reciprocating engine powered: weight limitations.

(a) No person may take off a reciprocating engine powered large transport category airplane from an airport located at an elevation outside of the range for which maximum takeoff weights have been determined for that airplane.

(b) No person may take off a reciprocating engine powered large transport category airplane for an airport of intended destination that is located at an elevation outside of the range for which maximum landing weights have been determined for that airplane.

(c) No person may specify, or have specified, an alternate airport that is located at an elevation outside of the range for which maximum landing weights have been determined for the reciprocating engine powered large transport category airplane concerned.

(d) No person may take off a reciprocating engine powered large transport category airplane at a weight more than the maximum authorized takeoff weight for the elevation of the airport.

(e) No person may take off a reciprocating engine powered large transport category airplane if its weight on arrival at the airport of destination will be more than the maximum authorized landing weight for the elevation of that airport, allowing for normal consumption of fuel and oil en route.

§ 135.277 Large transport category airplanes: reciprocating engine powered: takeoff limitations.

(a) No person operating a reciprocating engine powered large transport category airplane may take off that airplane unless it is possible:

(1) To stop the airplane safely on the runway, as shown by the accelerate stop distance data, at any time during takeoff until reaching critical-engine failure speed;

(2) If the critical engine fails at any time after the airplane reaches critical-engine failure speed V1, to continue the takeoff and reach a height of 50 feet, as indicated by the takeoff path data, before passing over the end of the runway; and

(3) To clear all obstacles either by at least 50 feet vertically (as shown by the takeoff path data) or 200 feet horizontally within the airport boundaries and 300 feet horizontally beyond the boundaries, without banking before reaching a height of 50 feet (as shown by the takeoff path data) and thereafter without banking more than 15 degrees.

(b) In applying this section, corrections must be made for any runway gradient. To allow for wind effect, takeoff data based on still air may be corrected by taking into account not more than 50 percent of any reported headwind component and not less than 150 percent of any reported tailwind component.

§ 135.279 Large transport category airplanes: reciprocating engine powered: en route limitations: all engines operating.

(a) No person operating a reciprocating engine powered large transport category airplane may take off that airplane at a weight, allowing for normal consumption of fuel and oil, that does not allow a rate of climb (in feet per minute), with all engines operating, of at least 6.90 Vso (that is, the number of feet per minute is obtained by multiplying the number of knots by 6.90) at an altitude of at least 1,000 feet above the highest ground or obstruction within ten miles of each side of the intended track.

(b) This section does not apply to large transport category airplanes certificated under Part 4a of the Civil Air Regulations.

§ 135.281 Large transport category airplanes: reciprocating engine powered: en route limitations: one engine inoperative.

(a) Except as provided in paragraph (b) of this section, no person operating a reciprocating engine powered large transport category airplane may take off that airplane at a weight, allowing for normal consumption of fuel and oil, that does not allow a rate of climb (in feet per minute), with one engine inoperative, of at least $0.079-\frac{0.106}{N}Vso^2$ (where N is the number of engines installed and Vso is expressed in knots) at an altitude of at least 1,000 feet above the highest ground or obstruction within 10 miles of each side of the intended track. However, for the purposes of this paragraph the rate of climb for transport category airplanes certificated under Part 4a of the Civil Air Regulations is 0.026 Vso^2.

(b) In place of the requirements of paragraph (a) of this section, a person may, under an approved procedure, operate a reciprocating engine powered large transport category airplane at an all-engines-operating altitude that allows the airplane to continue, after an engine failure, to an alternate airport where a landing can be made in accordance with Section 135.267, allowing for normal consumption of fuel and oil. After the assumed failure, the flight path must clear the ground and any obstruction within five miles on each side of the intended track by at least 2,000 feet.

(c) If an approved procedure under paragraph (b) of this section is used, the certificate holder shall comply with the following:

(1) The rate of climb (as prescribed in the Airplane Flight Manual for the appropriate weight and altitude) used in calculating the airplane's flight path shall be diminished by an amount, in feet per minute, equal to $0.079-\frac{0.106Vso^2}{N}$ (when N is the number of engines installed and Vso^2 is expressed in knots) for airplanes certificated under Part 25 of this chapter and by 0.026 Vso^2 for airplanes certificated under Part 4a of the Civil Air Regulations.

(2) The all-engine-operating altitude shall be sufficient so that in the event the critical engine becomes inoperative at any point along the route, the flight will be able to proceed to a predetermined alternate airport by use of this procedure. In determining the takeoff weight, the airplane is assumed to pass over the critical obstruction following engine failure at a point no closer to the critical obstruction than the nearest approved radio navigational fix, unless the Administrator approves a procedure established on a different basis upon finding that adequate operational safeguards exist.

(3) The airplane must meet the provisions of paragraph (a) of this section at 1,000 feet above the airport used as an alternate in this procedure.

(4) The procedure must include an approved method of accounting for winds and temperatures that would otherwise adversely affect the flight path.

(5) In complying with this procedure, fuel jettisoning is allowed if the certificate holder shows that it has an adequate training program, that proper instructions are given to the flight crew, and all other precautions are taken to ensure a safe procedure.

(6) The certificate holder and the pilot in command shall jointly elect an alternate airport for which the appropriate weather reports or forecasts, or any combination thereof, indicate that weather conditions will be at or above the alternate weather minimum specified in the certificate holder's operations specifications for that airport when the flight arrives.

§ 135.283 Part 25 transport category airplanes with four or more engines: reciprocating engine powered: en route limitations: two engines inoperative.

(a) No person may operate an airplane certificated under Part 25 and having four or more engines unless:

(1) There is no place along the intended track that is more than 90 minutes (with all engines operating at cruising power) from an airport that meets the requirements of § 135.287; or

(2) It is operated at a weight allowing the airplane, with the two critical engines inoperative, to climb at 0.013 Vso^2 feet per minute (that is, the number of feet per minute is obtained by multiplying the number of knots squared by 0.013) at an altitude of 1,000 feet above the highest ground or obstruction within 10 miles on each side of the intended track, or at an altitude of 5,000 feet, whichever is higher.

(b) For the purposes of paragraph (a) (2) of this section, it is assumed that:

(1) The two engines fail at the point that is most critical with respect to the takeoff weight;

(2) Consumption of fuel and oil is normal with all engines operating up to the point where the two engines fail with two engines operating beyond that point;

(3) Where the engines are assumed to fail at an altitude above the prescribed minimum altitude, compliance with the prescribed rate of climb at the prescribed minimum altitude need not be shown during the descent from the cruising altitude to the prescribed minimum altitude, if those requirements can be met once the prescribed minimum altitude is reached, and assuming descent to be along a net flight path and the rate of descent to be 0.013 Vso^2 greater than the rate in the approved performance data; and

(4) If fuel jettisoning is provided, the airplane's weight at the point where the two engines fail is considered to be not less than that which would include enough fuel to proceed to an airport meeting the requirements of § 135.287 and to arrive at an altitude of at least 1,000 feet directly over that airport.

§ 135.285 Large transport category airplanes: reciprocating engine powered: landing limitations: destination airport.

(a) Except as provided in paragraph (b) of this section, no person operating a reciprocating engine powered large transport category airplane may take off that airplane, unless its weight on arrival, allowing for normal consumption of fuel and oil in flight, would allow a full stop landing at the intended destination within 60 percent of the effective length of each runway described below from a point 50 feet directly above the intersection of the obstruction clearance plane and the runway. For the purposes of determining the allowable landing weight at the destination airport the following is assumed:

(1) The airplane is landed on the most favorable runway and in the most favorable direction in still air.

(2) The airplane is landed on the most suitable runway considering the probable wind velocity and direction (forecast for the expected time of arrival), the ground handling characteristics of the type of airplane, and other conditions such as landing aids and terrain, and allowing for the effect of the landing path and roll of not more than 50 percent of the headwind component or not less than 150 percent of the tailwind component.

(b) An airplane that would be prohibited from being taken off because it could not meet the requirements of paragraph (a) (2) of this section may be taken off if an alternate airport is selected that meets all of the requirements of this section except that the airplane can accomplish a full stop landing within 70 percent of the effective length of the runway.

§ 135.287 Large transport category airplanes: reciprocating engine powered: landing limitations: alternate airport.

No person may list an airport as an alternate airport in a flight plan unless the airplane (at the weight anticipated at the time of arrival at the airport), based on the assumptions in § 135.285, can be brought to a full stop landing, within 70 percent of the effective length of the runway.

§ 135.289 Large transport category airplanes: turbine engine powered: takeoff limitations.

(a) No person operating a turbine engine powered large transport category airplane may take off that airplane at a weight greater than that listed in the Airplane Flight Manual for the elevation of the airport and for the ambient temperature existing at takeoff.

(b) No person operating a turbine engine powered large transport category airplane certificated after August 26, 1957, but before August 30, 1959 (SR422, 422A), may take off that airplane at a weight greater than that listed in the Airplane Flight Manual for the minimum distance required for takeoff. In the case of an airplane certificated after September 30, 1958 (SR422A, 422B), the takeoff distance may include a clearway distance but the clearway distance included may not be greater than one-half of the takeoff run.

(c) No person operating a turbine engine powered large transport category airplane certificated after August 29, 1959 (SR422B), may take off that airplane at a weight greater than that listed in the Airplane Flight Manual at which compliance with the following may be shown:

(1) The accelerate-stop distance must not exceed the length of the runway plus the length of any stopway.

(2) The takeoff distance must not exceed the length of the runway plus the length of any clearway except that the length of any clearway included must not be greater than one-half the length of the runway.

(3) The takeoff run must not be greater than the length of the runway.

(d) No person operating a turbine engine powered large transport category airplane may take off that airplane at a weight greater than that listed in the Airplane Flight Manual:

(1) In the case of an airplane certificated after August 26, 1957, but before October 1, 1958 (SR422), that allows a takeoff path that clears all obstacles either by at least (35+0.01 D) feet vertically (D is the distance along the intended flight path from the end of the runway in feet), or by at least 200 feet horizontally within the airport boundaries and by at least 300 feet horizontally after passing the boundaries; or

(2) In the case of an airplane certificated after September 30, 1958 (SR422A, 422b), that allows a net takeoff flight path that clears all obstacles either by a height of at least 35 feet vertically, or by at least 200 feet horizontally within the airport boundaries and by at least 300 feet horizontally after passing the boundaries.

(e) In determining maximum weights, minimum distances and flight paths under paragraphs (a) through (d) of this section, correction must be made for the runway to be used, the elevation of the airport, the effective runway gradient, and the ambient temperature and wind component at the time of takeoff.

V 42 167 AUG 29 77 UMI

(f) For the purposes of this section, it is assumed that the airplane is not banked before reaching a height of 50 feet, as shown by the takeoff path or net takeoff flight path data (as appropriate) in the Airplane Flight Manual, and thereafter that the maximum bank is not more than 15 degrees.

(g) For the purposes of this section the terms, "takeoff distance," "takeoff run," "net takeoff flight path," have the same meanings as set forth in the rules under which the airplane was certificated.

§ 135.291 Large transport category airplanes: turbine engine powered: en route limitations: one engine inoperative.

(a) No person operating a turbine engine powered large transport category airplane may take off that airplane at a weight, allowing for normal consumption of fuel and oil, that is greater than that which (under the approved, one engine inoperative, en route net flight path data in the Airplane Flight Manual for that airplane) will allow compliance with subparagraph (1) or (2) of this paragraph, based on the ambient temperatures expected en route.

(1) There is a positive slope at an altitude of at least 1,000 feet above all terrain and obstructions within five statute miles on each side of the intended track, and, in addition, if that airplane was certificated after August 29, 1958 (SR422B), there is a positive slope at 1,500 feet above the airport where the airplane is assumed to land after an engine fails.

(2) The net flight path allows the airplane to continue flight from the cruising altitude to an airport where a landing can be made under § 135.297 clearing all terrain and obstructions within five statute miles of the intended track by at least 2,000 feet vertically and with a positive slope at 1,000 feet above the airport where the airplane lands after an engine fails, or, if that airplane was certificated after September 30, 1958 (SR422A, 422B), with a positive slope at 1,500 feet above the airport where the airplane lands after an engine fails.

(b) For the purpose of paragraph (a) (2) of this section, it is assumed that—

(1) The engine fails at the most critical point en route;

(2) The airplane passes over the critical obstruction, after engine failure at a point that is no closer to the obstruction than the approved radio navigation fix, unless the Administrator authorizes a different procedure based on adequate operational safeguards;

(3) An approved method is used to allow for adverse winds;

(4) Fuel jettisoning will be allowed if the certificate holder shows that the crew is properly instructed, that the training program is adequate, and that all other precautions are taken to ensure a safe procedure;

(5) The alternate airport is selected and meets the prescribed weather minimums; and

(6) The consumption of fuel and oil after engine failure is the same as the consumption that is allowed for in the approved net flight path data in the Airplane Flight Manual.

§ 135.293 Large transport category airplanes: turbine engine powered: en route limitations: Two engines inoperative.

(a) Airplanes certificated after August 26, 1957, but before October 1, 1958 (SR422): No person may operate a turbine engine powered large transport category airplane along an intended route unless he complies with either of the following:

(1) There is no place along the intended track that is more than 90 minutes (with all engines operating at cruising power) from an airport that meets the requirements of § 135.297.

(2) Its weight, according to the two-engine-inoperative, en route, net flight path data in the Airplane Flight Manual, allows the airplane to fly from the point where the two engines are assumed to fail simultaneously to an airport that meets the requirements of § 135.297, with a net flight path (considering the ambient temperature anticipated along the track) having a positive slope at an altitude of at least 1,000 feet above all terrain and obstructions within five statute miles on each side of the intended track, or at an altitude of 5,000 feet, whichever is higher.

For the purposes of paragraph (2) of this paragraph, it is assumed that the two engines fail at the most critical point en route, that if fuel jettisoning is provided, the airplane's weight at the point where the engines fail includes enough fuel to continue to the airport and to arrive at an altitude of at least 1,000 feet directly over the airport, and that the fuel and oil consumption after engine failure is the same as the consumption allowed for in the net flight path data in the Airplane Flight Manual.

(b) Airplanes certificated after September 30, 1958, but before August 30, 1959 (SR422A): No person may operate a turbine engine powered large transport category airplane along an intended route unless he complies with either of the following:

(1) There is no place along the intended track that is more than 90 minutes (with all engines operating at cruising power) from an airport that meets the requirements of § 135.297.

(2) Its weight, according to the two-engine-inoperative, en route, net flight path data in the Airplane Flight Manual, allows the airplane to fly from the point where the two egnines are assumed to fail simultaneously to an airport that meets the requirements of § 135.297 with a net flight path (considering the ambient temperatures anticipated along the track) having a positive slope at an altitude of at least 1,000 feet above all terrain and obstructions within five miles on each side of the intended track, or at an altitude of 2,000 feet, whichever is higher.

For the purpose of paragraph (2) of this paragraph, it is assumed that the two engines fail at the most critical point en route, that the airplane's weight at the point where the engines fail includes enough fuel to continue to the airport, to arrive at an altitude of at least 1,500 feet directly over the airport, and thereafter to fly for 15 minutes at cruise power or thrust, or both, and that the consumption of fuel and oil after engine failure is the same as the consumption allowed for in the net flight path data in the Airplane Flight Manual.

(c) Aircraft certificated after August 29, 1959 (SR422B): No person may operate a turbine engine powered large transport category airplane along an intended route unless he complies with either of the following:

(1) There is no place along the intended track that is more than 90 minutes (with all engines operating at cruising power) for an airport that meets the requirements of § 135.297.

(2) Its weight, according to the two-engine-in-operative, en route, net flight path data in the Airplane Flight Manual, allows the airplane to fly from the point where the two engines are assumed to fail simultaneously to an airport that meet the requirements of § 135.297, with the net flight path (considering the ambient temperatures anticipated along the track) clearing vertically by at least 2,000 feet all terrain and obstructions within five statute miles (4.34 nautical miles) on each side of the intended track. For the purposes of this paragraph, it is assumed that—

(i) The two engines fail at the most critical point en route;

(ii) The net flight path has a positive slope at 1,500 feet above the airport where the landing is assumed to be made after the engines fail;

(iii) Fuel jettisoning will be approved if the certificate holder shows that the crew is properly instructed, that the training program is adequate, and that all other precautions are taken to ensure a safe procedure;

(iv) The airplane's weight at the point where the two engines are assumed to fail provides enough fuel to continue to the airport, to arrive at an altitude of at least 1,500 feet directly over the airport, and thereafter to fly for 15 minutes at cruising power or thrust, or both; and

(v) The consumption of fuel and oil after the engine failure is the same as the consumption that is allowed for in the net flight path data in the Airplane Flight Manual.

§ 135.295 Large transport category airplanes: turbine engine powered: landing limitations: Destination airports.

(a) No person operating a turbine engine powered large transport category airplane may take off that airplane at such a weight that (allowing for normal consumption of fuel and oil in flight to the destination or alternate airport) the weight of the airplane on arrival would exceed the landing weight set forth in

the Airplane Flight Manual for the elevation of the destination or alternate airport and the ambient temperature anticipated at the time of landing.

(b) Except as provided in paragraphs (c), (d), or (e) of this section, no person operating a turbine engine powered large transport category airplane may take off that airplane unless its weight on arrival, allowing for normal consumption of fuel and oil in flight (in accordance with the landing distance set forth in the Airplane Flight Manual for the elevation of the destination airport and the wind conditions anticipated there at the time of landing), would allow a full stop landing at the intended destination airport within 60 percent of the effective length of each runway described below from a point 50 feet above the intersection of the obstruction clearance plane and the runway. For the purpose of determining the allowable landing weight at the destination airport the following is assumed:

(1) The airplane is landed on the most favorable runway and in the most favorable direction, in still air.

(2) The airplane is landed on the most suitable runway considering the probable wind velocity and direction and the ground handling characteristics of the airplane, and considering other conditions such as landing aids and terrain.

(c) A turbopropeller powered airplane that would be prohibited from being taken off because it could not meet the requirements of paragraph (b) (2) of this section, may be taken off if an alternate airport is selected that meets all the requirements of this section except that the airplane can accomplish a full stop landing within 70 percent of the effective length of the runway.

(d) Unless, based on a showing of actual operating landing techniques on wet runways, a shorter landing distance (but never less than that required by paragraph (b) of this section) has been approved for a specific type and model airplane and included in the Airplane Flight Manual, no person may take off a turbojet powered airplane when the appropriate weather reports and forecasts, or a combination thereof, indicate that the runways at the destination airport may be wet or slippery at the estimated time of arrival unless the effective runway length at the destination airport is at least 115 percent of the runway length required under paragraph (b) of this section.

(e) A turbojet powered airplane that would be prohibited from being taken off because it could not meet the requirements of paragraph (b) (2) of this section may be taken off if an alternate airport is selected that meets all the requirements of paragraph (b) of this section.

§ 135.297 Large transport category airplanes: Turbine engine powered: landing limitations: alternate airports.

No person may select an airport as an alternate airport for a turbine engine powered large transport category airplane unless (based on the assumptions in § 135.295(b)) that airplane, at the weight anticipated at the time of arrival, can be brought to a full stop landing within 70 percent of the effective length of the runway for turbopropeller powered airplanes and 60 percent of the effective length of the runway for turbojet powered airplanes, from a point 50 feet above the intersection of the obstruction clearance plane and the runway.

§ 135.299 Large nontransport category airplanes: Takeoff limitations.

(a) No person operating a large nontransport category airplane may take off that airplane at a weight greater than the weight that would allow the airplane to be brought to a safe stop within the effective length of the runway, from any point during the takeoff before reaching 105 percent of minimum control speed (the minimum speed at which an airplane can be safely controlled in flight after an engine becomes inoperative) or 115 percent of the power off stalling speed in the takeoff configuration, whichever is greater.

(b) For the purposes of this action—

(1) It may be assumed that takeoff power is used on all engines during the acceleration;

(2) Not more than 50 percent of the reported headwind component, or not less than 150 percent of the reported tailwind component, may be taken into account;

(3) The average runway gradient (the difference between the elevations of the endpoints of the runway divided by the total length) must be considered if it is more than one-half of one percent; and

(4) It is assumed that the airplane is operating in standard atmosphere.

§ 135.301 Large nontransport category airplanes: En route limitations: one engine inoperative.

(a) Except as provided in paragraph (b) of this section, no person operating a large nontransport category airplane may take off that airplane at a weight that does not allow a rate of climb of at least 50 feet a minute, with the critical engine inoperative, at an altitude of at least 1,000 feet above the highest obstruction within five miles on each side of the intended track, or 5,000 feet, whichever is higher.

(b) Notwithstanding paragraph (a) of this section, if the Administrator finds that safe operations are not impaired, a person may operate the airplane at an altitude that allows the airplane, in case of engine failure, to clear all obstructions within five miles on each side of the intended track by 1,000 feet. If this procedure is used, the rate of descent for the appropriate weight and altitude is assumed to be 50 feet a minute greater than the rate in the approved performance data. Before approving such a procedure, the Administrator considers the following for the route, route segment, or area concerned.

(1) The reliability of wind and weather forecasting.

(2) The location and kinds of navigation aids.

(3) The prevailing weather conditions, particularly the frequency and amount of turbulence normally encountered.

(4) Terrain features.

(5) Air traffic problems.

(6) Any other operational factors that affect the operations.

(c) For the purposes of this section, it is assumed that—

(1) The critical engine is inoperative;

(2) The propeller of the inoperative engine is in the minimum drag position;

(3) The wing flaps and landing gear are in the most favorable position;

(4) The operating engines are operating at the maximum continuous power available;

(5) The airplane is operating in standard atmosphere; and

(6) The weight of the airplane is progressively reduced by the anticipated consumption of fuel and oil.

§ 135.303 Large nontransport category airplanes: Landing limitations: Destination airport.

(a) No person operating a large nontransport category airplane may take off that airplane at a weight that—

(1) Allowing for anticipated consumption of fuel and oil, is greater than the weight that would allow a full stop landing within 60 percent of the effective length of the most suitable runway at the destination airport; and

(2) Is greater than the weight allowable if the landing is to be made on the runway—

(i) With the greatest effective length in still air; and

(ii) Required by the probable wind, taking into account not more than 50 percent of the headwind component or not less than 150 percent of the tailwind component.

(b) For the purpose of this section, it is assumed that—

(1) The airplane passes directly over the intersection of the obstruction clearance plane and the runway at a height of 50 feet in a steady gliding approach at a true indicated airspeed of at least 1.3 Vso;

(2) The landing does not require exceptional pilot skill, and

(3) The airplane is operating in standard atmosphere.

§ 135.305 Large nontransport category airplanes: Landing limitations: Alternate airport.

No person may select an airport as an alternate airport for a large nontransport category airplane unless that airplane (at the weight anticipated at the time of arrival), based on the assumptions contained in § 135.303, can be brought to a full stop landing within 70 percent of the effective length of the runway.

V42167A AUG 29 77 7 UMI

Subpart J—[Reserved]

Subpart K—Maintenance, Preventive Maintenance, and Alterations

§ 135.333 Applicability.

(a) This subpart prescribes rules in addition to those prescribed in other parts of this chapter for the maintenance, preventive maintenance and alterations for all ATCO Certificate holders as follows:

(1) Aircraft that are certificated for a passenger seating configuration, excluding any pilot seat, of nine seats or less, shall be maintained in accordance with part 91 and 43 of this chapter and §§ 135.337, 135.339 and 135.343 of this part. An approved aircraft inspection program may be used in accordance with the provision of § 135.341.

(2) Aircraft that are certificated for a passenger seating configuration, excluding any pilot seats, of ten seats or more, shall be maintained in accordance with a maintenance program set forth in §§ 135.337, 135.339, and 135.345 through 135.365 of this part.

(3) A certificate holder who is not otherwise required, may elect to maintain its aircraft in accordance with paragraph 135.333(a)(2) of this section.

§ 135.335 Responsibility for airworthiness.

(a) Each certificate holder is primarily responsible for the airworthiness of its aircraft, including airframes, aircraft engines, propellers, rotors, appliances, and parts thereof, and shall have its aircraft maintained as prescribed in this chapter, and shall have defects repaired between required maintenance as prescribed in part 43 of this chapter.

(b) The certificate holder who maintains its aircraft as prescribed by § 135.333(a)(2) of this part shall perform the maintenance, preventive maintenance, and alterations of its aircraft, including airframe, aircraft engine, propellers, rotors, appliances, emergency equipment, and parts thereof, in accordance with its manual and regulations of this chapter.

(c) A certificate holder who maintains its aircraft as prescribed by § 135.333(a)(2) of this part may make arrangements with another person for the performance of any maintenance, preventive maintenance, or alterations. However, this does not relieve the certificate holder of the responsibility specified in paragraph (a) of this section.

§ 135.337 Mechanical reliability reports.

(a) Each certificate holder shall report the occurrence or detection of each failure, malfunction, or defect in an aircraft concerning—

(1) Fires during flight and whether the related fire-warning system functioned properly;

(2) Fires during flight not protected by related fire-warning system;

(3) False fire-warning during flight;

(4) An exhaust system that causes damage during flight to the engine, adjacent structure, equipment, or components;

(5) An aircraft component that causes accumulation or circulation of smoke, vapor, or toxic or noxious fumes in the crew compartment or passenger cabin during flight;

(6) Engine shutdown during flight;

(7) Engine shutdown during flight when external damage to the engine or aircraft structure occurs;

(8) Engine shutdown during flight due to foreign object ingestion or icing;

(9) Shutdown of more than one engine during flight;

(10) A propeller feathering system or ability of the system to control overspeed during flight;

(11) A fuel or fuel-dumping system that affects fuel flow or causes hazardous leakage during flight;

(12) An unwanted landing gear extension or retraction or opening or closing of landing gear doors during flight;

(13) Brake system components that result in loss of brake actuating force when the aircraft is in motion on the ground;

(14) Aircraft structure that requires major repair;

(15) Cracks, permanent deformation, or corrosion of aircraft structures, if more than the maximum acceptable to the manufacturer or the FAA; and

(16) Aircraft components or systems that result in taking emergency actions during flight (except action to shut-down an engine).

(b) For the purpose of this section, "during flight" means the period from the moment the aircraft leaves the surface of the earth on takeoff until it touches down on landing.

(c) In addition to the reports required by paragraph (a) of this section, each certificate holder shall report any other failure, malfunction, or defect in an aircraft that occurs or is detected at any time if, in its opinion, the failure, malfunction, or defect has endangered or may endanger the safe operation of the aircraft.

(d) Each certificate holder shall send each report required by this section, in writing, covering each 24-hour period beginning at 0900 hours local time of each day and ending at 0900 hours local time on the next day to the FAA District Office having jurisdiction over the area in which the certificate holder's principal business office is located. The report must be mailed or delivered to that office on the following day. However, a report that is due on Saturady or Sunday may be mailed or delivered on the following Monday and one that is due on a holiday may be mailed or delivered on the next work day. For aircraft operated in areas where mail is not collected, reports may be mailed or delivered within 24-hours after the aircraft returns to a point where the mail is collected.

(e) The certificate holder shall transmit the reports required by this section on a form and in a manner prescribed by the Administrator, and shall include as much of the following as is available:

(1) The type and identification number of the aircraft.

(2) The name of the operator.

(3) The date.

(4) The nature of the failure, malfunction, or defect.

(5) Identification of the part and system involved, including available information pertaining to type designation of the major component and time since last overhaul, if known.

(6) Apparent cause of the failure, malfunction or defect (e.g., wear crack, design deficiency, or personnel error).

(7) Other pertinent information necessary for more complete identification, determination of seriousness, or corrective action.

(f) A certificate holder, that is also the holder of a Type Certificate (including a Supplemental Type Certificate), a Parts Manufacturer Approval (PMA), or a TSO authorization, or that is the licensee of a Type Certificate need not report a failure, malfunction, or defect under this section if the failure, malfunction, or defect has been reported by it under § 21.3 or § 37.17 of this chapter or under the accident reporting provisions of Part 830 of Regulations of the National Transportation Safety Board.

(g) No person may withhold a report required by this section even though all information required by this section is not available.

(h) When the certificate holder gets additional information, including information from the manufacturer or other agency, concerning a report required by this section, it shall expeditiously submit it as a supplement to the first report and reference the date and place of submission of the first report.

§ 135.339 Mechanical interruption summary report.

Each certificate holder shall mail or deliver, before the end of the 10th day of the following month, a summary report of the following occurrences in its aircraft for the preceeding month to the FAA District Office having jurisdiction over the area in which the certificate holder's principal business office is located:

(a) Each interruption to a flight, unscheduled change of aircraft enroute, or unscheduled stop or diversion from a route, caused by known or suspected mechanical difficulties or malfunctions that are not required to be reported under § 135.337.

(b) The number of propeller featherings in flight, listed by type of propeller and engine and aircraft on which it was installed. Propeller featherings for training, demonstration, or flight check purposes need not be reported.

§ 135.341 Approved aircraft inspection program.

(a) Whenever the Administrator finds that the aircraft inspections required or permitted under part 91 of this chapter are not adequate to meet the requirements of this part, or upon application by a certificate holder, the Administrator may amend the certificate holder's operations specifications, in accordance with § 135.19, to require or allow an approved aircraft inspection program for any make and model aircraft of which the certificate holder has the exclusive use of at least one aircraft (as defined in § 135.25(b)).

(b) A certificate holder who applies fir an amendment of his operations specifications to allow an approved aircraft inspection program must submit a program for approval by the Administrator with his application.

(c) Each certificate holder who is required by his operations specifications to have an approved aircraft inspection program shall submit a program for approval by the Administrator within 30 days of the amendment of its operations specifications or within such other period as the Administrator may prescribe in the operations specifications.

(d) The aircraft inspection program submitted for approval by the Administrator must contain the following:

(1) Instructions and procedures for the conduct of aircraft inspections (which must include necessary tests and checks), setting forth in detail the parts and areas of the airframe, engines, propellers, rotors, and appliances, including emergency equipment, that must be inspected.

(2) A schedule for the performance of the aircraft inspections under paragraph (1) of this paragraph expressed in terms of the time in service, calendar time, number of system operations, or any combination of these.

(3) Instructions and procedures for recording discrepancies found during inspections and correction or deferral of discrepancies including form and disposition of records.

(e) After approval, the certificate holder shall include the approved aircraft inspection program in the manual required by § 135.23.

(f) Whenever the Administrator finds that revisions to an approved aircraft inspection program are necessary for the continued adequacy of the program the certificate holder shall, after notification by the Administrator, make any changes in the program found by the Administrator to be necessary. The certificate holder may petition the Administrator to reconsider the notice to make any changes in a program. The petition must be filed with the representative of the Administrator assigned to it within 30 days after the certificate holder receives the notice. Except in the case of an emergency requiring immediate action in the interest of safety, the filing of the petition stays the notice pending a decision by the Administrator.

(g) Each certificate holder who has an approved aircraft inspection program shall have each aircraft that is subject to the program inspected in accordance with the program.

(h) The registration number of each aircraft that is subject to an approved aircraft inspection program must be include in the operations specifications of the certificate holder.

§ 135.343 Additonal maintenance requirements, aircraft certificated to carry nine or less passengers.

Each certificate holder who operates a single-engine aircraft or a multiengine aircraft certificated, excluding any pilot seat, for nine passengers or less, must comply with the manufacturer's recommended maintenance programs, or a program approved by the Administrator, for each aircraft engine, propeller, rotor, and each item of emergency equipment required by this chapter.

§ 135.345 Maintenance, preventive maintenance and alteration organization.

(a) Each certificate holder that performs any of its maintenance (other than required inspections), preventive maintenance, or alterations, and each person with whom it arranges for the performance of that work must have an organization adequate to perform the work.

(b) Each certificate holder that performs any inspections required by its manual in accordance with § 135.349(b)(2) or (3), (in this subpart referred to as "required inspections"), and each person with whom it arranges for the performance of that work, must have an organization adequate to perform that work.

(c) Each person performing required inspections in addition to other maintenance, preventive maintenance, or alterations, shall organize the performance of those functions so as to separate the required inspection functions from the other maintenance, preventive maintenance, and alteration functions. The separation shall be below the level of administrative control at which overall responsibility for the required inspection functions and other maintenance, preventive maintenance, and alteration functions is exercised.

§ 135.347 Maintenance, preventive maintenance, and alteration programs.

Each certificate holder shall have an inspection program and a program covering other maintenance, preventive maintenance, and alterations, that ensures that—

(a) Maintenance, preventive maintenance, and alterations performed by it, or by other persons, are performed in accordance with the certificate holder's manual;

(b) Competent personnel and adequate facilities and equipment are provided for the proper performance of maintenance, preventive maintenance, and alterations; and

(c) Each aircraft released to service is airworthy and has been properly maintained for operation under this part.

§ 135.349 Manual requirements.

(a) Each certificate holder shall put in its manual the chart or description of the certificate holder's organization required by § 135.345 and a list of persons with whom it has arranged for the performance of any of its required inspections, other maintenance, preventive maintenance, or alterations, including a general description of that work.

(b) Each certificate holder shall put in its manual the programs required by § 135.347 that must be followed in performing maintenance, preventive maintenance, and alterations of that certificate holder's aircraft, including airframes, aircraft engines, propellers, rotors, appliances, emergency equipment, and parts thereof, and must include at least the following:

(1) The method of performing routine and nonroutine maintenance (other than required inspections), preventive maintenance, and alterations.

(2) A designation of the items of maintenance and alteration that must be inspected (required inspections) including at least those that could result in a failure, malfunction, or defect endangering the safe operation of the aircraft, if not performed properly or if improper parts or materials are used.

(3) The method of performing required inspections and a designation by occupational title of personnel authorized to perform each required inspection.

(4) Procedures for the reinspection of work performed pursuant to previous required inspection findings ("buy-back procedures").

(5) Procedures, standards, and limits necessary for required inspections and acceptance or rejection of the items required to be inspected and for periodic inspection and calibration of precision tools, measuring devices, and test equipment.

(6) Procedures to ensure that all required inspections are performed.

(7) Instructions to prevent any person who performs any item of work from performing any required inspection of that work.

(8) Instructions and procedures to prevent any decision of an inspector regarding any required inspection from being countermanded by persons other than supervisory personnel of the inspection unit, or a person at the level of administrative control that has overall responsibility for the management of both the required inspection functions and the other maintenance, preventive maintenance, and alterations functions.

(9) Procedures to ensure that required inspections, other maintenance, preventive maintenance, and alterations that are not completed as a result of work interruptions are properly completed before the aircraft is released to service.

§ 135.351 Required inspection personnel.

(a) No person may use any person to perform required inspections unless the person performing the inspection is appropriately certificated, properly trained, qualified, and authorized to do so.

(b) No person may allow any person to perform a required inspection unless, at the time, the person performing that inspection is under the supervision and control of an inspection unit.

V 42 167 AUG 29 77 UMI

(c) No person may perform a required inspection if he performed the item of work required to be inspected.

(d) Each certificate holder shall maintain, or shall determine that each person with whom it arranges to perform its required inspections maintains, a current listing of persons who have been trained, qualified, and authorized to conduct required inspections. The persons must be identified by name, occupational title and the inspections that they are authorized to perform. The certificate holder (or person with whom it arranges to perform its required inspections) shall give written information to each person so authorized, describing the extent of his responsibilities, authorities, and inspectional limitations. The list shall be made available for inspection by the Administrator upon request.

§ 135.353 Continuing analysis and surveillance.

(a) Each certificate holder shall establish and maintain a system for the continuing analysis and surveillance of the performance and effectiveness of its inspection program and the program covering other maintenance, preventive maintenance, and alterations and for the correction of any deficiency in those programs, regardless of whether those programs are carried out by the certificate holder or by another person.

(b) Whenever the Administrator finds that either or both of the programs described in paragraph (a) of this section does not contain adequate procedures and standards to meet the requirements of this part, the certificate holder shall, after notification by the Administrator, make changes in those programs requested by the Administrator.

(c) A certificate holder may petition the Administrator to reconsider the notice to make a change in a program. The petition must be filed with the FAA District Office charged with the overall inspection of the certificate holder's operations within 30 days after the certificate holder receives the notices. Except in the case of an emergency requiring immediate action in the interest of safety, the filing of the petition stays the notice pending a decision by the Administrator.

§ 135.355 Maintenance and preventive maintenance training program.

Each certificate holder or a person performing maintenance or preventive maintenance functions for it shall have a training program to ensure that each person (including inspection personnel) who determines the adequacy of work done is fully informed about procedures and techniques and new equipment in use and is competent to perform his duties.

§ 135.357 Certificate requirements.

(a) Except for maintenance, preventive maintenance, alterations, and required inspections performed by repair stations certificated under the provisions of Subpart C of Part 145, of this chapter, each person who is directly in charge of maintenance, preventive maintenance, or alterations, and each person performing required inspections must hold an appropriate airman certificate.

(b) For the purpose of this section, a person "directly in charge" is each person assigned to a position in which he is responsible for the work of a shop or station that performs maintenance, preventive maintenance, alterations, or other functions affecting airworthiness. A person who is "directly in charge" need not physically observe and direct each worker constantly but must be available for consultation and decision on matters requiring instruction or decision from higher authority than that of the person performing the work.

§ 135.359 Authority to perform and approve maintenance, preventive maintenance and alterations.

(a) A certificate holder may make arrangements with other persons to perform maintenance, preventive maintenance, and alterations as provided in its maintenance manual. In addition, a certificate holder may perform these functions for another certificate holder as provided in the maintenance manual of the other certificate holder.

(b) A certificate holder may approve any airframe, aircraft engine, propeller, rotor, or appliance for return to service after maintenance, preventive maintenance, or alterations that are performed under paragraph (a) of this section. However, in the case of a major repair or alteration, the work must have been done in accordance with technical data approved by the Administrator.

§ 135.361 Maintenance recording requirements.

(a) Each certificate holder shall keep (using the system specified in the manual required in § 135.349) the following records for the periods specified in paragraph (b):

(1) All the records necessary to show that all requirements for the issuance of an airworthiness release under § 135.365 have been met.

(2) Records containing the following information:

(i) The total time in service of the airframe, engine, and propeller.

(ii) The current status of life-limited parts of each airframe, engine, propeller, rotor, and appliance.

(iii) The time since last overhaul of all items installed on the aircraft which are required to be overhauled on a specified time basis.

(iv) The indentification of the current inspection status of the aircraft, including the time since the last inspections required by the inspection program under which the aircraft and its appliances are maintained.

(v) The current status of applicable airworthiness directives, including the methods of compliance.

(vi) A list of current major alterations to each airframe, engine, propeller, rotor, and appliance.

(b) Each certificate holder shall retain the records required to be kept by this section for the following periods:

(1) Except for the records of the last complete overhaul of each airframe, engine, propeller, rotor, and appliance the records specified in paragraph (a) (1) of this section shall be retained until the work is repeated or susperseded by other work or for one year after the work is performed.

(2) The records of the last complete overhaul of each airframe, engine, propeller, rotor, and appliance shall be retained until the work is superseded by work of equivalent scope and detail.

(3) The records specified in paragraph (a) (2) of this section shall be retained and transferred with the aircraft at the time the aircraft is sold.

(c) The certificate holder shall make all maintenance records required to be kept by this section available for inspection by the Administrator or any representative of the National Transportation Safety Board (NTSB).

§ 135.363 Transfer of maintenance records.

Each certificate holder who sells a U.S. registered aircraft shall transfer to the purchaser, at the time of the sale, the following records of that aircraft, in plain language form or in coded form which provides for the preservation and retrieval of information in a manner acceptable to the Administrator: (a) The records specified in § 135.361(a)(2).

(b) The records specified in § 135.361 (a)(1) which are not included in the records covered by paragraph (a) of this section, except that the purchaser may permit the seller to keep physical custody of such records. However, custody of records by the seller does not relieve the purchaser of his responsibility under § 135.361(c) to make the records available for inspection by the Administrator or any representative of the National Transportation Safety Board (NTSB).

§ 135.365 Airworthiness release or aircraft log entry.

(a) No certificate holder may operate an aircraft after maintenance, preventive maintenance, or alterations are performed on the aircraft unless the certificate holder prepares, or causes the person with whom the certificate holder arranges for the performance of the maintenance, preventive maintenance, or alterations, to prepare:

(1) An airworthiness release; or

(2) An appropriate entry in the aircraft log.

(b) The airworthiness release or log entry required by paragraph (a) of this section must:

(1) Be prepared in accordance with the procedure set forth in the certificate holder's manual;

(2) Include a certification that: (i) The work was performed in accordance with the requirements of the certificate holder's manual;

(ii) All items required to be inspected were inspected by an authorized person who determined that the work was satisfactorily completed;

(iii) No known condition exists that would make the aircraft unairworthy;

(iv) So far as the work performed is concerned, the aircraft is in condition for safe operation; and

(3) Be signed by an authorized certificated mechanic or repairman except that a certificated repairman may sign the release or entry only for the work for which he is employed and for which he is certificated.

APPENDIX I.—PROPOSALS WITHDRAWN FROM THE 135 REVIEW PROGRAM HELD IN 1976

The proposals listed below were-withdrawn by the proponent, FAA, after the Part 135 Regulatory Review Conference in November 1976. The withdrawal of these proposals does not commit FAA to any future course of action.

Proposal No.:	*Rule content*
10---	Financial information required for issue of ATCO certificate.
26---	En route navigational facilities.
33---	Pilot-in-command qualifications: IFR flight.
34---	Pilot-in-command qualifications: IFR flight.
43---	Applicability.
48---	Flight following system.
64---	Pilot qualification: Certificate required.
66---	Responsibility for operational control.
71---	Engine inoperative: Landing: reporting.
77---	Line Checks.
78---	Proficiency Checks.
105--	Maintenance and preventive maintenance personnel duty time limitations.

APPENDIX II.—PROPOSALS WITHDRAWN FROM THE OPERATIONS REVIEW PROGRAM HELD IN 1975.

The proposals listed below regarding Part 135 were withdrawn by their proponents after the publication of the committee workbooks. Their withdrawal does not prevent the proponents or other interested persons from submitting similar proposals in the future. The withdrawal of FAA proposals does not commit the FAA to any future course of action.

Proposal No.:	*Proponent*
708---	Federal Aviation Administration.
710---	Do.
712---	Do.

The text of these proopsals can be obtained from the Office of the Chief Counsel, Attention: Rules Docket (AGC-24), Docket No. 14322, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591. (Operations Review Notice 75-9 [40 FR 24041]).

APPENDIX III.—PROPOSALS REMOVED FROM CONSIDERATION DURING THE OPERATIONS REVIEW PROGRAM IN 1975

Based on the FAA's review of the discussion at the Biennial Operations Review Conference and of the information submitted by interested persons, the following proposals considered by the Committee at the Operations Review Conference are removed from consideration for the reasons listed. The removal of these proposals from consideration does not commit the FAA to any future course of action.

Proposal No.:	*Proponent*
709---	Air Taxi and Commercial Pilots Association.
715---	Sam J. Corso.
719---	Secretariat General a L'Aviation Civile.
728---	Golden West Airlines.
737---	Association of Flight Attendants.
743---	Sam J. Corso.
747---	Air Taxi and Commercial Pilots Association.
754---	Air Line Pilots Association.
755---	Do.
756---	Air Tax and Commercial Pilots Association.
759---	Air Line Pilots Association.
764---	National Air Transportation Association.
771---	Do.
776---	Do.
778---	Do.
782---	Bransom Engineering Company, Inc.
785---	Air Line Pilots Association.
790---	Air Taxi and Commercial Pilots Association.
794---	National Air Transportation Association.
808---	Air Wisconsin, Inc.
809---	National Air Transportation Association.
811---	Air Taxi and Commercial Pilots Association.
812---	Sun Chemical Corporation.
812A--	Air Line Pilots Association.
814---	Thomson CSR and Sfena.
816---	Air Line Pilots Association.

Proposal No. 709. The proponent withdrew the first part of the proposal but retained that portion of the proposal which proposed deletion of the words "in air commerce" from the definition of "Commercial Operator." Adoption is inappropriate since Part 1 of the Federal Aviation Regulations defines "Commercial Operator" utilizing the term "in air commerce" which is consistent with the FAA's statutory safety authority.

Proposal No. 715. This proposal is one of a series which proposed the consolidation of all maintenance requirements within Part 43. The FAA, however, believes that where maintenance rules bear a specific applicability to a particular operation they should be retained within the part pertaining to the operation concerned to avoid confusion and promote clarity.

Proposal No. 719. The FAAct of 1958 requires a U.S. airworthiness certificate for aircraft used by U.S. operators and requires U.S. operators to use aircraft of U.S. registry. Only U.S. citizens can register aircraft on the U.S. registry. Adoption of this proposal would require amendment of the FAAct of 1958. Such action is beyond the scope of the Operations Review.

Proposal No. 728. The proposal would prohibit a Part 135 certificate holder from utilizing a pilot who has reached his 60th birthday. The FAA does not believe the proponent has presented sufficient justification for mandatory retirement age of 60 years for pilots-operating under Part 135.

Proposal No. 737. The proposal would require that flight attendants be provided on Part 135 aircraft having a passenger seating capacity of more than 15 instead of more than 19 as stated in the current rule. The FAA believes that the proponent did not present sufficient justification for a rule change.

Proposal No. 743. The proposal would remove the provisions of § 135.60 and place them in Part 91. The FAA believes that such a change is unwarranted as it would decrease the requisite flexibility presently available to Part 135 operators.

Proposal No. 747. This proposal would provide that the pilot in command would have joint authority with the certificate holder to authorize the carriage of arms aboard an aircraft. The justification offered by the proponent is that the proposal would make Part 135 consistent with Part 121. After review, the FAA considers the proposed change to be unnecessary.

Proposal No. 754. It was proposed to modify the second-in-command requirements on IFR flights conducted under Part 135 to apply to all flights. After review of these proposals the FAA has concluded that the level of safety provided by the current regulations is adequate.

Proposal No. 755—The proposal would delete the provisions of § 135.75. The FAA considers that the level of safety provided under the current rule is adequate and that the proposed change would not be in the public interest.

Proposal No. 756—This proposal would insert a requirement in § 135.77 which would authorize the pilot in command to determine whether the VFR flight could be operated safely without a second-in-command. Since, under current regulations, a pilot has the authority to refuse to operate an aircraft under any conditions which he considers unsafe, the FAA does not believe that sufficient justification exists for the amendment set forth in the proposal.

Proposal No. 759—The proposal would delete the autopilot exception to second-in-command requirement. The FAA considers that the current regulation provides an adequate level of safety and that the proposed change is unnecessary.

Proposal No. 764—The proposal would relax the current regulation concerning flight into known icing conditions. However, sufficient justification was not presented to change the current regulations which provide an adequate level of safety.

Proposal No. 771—The proposed relaxation of the regulation with respect to single-engine aircraft operating "VFR over-the-top" would result in a reduction of safety which is not justified.

Proposal No. 790—The proposal would require that a check pilot hold the appropriate Flight Instructor rating or Airline Transport Pilot Certificate. The FAA believes that the current standards which are equivalent

V 42 16 7 AUG 29 77 UMI

to PIC requirement for the operations authorized are adequate.

Proposal No. 794—The proposal would increase, in certain cases, the flight and duty time allowed crewmembers under § 135.136. This relaxation is unjustified and would result in an unacceptable standard of flight safety.

Proposal No. 808—The proposal would relax the current requirements by redefining the difference between large and small aircraft by allowing aircraft weight to be determined at zero fuel weight for operations under Part 135 instead of maximum certificated take off weight as is presently required. The proponent did not present sufficient justification for the proposed relaxation of the current rules.

Proposal No. 809—See comments on Proposal No. 771.

Proposal No. 811—The proposals would require that each aircraft operated under Part 135 be equipped with "a heated air source with sufficient capacity to enable crewmembers to perform their duties without discomfort or fatigue at at least 60 F." The FAA has determined that the proposed change is neither adequately justified nor technically or economically practicable at the present time. The proponent did not demonstrate that cockpit temperatures under current regulations pose a safety hazard.

Proposal No. 812—This proposal would prohibit Part 135 operations in an aircraft not equipped with an altimeter approved under Part 37. The FAA believes that this proposal is unduly restrictive and unnecessary. Current regulations require aircraft to be equipped with an approved altimeter for certification and provide specific maintenance standards.

Proposal No. 812A—This proposal would require that all night and "VFR over-the-top operations" be conducted pursuant to IFR equipment requirements. There has been no showing that the current regulation does not provide an adequate level of flight safety. Hence, in view of the economic ramifications of such a change, the FAA believes that the proposed change is unwarranted.

Proposal No. 814—The proposal would prohibit the use of runways for landing which were not equipped with either radio or visual approach slope deviation indication unless the aircraft is fitted with special equipment. The FAA is presently evaluating such equipment and will consider possible rule making at the completion of that evaluation.

Proposal No. 816—The proposal would replace the term "extended over-water operations" with the term "25 miles or more-over-water from an airport for landing." The FAA considers that the definition of "extended over-water operations," contained in § 1.1 is adequate and need not be changed for operations under Part 135.

The text of these proposals can be obtained at the Office of the Chief Counsel, Attention: Rules Docket (AGC-24), Docket No. 14322, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C., 20591. (Operations Review Notice 75 9 (39 F.R. 24041)).

(Secs. 313(a), 314(a), 601 through 610, and 1102 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1355(a), 1421 through 1430, and 1502; Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on August 19, 1977.

R. P. SKULLY,
Director,
Flight Standards Service.

Title 24—Housing and Urban Development

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI-2837]

PART 1917—APPEALS FROM PROPOSED FLOOD ELEVATION DETERMINATIONS

Final Flood Elevation Determination for the Town of Wickenburg, Maricopa County, Arizona

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base flood elevations (100-year flood) are listed below for selected locations in the Town of Wickenburg, Maricopa County, Ariz. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: On publication of the Flood Insurance Rate Map for the Town of Wickenburg, Maricopa County, Ariz.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

The Federal Insurance Administrator given notice of his final determinations of flood elevations for the Town of Wickenburg, Maricopa County, Ariz.

This final rule is issued in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the Town of Wickenburg, Maricopa County, Ariz., are available for review at the Wickenburg Post Office, 55 East Yavapai, Wickenburg, Ariz.

The final 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level

[Docket No. FI-2790]

PART 1917—APPEALS FROM PROPOSED FLOOD ELEVATION DETERMINATIONS

Final Flood Elevation Determination for the City of Venice, Madison County, Ill.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base flood elevations (100-year flood) are listed below for selected locations in the City of Venice, Madison County, Ill. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: On publication of the Flood Insurance Rate Map for the City of Venice, Madison County, Ill.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

The Federal Insurance Administrator given notice of his final determinations of flood elevations for the City of Venice, Madison County, Ill.

This final rule is issued in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128 and 24 CFR Part 1917). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the City of Venice, Madison County, Ill., are available for review at the City Hall, Venice.

The final 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Mississippi River	West of levee	429
Local ponding	Near intersection of Bremen and Main Sts.	410
	Between Slough Rd. and Main St.	410
	Intersection of 4th and Hampden Sts.	409
	Intersection of Fillmore and 7th Sts.	411
	Intersection of Weaver and Bissel Aves.	411

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: June 24, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

[Docket No. FI-2792]

PART 1917—APPEALS FROM PROPOSED FLOOD ELEVATION DETERMINATIONS

Final Flood Elevation Determination for the City of Muscatine, Muscatine County, Iowa

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base flood elevations (100-year flood) are listed below for selected locations in the City of Muscatine, Muscatine County, Iowa. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: On publication of the Flood Insurance Rate Map for the City of Muscatine, Muscatine County, Iowa.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

The Federal Insurance Administrator given notice of his final determinations of flood elevations for the City of Muscatine, Muscatine County, Iowa.

This final rule is issued in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the City of Muscatine, Muscatine County, Iowa are available for review at the City Hall, 3rd and Sycamore Street, Muscatine.

The final 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Mississippi River	Highway 92 Bridge	560

[Docket No. FI-2793]

PART 1917—APPEALS FROM PROPOSED FLOOD ELEVATION DETERMINATIONS

Final Flood Elevation Determination for the City of Riverdale, Scott County, Iowa

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base flood elevations (100-year flood) are listed below for selected locations in the City of Riverdale, Scott County, Iowa. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: On publication of the Flood Insurance Rate Map for the City of Riverdale, Scott County, Iowa.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

The Federal Insurance Administrator given notice of his final determinations of flood elevations for the City of Riverdale, Scott County, Iowa.

This final rule is issued in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the City of Riverdale, Scott County, Iowa are available for review at the City Hall, Elmhurst Lane, Riverdale, Iowa.

The final 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Mississippi River	Downstream corporate limits.	574
	South Bellingham St. (extended).	574
	Upstream corporate limits.	575
Duck Creek	Aicon RR.	574
	Davenport, Rock Island & Northwestern RR.	576
	Upstream corporate limits.	579

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: June 24, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

PART 1917—APPEALS FROM PROPOSED FLOOD ELEVATION DETERMINATIONS

Final Flood Elevation Determination for the Township of Warren, N.J.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base flood elevations (100-year flood) are listed below for selected locations in the Township of Warren, N.J. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: On publication of the Flood Insurance Rate Map for the Township of Warren, N.J.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or Toll Free Line 800–424–8872, Room 5270, 451 Seventh Street, S.W., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the Township of Warren. This final rule is issued in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917).

An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided, and the Administrator has resolved the appeals presented by the community.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the Township of Warren are available for review at 46 Mountain Boulevard, Warren, N.J.

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202–755–5581 or toll free line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

The Federal Insurance Administrator given notice of his final determinations of flood elevations for the Village of Richburg, Allegany County, N.Y.

This final rule is issued in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the Village of Richburg, Allegany County, N.Y., are available for review at the Richburg Post Office, Main Street, Richburg.

The final 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Little Genesee Creek.	South corporate limits.	1,618
	Broad St	1,637
	Richardson St	1,644
	Mill St	1,661
	East corporate limits	1,692
West Notch Rd. tributary.	Evans St	1,659
	North corporate limits.	1,715

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001–4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: June 24, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

COASTAL ZONE MANAGEMENT PROGRAM APPROVAL REGULATIONS

V42167 AUG 29 77 UMI

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[15 CFR Part 923]

COASTAL ZONE MANAGEMENT PROGRAM APPROVAL REGULATIONS

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Department of Commerce

ACTION: Proposed rule.

SUMMARY: These proposed regulations revise and incorporate several sets of existing regulations dealing with approval of State coastal management programs. Since a substantial number of coastal States will seek program approval within the next year, it is appropriate to issue these revised regulations now, as they provide greater detail and clarity as to the approval requirements.

DATE: Deadline for submission of written comments: October 28, 1977.

FOR FURTHER INFORMATION CONTACT:

Carol Sondheimer; State Programs Office; Office of Coastal Zone Management; Page Building 1; 3300 Whitehaven Street NW., Washington, D.C. 20235, 202-634-1672.

SUPPLEMENTARY INFORMATION: The National Oceanic and Atmospheric Administration (NOAA) is issuing these proposed revisions to the management program approval requirements, pursuant to section 306 of the Coastal Zone Management Act of 1972, as amended (16 U.S.C. 1451 et seq.), hereafter referred to as the "Act," in response to requests from States, Federal agencies and other interested parties to clarify the requirements by removing any ambiguities in existing program approval regulations and by resolving any apparent conflicts between existing regulations and guidance issued by the Office of Coastal Zone Management (OCZM) in the form of threshold papers and individual letters to States.

These proposed regulations incorporate, revise and will supercede (when issued as final rules) the following sets of existing regulations related to management program approvals:

(1) Final Coastal Zone Management Program Approval Regulations published in the FEDERAL REGISTER on January 9, 1975 dealing with section 306 approval requirements;

(2) Interim Coastal Zone Management Federal-State Consultation Regulations published in the FEDERAL REGISTER on February 2, 1975 dealing with subsections 307(b) and 307(h) of the Act which have to do with Federal consultation, review and approval procedures, and mediation during program development and preliminary approval;

(3) Final Coastal Zone Management Program Approval Regulations Amendment published in the FEDERAL REGISTER on November 2, 1976 dealing with subsection 306(h) of the Act with respect to island segmentation; and

(4) Proposed Coastal Zone Management Program Approval Regulations Amendments published in the FEDERAL REGISTER on December 30, 1976 dealing with subsections 306(c)(2)(B), 306(g) and 312 of the Act which have to do with a continuing State-local consultation mechanism, performance review of approved management programs, amendments or refinements to approved management programs, and termination and withdrawal of funding of approved management programs.

While the revisions herein are numerous, especially in providing greater specificity and detail as to acceptable approaches to meeting the approval requirements, they do not represent a radical alteration to the basic approval requirements. In most summary form these requirements are that a State develop a management program that:

(1) Identifies and evaluates those coastal resources that require management;

(2) Reexamines existing policies and/or develops new policies to address these resources. These policies must be specific, comprehensive and enforceable, and must provide an adequate degree of predictability as to how coastal resources will be dealt with;

(3) Determines specific uses and special geographic areas to be subject to the management program based on the nature of earlier identified coastal concerns. The basis for managing these uses (and/or their impacts) and these areas should be based on resource capability and suitability analyses, socio-economic considerations and public preferences; and

(4) Identifies the inland and seaward areas subject to the management program.

To assure that the program in fact will be put into practice, there must be sufficient legal authorities and organizational structures to implement the program and to insure conformance to it.

In arriving at these substantive aspects of the management program, States are obliged to follow an open process which involves providing information to and considering the interests of the general public, special interest groups, local governments, and regional, State, interstate and Federal agencies.

MAJOR CHANGES

The most major change from the existing approval regulations is not so much a change as a shift in emphasis—to increased attention on enforceable management program policies. Where the existing regulations discuss policy requirements in section 923.4, these proposed regulations devote most of Subpart A to a discussion of policy requirements. States are expected to include policies directed at three broad categories: (1) Resource management, (2) coastal development, and (3) government processes. Included therein are requirements for dealing with wetlands and floodplain management, either directly or through control of impacts on either type of area. These specific requirements have been added in response to the President's Executive Orders of May 25, 1977.

Two other aspects that have received increased attention in these regulations are what constitute acceptable and enforceable legal authorities for program approval purposes (see sections 923.40–923.44 of Subpart E) and what constitutes adequate consideration of national interests affecting a State's coastal zone (see section 923.52 of Subpart F). The devised text and tables in section 923.52 indicate that adequate consideration of the national interest in planning for and siting of facilities which are more than local in nature involves consideration of national interests in resource conservation and preservation as well as national defense, energy, transportation and recreation requirements.

The definition of what constitutes excluded Federal lands has been revised to reflect recent guidance from the Justice Department. On August 10, 1976, the U.S. Department of Justice rendered an opinion concluding that all Federal lands were excluded from the coastal zone as result of section 304(1) of the Act. NOAA interpreted this opinion as being limited to Federal lands owned by the United States, while other Federal agencies argued that the exclusion covered all lands owned, leased or otherwise used by the Federal Government. During Federal interagency review of section 307 regulations, which also are published today elsewhere in the FEDERAL REGISTER, the issue was resubmitted to the Justice Department. NOAA was informally advised that the exclusion was to be applied broadly to cover all lands used by the Federal Government. Accordingly, section 923.33 now states that all lands owned, leased, held in trust by the United States or the use of which is otherwise by law subject solely to the discretion of the Federal Government, its officers or agents, are excluded from a State's coastal zone. However, this section also notes that (1) Federal land actions causing significant offsite effects on coastal zone resources are subject to the Federal consistency requirements of sections 307(c) and (d) of the Act, and (2) in excluding Federal lands from the coastal zone for the purposes of this Act, a State does not relinquish or in any way impair its rights or authority over Federal lands that exist outside of the context of the coastal management program.

New sections have been added providing guidance on the recommended format for the document States submit for management program review and approval (see section 923.71 of Subpart H), the information States should include in their environmental impact assessments (see section 923.62 of Subpart G), and the process by which State programs are reviewed by NOAA, other Federal agencies and the general public (see section 923.72 of Subpart H).

What follows is a more detailed discussion of changes by subpart:

SUBPART A—GENERAL

This subpart contains definitions of major terms and explains the general policy requirements. Existing section 923.2 contains definitions of "full approval" and "preliminary approval" which have been dropped in proposed section 923.2. Definition of these terms is no longer necessary or appropriate as part of section 306 regulations since preliminary approval, to which the definition of full approval is directly related, now is covered by Coastal Zone Management Program Development Regulations. (See 15 CFR 920.40–920.43.)

The definition of the following terms has been added: "relevant Federal agencies" and "principally affected Federal agencies." These two terms appear in subsections 306(c)(1) and 307(b) of the Act, respectively. These terms are defined in sections 925.2(e) and 925.3 of the interim Federal-State Coordination Regulations. In these proposed regulations, the Council on Environmental Quality and the Department of Justice have been dropped, by mutual consent, from the list of relevant Federal agencies that States must consult during program development, given that these two agencies do not have specific missions or programs that affect or could be affected by State coastal zone management programs.

Proposed section 923.3 revises and expands upon the requirements of existing section 923.4. In addition to the changes discussed above having to do with increased emphasis on policy specificity, comprehensiveness, enforceability and predictability, this proposed section differs from existing section 923.4 in placing an equal emphasis on the substance of the management program and on the procedures by which the substance was developed when the Associate Administrator reviews the program for approval purposes. This equal emphasis and the requirement for specific and substantive policies is reflective of NOAA's underlying philosophy of what implementation of State coastal management programs is meant to achieve—that programs should be specific enough to materially increase the predictability of land and water decisions affecting coastal resources that are made by affected parties and by public officials. They also should provide the citizen of the State with a clear idea of those coastal issues which have been determined to be of statewide concern, as well as the manner in which the State will address these issues.

SUBPART B—USES SUBJECT TO MANAGEMENT

This subpart replaces existing sections 923.12 dealing with permissible uses, 923.17 dealing with local regulations and uses of regional benefit and proposed section 923.19 dealing with an energy facility planning process.

The term permissible uses has been dropped because of the confusion created by that phrase. The requirements with respect to uses subject to management have been clarified. They are essentially two phased: A State must (1) identify uses or impacts from those uses that will be controlled by the management program and (2) then must explain how these uses (or impacts) will be managed (i.e., on the basis of what technical and legal underpinnings). These requirements are discussed in sections 923.11 and 923.12, respectively.

Section 923.17 of existing regulations indicate that, at a minimum, facilities in which there is a national interest in their planning or siting must be considered as uses of regional benefit. The proposed section 923.13 makes this optional and provides that uses of regional benefit need be defined only in terms of uses contained in areawide plans adopted by agencies designated pursuant to section 204 of the Demonstration Cities and Metropolitan Development Act of 1966. A review of legislative history and recognition of the fact that the Act itself addresses consideration of national interests in some types of facilities (in subsection 306(c)(8) of the Act) separate from requirements related to uses of regional benefit (in subsection 306(e)(2)) leads NOAA to conclude that uses of regional benefit need not be defined as synonymous with facilities in which there may be a national interest in their planning or siting.

Proposed section 923.14 dealing with energy facility planning adopts the language of proposed section 923.19 (published December 30, 1976) with the addition and expansion of the commentary of 15 CFR 920.18(b)(1) which now appears as section 923.14(c). The purpose of this addition is to make clear the intent of this requirement given that the particular subsection of the Act—305(b)(8)—to which this section relates has been the subject of much discussion and misunderstanding. The intent of this requirement is to develop a clearly articulated process for dealing with energy facilities which may locate in or affect a State's coastal zone. The minimum requirement is that States develop a process for anticipating and managing energy facility impacts in the coastal zone. As a result of developing this required planning process, States should be able to specify the locational conditions that would either lead to or constrain the siting of particular energy facilities in a State's coastal zone.

When this section was published as proposed section 923.19 (on December 30, 1976), a number of comments were received to the effect that the required planning elements were inadequate and/or inappropriate. NOAA regards these as comments beyond the scope of these regulations as the planning requirements are addressed as part of the section 305 Program Development Regulations (15 CFR Part 920). As such, these requirements were subject to public review and comment (FEDERAL REGISTER, December 6, 1976) and the comments referred to above were addressed in the preamble to the revised, final Program Development Regulations, published in the FEDERAL REGISTER on April 29, 1977.

SUBPART C—SPECIAL MANAGEMENT AREAS

This subpart replaces existing sections 923.13 dealing with areas of particular concern, 923.14 dealing with guidelines on priorities, and 923.16 dealing with area designation for preservation and restoration, published January 9, 1975. This subpart also replaces proposed sections 923.18 dealing with shorefront access planning and 923.20 dealing with shoreline erosion/mitigation planning, published on December 30, 1976. This subpart also adds a new section 923.23 containing optional procedures for designating additional areas of particular concern beyond those required by subsection 305(b)(3) of the Act.

Together proposed sections 923.21 and 923.23 envision three categories of areas of particular concern, one of which is required; the other two are optional. The required designation, discussed in section 923.21, is for geographic areas, either generic or site specific, that require additional management beyond the general management controls provided in the management program and for which these additional management techniques are in place and ready to be implemented at the time of program approval. The second category of designation is optional and is discussed in section 923.23. This designation is of areas that the State recognizes require additional management but the nature of management and appropriate techniques will be developed after program approval. The third category is delevolpment of a procedure for designating areas of particular concern in the future after program approval. (See section 923.23.) Included in this third category is the procedure for designating areas for preservation and restoration called for in subsection 306(c)(9) of the Act. (See also section 923.24.) The reason for adding these optional procedures is a recognition of the ongoing nature of the coastal management process and the need to allow States to build into their management programs a process for responding in a responsible and timely manner to future management requirements.

Existing section 923.14 dealing with guidelines on priorities of uses, which is replaced herein with proposed section 923.22, is ambiguous as to whether such guidelines must be developed for the whole coastal zone or only for geographic areas of particular concern. In a threshold guidance paper issued by OCZM subsequent to the existing regulations, OCZM interpreted the existing requirement to apply throughout the coastal zone. However, these proposed regulations now indicate that the requirement to develop guidelines on priorities of uses, including uses of lowest priority, need apply only to areas of particular concern. This more limited interpretation of the requirement appears appropriate for two reasons. For one, while the language of subsection 305(b)(5) of the Act—from which this requirement is drawn—is somewhat ambiguous, it does refer to "particular areas" which can be read as being synonymous with the "areas of particular concern" referred to in subsection 305(b)(3) of the Act. Secondly, part of the purpose of the existing requirement—to establish Statewide priorities for the coastal zone

V 42167 AUG 29 77 UMI

generally—will now be accomplished by proposed section 923.3 which calls for the articulation of Statewide coastal zone policies.

Proposed sections 923.25 and 923.26 dealing with shorefront planning and erosion planning, respectively, adopt the language of proposed sections 923.18 and 923.20, published on December 30, 1976 with the minor change of title for proposed section 023.25 from shorefront access planning to shorefront access and preservation planning. This proposed title is a more accurate reflection of the requirements of that section.

Comments received on these two sections, as proposed in the FEDERAL REGISTER of December 30, 1976, with respect to the inadequacy of the planning requirements are beyond the scope of these regulations. Such comments were reviewed in connection with proposed amendments to the Program Development Regulations (FEDERAL REGISTER, December 6, 1976). NOAA's response to these comments is contained in the preamble to final Program Development Regulations, published April 29, 1977.

SUBPART D—BOUNDARIES

This subpart replaces existing section 923.11. The discussion of boundary requirements has been placed later in these proposed regulations than in the existing regulations as a reflection of the fact that the management boundary is a function, in large measure, of the uses and areas determined pursuant to Subparts B and C. Further, the delineation of the management boundary takes on significance only when the types of resources, uses and areas to be managed and the nature of their management have been determined, at least preliminarily.

Readers are referred to the discussion in Major Changes, above, of the changes made to exclude Federal lands in section 923.33 and the reasons therefor.

SUBPART E—AUTHORITIES AND ORGANIZATION

This subpart replaces and expands considerably existing Subpart C. The requirements of this proposed subpart have been subjected to extensive comment and questioning over the past several years. It is in response to these questions and comments that NOAA has expanded so substantially the discussions herein. Considerable attention is devoted to explaining what constitutes enforceable authorities and options available under the control techniques provided pursuant to subsection 306(e)(1) of the Act. (See section 923.42.)

Section 923.43 discusses acceptable means for assuring that local regulations will not unreasonably restrict or exclude uses of regional benefit (defined pursuant to section 923.13). While one obvious means for providing such assurance is a State override with respect to such uses, it is not the only acceptable means of providing such assurance, nor is it necessarily the most desirable.

The requirements in proposed section 923.44 for incorporation of air and water pollution control requirements pursuant to the Clean Air Act, as amended and the Federal Water Pollution Control Act, as amended are basically the same as those in the existing, equivalent section 923.44. Additional commentary has been provided in the proposed section to provide a clearer understanding of what constitute requirements under those two Acts.

Sections 923.45–923.47 of these proposed regulations deal with organizational requirements of the Act pursuant to subsections 305(b)(6), 306(c)(5) and 306(c)(6). The requirements of proposed section 923.45 regarding a description of how a State is organized to implement its management program is basically the same as the requirement in existing section 923.22. Reference in the existing section to gubernatorial certification of the establishment of the necessary organizational structure now appears in proposed section 923.47 which covers all documentation requirements that should appear in the Governor's transmittal accompanying the program submission. The discussion of the responsibilities of the State agency designated pursuant to subsection 306(c)(5) that appears in existing section 923.22 has been transferred to proposed section 923.46. Included in this proposed section, as part of the designated State agency's responsibilities, is the administrative capability to monitor and evaluate the effectiveness of the State and those given responsibilities under the management program to achieve management program objectives, including monitoring of adherence to the program policies.

SUBPART F—COORDINATION, PUBLIC INVOLVEMENT AND NATIONAL INTERESTS

This subpart replaces existing sections 923.15, 923.30–923.32, and 923.40 and 923.41 of final regulations published January 9, 1975, dealing with consideration of national interests, participation by relevant entities, consultation and coordination with other planning, and public hearings. This subpart also replaces sections 925.1–925.4 and 925.6 of existing interim regulations published February 28, 1975, dealing with Federal consultation and mediation during program development.

Proposed section 923.51 replaces existing section 925.4 (published as Interim Regulations on February 28, 1975) and deals with Federal consultation requirements pursuant to subsections 306(a)(1) and 307(b) of the Act. Basically this section adopts the thrust of the existing section with the following additional emphases:

(1) that Federal agency involvement begin early in program development and that it continue throughout the development process;

(2) that States have a responsibility to evaluate and accommodate, to the extent practicable, valid Federal agency views.

This proposed section now also discusses the Associate Administrator's responsibilities for considering Federal agency views prior to program approval.

After publication of Interim Federal-State Coordination Regulations on February 28, 1975, NOAA received a number of comments on section 925.4. These comments and NOAA's responses are noted below:

(1) One commentator recommended that there be an explicit requirement for States to consider Federal agency views of the national interests as part of the consultation procedure. NOAA RESPONSE: NOAA has accepted this recommendation in modified form. Proposed section 923.51(a)(4) requires States to evaluate Federal comments received during the program development process and, where appropriate, to accommodate the substance of relevant comments in the management program. Relatedly section 923.51(f)(2) encourages Federal agencies to provide States with their interpretations of various national interests. Additionally, proposed section 923.52(f) lists Federal agency statements regarding national interests as one source for deriving national interests to be considered during program development and implementation.

(2) One commentator recommended that NOAA reference, as part of the coordination requirements, the HUD–OCZM Interagency Agreement dealing with the interrelationship of the planning requirements of both agencies. NOAA response: Reference to this agreement, as well as other relevant interagency agreements, can be found in proposed section 923.56(c) dealing with plan coordination.

As indicated in the discussion of major changes above, the proposed section 923.52, which replaces existing section 923.15 and deals with consideration of the national interests called for in subsection 306(c)(8) of the Act, has been revised substantially. This revision is necessary and appropriate given the increased attention this subsection of the Act has received during public and Federal agency reviews of State programs recently approved or presently going through the approval process. This revision also is necessary and appropriate given the apparent confusion and differences of interpretation as to the requirements of existing section 923.15. Proposed section 923.52 recognizes that the national interest in the planning and siting of facilities that are more than local in nature, including energy facilities, is a function of consideration of the national need for those facilities in a State's coastal zone, siting requirements (including coastal dependency) of those facilities, and resource capability and conservation requirements. In effect then, adequate consideration of the national interest in facility siting involves a weighing of these varying and sometimes conflicting considerations. Accordingly the table in existing section 923.15 has been replaced in proposed section 923.52 with two tables that reflect both facility and resource considerations involved in determining the national interest in these facilities. In addition, the requirements with respect to subsection 306(c)(8) of

the Act have been clarified and now require of States that they:

(1) describe national interests considered during program development and the sources thereof;

(2) indicate how competing national interests have been weighed and the reflection of this in the management program, and

(3) describe a process for continued consideration of national interests during program implementation.

In addition, because subsection 306(c)(8) was amended in 1976 to include specific mention of energy facilities, proposed section 923.52(b) includes additional requirements for consideration of the national interest in energy facilities beyond those in section 923.52(a).

Proposed section 923.53 is new and requires States to include discussion of the Federal consistency procedures they will use to implement subsections 307 (c) and (d) of the Act after program approval. The addition of this requirement is in response to Federal agency requests that the State management programs include a discussion of the Federal consistency procedures in the management program document. The details on the consistency requirements pursuant to subsections 307 (c) and (d) and the mediation provisions pursuant to subsection 307(h) after program approval are being published elsewhere in the FEDERAL REGISTER as proposed in 15 CFR Part 930.

Proposed section 923.54 incorporates and somewhat revises existing section 925.6 which deals with mediation of serious Federal-State disagreements during program development or preliminary approval status (authorized under subsection 305(d) of the Act). Mediation of serious disagreements after program approval is dealt with as part of the Federal Consistency Regulations (15 CFR Part 930). Following is a list of comments received on section 925.6 when it was published as part of interim regulations on Feburary 28, 1975 and NOAA responses:

(1) Several reviewers objected to the designation of the Office of Management and Budget (OMB) as the agency which would cooperate with the Secretary in mediating serious disagreements. One reviewer suggested that the Council on Environmental Quality be designated to mediate disagreements regarding environmental issues. Another reviewer suggested that the Energy Resources Council mediate energy related disputes. Yet another reviewer recommended that the National Security Council handle national security disagreements.

NOAA Response: The term "OMB" has been replaced with the term "Executive Office of the President" to permit the Executive Office greater flexibility in designating the entity within that Office which will participate with the Secretary of Commerce in seeking to mediate serious disagreements.

(2) A number of reviewers objected to the cumbersome nature of the mediation process. In response to these comments, significant changes have been made. The reasons for these changes are contained in the preamble to the proposed Federal Consistency Regulations published elsewhere in today's FEDERAL REGISTER.

In addition, NOAA has determined that mediation efforts should be the responsibility of the Secretary and not the Associate Administrator as indicated in existing section 925.6. It was decided that the Office of the Secretary, which is responsible for administering the mediation and appeals system after program approval, should similarly take the lead in mediation efforts during program approval. Proposed section 923.54 reflects this position.

Proposed section 923.55 dealing with opportunities for full participation by governmental entities, interest groups and the general public replaces existing section 923.31 dealing with the same subject matter. The proposed section has been expanded to incorporate some recommendations from an OCZM threshold paper on alternative public involvement techniques.

Proposed section 923.56 dealing with plan coordination incorporates and slightly revises for the purpose of clarification the requirements of existing section 923.32. Continuing consultation requirements after program approval which are addressed in existing section 923.32 now are addressed in proposed section 923.57.

Proposed section 923.57 incorporates the continuing consultation requirements of existing section 923.32 as well as the specific State-local continuing consultation requirements of proposed section 923.42 (published December 30, 1976).

In response to comments on proposed section 923.42, NOAA has made the following changes:

(1) One commentator suggested that "management program decision" subject to the specific State-local consultation mechanism should be limited to those which are discretionary on the part of a State agency and should not include those decisions which are statutorily mandated. NOAA response: NOAA has accepted this suggestion and has revised the definition of "management program decision" in proposed section 923.57(c)(2) accordingly.

(2) One commentator objected to the definition of "conflict" with a local zoning ordinance because the definition leaves the determination of conflict up to the local government. NOAA response: The commentator's observation is correct. NOAA's rationale for so doing is in response to comments by a large number of coastal States (on a draft that preceded the December 30, 1976 proposed regulations) that to do otherwise would create enormous and undesirable burdens on the State agencies. Accordingly, no change has been made to proposed section 923.57(c)(3).

(3) Two comments were received on the definition of "local zoning ordinance, decision or other action." One commentator suggested the types of actions considered to fall within the definition should be further restricted; the other commentator recommended that the list of actions should be expanded. NOAA response: NOAA has not changed the definition in proposed section 923.57(c)(4). NOAA feels that the type of actions defined therein encompass major local zoning actions without placing an unwarranted requirement on either State or local governments.

(4) One commentator suggested that a "waiver" of a right by a local government to comment should be effected when there is a public statement by the appropriate local government official that the local government waives its right to comment or concurs with the State management program decision or that the local government intends to take a contradictory action thereby waiving its right to comment. NOAA response: NOAA has accepted the recommendation and has rewritten section 923.57(c)(6) accordingly. NOAA also has rewritten this section to indicate that, in addition to a written or oral waiver, a waiver of right to comment can occur when the local government takes an action that conflicts or interferes with the State management program decision.

(5) One commentator suggested that it be clarified whether the State management agency or the local government has the ultimate administrative authority to resolve conflicts. NOAA response: NOAA has added language to proposed section 923.57(f) to indicate that the State management agency has the ultimate administraive authority to resolve conflicts. This is in keeping with one of the basic purposes of the Act which is to encourage States to exercise effectively their responsibilities to achieve wise use of land and water resources in the coastal zone.

(6) One commentator objected, as too time-consuming, to the requirement that the State management agency inform the affected local government in writing of the outcome of State consideration of local government comments. NOAA response: NOAA does not feel it unreasonable to require a written outcome of the State's consideration of local comments. This written outcome does not have to be in the form of a specific letter to the affected local government but may take the form of notice in an agency newsletter or other public notice that normally would be seen by the affected local government. Accordingly, section 923.57(f)(2) has not been changed.

Proposed section 923.58 dealing with public hearing requirements replaces existing section 923.41. The language of 15 CFR 920.31 has been adopted because of its greater clarity and specificity. In response to questions, section 923.58 indicates that the public hearing required on the management program need not be on the document itself submitted to the Associate Administrator but must cover all aspects contained in the document.

SUBPART G—MISCELLANEOUS

Proposed section 923.61 deals with requirements for segment management programs and incorporates the requirements of existing section 923.43 as amended on November 2, 1976.

V 42167 AUG 29 77 UMI

Proposed section 923.62 is new and provides guidance on what items should be discussed in the environmental impact assessment which is part of the State's program submission. This addition has been made in response to repeated requests from States for guidance on this matter. The information in section 923.62 is based on an OCZM guidance memo issued August 1976.

SUBPART H—REVIEW/APPROVAL PROCEDURES

Proposed section 923.71 is new and provides a recommended format for program submissions. Again this guidance has been added in response to numerous requests from coastal States over the past few years. The recommended format is not mandatory. States may use a different format as long as it is discussed with and approved by OCZM.

In response to a comment on the Interim Federal-State Coordination Regulations issued February 2, 1975 that a State's management program should include specific Federal agency comments, proposed section 923.71(c)(4)(v) indicates that a summary of such comments should go into the body of the management program but copies of specific agency comment should be reserved for an appendix to the program document. It is optional on the part of the State whether specific comments are included in an appendix.

Proposed section 923.72 dealing with review/approval procedures replaces existing section 925.5 of interim regulations issued February 2, 1975. Revisions have been made to reflect more accurately the process by which the Associate Administrator decides whether to grant full approval to a State submission.

When section 925.5 was issued as part of interim regulations, the following comments were received:

(1) One reviewer argued that an environmental impact statement was not required prior to approval of a management program. NOAA response: NOAA has determined that the National Environmental Policy Act (NEPA) requires development of a statement prior to approval of a management program for a coastal State's entire coastline. Accordingly this requirement is reflected in the process described in section 923.72. In the case of segmented management programs, NOAA has determined that there may be instances where approval of the segment program will not have substantial envirnomental impacts. This situation is covered in proposed section 923.73 (a)(3).

(2) Another commentator recommended that, if a management program submitted for final approval included changes from the program as initially submitted, or contained new information, then any existing final environmental impact statement should be circulated for review and comment as a draft environmental impact statement. NOAA response: NOAA's procedures are in accordance with the Council on Environmental Quality's (CEQ) guidelines which specifically envison the option of an agency supplementing or amending "a draft or final environmental statement, * * * when substantial changes are made * * * or significant new information becomes available * * *" (40 CFR 1500.11(b)).

(3) One reviewer objected to the fact that the environmental impact statement process does not require a public hearing be held. NOAA response: While a public hearing is not required by NEPA, CEQ's guidelines encourage such hearing be held when a decision relates to a large scale program or project, or may be controversial. The Associate Administrator regards the decision to approve a State management program of sufficient scale and controversy to warrant a public hearing before making a final decision. Accordingly no change has been made.

Finally, the Associate Administrator has decided it is not necessary to publish notices of approval or disapproval of management programs in the FEDERAL REGISTER. Notice of the availability of draft and final environmental impact statements, however, will be published in the FEDERAL REGISTER. The findings of the Associate Administrator, in the event of approval, will be available upon request and will be sent as a matter of course to relevant Federal agencies. Section 923.72 reflects these statements.

Proposed section 923.73 entitled miscellaneous is new and deals with factors that may shorten the review timeliness discussed in section 923.72. Section 923.73 also indicates the procedures the Associate Administrator will follow in reviewing proposed amendments to a State's approved management program.

SUBPART I — APPLICATIONS FOR ADMINISTRATIVE GRANTS

Proposed Subpart I incorporates existing Subpart F dealing with the same subject matter. The following minor changes have been made:

(1) Where the Preapplication for Federal Assistance, Form SF-424, was required for the initial administrative grant, proposed section 923.86(a) now makes its use optional.

(2) Proposed section 923.83 dealing with allocation of portions of a State's grant to other entities has been revised to note restrictions on pass-throughs to local governments if a State is relying primarily on the direct State control technique provided for in subsection 306 (e)(1)(B) of the Act. This section also has been revised to indicate the conditions under which tribal governments may be allocated a portion of a State's administrative grant.

(3) Proposed section 923.85 dealing with eligible costs has been expanded to note that equipment purchases of more than five hundred dollars per item require NOAA approval prior to purchase and the basis on which such approvals will be made.

SUBPART J—REVIEW OF APPROVED MANAGEMENT PROGRAMS

This proposed subpart incorporates in somewhat revised form proposed Subpart G issued December 30, 1976. Following is a summary of comments received on the December 30 proposed Subpart G and NOAA's responses:

(1) One commentator suggested assessment of a State's performance should not be in terms of "adhering to the goals, objectives and policies contained in the management program" but rather in terms of a State's achieving goals and objectives in addition to adhering to the program policies. NOAA response: NOAA has accepted the recommended language change and has revised section 923.91(b)(1) accordingly.

(2) One commentator objected to reference to public interest groups in the section dealing with entities the Associate Administrator may consult in assessing State performance. This commentator noted that private interest groups, including representatives of industrial or development associations, should not be excluded arbitrarily as a potential evoluation source. NOAA response: NOAA concurs with the commentator's point and has deleted the word "public" from section 923.91(b)(4)(iv).

(3) Finally one commentator objected in general to the proposed performance review criteria as being too vague and not providing enough specific criteria. More specifically this commentator objected to the level of reporting detail being left to consultation between the Associate Administrator and the State. NOAA response: While it is difficult to know with any certainty in advanced of implementing the procedures contained in section 923.91 whether the procedures and criteria contained therein are too vague, NOAA does feel that the proposed regulations provide a reasonable and sufficiently clear basis on which to assess performance of approved management programs. As more State programs are approved, NOAA will gain more experience with performance reviews. If this experience indicates the proposed regulations are inadequate to serve their intended purpose, it would be appropriate, at that point in time, to amend the proposed criteria and procedures. Accordingly no major changes have been made to section 923.91.

Proposed section 923.92 incorporates proposed section 923.72 incorporates proposed section 923.72 (published December 30, 1976) dealing with amendments or modifications to approved management programs. In response to comments that the specific procedures to be followed in requesting an amendmend were not clearly described, section 923.92(c) has been added. In response to yet other comments that the statement that "Federal consistency * * * shall not apply to those parts of a State's coastal management program that are proposed for amendment * * *" was unclear, section 923.92(d) has been revised to indicate that unless and until an amendment to a management program is approved by the Associate Administrator, the Federal consistency provisions attach to all aspects of a State's management program, even those being proposed for amendment.

Proposed section 923.93 dealing with refinements to approved management programs incorporates proposed section 923.73 published December 30, 1976. This section has been expanded to include the procedures States shall follow in making program refinements. These procedures are in section 923.92(c) and have been added in response to requests from commentators on the December Proposed Regulations.

Proposed section 923.94 incorporates proposed section 923.74 (published December 30, 1976) dealing with termination and withdrawal of funding for programmatic reasons.

Environmental and inflationary impact statements: NOAA has reviewed these regulations pursuant to the National Environmental Policy Act of 1969 and has determined that promulgation of these regulations will not have a significant impact on the environment.

NOAA has determined that this document does not contain a major proposal requiring preparation of an Inflationary Impact Statement under Executive Order 11821 and OMB Circular A-107.

Public review and comment: NOAA invites public review and comment on these proposed regulations so that they again may be modified, where necessary and legally permissible, to fully satisfy the requirements of the Act in a manner which addresses the concerns of all parties affected by the regulations. Written comments should be submitted to the State Programs Division, Attention: Carol Sondheimer, Office of Coastal Zone Management, Page Building 1, 3300 Whitehaven Street NW., Washington, D.C. 20235 on or before October 28, 1977. Following the close of the comment period, and after review of comments, these proposed regulations may be amended and will be published as final regulations in the FEDERAL REGISTER.

Dated: August 23, 1977.

T. P. GLEITER,
Assistant Administrator for Administration.

PART 923—COASTAL ZONE MANAGEMENT PROGRAM APPROVAL REGULATIONS

Subpart A—General

Sec.
923.1 Purpose.
923.2 Definitions.
923.3 General requirements.

Subpart B—Uses Subject to Management

923.10 General.
923.11 Uses subject to management.
923.12 Use permissibility.
923.13 Uses of regional benefit.
923.14 Energy facility planning process.

Subpart C—Special Management Areas

923.20 General.
923.21 Areas of particular concern.
923.22 Priorities of uses.
923.23 Other areas of particular concern.
923.24 Areas for preservation or restoration.
923.25 Shorefront access and preservation planning.
923.26 Shoreline erosion/mitigation planning.

Subpart D—Boundaries

Sec.
923.30 General.
923.31 Inland boundaries.
923.32 Seaward boundaries.
923.33 Excluded lands.
923.34 Interstate boundaries.

Subpart E—Authorities and Organization

923.40 General.
923.41 Identification of authorities.
923.42 Control techniques.
923.43 Authorities related to uses of regional benefit.
923.44 Air and water pollution control requirements.
923.45 Organizational structure.
923.46 Designated state agency.
923.47 Documentation.

Subpart F—Coordination, Public Involvement and National Interests

923.50 General.
923.51 Federal-State consultation.
923.52 Consideration of national interests.
923.53 Federal consistency procedures.
923.54 Mediation.
923.55 Full participation.
923.56 Plan coordination.
923.57 Continuing consultation.
923.58 Public hearings.

Subpart G—Miscellaneous

923.60 General.
923.61 Segmentation.
923.62 Environmental impact assessments.

Subpart H—Review/Approval Procedures

923.70 General.
923.71 Recommended format for program submissions.
923.72 Review/approval procedures.
923.73 Miscellaneous.

Subpart I—Applications for Administrative Grants

923.80 General.
923.81 Administration of the program.
923.82 State responsibility.
923.83 Allocation.
923.84 Geographic segments.
923.85 Eligible costs.
923.86 Application for initial grant.
923.87 Applications for subsequent grants.
923.88 Grant amendments.

Subpart J—Review of Approved Management Programs

923.90 General.
923.91 Review of performance.
923.92 Amendments or modifications to approved management programs.
923.93 Refinements to approved management programs.
923.94 Termination and withdrawal of administrative funding.

AUTHORITY: Secs. 306, 307 and 312, Coastal Zone Management Act of 1972, Pub. L. 92-583, 86 Stat. 1280, as amended by Pub. L. 94-370, 90 Stat. 1013.

Subpart A—General

§ 923.1 Purpose.

(a) The primary purpose of these regulations is to set forth the criteria by which State programs submitted to the Associate Administrator for management program approval pursuant to section 306 of the Act will be evaluated. These regulations also establish the procedures by which States meeting the approval criteria may apply for administrative grants pursuant to subsections 306 (a) and (h) of the Act. Also included in these regulations are the procedures by which programs submitted for approval will be reviewed; the criteria by which the performance of approved programs will be evaluated for subsequent administrative grants; the conditions under which approved programs may be altered; and the conditions under which grants may be terminated.

(b) Sections 305, 306 and 307 of the Act set forth various requirements which must be fulfilled as a condition of program approval. The specifics of these requirements are set forth below in these groupings: General Requirements; Uses Subject to Management; Special Management Areas; Boundaries; Authorities and Organization; Coordination, Public Involvement and National Interests; and Miscellaneous. All relevant sections of the Act are dealt with under one or more of these groupings but not necessarily in the order in which these sections appear in the Act.

(c) The 15 CFR Part 920 regulations pertaining to program development grants are incorporated herein by reference. Accordingly, the two sets of regulations should be read together. Where there are differences in the Part 920 and Part 923 regulations, the Part 923 regulations control.

(d) Care has been taken in the use of the following words: "must," "shall," "provided that," "may," and "should." Wherever possible the words "must", "shall," and "provided that" appear in sections entitled Requirement. However, even when such words appear in Comment sections, they shall be interpreted as requirements of these regulations. The words "should" or "may" are to be interpreted as recommendations, and not as requirements for program approval.

(e) Finally, States should note that, while they must meet the requirements of these regulations, the presentation of how these requirements are met—either to the Associate Administrator or to the public—need not be in the order of phraseology uses herein. (See Subpart H for further discussion of the program submission format.)

§ 923.2 Definitions.

(a) The term "Act" means the Coastal Zone Management Act of 1972, as amended.

(b) The term "Secretary" means the Secretary of Commerce or his/her designee, including especially the Associate Administrator for Coastal Zone Management based on duly executed delegations of authority from the Secretary to the Administrator of the National Oceanic and Atmospheric Administration (NOAA) by Amendment 5 of the Department of Commerce Organizational Order 25-5A, dated October 13, 1976; and from the Administrator to the Associate Administrator for Coastal Zone Management by NOAA Circular 76-82, effective October 13, 1976.

(c) The term "Associate Administrator" means the Associate Administrator for Coastal Zone Management, National Oceanic and Atmospheric Administration, U.S. Department of Commerce.

V 42167 AUG 29 77 A UMI

(d) The term "relevant Federal agencies" means those Federal agencies with programs, activities, projects or regulatory, financing or other assistance responsibilities, in the following fields which could impact or affect a State's coastal zone:

(1) Energy production or transmission.
(2) Recreation of an interstate nature.
(3) Interstate transportation.
(4) Production of food and fiber.
(5) Preservation of life and property.
(6) National defense.
(7) Historic, cultural, esthetic and conservation values, and
(8) Mineral resources and extraction.

The following are defined as relevant Federal agencies:

Department of Agriculture	Department of Transportation
Department of Commerce	Environmental Protection Agency
Department of Defense	Energy Research and Development Administration
Department of Health, Education, and Welfare	Nuclear Regulatory Commission
Department of Housing and Urban Development	Federal Energy Administration
Department of the Interior	Federal Power Commission
	General Services Administration

Should governmental reorganization occur, relevant Federal agencies shall be those with programs, activities, projects or responsibilities in the fields cited above. States should include other relevant Federal agencies as appropriate to their program development or implementation efforts.

(e) The term "Federal agencies principally affected" shall mean the same as "relevant Federal agencies." The Associate Administrator may expand upon the term for purposes of reviewing the management program and environmental impact statement.

(f) The following terms, as used in these regulations, have the same definition as provided in section 304 of the Act.

(1) Coastal zone.
(2) Coastal waters,
(3) Coastal State,
(4) Estuary.
(5) Land use.
(6) Water use.
(7) Management program.

§ 923.3 General requirements.

(a) *Requirement.* In addition to the specific requirements related to individual elements of a State's coastal management program (such as those related to boundaries, areas of particular concern, legal authorities, etc.), the approvability of any State program, pursuant to section 306 of the Act, will be determined by the Associate Administrator in accordance with the following general requirements:

(1) That the management program is comprehensive. It must address and provide for the management of those significant resources, uses and areas that the State has determined, through its development process and in consultation with all relevant interests as required by the Act and these regulations, make its coastal zone a unique, vulnerable and/or valuable area requiring various forms of management;

(2) That the policies, standards, objectives and criteria upon which decisions pursuant to the program will be based are articulated clearly and are sufficiently specific to provide (i) a clear understanding of the content of the program, especially in identifying who will be affected by the program and how, and (ii) a clear sense of direction and predictability for decision makers who must take actions pursuant to or consistent with the management program; and

(3) That there are sufficient policies of an enforceable nature to insure the implementation of and adherence to the management program.

(b) *Requirement.* If a State's program does not provide for the management of those coastal resources that are unique, vulnerable and/or valuable or for the management of those uses which may have direct and significant impact(s) on those resources, the State must demonstrate to the satisfaction of the Associate Administrator that the absence of such provisions will not violate the Act's findings and its national policies of (i) achieving wise use of coastal land and water resources or (ii) preserving, protecting, developing and, where possible, restoring or enhancing the nation's coastal resources.

(c) *Comment.* Statutory Citation, Subsection 306(c)(1):

> Prior to granting approval of a management program submitted by a coastal state, the Secretary shall find that: (1) the state has developed and adopted a management program for its coastal zone • • • which is adequate to carry out the purposes of this title and is consistent with the policy declared in section 303 of this title.

(d) *Comment. Statutory Citation,* Section 303:

> The Congress finds and declares that it is the national policy (a) to preserve, protect, develop, and where possible, to restore or enhance the resources of the Nation's coastal zone for this and succeeding generations, (b) to encourage and assist the states to exercise effectively their responsibilities in the coastal zone through the development and implementation of management programs to achieve wise use of the land and water resources of the coastal zone giving full consideration to ecological, cultural, historic, and esthetic values as well as to needs for economic development, (c) for all Federal agencies engaged in programs affecting the coastal zone to cooperate and participate with state and local governments and regional agencies in effectuating the purposes of this title, and (d) to encourage the participation of the public, of Federal, state and local governments and of regional agencies in the development of coastal zone management programs. With respect to implementation of such management programs, it is the national policy to encourage cooperation among the various state and regional agencies including establishment of interstate and regional agreements, cooperative procedures, and joint action particularly regarding environmental problems.

(e) *Requirement.* Particular attention should be devoted to subsection 303(b) of the Act which calls for (i) the ability to manage coastal land and water resources based on (ii) ecological, historical, cultural, esthetic and economic considerations. It is impossible to specify by regulation the relevant scope, priority and type of such considerations for each coastal State, given significant differences in the bio-physical characteristics of the coastal zone, the quantity, quality and distribution of coastal resources located therein and the uses of or conflicts over use of these diverse resources. At a minimum, however, States shall include three broad classes of policies in their management program in order to provide a framework for the exercise of various management techniques governing coastal resources, uses and areas:

(1) *Resource policies* are directed toward the management and conservation of wetlands and floodplains as well as estuaries, intertidal areas, beaches, barrier islands, cliffs and bluffs, other areas subject to erosion or accretion, areas containing fishery, spawning and harvesting grounds, and such other areas or resources as the State deems require management;

(2) *Development policies* are those that address such matters as shorefront access, ports and harbors, energy facilities, coastal dependency of large-scale industrial, commercial, residential and institutional developments; and

(3) *Government process policies* are those which address such matters as State-local roles and responsibilities; clarification and simplification of regulatory and permitting procedures.

(f) *Comment.* Policies addressing appropriate uses of or in wetlands and floodplains located in a State's coastal zone, or policies addressing acceptable and non-acceptable impacts in those arms, are necessary in order to meet the Act and the directives of Presidential Executive Orders issued May 24, 1977. With respect to the Associate Administrator's responsibility for considering how a State has treated wetlands in its management program, the President's Executive Order states that:

> (1) Each agency shall provide leadership and take action to minimize the destruction, loss or degradation of wetlands, and to preserve and enhance the natural and beneficial values of wetlands, in carrying out the agency's responsibilities for • • • conducting Federal activities and programs affecting land use, including but not limited to water and related land resources planning, regulating and licensing activities • • •
>
> (5) In carrying out the activities described in Section 1 of this Order, each agency shall consider factors relevant to a proposal's effect on the survival and quality of the wetlands. Among these factors are:
>
> (a) public health, safety, and welfare, including water supply, quality, recharge and discharge, pollution, flood and storm hazards, and sediment and erosion;
>
> (b) maintenance of natural systems, including conservation and long term productivity of existing flora and fauna, species and habitat diversity and stability, hydrologic utility, fish, wildlife, timber, and flood and fiber resources, and

(c) other uses of wetlands in the public interest including recreational, scientific and cultural uses.

With respect to the Associate Administrator's responsibility for how a State has treated floodplains in its management program, the Presidents' Executive Order states that:

> (1) Each agency shall provide leadership and shall take action to reduce the risk of flood loss, to minimize the impact of floods on human safety, health and welfare, and to restore and preserve the natural and beneficial values served by floodplains in carrying its responsibilities for • • • conducting Federal activities and programs affecting land use, including but not limited to water and related land resources planning, regulating and licensing activities.
>
> (2) In carrying out the activities described in Section (1) of this Order, each agency has a responsibility • • • to ensure that its planning programs and budget requests reflect consideration of flood hazards and flood plain management • • •
>
> (4) Each agency shall take floodplain management into account when formulating or evaluating any water and land use plans and shall require land and water resources use appropriate to the degree of hazard involved • • •
>
> (6) The term "floodplain" shall mean the lowland and relatively flat areas adjoining inland and coastal waters including floodprone areas of offshore islands, including at a minimum, that area subject to a one percent or greater chance of flooding in any given year.

Subpart B—Uses Subject to Management

§ 923.10 General.

This subpart deals with land and water uses which, because of their impacts on important coastal resources, including especially coastal waters, are subject to the terms of the management program. Determination of these uses will, in turn, assist in determining the appropriate coastal management boundary. This subpart deals in full with the requirements of subsections 305(b)(2), Uses Subject to Management and 305(b)(8), Energy Facility Planning, and deals in part with the requirements of subsection 306(e)(2), Uses of Regional Benefit.

§ 923.11 Uses subject to management.

(a) *Requirement.* The essential requirements of this subpart are: (1) To determine and identify which uses shall be subject to the terms of the management program;

(2) To establish the bases for policies and management authorities that will govern whether and how uses will be permitted, conditioned or denied; and

(3) To assure that these policies and authorities incorporate a sufficiently broad range of considerations to address the national concerns of sections 302 and 303 of the Act.

(b) *Comment.* In order to meet the requirements of (a)(1) above, States should inventory natural and manmade coastal resources and should analyze the quality, location, distribution and demand for these resources as well as the need for and nature of coastal management. Assessments derived from these inventories and analyses should form one basis for determining uses subject to the management program.

(c) *Comment.* In addition, States should consider the potential for direct and significant coastal impacts from the following types of uses, especially as they affect unique, vulnerable or valuable coastal resources:

(1) Residential and commercial developments such as subdivisions, high-rise apartments or hotels, trailer parks and second-home developments, and shopping centers, and associated transportation corridors;

(2) Industrial developments, such as tank farms and refineries, power plants, manufacturing complexes, industrial parks, onshore and offshore port facilities, mineral and sand extraction operations; liquified natural gas (LNG) facilities, petrochemical plants;

(3) Recreational facilities such as beaches, amusement parks, marinas and other boating facilities; and

(4) Public facilities and public works such as schools, hospitals, government buildings, dams and water treatment facilities.

(d) *Comment.* In determining if the managed uses and their management are sufficiently comprehensive, the Associate Administrator will rely primarily on whether major coastal-related issues raised by the public and/or governmental entities during the course of program development have been addressed.

§ 923.12 Use permissibility.

(a) *Requirement.* In order to meet the requirements of subsection 305(b)(2) of the Act, and the associated requirements of § 923.11(a)(2), States must develop policies and procedures by which uses, determined to be subject to the management program, will be permitted, conditioned, modified and/or prohibited. These policies and procedures regarding management of uses and/or their impacts must be capable of effective implementation at the time of program approval.

(b) *Comment.* Statutory Citation, Subsection 305(b)(2):

> The management program for each coastal state shall include • • • (2) A definition of what shall constitute permissible land uses and water uses within the coastal zone which have a direct and significant impact on the coastal water.

(c) *Comment.* The policies and procedures called for in paragraph (a) above should be based on the following types of analyses: (1) Capability and suitability of resources types to accommodate existing, projected or potential uses;

(2) Environmental impacts on coastal resources;

(3) Compatability of various uses with adjacent uses or resources;

(4) Evaluation of inland and other locational alternatives;

(5) Coastal dependency of various uses and other social and economic considerations.

(d) *Comment.* The procedures called for in paragraph (a) above can be satisfied by use of performance standards provided that such standards take into account the full range of considerations called for in sections 302, 303 and 307(f) of the Act. These considerations include, but are not limited to:

(1) Air and water quality;

(2) Aesthetics, in instances where the character of coastal development or historic preservation are particularly important concerns;

(3) Open space or recreational usage of the shoreline where increased access to the shorefront is a particularly important concern;

(4) Floral and faunal communities where loss of living marine resources or threats to endangered or threatened coastal species are particularly important concerns; and

(5) Coastal dependency of various activities and uses.

(e) *Comment.* To the extent a State's management program policies are generalized, performance standards that will be used to enforce these policies will need to be sufficiently explicit and specific that persons affected by the management program will have a reasonable understanding of what uses would be permitted in which locations of the coastal zone and under what conditions. Further, while performance standards represent an acceptable procedure for managing uses, they do not substitute for the requirement of § 923.11(a)(1) to identify uses subject to the management program.

§ 923.13 Uses of regional benefit.

(a) *Requirement.* In order to meet the requirements of subsection 306(e)(2) of the Act, State's must:

(1) Identify what constitute uses of regional benefit; and

(2) Identify those methods that shall be used to assure that unreasonable restrictions or exclusions of such uses by local land and water use regulations shall not occur.

(b) *Comment.* Statutory Citation, Subsection 306(e)(2):

> Prior to granting approval, the Secretary shall also find that the program provides • • • (2) for a method of assuring that local land and water use regulations within the coastal zone do not unreasonably restrict or exclude land and water uses of regional benefit.

(c) *Comment.* States have a number of options with respect to identifying uses of regional benefit as required in (a)(1) above. States may define uses of regional benefit as uses that are more than local in nature as defined in plans adopted by areawide agencies designated pursuant to section 204 of the Demonstration Cities and Metropolitan Development Act of 1966. Where States follow this procedure, they should coordinate the requirements of this section with those of § 923.56 having to do with plan coordination. Alternatively, States may choose to define uses of regional benefit to include facilities in which there may be a national interest in their planning or siting. In such cases, States should refer to § 923.52 which discusses consideration of facilities in which there may be a national interest in planning and siting. Another alternative would be for the State to identify those uses

V 42167 AUG 29 77 UMI

which it perceives will affect or produce some regional benefit defined in terms of providing services or other benefits to citizens of more than one unit of local, general-purpose government (excluding situations such as cities and counties that exercise jurisdiction over the same geographic areas).

(d) *Comment.* Once uses of regional benefit have been defined, States must provide a method for assuring local regulations do not unreasonably restrict or exclude such uses. Acceptable alternatives for meeting this requirement are discussed in § 923.43 of subpart E—Authorities and Organization.

§ 923.11 Energy facility planning process.

(a) *Requirement.* In order to meet the requirements of subsection 305(b)(8) of the Act, States must develop a planning process which is capable, at a minimum, of anticipating and managing the impacts from energy facilities in or affecting a State's coastal zone. This process must include the following elements:

(1) An identification of energy facilities which are likely to locate in, or which may significantly affect, a State's coastal zone;

(2) A procedure for assessing the suitability of sites for such facilities;

(3) Articulation of State policies for managing energy facilities and their impacts;

(4) A mechanism for coordination and or cooperative working arrangements, as appropriate, between the State coastal planning or management agency and other relevant State, Federal, local and interstate agencies involved in energy facility planning and/or siting, including conformity of siting programs, where they exist, with the coastal zone management program; and

(5) An identification of legal authorities and other management techniques that will be used to accomplish State policies.

(b) *Comment.* Statutory Citation. Subsection 305(b)(8) and (9):

The management program for each coastal state shall include * * * (8) A planning process for energy facilities likely to be located in, or which may significantly affect, the coastal zone, including, but not limited to, a process for anticipating and managing the impacts from such facilities * * *. (9) No management program is required to meet the requirements in paragraphs * * * (8) * * * before October 1,1978.

(1) The purpose of identifying energy facilities which may significantly affect the coastal zone is to assure the consideration of energy facilities as land or water uses likely to have direct and significant impacts on coastal resources and therefore subject to the management program. Since the specific planning process called for in this section is an integral part of the requirements of this subpart, many of the requirements contained in (a) (1) and (2) above can be met by completing the work called for in §§ 923.11 and 923.12. The coordination requirements in (a)(4) above can be fulfilled in large measure through adequate consultation pursuant to §§ 923.51 and 923.55. Further, because of the obvious linkage between subsections 305(b)(8) of the Act having to do with an energy facility planning process and 306(c)(8) having to do with consideration of national interests involved in planning for and siting of facilities, including energy facilities which may be more than local in nature, States should, to the extent possible, coordinate fulfillment of the requirements of this section with those of § 923.52—Consideration of National Interests.

(c) *Comment.* Since one of the objectives of implementing State coastal management programs is to bring about a greater degree of predictability with respect to what may occur in which areas of the coastal zone, and since many energy facilities are coastal dependent and may cause substantial impacts on coastal resources and adjacent land and water uses, States are encouraged, through establishment of this planning process, to be site-specific, especially in indicating areas appropriate for particular types of energy facilities. At a minimum, as a result of developing this required planning process, States should be able to specify the locational conditions that would either constrain or lead to the siting of particular energy facilities in a State's coastal zone. With this as an introduction, the remainder of this comment discusses a number of approaches States can use to meet the requirements of this section: A State can designate/reserve specific sites in or near the coastal zone for particular types of energy facilities. Alternatively, a State can develop performance standards, or other regulations, that energy facilities have to meet irrespective of their coastal zone location. Under this approach, no sites are specifically reserved but neither are any specifically excluded. A third option, a variant of the second, combines a performance standard approach with specific exclusions of all or particular types of facilities in selected coastal zone locations. These exclusions/restrictions can be based on findings related to the anticipated adverse environmental impacts in particular locations due to the value and/or the sensitivity of particular resources (e.g., exclusion due to thermal pollution of nuclear power plants in particular wetlands which are especially productive fish spawning/nursery grounds); the safety problems associated with the operation of specific facilities in particular locations: (e.g., exclusion of LNG terminals in densely populated areas because of safety risks; e.g., requirement for oil transfer by off-shore pipeline rather than on-shore tanker unloading); State policy determinations that certain types of energy facilities are not coastal dependent (e.g., requirement for petrochemical processing plants to be located inland from the coastal zone) and/or State policy determinations that certain energy facilities have environmental or fiscally unacceptable secondary or growth inducing impacts. There are numerous variations and mixes of the above approaches that can be used in developing an acceptable energy facility planning process and associated coastal zone management program policies. For example, a State could reserve sites for a number of specific types of energy facilities (e.g., electric power plants, deepwater terminals), restrict or exclude others from the coastal zone (e.g., nuclear power plants), and require still other types of facilities to meet certain performance criteria (i.e., pipeline siting, drilling techniques). Whatever approach is taken, it is critical to tie the outcome of the planning process to what may sometimes be two conflicting considerations: resource preservation/conservation and the need for energy production and transportation. The latter consideration may involve being responsive to not only the needs of energy users in the coastal zone but also energy needs of the State, region and the Nation. At the same time, other facilities or resources of national interest, such as recreation areas, commercial and sports fisheries and wildlife habitats must be provided for in the coastal zone. The relative importance of energy facilities in the coastal zone should reflect the importance of these other interests as well as the availability of energy resources and potential sites in—or outside of—the coastal zone. Essentially, a balancing of national interests between resource preservation and conservation, on the one hand, and energy needs, on the other hand, must be achieved in order to avoid unreasonable restrictions or exclusions of any interest. Particularly in determining greater than local energy needs, consideration must be given to (1) national and other projections of energy needs, (2) assessments of the best mix of energy sources (e.g., coal v. gas v. oil) to meet these needs and (3) techniques for reducing demands for energy (e.g., impact of energy conservation measures). Further, determination of whether the coastal zone or resources therein are required to serve greater than local needs should be based, in part, on consultation with relevant Federal agencies. (See §§923.51 and 923.52 for details on Federal Consultation and Consideration of National Interests.)

(d) *Comment.* States should refer to 15 CFR Part 920.18 which contains more detailed commentary and guidance on fulfilling the requirements of paragraph (a).

(e) *Comment.* Prior to October 1, 1978, a State may seek approval for its management program even if these energy facility planning requirements have not been completed. However, those States which have received full approval prior to that date must request an amendment to their management program covering these requirements by October 1, 1978 in order to maintain continued eligibility for section 306 funding. States submitting programs for full approval after October 1, 1978 must meet the requirements of this section at the time of program submission.

Subpart C—Special Management Areas

§ 923.20 General.

(a) This subpart deals with areas that are of particular concern because of their

coastal-related values, characteristics, or impacts on them, or that may face pressures which demand detailed attention beyond a State's general planning and regulatory system as proposed in the management program. As a result, these areas require special management attention within the terms of the State's overall coastal program. This subpart deals with the following interrelated subsections of the Act: 305(b)(3)—Geographic Areas of Particular Concern; 305(b)(5)—Guidelines on Priorities of Uses; 305(b)(7)—Shorefront Access and Protection Planning; 305(b)(9)—Shoreline Erosion Planning; and 306(c)(9)—Areas for Preservation and Restoration.

§ 923.21 Areas of particular concern.

(a) *Requirement.* In order to meet the requirements of subsections 305(b)(3) and (5) of the Act, States must:

(1) Designate geographic areas that are of particular concern, on a generic or site-specific basis or both;

(2) Indicate the nature of the concern and the basis on which designations are made;

(3) Describe how the management program applies enforceable policies and authorities to the designated areas; and

(4) Provide guidelines regarding priorities of uses in these areas, including guidelines on uses of lowest priority.

(b) Comment. Statutory Citation, Subsection 305(b)(3):

The management program for each coastal state shall include * * * (3) An inventory and designation of areas of particular concern within the coastal zone.

(c) *Comment.* The importance of designating areas or particular concern for management purposes and the number and type of areas that should be designated is directly related to the degree of comprehensive controls employed generally throughout a State's coastal zone. Accordingly, where a State's general coastal management policies and authorities are insufficient to address the nature of a State's concern in a particular area or type of area, then designation of areas of particular concern is especially important since that designation will include the more specific policies and authorities that also will govern management within those areas. Where a State's general coastal management policies and authorities are broad and address State and national concerns comprehensively, relatively less emphasis need be placed on designation of areas of particular concern.

(d) *Comment.* Designation.

(1) In developing the criteria for designating areas of particular concern and in making the designations, States shall review their natural and manmade coastal zone resources and shall consider whether the following represent areas of concern requiring special management:

(i) Areas of unique, scarce, fragile or vulnerable natural habitat, physical feature, historical significance, cultural value or scenic importance;

(ii) Areas of high natural productivity or essential habitat for living resources, including fish, wildlife and the various trophic levels in the food web critical to their well-being;

(iii) Areas of substantial recreational value and/or opportunity;

(iv) Areas where developments and facilities are dependent upon the utilization of, or access to, coastal waters;

(v) Areas of unique geologic or topographic significance to industrial or commercial development;

(vi) Areas of urban concentration where shoreline utilization and water uses are highly competitive;

(vii) Areas of significant hazard if developed, due to storms, slides, floods, erosion, settlement, etc.; and

(viii) Areas needed to protect, maintain or replenish coastal lands or resources including coastal flood plains, aquifer recharge areas, sand dunes, coral and other reefs, beaches, offshore sand deposits, and mangrove stands.

(2) Designation does not necessarily require specific gubernatorial or legislative action. Such action is necessary only to the extent the appropriate management of designated areas cannot be assured without such action.

(3) Designations may be generic (i.e., by type of area such as all wetlands, or all port areas) or they may be site-specific (as for example historic area x in county y) or they may be both. Irrespective of whether these designations are generic or site-specific, States must indicate the nature of the concern. This will accomplish two purposes: (i) indicate why areas or types of areas have been singled out for special management attention and (ii) provide a basis for articulating appropriate management policies and use guidelines.

(4) Once designated, areas of particular concern must be identified by location (if site specific) or category of coastal resources (if generic) in sufficient detail that affected landowners, governmental entities and the public can determine with reasonable certainty if a given area is or is not designated. Maps that indicate the general location of designated areas or types of areas are a desirable part of a State's program submission.

(5) Some States may wish to involve local governments, other State agencies, Federal agencies and/or the public in the process of designating areas of particular concern. Such efforts are encouraged provided that the State establishes guidelines which reflect the concerns around which such nominations can be submitted and selected.

§ 923.22 Priorities of uses.

(a) *Requirement.* At a minimum, priority of use guidelines must be established for areas of particular concern designated pursuant to § 923.21. States may establish priority use guidelines that apply throughout the coastal zone and are encouraged to do so, especially as an aid to resolving use conflicts.

(b) *Comment.* Statutory Citation, Subsection 305(b)(5):

The management program for each coastal state shall include * * * (5) Broad guidelines on priorities of uses in particular areas, including specifically those uses of lowest priority.

(c) *Comment.* Within areas of particular concern there are three main purposes of the guidelines on priority of uses will serve:

(i) to provide a basis for special management in areas of particular concern;

(ii) to provide a common reference point for resolving conflicts, and

(iii) to articulate further the nature of the interests in designated areas of particular concern and appropriate uses.

(d) *Comment.* One of the purposes in providing guidelines regarding uses of lowest priority in a specific area or for a specific type of area is to guide resolution of conflicts when two or more uses are competing for the same area. Where States are concerned about prohibiting or strictly controlling particular uses or types of uses in areas of particular concern, such uses should not be listed as uses of lowest priority but should be separately prohibited or restricted.

(e) *Comment.* Another purpose of priority use guidelines is to express the State's management concerns and policies on how resources should be protected and/or developed. When a certain use is determined to be of lowest priority in a certain geographic area, based on the results of resource inventories and analyses, program policies and other controls should be used to guide such uses to areas where the use will be more compatible with resource capability and suitability, and consequently will receive a higher priority.

(f) *Comment.* As with other guidelines of this general type, guidelines for priority of uses need not be determinative in all cases. However, they should be regarded as strongly advisory to decision makers carrying out the management program and the enforceable policies therein and may provide the basis for legal challenge to actions taken inconsistent with the guidelines.

§ 923.23 Other areas of particular concern.

(a) In addition to the designation of areas of particular concern required by § 923.21 prior to program approval, States also may designate two other categories of special management areas.

(1) One category comprises specific areas that are known to require additional or special management (e.g., urban waterfronts) but for which addition management techniques have not been developed or necessary authorities have not been established at the time of program approval. For this category of areas of particular concern it is assumed that the appropriate management techniques, that meet all the requirements of § 923.21(a) above, will be developed during program implementation. Where States designate areas of particular concern of this type, the Associate Administrator will review the designations to determine that the reason for designation has been clearly stated, that a rea-

V 42 167 AUG 29 77 UMI

sonable time frame and procedure have been established for developing and implementing appropriate management techniques, and that an agency (or agencies) capable of formulating the necessary management policies and techniques has been identified.

(2) The second category consists of a process for future designation of areas of particular concern after program approval. Establishment of such a process recognizes the evolving nature of management programs and the desirability of establishing a mechanism to address areas which may become a focus of State concern in the future. Included within this category are the procedures established for designating areas for preservation or restoration. (See the next section).

§ 923.24 Areas for preservation or restoration.

(a) *Requirement.* To meet the requirements of subsection 306(c)(9) of the Act, States must:

(1) Describe the criteria by which areas can be designated for the purpose of preserving or restoring them for their conservation, recreational, ecological or esthetic values; and

(2) Describe the procedures by which such designations can be made.

(b) *Comment.* Statutory Citation, Subsection 306(c)(9):

Prior to granting approval of a management program submitted by a coastal state, the Secretary shall find that • • • (9) The management program makes provisions for procedures whereby specific areas may be designated for the purpose of preserving or restoring them for their conservation, recreational, ecological or esthetic values.

(c) *Comment.* States that wish to establish a process for designating future areas of particular concern, that may be other than areas for preservation or restoration, shall describe the criteria and procedures by which such designations for other purposes can be made.

§ 923.25 Shorefront access and preservation planning.

(a) *Requirement.* In order to meet the requirements of subsection 305(b)(7) of the Act and to coordinate these requirements with those of subsections 305(b)(3) and 306(c)(9), States must develop a planning process that can identify public shorefront areas appropriate for access and or protection. This process must include:

(1) A procedure for assessing public areas requiring access or protection;

(2) A definition of the term "beach" and an identification of public areas meeting that definition;

(3) Articulation of State policies pertaining to shorefront access and/or protection;

(4) A method for designating shorefront areas (either as a class or site specifically) as areas of particular concern or areas for preservation or restoration, if appropriate;

(5) A mechanism for continuing refinement and implementation of necessary management techniques, if appropriate; and

(6) An identification of funding programs and other techniques that can be used to meet management needs.

(b) *Comment.* Statutory Citation, Subsection 305(b)(7):

The management program for each coastal state shall include • • • (7) A definition of the term "beach" and a planning process for the protection of, and access to, public beaches and other public coastal areas of environmental, recreational, historical, esthetic, ecological or cultural value.

(1) The basic purpose in focusing special planning attention on shorefront access and protection is to express more than local concern with respect to additional access or protection needs for public beaches and other public coastal areas of environmental, recreational, historic, esthetic, ecological or cultural value and to include these areas for special management attention within the purview of the State's management program. If appropriate, this special management attention may be achieved by designation of public shorefront areas requiring additional access or protection as areas of particular concern or areas for preservation or restoration. Since the specific planning requirements called for in this section are closely related to the broader requirements for areas of particular concern and areas for preservation and restoration, many of the requirements called for in paragraph (a) above can be met by completing the work called for in §§ 923.21 and 923.24.

(2) States should refer to 15 CFR 920.17 which contains more detailed commentary and guidance on fulfilling the requirements of paragraph (a).

(c) *Comment.* Statutory Citation, Subsection 305(b)(9):

• • • No management program is required to meet the requirements in paragraphs (7), (8) and (9) before October 1, 1980.

(1) Prior to October 1, 1978, a State may seek approval of its management program even if these shorefront planning requirements have not been completed. However, those States which have received full approval prior to that date must request an amendment to their management program meeting these requirements by October 1, 1978 in order to maintain continued eligibility for section 306 funding. States submitting programs for full approval after October 1, 1978 must meet the requirements of this section at the time of program submission.

§ 923.26 Shoreline erosion/mitigation planning.

(a) *Requirement.* In order to meet the requirements of subsection 305(b)(9) of the Act and to coordinate these requirements with those of subsections 305(b)(3) and 306(c)(9), States must include a planning process that can assess the effects of shoreline erosion. Evaluation can include assessment of ways to mitigate, control or restore areas adversely affected by erosion. This process must include:

(1) A method for assessing the effects of shoreline erosion;

(2) Procedures for managing erosion effects, including non-structural procedures;

(3) Articulation of State policies pertaining to erosion, including policies regarding preferences for non-structural, structural and/or no controls;

(4) A method for designating areas for erosion control, mitigation and/or restoration as areas of particular concern or areas for preservation and restoration, if appropriate;

(5) A mechanism for continuing refinement and implementation of necessary management policies and techniques, if appropriate; and

(6) An identification of funding programs and other techniques that can be used to meet management needs.

(b) *Comment.* Statutory Citation, Subsection 305(b)(9):

The management program for each coastal state shall include • • • (9) A planning process for (A) assessing the effects of shoreline erosion (however caused), and (B) studying and evaluating ways to control, or lessen the impact of, such erosion, and to restore areas adversely affected by such erosion.

(1) The basic purpose in developing a process to evaluate and, if appropriate, to control and mitigate shoreline erosion is to assure consideration of erosion impacts within the purview of a State's management program. Since the specific planning requirements called for in this section are closely related to the broader requirements of areas of particular concern and areas for preservation and restoration, many of the requirements called for in paragraph (a) above can be met by completing the work called for in §§ 923.21 and 923.24.

(2) States should refer to 15 CFR 920.19 which contains more detailed commentary and guidance on fulfilling the requirements of paragraph (a).

(c) *Comment.* Statutory Citation, Subsection 305(b)(9):

• • • No management program is required to meet the requirements in paragraphs (7), (8) and (9) before October 1, 1978.

(1) Prior to October 1, 1978, a State may seek approval of its management program even if these erosion planning requirements have not been completed. However, those States which have received full approval prior to that date must request an amendment to their management program meeting these requirements before October 1, 1978, in order to maintain continued eligibility for section 306 funding. States submitting programs for full approval after October 1, 1978 must meet the requirements of this section at the time of program submission.

Subpart D—Boundaries

§ 923.30 General.

(a) There are four elements to a State's boundary: The inland boundary, the seaward boundary, areas excluded from the boundary, and, in most cases, interstate boundaries. Specific requirements with respect to procedres for determining these boundaries, and means for identifying these boundaries are discussed in the sections of this subpart that follow.

(b) *Comment.* Statutory Citation, Subsection 305(b)(1):

The management program for each coastal state shall include • • • (1) An identification of the boundaries of the coastal zone subject to the management program.

(c) *Comment.* Statutory Citation, Subsection 304(1):

The term "coastal zone" means the coastal waters (including the lands therein and thereunder), and the adjacent shorelands (including the waters therein and thereunder), strongly influenced by each other in proximity to the shorelines of the several coastal states, and includes islands, transitional and intertidal areas, salt marshes, wetlands, and beaches. The zone extends, in Great Lakes waters, to the international boundary between the United States and Canada and, in other areas, seaward to the outer limit of the United States territorial sea. The zone extends inland from the shorelines only to the extent necessary to control shorelands, the uses of which have a direct and significant impact on the coastal waters. Excluded from the coastal zone are lands the use of which is by law subject solely to the discretion of or which is held in trust by the Federal Government, its officers or agents.

§ 923.31 Inland boundaries.

(a) *Requirement.* The inland boundary of a State's coastal management area must include:

(1) Those areas the management of which is necessary now or is likely to be necessary in the near future to control uses identified pursuant to § 923.11 of these regulations;

(2) Those special management areas identified pursuant to § 923.21;

(3) Transitional and intertidal areas—Areas subject to periodic inundation by tides, as well as adjacent areas where ecological systems are neither intertidal nor upland in nature but which are distinctly affected by coastal waters;

(4) Salt marshes and wetlands—Areas subject to periodic inundation of tidal salt (or Great Lakes) waters which contain marsh flora typical of the region.

(5) Islands—Bodies of land surrounded by water on all sides. In the case of Puerto Rico, the U.S. Virgin Islands, Hawaii, Guam, American Samoa and the Mariana Islands, all islands offshore from the main island(s) must be included. Interior portions of the main island(s) may be excluded if uses of these lands do not cause direct and significant impacts on coastal waters.

(6) Beaches—The area affected by wave action directly from the sea. Examples are sandy beaches and rocky areas usually to a vegetation line.

(b) *Comment.* While the above elements represent the minimum area that must be included in a State's landward coastal management boundary, a State also may include the following within the management area:

(1) Entire watersheds—A State may determine some uses within entire watersheds have direct and significant impact on coastal waters. In such cases it would be appropriate to define the coastal zone as including these watersheds. However, while it is clear that large rivers can have a substantial effect on coastal waters as they empty out into the sea or Great Lakes, taken to its logical conclusion, this also could mean vast areas of the interior might have to be included in the coastal zone. Therefore, along major rivers, such as the Mississippi, the Susequehanna, the Hudson, the Columbia and the Sacramento, the coastal zone need extend upstream only to the point of identified salt water intrusion, although States may delineate boundaries above this point if they choose.

(2) Waters under tidal influence—Waters containing a measurable quantity of seawater, generally 5 parts per 1000 or the salt wedge in east coast estuaries, must be included in the coastal boundaries. Areas of tidal influence that extend further inland, particularly in estuaries, deltas and rivers, may be included if uses further inland could have direct and significant impacts on coastal waters.

(3) Indian lands not held in trust by the Federal Government. Because such lands often are interspersed with trust lands (which must be excluded from the management area), it may be difficult to develop a discrete management program for non-trust lands alone. Moreover, in some cases, because of longstanding jurisdictional disputes, it often may be difficult to determine which lands are trust lands and which are non-trust lands. Accordingly, States have the option of including or excluding non-trust lands from the management program. (See § 923.33(e) regarding tribal participation in coastal management.

(c) *Comment.* Urban areas. In many urban areas or where the shoreline has been modified extensively, natural system relationships between land and water may be extremely difficult, if not impossible, to define in terms of "direct and significant impacts." In these areas, a State may define inland boundaries on the basis on other water-land factors such as, but not limited to, dependency of uses on water access, or visual relationships. While inland boundaries in urban areas may be more limited than in more natural, less developed portions of a State's coastal zone, how much more limited this boundary may be will depend on the extent of development or alteration, the nature of coastal-related issues of significance in urban areas, and the number, nature and location of water dependent uses in close proximity to the water.

(d) *Comment.* Direct and significant impacts.

(1) The purpose of determining "direct and significant impacts" on coastal waters or, more broadly, on coastal resources is to assist in a determination of uses subject to the management program and thereby included within the management boundaries. Determination of what constitute direct and significant impacts should occur early in the program development process.

(2) Certain uses may cause direct and significant impacts only in terms of water or air quality impacts. However, once such uses have been identified, because of these impacts, as being subject to the management program, their management must be based on the comprehensive policies of the program which will address more than just air and water quality considerations.

(3) While the substantive definition of direct and significant impact is a matter for each State to establish, the Associate Administrator will review this definition in terms of the method used to analyze various land and water uses and their impacts on coastal resources.

(e) *Requirement.* The inland boundary must be described in a manner which is sufficiently clear and exact to enable persons to determine whether property they use or an activity they propose to undertake in located in the area subject to management. Whether this description should be in narrative form or graphically depicted in the management program document depends on (i) the nature of the boundary and (ii) whether it is possible to determine if a use or an area is within the coastal zone within a reasonable period of time. States must be able to advise interested parties whether they are subject to the terms of the management program within 30 days of receipt of an inquiry.

(f) *Comment.* The primary purpose in defining the coastal zone boundary is to assist coastal residents and property owners, resource users and governmental entities to understand the geographic scope of the management program and to assist them in determining whether, where and how they are affected by the program. Accordingly, it is anticipated that the program submission should contain generalized maps, charts or other graphics appropriate to understanding the provisions and geographic scope of the management program.

(g) *Comment.* An inland coastal zone boundary defined in terms of political jurisdiction (e.g., county, township or municipal lines), cultural features (e.g., highways, railroads), planning areas (e.g., regional agency jurisdictions, census enumeration districts), or a uniform setback line is acceptable provided that such boundary includes the minimal areas of beaches, wetlands, islands, transitional and intertidal areas plus those uses identified pursuant to section 923.11 and those areas identified pursuant to section 923.21

§ 923.32 Seaward boundaries.

(a) *Requirement.* The seaward boundary is clearly defined in the Act. For States adjoining the Great Lakes, the seaward boundary is the international boundary with Canada or the boundaries with adjacent States. For all other States participating in the program, the seaward boundary is the outer limit of the United States territorial sea. The requirement can be met by a simple restatement of the limits defined in this section.

(b) *Comment.* The seaward limits as defined in this section are for purposes of this program only and represent the area within which the State's management program may be authorized and financed. These limits are irrespective

FEDERAL REGISTER, VOL. 42, NO. 167—MONDAY, AUGUST 29, 1977

V 42 167 AUG 29 77 UMI

of any other claims States may have by virtue of the Submerged Lands Act or any changes that may occur as a result of the Fisheries Conservation and Management Act of 1976.

(c) *Comment.* The seaward limits need not be defined in any more precise manner than that stated above provided that there are no water areas which immediately require a more exact delineation because of site specific policies associated with these areas. Examples of what would constitute critical areas that would require more precise delineation include, but are not limited to, those areas where a State specifically encourages or conditions construction of a monobuoy; designates marine sanctuaries, protected resource habitats or preserves; reserves corridors for pipelines; or reserves areas for creation of off-shore islands.

§ 923.33 **Excluded lands.**

(a) *Requirement.* States must exclude from their coastal management boundaries those areas owned, leased, held in trust or whose use is otherwise by law subject solely to the discretion of the Federal Government, its officers or agents. To meet this requirement, States must describe or map areas or types of areas owned, leased, held in trust or otherwise used by Federal agencies. The intent of this requirement is not to list or map every post office or Federal courthouse which is physically located in, but legally excluded from, a State's coastal zone but rather to indicate the large-scale holdings and types of areas excluded. Accordingly, a State may simply declare that, for example, all Department of Defense holdings in counties x, y and z are excluded.

(b) *Comment.* Where Federal agencies have provided information regarding the location of excluded holdings, these should be listed, usually as an Appendix to the management program. It will not always be necessary or appropriate to list these holdings in the format or detail provided by the Federal agencies. If Federal agencies have not provided sufficient information or detail regarding holdings that should be excluded, States may rely on such other information as they may be able to obtain.

(c) *Comment.* The exclusion of Federal holdings does not remove Federal agencies from the obligation of complying with the consistency provisions of section 307 of the Act when Federal actions on these excluded lands have spillover impacts that significantly affect coastal zone areas, uses or resources within the purview of a State's management program. In this connection, States are advised, but not required, to map the following types of excluded Federal holdings: (i) Large-scale holdings (of 10 or more acres), especially those that may have spillover effects; (ii) holdings near special management areas; and (iii) areas that may be declared surplus or excess in the near future, especially those for which the State has reuse priorities or policies.

(d) *Comment.* In excluding Federal lands from a State's coastal zone for the purposes of this Act, a State does not impair in any way any of its rights or authorities over Federal lands that exist separate from this program.

(e) *Comment.* Indian lands. While Indian lands held in trust by the Federal government must be excluded from a State's coastal zone, by definition in the Act, and while alienated (or non-trust) lands may be excluded from a State's program, it is not intended that such exclusions should deter tribes along coastal shorelines from developing and administering sound coastal management practices. Wise use and management of tribal land and water resources would complemet State management efforts and would further the national objectives of the Act. Accordingly, tribal participation in coastal management efforts shall be supported and encouraged provided that such efforts are compatible with a State's coastal management policies and are in furtherance of the national policies of section 303 of the Act. (For further guidance on tribal participation in coastal management activities, see § 923.83(d).)

§ 923.34 **Interstate boundaries.**
